In common with many not for profit organizations, certain revenues are not susceptible to satisfactory audit verification for completeness. Accordingly, our verification of revenue for the special purpose fund was limited to the amounts recorded in the District and we were not able to determine whether any adjustments might be necessary to revenue, current year surplus (deficit) and accumulated surplus.

In our opinion, except for the adjustments, if any, which we might have determined to be necessary had we been able to satisfy ourselves concerning the completeness of revenue, as described in the preceding paragraph, these financial statements present fairly, in all material respects, the financial position of the school district as at June 30, 2008 and the results of its operations and its cash flows for the year then ended in accordance with accepted accounting principles for school divisions in Manitoba as set out in notes 3 and 4 to the financial statements.

Further, in our opinion, the other statements and reports, when considered in relation to the aforementioned financial statements, present fairly, in all material respects, the supplementary information shown.

Winnipeg, Canada
September 4, 2008

Collins Barrow
CHARTERED ACCOUNTANTS

I hereby certify that this report and the statements and reports referenced herein have been presented to the members of the Board of the above mentioned School Division.

* Includes network infrastructure.

1. Nature of Organization and Economic Dependence

The School District (District) is a public body that provides education services to residents within its geographic location. The District is funded mainly by grants from the Province of Manitoba (Province), and a special levy on the property assessment included in the District's boundaries. The District is exempt from income tax.

The District is economically dependent on the Province for a significant portion of its revenue. Without this funding, the District would not be able to continue its operations.

2. Significant Accounting Policies

The consolidated financial statements have been prepared by management in accordance with Canadian generally accepted accounting principles established by PSAB of the Canadian Institute of Chartered Accountants (CICA).

a) Reporting Entity and Consolidation

The consolidated financial statements reflect the assets, liabilities, revenues and expenses of the operating fund, capital fund, and special purpose fund of the District.

All inter-fund accounts and transactions are eliminated upon consolidation wherever possible.

b) Basis of Accounting

Revenues and expenses are reported on the accrual basis of accounting except when the accruals cannot be determined with a reasonable degree of certainty or when their estimation is impracticable. The accrual basis of accounting recognizes revenues as they are earned and measurable; expenses are recognized as they are incurred and measurable as a result of the receipt of goods or services and the creation of a legal obligation to pay. Expenses also include the amortization of tangible capital assets.

c) Fund Accounting

The fund method of accounting is employed by the District to record financial transactions in separate funds as defined by Financial Reporting and Accounting in Manitoba Education (FRAME) in accordance with the purpose for which the funds have been created.

The Operating Fund is maintained to record all the day to day operating revenues and expenses. The Capital Fund is used to account for the acquisition, amortization, disposal and financing of capital assets. The Special Purpose Fund is used to account for school generated funds and charitable foundations controlled by the District.

d) School Generated Funds

School generated funds are moneys raised by the school, or under the auspices of the school, through extra curricular activities for the sole use of the school that the principal of each school, subject to the rules of the school board, may raise, hold, administer and expend for the purposes of the school.

Only revenue and expenses of school generated funds controlled by the District are included in the Consolidated Statement of Revenue, Expenses and Accumulated Surplus. To be deemed as controlled, a school must have the unilateral authority to make the decisions as to when, how and on what the funds are to be spent.

Period end cash balances of all school generated funds are included in the Consolidated Statement of Financial Position. The uncontrolled portion of this amount is reflected in the School Generated Funds Liability account. Examples of uncontrolled school generated funds are student council funds and travel club funds. Revenues and expenses of uncontrolled school generated funds are not included in the consolidated financial statements.

2. Significant Accounting Policies - Continued

e) Tangible Capital Assets

Tangible capital assets are non-financial assets that are used by the District to provide services to the public and have an economic life beyond one fiscal year. Tangible capital assets include land, buildings, buses, other vehicles, furniture and equipment and assets under construction.

To be classified as tangible capital assets, each asset other than land must individually meet the capitalization threshold for its class as prescribed by FRAME.

Asset Description	Capitalization Threshold ($)	Estimated Useful Life (years)
Land Improvements	25,000	10
Buildings - bricks, mortar and steel	25,000	40
Buildings - wood frame	25,000	25
School buses	20,000	10
Vehicles	10,000	5
Equipment	5,000	5
Network Infrastructure	25,000	10
Computer Hardware, Servers & Peripherals	5,000	4
Computer Software	10,000	4
Furniture and Fixtures	5,000	10
Leasehold Improvements	25,000	Over term of lease

Grouping of assets is not permitted except for computer work stations.

With the exception of land and buildings acquired before June 30, 1995, all tangible capital assets, are recorded at historical cost, which includes purchase price, installation costs and other costs incurred to put the asset into service.

All land acquired prior to June 30, 1995 has been valued using information provided by the Crown Lands and Property Agency and adjusted by the District where further information was available.

Buildings are recorded at historical cost when known. For buildings acquired prior to June 30, 2005 where the actual cost was not known, the replacement value for insurance purposes as at June 30, 2005 was regressed to the date of acquisition using a regression index based on Southam and CanaData construction cost indices.

All tangible capital assets, except for land and assets under construction are amortized on a straight-line basis over their estimated useful lives as prescribed by FRAME. Land is not amortized.

One-half of the annual amortization is charged in the year of acquisition and in the year of disposal if not fully amortized.

Assets under construction are not amortized until the date of substantial completion. Interest on funds used to finance school buildings under construction is capitalized for the periods preceding the date of substantial completion.

f) Employee Future Benefits

The Province of Manitoba pays the employer portion of the Teachers' Retirement Allowances Fund (TRAF), the pension plan for all certified teachers of the District. The District does not contribute to TRAF, and no costs relating to this plan are included in the District's financial statements.

2. Significant Accounting Policies - Continued

g) Capital Reserve

Certain amounts, as approved by the Board of Trustees and the Public Schools Finance Board (PSFB), may be set aside in reserve accounts for future capital purposes. These Capital Reserve accounts are internally restricted funds that form part of the Accumulated Surplus presented in the Consolidated Statement of Financial Position.

h) Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period.

i) Financial instruments

There are no significant terms and conditions related to financial instruments (cash, accounts receivable, accounts payable, accrued interest payable, deferred revenue and long-term debt) that may affect the amount, timing and certainty of future cash flows. The District is exposed to credit risk from the potential non-payment of accounts receivable. However, the majority of the receivables are from local, provincial and federal governments, and therefore, the credit risk is minimal. The carrying amounts of the financial instruments approximate their carrying values, unless otherwise noted.

3. Overdraft

The District has an authorized line of credit with The South Interlake Credit Union Limited of $250,000 by way of overdrafts and is repayable on demand at prime plus .50%; interest is paid monthly. $250,000 remains available on this line of credit. Overdrafts are secured by a temporary borrowing by-law.

4. Deferred Revenue

The deferral method of accounting is used to properly match revenues with expenditures. These amounts are recognized as revenue in the fiscal year the related expenses are incurred or services performed.

5. Debenture Debt

The debenture debt of the District is in the form of one ten-year debenture payable, principal and interest, in ten equal yearly installments and maturing June 15, 2011. Payment of principal and interest is funded entirely by grants from the Province of Manitoba. The debenture carries interest at 6.625%. Debenture interest expense payable as at June 30, 2008, is accrued and recorded in Accrued Interest Payable, and is funded by the Operating Fund as an annual transfer. The debenture principal and interest repayments in the next three years are:

	Principal	Interest	Total
2009	57,713	12,247	69,690
2010	61,537	8,423	69,690
2011	65,612	4,348	69,690
	$184,862	$ 25,018	$209,070

6. Other Borrowings

Other borrowings are debts other than overdrafts or debentures. This includes loans to finance a boiler replacement project.

The loan bears interest at 6.50% per annum, due in 2013 and an annual payment of $25,000 principal plus interest. This loan is secured by way of a borrowing By-law.

Principal and interest repayment of total Other Borrowings in the next five years are:

	Principal	Interest	Total
2009	$ 25,000	$ 9,750	$ 34,750
2010	25,000	8,125	33,125
2011	25,000	6,500	31,500
2012	25,000	4,875	29,875
2013	25,000	3,250	28,250
	$ 125,000	$ 32,500	$ 157,500

7. Net Tangible Capital Assets

The Schedule of Tangible Capital Assets (TCA), page 23 of the audited financial statements, provides a breakdown of cost, accumulated amortization and net book value by class.

	Gross Amount	Accumulated Amortization	2008 Net Book Value	2007 Net Book Value
Owned-tangible capital assets	$3,017,401	$1,776,763	$1,240,638	$1,308,109
Capital lease	-	-	-	-
	$3,017,401	$1,776,763	$1,240,638	$1,308,109

8. Accumulated Surplus

The consolidated accumulated surplus is comprised of the following:

	2008	2007
Operating Fund		
Designated Surplus	$ 0	$ 0
Undesignated Surplus	137,470	189,000
	137,470	189,000
Capital Fund		
Reserve Accounts	0	0
Equity in Tangible Capital Assets	898,049	884,546
	898,049	884,546
Special Purpose Fund		
School Generated Funds	19,825	16,743
Other Special Purpose Funds	0	0
	19,825	16,743
Total Accumulated Surplus	$1,055,344	$1,090,289

Designated Surplus under the Operating Fund represents internally restricted amounts appropriated by the board or, in the case of school budget carryovers, by board policy. See page 5 of the audited financial statements for a breakdown of the Designated Surplus.

Reserve Accounts under the Capital Fund represents internally restricted reserves for specific purposes approved by the Board of Trustees and PSFB. A Schedule of Capital Reserve Accounts is provided on page 24 of the audited financial statements.

School Generated Funds and Other Special Purpose Funds are externally restricted monies for school use, Scholarship Awards and donations for school projects.

9. Municipal Government - Property Tax and related Due from Municipal Government

Education property tax or Special Levy is raised as the District's contribution to the cost of providing public education for the student's resident in the District. The Municipal Government-Property Tax shown on the consolidated revenue and expense is raised over the two calendar (tax) years; 44% from 2007 tax year and 56% from 2008 tax year. Below are the related revenue and receivable amounts:

	2008	2007
Revenue-Municipal Government-Property Tax	$1,636,803	$1,583,423
Receivable-Due from Municipal-Property Tax	$ 0	$ 0

10. Interest Received and Paid

The District received interest during the year of $31,879 (previous year $22,108); interest paid during the year was $25,483 (previous year $31,474).

Interest expense is included in Fiscal and is comprised of the following:

	2008	2007
Operating Fund		
Fiscal-short term loan, interest and bank charges	$ 44	$ 85
Capital Fund		
Debenture debt interest	15,686	19,847
Other interest	9,753	11,542
	$ 25,483	$ 31,474

11. Expenses by Object

Expenses in the consolidated statement of revenue, expenses and accumulated surplus are reported by function as defined by FRAME. Below is the detail of expenses by object:

	Actual 2008	Budget 2008	Actual 2007
Salaries	$2,050,185	$2,061,884	$1,977,993
Employees benefits and allowances	125,709	143,107	131,155
Services	469,272	415,900	366,051
Supplies, materials and minor equipment	135,716	104,500	117,278
Interest	25,483	0	31,474
Bad debts	-	-	-
Payroll tax	61,086	17,500	43,360
Transfers	0	2,700	3,746
Amortization	67,471		67,471
Loss (Gain) and disposal of capital assets	0		0
School generated funds	32,836		55,095
Other special purpose funds	0		0
	$2,967,758	$2,745,591	$2,793,623

12. Budget Figures and Non Financial Information

The 2008 - Fixed budget figures, student enrolments (FRAME) and transportation statistics, full time equivalent personnel, and senior staff allocations are unaudited and have been presented for information purposes only.

MANAGEMENT REPORT

Management's Responsibility for the Financial Statements

The accompanying consolidated financial statements of The Winnipeg School Division are the responsibility of the Division's management and have been prepared in compliance with legislation, and in accordance with generally accepted accounting principles established by the Public Sector Accounting Board of The Canadian Institute of Chartered Accountants. A summary of the significant accounting policies are described in note 2 to the consolidated financial statements.

The preparation of consolidated financial statements necessarily involves the use of estimates based on management's judgment, particularly when transactions affecting the current accounting period cannot be finalized with certainty until future periods. The Division's management maintains a system of internal controls designed to provide reasonable assurance that assets are safeguarded, transactions are properly authorized and recorded in compliance with legislative and regulatory requirements, and reliable financial information is available on a timely basis for preparation of the consolidated financial statements. These systems are monitored and evaluated by management.

The Board of Trustees of the Division met with management and the external auditors to review the consolidated financial statements and discuss any significant financial reporting or internal control matters prior to their approval of the consolidated financial statements.

The consolidated financial statements have been audited by KPMG LLP, independent external auditors appointed by the Board. The accompanying Auditors' Report outlines their responsibilities, the scope of their examination and their opinion on the Division's consolidated financial statements.

AUDITORS' REPORT TO THE BOARD OF TRUSTEES

We have audited the consolidated statement of financial position of The Winnipeg School Division as at June 30, 2008 and the consolidated statements of revenues, expenses and accumulated surplus, changes in net debt and cash flow for the year then ended. These financial statements have been prepared to comply with the Public Schools Act. These financial statements are the responsibility of the Division's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of the Division as at June 30, 2008 and the results of its operations and its cash flows for the year then ended in accordance with generally accepted accounting principles established by the Public Sector Accounting Board of the Canadian Institute of Chartered Accountants.

Our audit was conducted for the purpose of forming an opinion on the basic financial statements taken as a whole. The current year's supplementary information included in the other statements and reports is presented for purposes of additional analysis and is not a required part of the basic financial statements. Such supplementary information has been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, is fairly stated in all material respects in relation to the basic financial statements taken as a whole. Budgeted figures provided for information purposes are unaudited.

* Includes network infrastructure.

1. Nature of organization and economic dependence:

The Winnipeg School Division (Division) is a public education system that provides educational services for students in nursery to grade 12 residing primarily within its designated boundaries.

The Division is economically dependent on the Province of Manitoba for the majority of its revenue and capital financing requirements. Without this funding, the Division would not be able to continue its operations.

The Division is exempt from income tax under the *Income Tax Act.*

2. Significant accounting policies.

The significant accounting policies of the Division include:

(a) Reporting entity and consolidation:

The Division's reporting entities are comprised of the Division, school generated funds and The Children's Heritage Fund.

The consolidated financial statements reflect the assets, liabilities, revenues and expenditures of the Operating Fund, Capital Fund, and Special Purpose Fund of the Division.

(b) Trust funds:

The Division administers various trust funds. Trust funds and their related operations are not included in the consolidated financial statements as they are not owned or controlled by the Division.

Margaret Crawford Fund:

The Division administers the Margaret H. Crawford Trust Fund, a bequest fund that was established in 1954 which awards bursaries to students in vocational programming. Total funds under administration as at December 31, 2007 were $682,966 (2006 - $575,404).

2. Significant accounting principles (continued).

(b) Trust funds (continued):

School scholarship funds:

Certain schools in the Division administer trust funds for the specific purpose of awarding scholarships to students. As at June 30, 2008 funds on hand in these schools for this purpose totaled $126,670 (2007 - $151,886).

Funds under administration:

The Division administers certain programs at the request of third parties. As the Division does not rely on receipt of these monies to operate its mandated educational programming, the related receipts and disbursements of $950,759 have not been included in these consolidated financial statements.

(c) Basis of accounting:

These consolidated financial statements are prepared by management in accordance with generally accepted accounting principles established by the Public Sector Accounting Board of the Canadian Institute of Chartered Accountants (PSAB). Revenues and expenditures are reported on the accrual basis of accounting. The accrual basis of accounting recognizes revenues as they are earned and measurable; expenditures are recognized as they are incurred and measurable as a result of the receipt of goods and services acquired in the period.

(d) Fund accounting:

The Division records financial transactions in separate funds as defined by Financial Reporting and Accounting in Manitoba Education (FRAME).

The Operating Fund is maintained to record all the day to day operating revenues and expenditures. The Capital Fund is used to account for the acquisition, amortization, disposal and financing of capital assets. The Special Purpose Fund is used to account for school generated funds and the Children's Heritage Fund controlled by the Division.

2. Significant accounting principles (continued).

(e) Deferred revenue:

Certain amounts are received pursuant to legislation, regulation or agreement and may only be used in the delivery of certain programs and services or in the delivery of specific services and transactions. These amounts are recognized as revenue in the fiscal year the related expenditures are incurred or services performed.

(f) Tangible capital assets:

Tangible capital assets are non-financial assets that are used by the Division in operations and have an economic life beyond one fiscal year. Tangible capital assets include land, buildings, buses, other vehicles, furniture and equipment, computers, capital leases, leasehold improvements, and assets under construction.

To be classified as tangible capital assets, each asset, other than land, must meet the capitalization threshold for its class as prescribed by FRAME.

Asset description	Capitalization threshold	Estimated useful life (years)
Land improvements	$ 25,000	10
Buildings - bricks, mortar and steel	25,000	40
Building - wood frame	25,000	25
Network infrastructure	25,000	10
Leasehold improvements	25,000	Over term of the lease
School buses	20,000	10
Vehicles	10,000	5
Computer software	10,000	4
Equipment	5,000	5
Computer hardware, services and peripherals	5,000	4
Furniture and fixtures	5,000	10

With the exception of buildings, all tangible capital assets are recorded at historical cost.

Buildings are recorded at historical cost. For buildings acquired prior to June 30, 2005 where the actual cost was not known, the replacement value for insurance purposes as at June 30, 2005 was regressed to the date of acquisition using a regression index based on Southam and CanaData construction cost indices.

Tangible capital assets are amortized on a straight-line basis over their estimated useful lives as prescribed by FRAME. Land is not amortized.

2. Significant accounting principles (continued).

Assets under construction are not amortized until the date of substantial completion. Interest on funds used to finance school buildings under construction is capitalized for the periods preceding the date of substantial completion.

(g) Employee future benefits:

The Division provides a contributory defined benefit pension plan and Disability Income Plan (benefit plans) and other negotiated future benefits to employees. The costs of the Division's benefit plans are recognized over the period in which the related employees render their service. The Division adopted the following PSAB reporting standards with respect to accounting for these employee future benefits:

(i) Benefit plans:

A discount rate is used to measure benefit obligations. The expected return on pension plan assets is calculated on the fair value of the assets as of the year end date.

These costs are actuarially determined using the accrued benefit actuarial cost method with salary projection and management's best estimate of expected plan investment performance, salary escalation and retirement ages of employees.

Current service costs and interest costs on the benefit obligation are charged to income as they accrue. Actuarial gains and losses are amortized to the liability or asset and the related expenditure over the expected average remaining service life of active plan members.

The cost of the benefit plan amendments related to prior period employee services is accounted for in the period of the plan amendment.

(ii) Other future benefits.

Other future benefits are currently under-written on an experience-rated non-refundable basis. Should the rates established be inadequate or excessive, any deficit or surplus which develops in the account is absorbed by the insurer.

2. Significant accounting principles (continued).

(h) Capital reserve:

Certain amounts approved by the Board of Trustees and the Public Schools Finance Board have been set aside in reserve accounts for future capital purposes. These capital reserve accounts are internally restricted funds that form part of the accumulated surplus presented in the consolidated statement of financial position.

(i) Government transfers:

Government transfers, including legislative grants, are recognized in the consolidated financial statements in the period in which events giving rise to the transfer occur, providing the transfers are authorized, any eligibility criteria have been met and reasonable estimates of the amount can be made.

(j) Investment income:

Investment income is reported as revenue in the period earned.

(k) Use of estimates:

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenditures and the disclosure of contingent assets and liabilities at the date of the consolidated financial statements during the reporting period. Actual subsequent results could differ from these estimates.

3. Overdraft:

The Division has an authorized overdraft limit with a chartered bank of $55,000,000. As at June 30, 2008 $18,000,000 of the authorized overdraft has been utilized in the form of fixed rate promissory notes, bearing interest at rates ranging from 3.93 percent to 4.40 percent, due July 2008.

Included in the overdraft are capital projects totaling approximately $809,114 which will be submitted to PSFB for debenture funding, funds held on behalf of the Winnipeg Teachers Association's dental plan totaling $2,128,695 and funds on behalf of the Winnipeg Teachers Association and the Winnipeg Association of Non Teaching employees extended health care plan totaling $1,380,470 as at June 30, 2008. As at June 30, 2007, the Division held funds on behalf of the dental plan totaling $2,031,717 and the extended health care plan totaling $980,272, however, the funds were reflected net against the corresponding liability.

Overdrafts are secured by borrowing By-Law No. 1141.

4. Short-term investments:

Short-term investments consist of Federal, Provincial and Corporate bonds and debentures, and mortgage backed securities. All short-term investments are recorded at the lower of cost or market. As at June 30, 2008, the cost of short-term investments was $2,644,972 (2007 - $2,490,487); investment income earned during the year was $176,799 (2007 - $109,991).

5. Employee future benefits:

The Division sponsors a contributory defined benefit pension plan and other future benefits for certain employees.

(i) Benefit plans:

Employees eligible for the pension plan are required to contribute a percentage of earnings in accordance with the following schedule:

Year	Pensionable salary	Excess pensionable salary
2006	5.50%	7.00%
2007	6.00%	7.40%
2008	6.50%	7.80%
2009	7.00%	8.20%

The School Division is required to contribute an amount each year equal to 127.4 percent of employees' required pension contributions.

The benefit plans are actuarially valued every two years. The most recent actuarial report was prepared on December 31, 2006.

5. Employee future benefits (continued):

Information about the Division's benefit plans in aggregate, is as follows:

Benefit plan assets:	
Fair value, beginning of year	$ 238,281,394
Expected return	14,712,925
Actuarial investment gain/(loss)	8,469,519
Employer contributions	3,761,580
Employee contributions	3,547,804
Benefits paid	(10,919,332)
Fair value, end of year	$ 257,853,890
Accrued benefit plan obligations:	
Balance, beginning of year	$ 220,655,154
Current service costs	8,543,728
Interest costs	13,415,113
Benefits paid	(10,919,332)
Actuarial gain/loss	–
Balance, end of year	$ 231,694,663
Surplus of plan assets versus plan obligations	$ 26,159,227
Unamortized net actuarial gain/loss	$
Benefit plan surplus	26,159,227
Less: valuation allowance	(26,159,227)
Net accrued benefits plan asset	$ –

Pursuant to the Division's by-laws it does not have any access to any benefit plan surplus'. As such, a valuation allowance has been recorded to offset the benefit plan asset.

Included in the accrued benefit plan obligations and the fair value of benefit plan assets at year end are amounts in respect of the Disability Income Plan which has an accrued benefit plan obligation in excess of plan assets.

5. Employee future benefits (continued):

The total net cost for the Division's benefit plans is as follows:

Net defined benefit plan's costs:	
Current service cost less employee contributions	$ 4,995,924
Interest on plan obligations	13,415,113
Expected return on plan assets	(14,712,925)
Amortization of actuarial (gains) and losses	–
Valuation allowance increase (decrease)	63,468
Net defined benefit plans cost	$ 3,761,580

The significant actuarial assumptions adopted in measuring the Division's accrued benefit obligations are as follows:

Discount rate	6.00%
Rate of compensation increase	4.00%

The significant actuarial assumptions adopted in measuring the Division's pension cost are as follows:

Discount rate	6.00%
Expected long-term rate of return on plan assets	6.00%
Rate of compensation increase	4.00%

The benefit plan assets are held in trust and are invested as follows:

Equities	51%
Bonds	43%
Cash and cash equivalents	6%

(ii) Other future benefits:

The Division promotes other negotiated future benefits to employees, the costs of which are recognized over the period in which these employees render their service. At June 30, 2008, the Division has recorded an estimated liability of $3,643,222 (2007 - $3,551,483) in respect of these benefits.

6. Deferred revenue:

	Balance as at June 30, 2007	Additions in the period	Revenue recognized in the period	Balance as at June 30, 2008
Educational property tax credit	$ 8,654,617	$ 9,824,821	$ 8,654,617	$ 9,824,821
Manitoba Textbook Bureau	322,267	897,596	671,206	548,657
Other special purpose funds	866,277	1,220,361	1,249,776	836,862
	$ 9,843,161	$ 11,942,778	$ 10,575,599	$ 11,210,340

7. School generated funds:

School generated funds are monies raised by the school, or under the auspices of the school, which each school's principal may raise, hold, administer or expend subject to the rules of the Division. At June 30, 2008, school funds held totaled $2,215,442 (2007 -$2,270,755).

The school generated funds liability of $2,063,576 (2007 -$1,946,196) comprises the portion of school generated funds that are not controlled and included in the cash and bank balances noted above.

8. Debenture debt:

The debenture debt of the Division is in the form of twenty-year debentures payable, principal and interest, in twenty equal yearly installments and maturing at various dates from 2009 to 2028. Payment of principal and interest is funded entirely by grants from the Province of Manitoba. The debentures carry interest rates that range from 5.5 percent to 12.25 percent. The debenture principal and interest repayments in the next five years and thereafter are:

	Principal	Interest	Total
2009	$ 6,632,589	$ 5,126,975	$ 11,759,564
2010	6,190,029	4,546,287	10,736,316
2011	5,802,416	4,025,083	9,827,499
2012	5,552,002	3,555,948	9,107,950
2013	5,287,256	3,128,700	8,415,956
Thereafter	43,742,542	15,424,426	59,166,968
	$ 73,206,834	$ 35,807,419	$ 109,014,253

As June 30, 2008, the Division has submitted claims for capital projects to the Public Schools Finance Board totaling $809,114 (2007 - $472,675).

9. Net tangible capital assets:

The schedule of tangible capital assets (TCA), page 23 of the consolidated financial statements provides a breakdown of cost, accumulated amortization and net book value by class

	Gross amount	Accumulated amortization	Net book value
Tangible capital assets	$ 208,263,934	$ 100,966,155	$ 107,297,779

10. Expenditures by type:

Expenditures by type not otherwise disclosed in these consolidated financial statements are listed on page 11.

11. Contractual obligations:

The Division is committed to payments under operating leases for equipment and buildings through 2011 in the amount of $1,886,343. Annual payments are; 2009 - $1,239,630; 2010 - $428,270; 2011 - $218,443.

The Division has entered into a memorandum of understanding for the construction of certain network assets. Total estimated cost of this project is $4,106,000.

12. Special levy raised for la Division Scolaire Franco-Manitobaine:

In accordance with Section 190.1 of *The Public Schools Act* the Division is required to collect a special levy on behalf la Division Scolaire Franco-Manitobaine. As at June 30, 2008, the amount of this special levy was $847,880 (2007 - $714,185). These amounts are not included in the Division's consolidated financial statements.

MANAGEMENT REPORT

Management's Responsibility for the Financial Statements

The accompanying consolidated financial statements of Winnipeg Technical College are the responsibility of the College management and have been prepared in compliance with legislation, and in accordance with generally accepted accounting principles established by the Public Sector Accounting Board of The Canadian Institute of Chartered Accountants. A summary of the significant accounting policies are described in Note #3 to the consolidated financial statements.

The preparation of consolidated financial statements necessarily involves the use of estimates based on management's judgment, particularly when transactions affecting the current accounting period cannot be finalized with certainty until future periods. College management maintains a system of internal controls designed to provide reasonable assurance that assets are safeguarded, transactions are properly authorized and recorded in compliance with legislative and regulatory requirements, and reliable financial information is available on a timely basis for preparation of the consolidated financial statements. These systems are monitored and evaluated by management.

The Governing Board of the College met with management and the external auditors to review the consolidated financial statements and discuss any significant financial reporting or internal control matters prior to their approval of the consolidated financial statements.

The consolidated financial statements have been audited by independent external auditors appointed by the Board. The accompanying Auditors' Report outlines their responsibilities, the scope of their examination and their opinion on the College's consolidated financial statements.

Auditors' Report

To the Chair and Members of the Governing Board of
Winnipeg Technical College

We have audited the consolidated statements of financial position of **Winnipeg Technical College** as at June 30, 2008 and the consolidated statements of revenues, expenses and accumulated surplus change in net debt and cash flow, for the year ended. These financial statements are the responsibility of the College's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements fairly, in all material respects, the financial position of the College as at June 30, 2008 and the results of its operations and changes in its financial position for the year then ended in accordance with the generally accepted accounting principals as established by the Public Sector Accounting Board.

Our audit was conducted for the purposes of forming an opinion on the consolidated financial statements taken as a whole. The current year's supplementary information included in the other statements, schedules and reports is presented for purposes of additional analysis. Such supplementary information has been subjected to the auditing procedures applied in the audit of the consolidated financial statements and, in our opinion, is fairly stated in all material respects in relation to the consolidated financial statements taken as a whole.

Our examination did not include the budget figures and we do not express any opinion concerning them.

1. Nature of Organization and Economic Dependence

The Winnipeg Technical College is a public body that provides vocational training to adults and secondary students. The division is funded primarily through a five year agreement with the Province of Manitoba and the Pembina Trails School Division which details operational requirements of the College. The Pembina Trails School Division contributed $912,467 to the partnership relationship recorded in 'Other School Division Revenue' on page 10: Operating Fund – Revenue Detail.

The College is exempt from income tax and operates a registered charity.

The College is economically dependent on the Province and Pembina Trails School Division for the majority of its revenue and capital financing requirements. Without this funding, continued operation of the College would be difficult.

2. Significant Accounting Policies

The consolidated financial statements have been prepared by management in accordance with Canadian generally accepted accounting principles established by PSAB of the Canadian Institute of Chartered Accountants (CICA).

a) Reporting Entity and Consolidation

The consolidated financial statements reflect the assets, liabilities, revenues and expenses of the operating fund, capital fund, and special purpose fund of the College. The College reporting entity includes funds associated with the SWTC Scholarship/ Trust Fund controlled by the College.

All inter-fund accounts and transactions are eliminated upon consolidation.

b) Basis of Accounting

Revenues and expenses are reported on the accrual basis of accounting except when the accruals cannot be determined with a reasonable degree of certainty or when their estimation is impracticable. The accrual basis of accounting recognizes revenues as they are earned and measurable; expenses are recognized as they are incurred and measurable as a result of the receipt of goods or services and the creation of a legal obligation to pay. Expenses also include the amortization of tangible capital assets.

c) Fund Accounting

The fund method of accounting is employed by the College to record financial transactions in separate funds as defined by Financial Reporting and Accounting in Manitoba Education (FRAME) in accordance with the purpose for which the funds have been created.

The Operating Fund is maintained to record all the day to day operating revenues and expenses. The Capital Fund is used to account for the acquisition, amortization, disposal and financing of capital assets. The Special Purpose Fund is used to account for school generated funds and charitable foundations controlled by the College.

d) School Generated Funds

School generated funds are moneys raised by the school, or under the auspices of the school, through extra curricular activities for the sole use of the school that the principal of each school, subject to the rules of the school board, may raise, hold, administer and expend for the purposes of the school.

Only revenue and expenses of school generated funds controlled by the College are included in the Consolidated Statement of Revenue, Expenses and Accumulated Surplus. To be deemed as controlled, a school must have the unilateral authority to make the decisions as to when, how and on what the funds are to be spent.

Period end cash balances of all school generated funds are included in the Consolidated Statement of Financial Position. The uncontrolled portion of this amount is reflected in the School Generated Funds Liability account. Examples of uncontrolled school generated funds are parent council funds, other parent group funds, student council funds and travel club funds. Revenues and expenses of uncontrolled school generated funds are not included in the consolidated financial statements.

e) Tangible Capital Assets

Tangible capital assets are non-financial assets that are used by the College to provide services to the public and have an economic life beyond one fiscal year. Tangible capital assets include land, buildings, buses, other vehicles, furniture and equipment, computers, capital leases, leasehold improvements, and assets under construction.

To be classified as tangible capital assets, each asset other than land must individually meet the capitalization threshold for its class as prescribed by FRAME.

Asset Description	Capitalization Threshold ($)	Estimated Useful Life (years)
Land Improvements	25,000	10
Buildings - bricks, mortar and steel	25,000	40
Buildings - wood frame	25,000	25
School buses	20,000	10
Vehicles	10,000	5
Equipment	5,000	5
Network Infrastructure	25,000	10
Computer Hardware, Servers & Peripherals	5,000	4
Computer Software	10,000	4
Furniture & Fixtures	5,000	10
Leasehold Improvements	25,000	Over term of lease

Grouping of assets is not permitted except for computer work stations.

With the exception of land, donated capital assets and capital leases, all tangible capital assets, are recorded at historical cost, which includes purchase price, installation costs and other costs incurred to put the asset into service.

Buildings are recorded at historical cost when known. For buildings acquired prior to June 30, 2005 where the actual cost was not known, the replacement value for insurance purposes as at June 30, 2005 was regressed to the date of acquisition using a regression index based on Southam and CanaData construction cost indices.

All land acquired prior to June 30, 2006 has been valued by the Crown Lands and Property Agency.

All tangible capital assets, except for land, capital leases, and assets under construction, are amortized on a straight-line basis over their estimated useful lives as prescribed by FRAME. Land is not amortized.

One-half of the annual amortization is charged in the year of acquisition and in the year of disposal if not fully amortized.

Assets under construction are not amortized until the date of substantial completion. Interest on funds used to finance school buildings under construction is capitalized for the periods preceding the date of substantial completion.

f) Employee Future Benefits

The Province of Manitoba pays the employer portion of the Teachers' Retirement Allowances Fund (TRAF), the pension plan for all certified teachers of the College. The College does not contribute to TRAF, and no costs relating to this plan are included in the College's financial statements.

The College does provide retirement benefits to non-certified personnel and other future benefits to its employees. These benefits include vacation and accumulated sick leave days. The College adopted the following policies with respect to accounting for these employee future benefits:

(i) Defined contribution/ insured benefit plans

The Retirement Plan offered non-certified staff is a money-purchase plan administered by the Manitoba Association of School Trustees (MAST). The plan requires the College to make a specific fixed contribution each period. The College does not assume any actuarial or investment risk in the future, nor responsibility to make further contributions.

(ii) Vacation Days

Non-certified permanent personnel accrue vacation entitlement for service in accordance with College policy. General practice is that most days are accumulated through the period July 1- June 30. The unused entitlement balance is recorded as a liability at yearend.

Permanent certified personnel do not earn vacation entitlement, however they are paid over 12 months for services performed over ten months. The amount to be paid in July and August for the prior service year is set up as a liability at yearend.

(iii) Accumulated Sick Days

The College offers sick leave to its employees which do not vest, but accumulate for use by the employee beyond the current period. The College concurs with the Province of Manitoba that the liability for accumulated sick days would not be material; therefore a liability has not been recorded for this benefit.

g) Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period.

i) Financial Instruments

There are no significant terms and conditions related to financial instruments (cash, accounts receivable, investments, and bank indebtedness, accounts payable and long-term debt) that may affect the amount, timing and certainty of future cash flows. The

College is exposed to credit risk from the potential non-payment of accounts receivable. However, the majority of the receivables are from local, provincial and federal governments, and therefore, the credit risk is minimal. The carrying amounts of the financial instruments approximate their carrying values, unless otherwise noted.

3. Overdraft

The College has an authorized demand facility with the Royal Bank of Canada of $ 625,000 by way of overdraft and loan and is repayable on demand at RB Prime less .75 % (interest is paid monthly in arrears).

4. Employee Future Benefits

Employee future benefits are benefits earned by employees in the current period, but will not be paid out until future periods.

The College sponsors one defined contribution benefit pension plan that is provided to all non-certified employees. The defined contribution insured plan requires eligible employees to contribute a percentage of their earnings based on their age at the start of each calendar year. Employees contribute from a low of 9% to a high of 11.65% less their contribution to the Canada Pension Plan. The College contributions equal the employee contributions to the plan. No pension liability is included in the financial statements other than late payment interest owing for the period.

Long term disability benefits are covered by a defined contribution/ insured plan. The costs of salary compensation paid to employees on long-term disability leave are fully insured and are not included in the financial statements.

5. Debenture Debt

PS 3230.15, 3230.17-18 (Reference)

The debenture debt of the Division is in the form of twenty-year debentures payable, principal and interest, in twenty equal yearly installments and maturing at various dates from 2010 to 2027. Payment of principal and interest is funded entirely by grants from the Province of Manitoba, except for debenture debt on one self-funded capital project which matures in 2018. The debentures carry interest rates that range from 4.875 % to 10.25 %. Debenture interest expense payable as at June 30, 2008, is accrued and recorded in Accrued Interest Payable, and a grant in an amount equal to the interest accrued on provincially funded debentures is recorded in Due from the Provincial Government. The debenture principal and interest repayments in the next five years are:

	Principal	Interest	Total
2009	86,315	88,357	174,672
2010	91,353	83,319	174,672
2011	92,392	77,979	170,371
2012	97,613	72,758	170,371
2013	103,131	67,240	170,371
	$ 470,804	$ 389,653	$ 860,457

6. Tangible Capital Assets

PS 3150.40-41, 3150.42, PSG-2 24(a) (Reference)

The Schedule of Tangible Capital Assets (TCA), page 23 of the audited financial statements, provides a breakdown of cost, accumulated amortization and net book value by class.

	Gross Amount	Accumulated Amortization	2008 Net Book Value
Owned-tangible capital assets	$10,545,131	$4,570,958	$5,974,173
Capital lease	40,677.00	4,068.00	36,609.00
	$10,585,808	$4,575,026	$6,010,782

7. Accumulated Surplus

PSG-4 7-8 (Reference)

The consolidated accumulated surplus is comprised of the following:

	2008	2007
Operating Fund		
Designated Surplus	$1,234,097.00	$641,632.00
Undesignated Surplus	$263,827.00	$200,305.00
	$1,497,924.00	$841,937.00
Capital Fund		
Reserve Accounts	-	-
Equity in Tangible Capital Assets	$4,387,736.00	$4,495,220.00
	$4,387,736.00	$4,495,220.00
Special Purpose Fund		
School Generated Funds	-	-
Other Special Purpose Funds	$1,890.00	$5,672.00
	$1,890.00	$5,672.00
Total Accumulated Surplus	$5,887,550.00	$5,342,829.00

Designated Surplus under the Operating Fund represents internally restricted amounts appropriated by the board or, in the case of school budget carryovers, by board policy. See page 5 of the audited financial statements for a breakdown of the Designated Surplus.

	2008
Board approved appropriation by motion	1,234,097
School budget carryovers by board policy	
Designated surplus	$ 1,234,097

School Generated Funds and Other Special Purpose Funds are externally restricted moneys for school and (*provide details of Other Special Purpose Funds*) use.

	2008
Foundation-Scholarship	$ 1,890
Other - *Specify*	-
Other Special Purpose Funds	$ 1,890

8. Interest Received and Paid

PS 1200.106-7 (Reference)

The Division received interest during the year of $86,980 (previous year $66,786); interest paid during the year was $136,432(previous year $129,278).

Interest expense is included in Fiscal and is comprised of the following:

	2008
Operating Fund	
Fiscal-short term loan, interest and bank charges	$ 25,001
Capital Fund	
Debenture debt interest	108,938
Other interest	2,493
	$ 136,432

The accrual portion of debenture debt interest expense of $26,524 included under the Capital Fund-Debenture debt interest is offset by an accrual of the debt servicing grant from the Province of Manitoba.

9. Expenses by object

PS 1200.085; PS 2500.014 (Reference)

Expenses in the consolidated statement of revenue, expenses and accumulated surplus are reported by function as defined by FRAME. Below is the detail of expenses by object:

	Actual 2008	Budget 2008	Actual 2007
Salaries	$ 7,463,857	$ 5,149,330	$ 6,469,351
Employees benefits & allowances	654,673	456,666	582,123
Services	1,845,118	1,464,720	1,757,603
Supplies, materials & minor equipment	1,393,516	1,323,575	1,176,389
Interest	25,001	30,000	31,275
Bad debts	-	-	-
Payroll tax	111,179	105,592	101,998
Amortization	282,925	-	270,340
Other capital items	111,431	62,569	102,446
School generated funds	-	-	-
Other special purpose funds	4,505	-	5,056
	$ 11,892,205	$ 8,592,452	$ 10,496,581

10. Contractual Obligations

An agreement providing guaranteed access to training spaces for students from the Louis Riel School Division was concluded in late June 2006. The agreement covers the period July 1, 2006 through June 30, 2011 and outlines certain rights granted to the Louis Riel School Division and their students as a result of withdrawal from governance of the College. The College will guarantee access to 71 FTE students from the Louis Riel School Division and charge a fee for these services of $708,483 for 2008-09.

PUBLIC SCHOOLS FINANCE BOARD

MANAGEMENT REPORT

The accompanying financial statements are the responsibility of management and have been prepared in accordance with the accounting policies stated in the financial statements. These accounting policies have been applied on a basis consistent with the prior year. In management's opinion, the financial statements have been properly prepared within reasonable limits of materiality, incorporating management's best judgement regarding all necessary estimates and all other data available up to November 19, 2008. The financial information presented elsewhere in the Annual Report is consistent with that in the financial statements.

Management maintains internal controls to provide reasonable assurance of the reliability and accuracy of the financial information. These internal controls also provide for the safeguarding of the Board's assets.

The responsibility of the Auditor General and her staff is to express an independent, professional opinion on whether the financial statements are fairly stated in accordance with the accounting policies stated in the financial statements. The Auditors' Report outlines the scope of the audit examination and provides the audit opinion.

The Board has reviewed and approved these financial statements and the Annual Report in advance of its release and has approved its content and authorized its release.

On Behalf of Management

Steve Power, CMA

OFFICE OF THE
AUDITOR GENERAL
MANITOBA

AUDITORS' REPORT

To the Legislative Assembly of Manitoba
To the Board of Directors

We have audited the statement of financial position of The Public Schools Finance Board as at June 30, 2008, and the statements of revenue and expenditure and education support fund and cash flows for the year then ended. These financial statements are the responsibility of the Board's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of the Board as at June 30, 2008, and the results of its operations and its cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

Notes to the Financial Statements

As at June 30, 2008

1. Nature of the Board's operations

The Public Schools Finance Board was established by the Public Schools Finance Board Act in April, 1967.

The Board is responsible for receiving all monies paid to the Education Support Fund for the financing of public schooling in Manitoba. It administers the capital support program including the determination and the disbursement of all capital grants provided to Manitoba school divisions under the Program. The Board also issues payments to Manitoba school divisions under the operational support program in amounts as determined by the Minister of Education, Citizenship and Youth.

The Public Schools Act and its Regulations govern the Education Support Fund.

2. Significant Accounting Policies

(a) The financial statements of the Board have been prepared in accordance with Canadian generally accepted accounting principles.

(b) The Education Support Levy is assessed against municipal corporations on a calendar year basis. The Board applied 40% of the 2007 levy to the July to December period and 60% of the 2008 levy to the January to June period.

(c) The preparation of financial statements in conformity with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimated.

(d) The Board's financial instruments consist of cash, funds on deposit with the Province of Manitoba, accounts receivable, support payable to school divisions, accrued interest, funds advanced from the Province of Manitoba, notes payable - Province of Manitoba, and other payables.

The Board has designated its financial instruments as follows:

Cash and funds on deposit with the Province of Manitoba are classified as financial assets held for trading and are measured at fair value with gains and losses recognized in net earnings.

Significant Accounting Policies (continued)

Accounts Receivable are classified as loans and receivables. These financial assets are recorded at their amortized cost using the effective interest rate method.

Support payable to school divisions, accrued interest, funds advanced from the Province of Manitoba, notes payable - Province of Manitoba and other payables are classified as other financial liabilities. These financial liabilities are recorded at their amortized cost using the effective interest rate method.

Unless otherwise noted, it is management's opinion that the entity is not exposed to significant interest, currency or credit risk arising from these financial instruments.

The fair value of accounts receivable, support payable to school divisions, accrued interest, funds advanced from the Province of Manitoba, notes payable - Province of Manitoba and other payables approximates their carrying values due to their short-term maturity.

3. Future Accounting Policy Changes

The Canadian Institute of Chartered Accountants (CICA) has issued two new standards, CICA 3862: Financial Instruments - Disclosures and CICA 3863: Financial Instruments - Presentation, which enhance the abilities of users of financial statements to evaluate the significance of financial instruments to an entity, related exposures and the management of these risks. This change in accounting policies, which will be adopted effective July 1, 2008, will only require additional disclosures in the financial statements.

The CICA has also issued a new standard, CICA 1535: Capital Disclosures, which requires the disclosure of qualitative and quantitative information that enables users of financial statements to evaluate the entity's objectives, policies and processes for managing capital. These changes in accounting policies, which will be adopted effective July 1, 2008, will only require additional disclosures in the financial statements.

4 New Accounting Policies

Effective July 1, 2007 the Board adopted the following new accounting standards issued by the CICA.

Accounting Changes

Section 1506 requires that voluntary changes in accounting policies are made only if they result in the financial statements providing reliable and more relevant information. Additional disclosure is required when the entity has not yet applied a new primary source of Canadian GAAP that has been issued but is not yet effective, as well as when changes in accounting estimates and errors occur. The adoption of this revised standard had no material impact on the Board's financial statements for the year ended June 30, 2008.

New Accounting Policies (continued)

Financial Instruments - Recognition and Measurement

Section 3855 prescribes the criteria for recognition and presentation of financial instruments on the Statement of Financial Position and the measurement of financial instruments according to prescribed classifications. Under this section, financial assets and liabilities are initially recorded at fair value. This section also addresses how financial instruments are measured subsequent to initial recognition and how the gains and losses are recognized.

The Board is required to designate its financial instruments into one of the following five categories: held for trading; available for sale; held to maturity; loans and receivables; and other financial liabilities. All financial instruments classified as held for trading or available for sale are subsequently measured at fair value with any change in fair value recorded in net earnings and fund balances, respectively. All other financial instruments are subsequently measured at amortized cost.

The adoption of this revised standard had no material impact on the Board's financial statements for the year ended June 30, 2008.

5. Related party transactions

The Board is related in terms of common ownership to all Province of Manitoba created departments, agencies and Crown corporations. The Board enters into transactions with these entities in the normal course of business. These transactions are recorded at the exchange amount.

6. Pension costs and obligations

The Board's employees are eligible for membership in the provincially operated Civil Service Superannuation Plan. The pension liability for Board employees is included in the Province of Manitoba's liability for the Civil Service Superannuation Fund. Accordingly, the Board reflects no provision in the financial statements relating to its participation in the pension plan.

7. Notes Payable

Notes Payable to the Province of Manitoba are due on demand. The interest payable on the notes is the Royal Bank prime rate less 75 basis points.

8. Operational support program

	2008	2007
	(in thousands of dollars)

AUDITORS' REPORT

To the Board of Governors of Red River College

We have audited the statement of financial position of Red River College as at June 30, 2008 and the statements of operations, changes in net assets and cash flows for the year then ended. These financial statements are the responsibility of the College's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of the College as at June 30, 2008 and the results of its operations and cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

Our examination did not extend to the budget which has been provided as additional information and therefore we do not express any opinion concerning the budget.

The following have been excluded from the financing and investing activities on the statement of cash flows:

The portion of the purchase price of assets under capital lease satisfied by the assumption of debt in the amount of $2,868 (2007 - $1,990).

See accompanying notes to financial statements.

1. General:

Red River College (the College) operates under the authority of *The Colleges Act of Manitoba*. This legislation, which established the College as a board-governed institution on April 1, 1993, allowed for the transfer of assets, liabilities, investment in capital assets and contributed surplus from the Province of Manitoba (the Province). The College is a registered charity under the *Income Tax Act*.

2. Significant accounting policies:

(a) Inventories:

Inventories are valued at the lower of cost and net realizable value.

(b) Long-term investments:

Effective July 1, 2007, long-term investments are classified as held-for-trading and are recorded at fair value (note 3). Unrealized gains and losses, representing the change between the fair value and the cost of the investments at the beginning and the end of the year, are recorded in deferred contributions or net assets restricted for endowments depending on the restrictions of the long-term investment. Fair value of investments is determined based on quoted market prices. For periods prior to July 1, 2007, all investments were carried at cost less any impairment for declines in market value that were considered to be other than temporary and investment income was recorded on an accrual basis.

(c) Capital assets:

Purchased capital assets are recorded at cost. Donated capital assets are recorded at their fair value at the time of the donation. Library holdings are accounted for using the base stock method. Under this method, the value of the base stock is capitalized, but subsequent purchases are not capitalized because it has been determined that annual additions are approximately equal to reductions. Capital assets are amortized on a straight-line basis using an annual rate of:

Asset	Rate
Buildings	2.5%
Major renovations	5%
Equipment and furniture	10 - 20%
Computer equipment and software	20 - 33%
Vehicles	20%
Aircraft	5%
Leasehold improvements	Over the term of the lease

2. Significant accounting policies (continued):

(d) Donations:

Donations are recorded when received. Donations of materials and equipment are recorded at fair value.

(e) Revenue recognition:

The College follows the deferral method of accounting for contributions, which include donations and government grants. Unrestricted contributions are recognized as revenue when received. Contributions externally restricted for purposes other than endowment are deferred and recognized as revenue in the year in which the related expenses are recognized. Endowment contributions are recognized as direct increases in net assets in the period in which they are received.

The unearned portion of tuition fees and contractual training revenue received but not earned until next fiscal year is recorded as deferred revenue.

Restricted investment income is recognized as revenue in the year in which the related expenses are recognized. Unrestricted investment income is recognized as revenue when earned or there has been a change in fair value of the investments.

(f) Intangible asset:

The intangible asset is recorded at cost and is amortized on a straight-line basis using an annual rate of 10 percent.

(g) Deferred contributions:

Debt owing to the Province is reflected as deferred contributions in the statement of financial position. The related revenue earned from the Council on Post-Secondary Education (COPSE) to offset the principal repayment and the related interest expense are both excluded from the statement of operations.

(h) Foreign currency translation:

Monetary assets and liabilities in foreign currencies have been translated into Canadian dollars at year end exchange rates with any gain or loss included in income in the year. Revenues and expenses have been translated at the exchange rate in effect at the transaction date.

2. Significant accounting policies (continued):

(i) Use of estimates:

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the year. Actual results could differ from those estimates.

(j) Future changes to significant accounting policies:

On December 1, 2006, the CICA issued three new accounting standards: Handbook Section 1535, *Capital Disclosures*, Handbook Section 3862, *Financial Instruments - Disclosures* and Handbook Section 3863, *Financial Instruments - Presentation*. These new standards apply to the College effective July 1, 2008.

Section 1535 specifies the disclosure of: (i) an entity's objectives, policies and procedures and process for managing capital; (ii) quantitative data about what the entity regards as capital; (iii) whether the entity has complied with any capital requirements; and (iv) if it has not complied, the consequences of such non-compliance.

Sections 3862 and 3863 replace Handbook Section 3861, *Financial Instruments - Disclosure and Presentation*, revising and enhancing its disclosure requirements, and carrying forward unchanged its presentation requirements. These new sections place increased emphasis on disclosures about the nature and extent of risks arising from financial instruments and how the entity manages those risks.

In addition, the CICA issued a new accounting standard, Handbook Section 3031, *Inventories*, that replaces Handbook Section 3030. This new section provides guidance as to costs that can be included in inventories and requires that inventories be measured at the lower of cost and net realizable value.

The College is currently assessing the impact that these new standards will have on its financial statements for the year ending June 30, 2009.

3. Change in accounting policy:

The College adopted the new CICA Handbook Section 3855, *Financial Instruments - Recognition and Measurement,* on July 1, 2007. This standard provides guidance on recognizing financial instruments and non-financial derivatives on the statement of financial position. The standard also specifies how financial instrument gains and losses are presented. Initially, all financial assets and liabilities must be recorded on the statement of financial position at fair value. Subsequent measurement is determined by the classification of each financial asset and liability. Under this standard, all financial instruments are classified as one of: (a) held-for-trading; (b) loans and receivables; (c) held-to-maturity; (d) available-for-sale or (e) other liabilities. Financial assets and liabilities classified as held-for-trading are measured at fair value with gains and losses recognized in the statement of operations. Financial instruments classified as held-to-maturity, loans and receivables and other liabilities are measured at amortized cost. Available-for-sale financial instruments are measured at fair value, with unrealized gains and losses recognized directly in unrestricted net assets.

Upon adoption of this new standard, cash and short-term investments and bank indebtedness were designated as held-for-trading; accounts receivable, due from Province of Manitoba and note receivable from the RRC Students' Association as loans and receivables; accounts payable and accrued liabilities, accrued vacation pay, due to related party and long-term liabilities as other liabilities. Long-term investments are designated as held-for-trading.

The College does not have any available-for-sale or held-to-maturity instruments.

As required by the transitional arrangements of Section 3855, the accounting policy change from carrying value to fair value was adopted retroactively without restatement of the 2007 financial statements. As a result of the change, the carrying value of long-term investments increased by $116, deferred contributions increased by $112 and net assets restricted for endowments increased by $4, reflecting unrealized gains on externally restricted deferred contributions and endowments with no income restrictions at that date. The impact of Section 3855 for the year ended June 30, 2008 was an unrealized gain of $67 which has been recorded as an increase in long-term investments and deferred contributions.

4. Short-term investments:

Short-term investment activity is transacted with the Department of Finance of the Province in short-term deposits. Interest rates on short-term investments range between 2.45 percent and 2.85 percent. Short-term investments mature between July 2008 and September 2008.

The carrying value of the short-term investments at the beginning and end of the year approximated fair value due to the short-term maturity of these deposits.

5. Accounts receivable:

		2008		2007
Trust and endowment receivables	$	160	$	159
Other accounts receivable		4,217		3,012
	$	4,377	$	3,171

6. Prepaid expenses and other assets:

		2008		2007
Prepaid property taxes	$	1,332	$	1,320
Other prepaid expenses		1,076		992
Datatel flexible spending account		46		277
	$	2,454	$	2,589

7. Long-term investments:

	2008				2007			
		Fair value		Cost		Fair value		Cost
Cash and fixed term instruments	$	8,282	$	8,010	$	7,379	$	7,426
Equity investments		1,768		1,865		1,393		1,230
Debentures		404		404		–		–
	$	10,454	$	10,279	$	8,772	$	8,656

Fair value as represented above was derived from the quoted market value of investments.

8. Due from Province of Manitoba:

The balance due from the Province is non-interest bearing, unsecured and has no fixed terms of repayment. This balance arose when the severance and vacation pay liabilities were transferred from the Province to the College in 1996. The College is responsible for funding liabilities for vacation pay and severance pay benefits accumulated after the transfer through its operating grants from the Province of Manitoba. As a result, the change in the severance liability, including the interest accretion, is reflected in the funding for severance expense. The portion of the receivable related to the vacation pay is paid annually through the operating grants.

9. Capital assets:

	Cost	Accumulated amortization	2008 Net book value	2007 Net book value
Equipment and furniture	$ 30,944	$ 20,611	$ 10,333	$ 8,493
Computer equipment and software	19,007	15,621	3,386	4,035
Major renovations	6,067	2,127	3,940	4,250
Buildings	48,510	5,169	43,341	44,536
Vehicles	208	134	74	105
Aircraft	1,716	441	1,275	1,360
Leasehold improvements	5,350	2,891	2,459	2,523
Construction in progress	5,867	–	5,867	580
Assets under capital leases	10,462	6,628	3,834	3,061
Library holdings	1,223	–	1,223	1,223
	$ 129,354	$ 53,622	$ 75,732	$ 70,166

The assets under capital leases are amortized on a straight-line basis over the expected useful life of the assets. The amount of amortization charged to expense is $2,094 (2007 - $2,113).

The increase in net book value of capital assets is due to the following:

	2008	2007
Balance, beginning of year	$ 70,166	$ 72,189
Purchase of capital assets:		
Funded by deferred capital contributions	4,746	1,831
Funded by deferred capital campaign contributions	256	208
Internally funded	8,338	4,581
Financed through capital lease proceeds	560	83
Donations of capital assets	182	21
Gain (loss) on disposal of capital assets	45	(14)
Amortization of capital assets	(8,561)	(8,733)
Balance, end of year	$ 75,732	$ 70,166

10. Bank indebtedness:

Bank indebtedness of $1,715 (2007 - $255) represents cheques issued in excess of cash on deposit with Royal Bank of Canada.

In addition, the College has a $5,000 operating line of credit with the Province, bearing interest at prime. At June 30, 2008, there had been no withdrawals on this operating line.

11. Accounts payable and accrued liabilities:

	2008	2007
Trade payables	$ 4,890	$ 4,417
Trust and endowment payables	1	14
Accrued salaries and benefits	4,151	3,086
Accrued retirement severance pay	7,310	7,051
Accrued vacation pay	9,302	8,160
	$ 25,654	$ 22,728

Significant actuarial assumptions used in the severance obligations at June 30, 2008 and June 30, 2007 were:

	2008	2007
Interest rate on obligations	7.00%	7.00%
Employer current service cost as a percentage of salary	.62%	.62%

12. Obligations under capital leases:

The following is a schedule of future minimum lease payments under capital leases expiring between July 2008 and April 2013 together with the balances of the obligations under capital leases:

2009	$ 1,907
2010	967
2011	548
2012	299
2013	12
Total minimum lease payments	3,733
Less amount representing interest (ranging from 4.75% to 6.25%)	(286)
Balance of obligations	3,447
Current portion	1,731
	$ 1,716

Interest expense on the lease obligations amounted to $257 (2007 - $181).

13. Deferred contributions:

Deferred contributions represent the portion of the provincial operating grant and other contributions that pertains to expenditures of the following year and donations for various scholarships, bursaries and other specific purposes to be paid out in future years.

	2008	2007
Deferred provincial operating grant:		
Balance, beginning of year	$ 1,738	$ 1,657
Amount recognized as revenue during the year	(1,738)	(1,657)
Amount received related to following year	3,432	1,738
Balance, end of year	3,432	1,738
Deferred other contributions:		
Balance, beginning of year (note 3)	1,657	1,430
Amount recognized as revenue during the year	(434)	(426)
Amount restricted for endowment	(88)	(1)
Trust funds used to support college operations	–	(99)
Amount received related to following year	1,013	753
Balance, end of year	2,148	1,657
	$ 5,580	$ 3,395

14. Deferred capital campaign contributions:

Deferred capital campaign contributions represent donations received for capital fundraising campaigns. The donations are being amortized on the same basis as the capital assets to which they relate. The changes in the deferred capital campaign contributions balance are as follows:

	2008	2007
Balance, beginning of year	$ 3,342	$ 3,431
Less amortization of deferred capital campaign contributions during the year	(298)	(297)
Add donations received during the year	256	208
Balance, end of year	$ 3,300	$ 3,342

15. Deferred capital contributions:

Deferred capital contributions represent the unamortized amount of grants, donations and other revenue received for the purchase of capital assets.

The amortization of capital contributions is recorded as revenue in the statement of operations. The changes in the deferred capital contributions are as follows:

	2008	2007
Balance, beginning of year	$ 50,583	$ 53,181
Less amortization of deferred contributions	(3,922)	(4,450)
Add:		
Contributions received for capital purposes	4,746	1,831
Donations-in-kind	182	21
Balance, end of year	$ 51,589	$ 50,583

Unamortized capital contributions of $51,589 (2007 - $50,583) include contributions received from the Province for the purchase of capital assets. The College has executed promissory notes for these contributions. The promissory notes are payable to the Department of Finance of the Province and the payment of these liabilities is guaranteed and funded by the COPSE.

New funding was received of approximately $11,700 with respect to these obligations for the construction of the Heavy Equipment Transportation Centre of Excellence (the Centre) and has been recorded in deferred revenue until completion of the Centre. Upon completion of the Centre, the balance will be recorded in deferred capital contributions. No revenue or expense is recorded in accordance with their extinguishment, except for the amortization of the deferred contributions. The balances of the promissory notes are as follows:

	2008	2007
Princess Street campus:		
Phase 1 - 6.3% interest, maturing July 31, 2042, repayable in monthly instalments of $71 including principal and interest	$ 11,998	$ 12,097
Phase 2 - 6.3% interest, maturing July 31, 2043, repayable in monthly instalments of $122 including principal and interest	20,800	20,960
Phase 3 - 6.3% interest, maturing March 31, 2044, repayable in monthly instalments of $50 including principal and interest	8,558	8,621
Heavy Equipment Transportation Centre of Excellence, 5.5% interest, maturing January 31, 2048, repayable in monthly instalments of $60 including principal and interest	11,666	–
	$ 53,022	$ 41,678

16. Investment in capital and intangible assets:

The investment in capital and intangible assets consists of the following:

	2008	2007
Capital assets, net book value	$ 75,732	$ 70,166
Intangible assets, net book value	8	10
Less:		
Amounts financed by deferred capital campaign contributions	(3,300)	(3,342)
Deferred capital contributions	(51,589)	(50,583)
Amounts financed by capital lease	(3,447)	(2,887)
Balance, end of year	$ 17,404	$ 13,364

The change in investment in capital and intangible assets is calculated as follows:

	2008	2007
Purchase of capital assets internally financed	$ 8,338	$ 4,581
Amortization of:		
Capital and intangible assets	(8,563)	(8,735)
Deferred capital contributions	3,922	4,450
Deferred capital campaign contributions	298	297
Gain (loss) on disposal of capital assets	45	(14)
Increase in investment in capital and intangible assets	$ 4,040	$ 579

17. Restrictions on net assets:

Net assets restricted for endowment purposes are subject to externally imposed restrictions stipulating that the resources be maintained permanently. Investment income on these resources is externally restricted to provide various scholarships, bursaries and other expenditures.

17. Restrictions on net assets (continued):

Internally restricted net assets consist of the following:

		2008		2007
Princess Street campus structural reserve	$	537	$	537
Notre Dame campus structural reserve		200		200
Contract training net proceeds		1,579		1,266
Campus renovations reserve		800		800
Balance, end of year	$	3,116	$	2,803

Under college internal best practice guidelines, net proceeds earned from designated contract training activities are restricted and eligible for expenditure under certain conditions, in the years following contract completion.

18. Change in non-cash working capital balances:

		2008		2007
Accounts receivable	$	(1,206)	$	43
Inventories		(243)		265
Prepaid expenses and other assets		135		500
Accounts payable and accrued liabilities		2,926		2,974
Deferred revenue		12,538		(409)
Change in non-cash working capital	$	14,150	$	3,373

19. Pension costs and obligations:

The College, together with other related and unrelated parties, is part of a defined benefit pension plan (Civil Service Superannuation Plan) that satisfies the definition of a multi-employer plan. The costs of the benefit plan are not allocated to the individual entities within the group. As a result, individual entities within the group are not able to identify their share of the underlying assets and liabilities. Therefore, the plan is accounted for as a defined contribution plan in accordance with the requirements of the Canadian Institute of Chartered Accountants Handbook, Section 3461.

The expense related to the pension plan was $1,120 (2007 - $805). These contributions represent the total pension obligations of the College. The College is not required under present legislation to make contributions with respect to any actuarial deficiencies of the plan.

20. Commitments:

The College leases classroom and office space in Winnipeg, Portage la Prairie, Steinbach and Winkler, Manitoba. The College has also contracted for services, as well as leased certain computer and other equipment. Minimum annual lease and contractual commitment payments for accommodation, services, construction costs and equipment, in aggregate, for each of the next five years, is approximately as follows:

2009	$ 12,225
2010	1,541
2011	1,180
2012	1,094
2013	591
	$ 16,631

The College is constructing the Heavy Equipment Training Centre of Excellence (the Centre) at the Notre Dame campus for an estimated cost of $15.1 million, of which $5.9 million has been spent as June 30, 2008.

The Centre is secured by a promissory note and is being funded both internally and through funding from the Province and other capital contributions. The College accounts for the funding from the Province for the Centre as a deferred capital contribution upon completion (note 15).

21. Related parties:

(a) Red River College Students' Association Inc.:

The Red River College Students' Association (the Students' Association) is an income tax exempt organization significantly influenced by the College. The Students' Association is responsible for providing services such as health and dental benefits, study and lounging areas, and a voice on the College's Board of Governors to students of the College. The Students' Association and the Students' Association Building Fund (SABF) are incorporated under the *Corporations Act* of Manitoba and operate on a not-for-profit basis. SABF is a wholly-owned subsidiary of the Students' Association. In 2007, the College agreed to loan $375 to SABF and during the year advanced $125 (2007 - $250) to be used to construct a new student lounge on the Notre Dame campus. The note receivable is unsecured and non-interest bearing.

21. Related parties (continued):

Repayment began in February 2008 and the balance will be repaid as follows:

2009	$	100
2010		105
2011		105
2012		25
	$	335

The net assets and results of operations of the Students' Association and SABF are not included in the statements of the College.

(b) Crecomm Radio Inc.:

Crecomm Radio Inc. (Crecomm), is an organization controlled and partially funded by the College. It operates a campus radio station and provides training and educational opportunities for Creative Communication students. Crecomm is incorporated under the *Corporations Act* of Manitoba and is exempt from income taxes. As at June 30, 2008, net assets of Crecomm amount to a deficit of $149 and there is a net receivable owing to the College of $31.

The net assets and results from operations of Crecomm are not included in the statements of the College.

(c) Canadian Animal Blood Bank Inc.:

The Canadian Animal Blood Bank Inc. (the Blood Bank) is a significantly influenced investee owned 50 percent by the College and 50 percent by the Manitoba Veterinary Medical Association. The Blood Bank is dedicated to improving veterinary care by providing blood products for animals who require transfusion therapy. The Blood Bank is incorporated under the *Corporations Act* of Manitoba and operates on a not-for-profit basis and is exempt from income taxes. As at May 31, 2008, net resources of the Blood Bank amount to $125.

The net assets and results of operations of the Blood Bank are not included in the statements of the College.

22. Financial instruments:

(a) Fair value:

The carrying amounts of short-term financial assets and liabilities are a reasonable estimate of their fair values because of the short maturity of these instruments. Short-term financial assets are comprised of cash, short-term investments and accounts receivable. Short-term financial liabilities are comprised of accounts payable and accrued liabilities and current portion of obligations under capital leases. The fair value of obligations under capital leases are also approximately equal to their carrying amounts. The fair value of the long-term investments is disclosed in note 7.

The fair value of the note receivable from the Red River College Students' Association and the balance due from the Province of Manitoba is not readily determinable due to the underlying terms and conditions.

(b) Credit risk:

Credit risk is the risk to the College's earnings arising from the risk that a counter party to a transaction is unable to satisfy its obligations to the College. Credit risk is mitigated by the fact that the College's accounts receivable are comprised of a large number of comparatively small individual balances. Reviews are made of the credit worthiness of accounts and reserves established as required.

(c) Interest rate and foreign exchange risk:

Interest rates, maturities and security affect the interest rate risk of certain of the College's financial assets and liabilities.

The College is subject to foreign exchange risk because a portion of its financial instruments are denominated in foreign currencies.

The financial risk is the risk to the College's earnings that arises from fluctuations in interest rates and foreign exchange rates and the degree of volatility of these rates. The College does not use derivative instruments to reduce its exposure to interest rate and foreign exchange risk.

23. Comparative figures:

Certain comparative figures have been reclassified to conform with the financial statement presentation adopted in the current year.

Management's Responsibility

To the Board of Assiniboine Regional Health Authority:

Management is responsible for the preparation and presentation of the accompanying financial statements, including responsibility for significant accounting judgments and estimates in accordance with Canadian generally accepted accounting principles and ensuring that all information in the annual report is consistent with the statements. This responsibility includes selecting appropriate accounting principles and methods, and making decisions affecting the measurement of transactions in which objective judgment is required.

In discharging its responsibilities for the integrity and fairness of the financial statements, management designs and maintains the necessary accounting systems and related internal controls to provide reasonable assurance that transactions are authorized, assets are safeguarded and financial records are properly maintained to provide reliable information for the preparation of financial statements.

The Board of Directors and Audit Committee are composed entirely of Directors who are neither management nor employees of the health authority. The Board is responsible for overseeing management in the performance of its financial reporting responsibilities, and for approving the financial information included in the annual report. The Board fulfils these responsibilities by reviewing the financial information prepared by management and discussing relevant matters with management and external auditors. The Audit Committee has the responsibility of meeting with management and external auditors to discuss the internal controls over the financial reporting process, auditing matters and financial reporting issues. The Committee is also responsible for recommending the appointment of the health authority's external auditors.

Meyers Norris Penny LLP, an independent firm of Chartered Accountants, is appointed by the Board to audit the financial statements and report directly to them; their report follows. The external auditors have full and free access to, and meet periodically and separately with, both the Committee and management to discuss their audit findings.

June 4, 2009

Chief Executive Officer

Chief Financial Officer

Auditors' Report

To the Board of Assiniboine Regional Health Authority:

We have audited the consolidated statement of financial position of Assiniboine Regional Health Authority as at March 31, 2009 and the consolidated statements of operations and changes in net assets and cash flows for the year then ended. These financial statements are the responsibility of the organization's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of the organization as at March 31, 2009 and the results of its operations and its cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

Cash and cash equivalents, end of year	29,520,233	17,649,579

The accompanying notes are an integral part of these financial statements

1. Purpose of the organization

The Assiniboine Regional Health Authority is a not-for-profit organization created by regulation 99/2002 under the Regional Health Authorities Act. Through participation and teamwork, and available resources, the Assiniboine Regional Health Authority's mission is to share in enhanced well-being through the delivery of quality health services that are responsive to the needs of the population.

The organization is a registered charity and, as such, is exempt from income taxes and may issue income tax receipts to donors.

2. Change in accounting policies

Capital disclosures

Effective April 1, 2008, the Organization adopted the Canadian Institute of Chartered Accountants' new recommendations for disclosures about capital. Section 1535 Capital Disclosures establishes standards for disclosing what an entity regards as capital and an entity's objectives, policies and processes for managing its capital. The Section also prescribes disclosure regarding whether an entity has complied with any externally imposed capital requirements, and if not, the consequences of such non-compliance. The adoption of this new standard did not have a material impact on the Organization's consolidated financial statements.

Inventory

Effective April 1, 2008, the Organization adopted the Canadian Institute of Chartered Accountants' new recommendation for inventory under CICA 3031 Inventories. The new Section provides guidance on the measurement and disclosure of inventories. The new recommendation establishes that inventories should be measured at the lower of cost and net realizable value and provides guidance on the determination of cost. There was no material impact on the financial statements from the retrospective application of the new accounting recommendations

3. Significant accounting policies

The financial statements have been prepared in accordance with Canadian generally accepted accounting principles for not-for-profit organizations and include the following significant accounting policies:

Revenue recognition

The Authority follows the deferral method of accounting for contributions including government grants and donations.

The Authority is funded primarily through grants from Manitoba Health. Operating grants are recorded as revenue in the period to which they relate. In accordance with funding arrangements with Manitoba Health, estimated final settlements are accrued in the fiscal period to which they relate. Where a portion of a grant relates to a future period, it is deferred and recognized in that subsequent period.

Where a grant or other restricted contribution is received but relates to expenses of one or more future periods, it is deferred and recognized as revenue in the same period as the related expenses are recognized. Contributions restricted for the purchase of capital assets or to repay long-term debt as a lump sum are deferred and amortized into revenue at a rate corresponding with the amortization rate for the related capital assets.

3. Significant accounting policies *(continued)*

Contributed services

A number of individuals donate significant amounts of time to the Authority's activities. No amount is reflected in the statements for donated services since no objective basis is available to measure the value of such services.

Inventories

Inventories are stated at the lower of cost and net realizable value. Cost is determined by the first-in, first-out method.

Capital assets

Capital assets are initially recorded at cost. Amortization is provided using the straight-line method at rates intended to amortize the cost of assets over their estimated useful lives.

	Method	Rate
Buildings	straight-line	10-40 years
Equipment, computers, vehicles, ambulance equipment	straight-line	5-10 years
Land improvements	straight-line	15 years

Pre-retirement obligations

The Authority applies the accounting recommendations for employee future benefits contained in *Section 3461* of the *Canadian Institute of Chartered Accountants' Handbook.*

Long-lived assets

Long-lived assets consist of capital assets with finite useful lives. Long-lived assets held for use are measured and amortized as described in the applicable accounting policies.

The Authority performs impairment testing on long-lived assets held for use whenever events or changes in circumstances indicate that the carrying value of an asset, or group of assets, may not be recoverable. Impairment losses are recognized when undiscounted future cash flows from its use and disposal are less than the asset's carrying amount. Impairment is measured as the amount by which the asset's carrying value exceeds its fair value. Any impairment is included in operations for the year.

Basis of consolidation

The following entities have been consolidated into these financial statements as at March 31, 2009 respectively.

Hamiota District Health Centre Inc. Lilac Residence (East Wing)
Hamiota District Health Centre Inc. Lilac Residence (North Wing)
Morley House of Shoal Lake Elderly Persons Housing
Morley House of Shoal Lake Lakeshore Lodge
Pioneer Lodge Inc.
Riverdale Personal Care Home Inc. Westwood Lodge
Tiger Hills Villa Inc.

The financial statements of the above entities are prepared in accordance with the accounting principles required by Manitoba Housing and Renewal Corporation (MHRC). The differences in accounting policies used by the above entities and Assiniboine Regional Health Authority would not result in significant changes to these consolidated financial statements.

3. Significant accounting policies *(continued)*

Financial information at different dates

The following entities have been consolidated into these financial statements as at December 31, 2008:

Baldur Handi-Van Service
Hartney Handi-Transit
Tiger Hills Handi-Van Service

These entities have not been reported as at March 31, 2009 due to the reporting requirements of their funding agency: The Province of Manitoba – Department of Highways and Transportation. There have been no significant transactions in the intervening period between December 31, 2008 and March 31, 2009, and their revenues and expenses for the three-month intervening period have not been prepared since these entities are not significant to the Assiniboine Regional Health Authority as a whole.

Financial instruments

In January 2005, the Canadian Institute of Chartered Accountants' ("CICA") issued new recommendations for the recognition and measurement of financial instruments, and amendments to the existing presentation and disclosure standards, effective for financial statements with fiscal years beginning on or after October 1, 2006. On January 1, 2007, the Organization implemented these new standards, the main requirements of which are set out below:

Held for trading:
The Organization has classified the following financial assets and liabilities as held for trading: cash and marketable securities. These instruments are recorded at their fair value.

Loans and receivables:
The Organization has classified the following financial assets as loans and receivables: accounts receivable and Due from Manitoba Health. These assets are initially recognized at their fair value approximated by the instrument's initial cost in a transaction between unrelated parties. Transactions to purchase or sell these items are recorded on the trade date, and transaction costs are immediately recognized in operations.

Loans and receivables are subsequently measured at their amortized cost, using the effective interest method. Under this method, estimated future cash receipts are exactly discounted over the asset's expected life, or other appropriate period, to its net carrying value. Amortized cost is the amount at which the financial asset is measured at initial recognition less principal repayments, plus or minus the cumulative amortization using the effective interest method of any difference between that initial amount and the maturity amount, and less any reduction for impairment or uncollectability. Gains and losses arising from changes in fair value are recognized in net operations upon derecognition or impairment.

Other financial liabilities:
The Organization has classified the following financial liabilities as other financial liabilities: accounts payable, accruals and Due to Manitoba Health. These liabilities are initially recognized at their fair value approximated by the instrument's initial cost in a transaction between unrelated parties. Transactions to purchase or sell these items are recorded on the trade date, and transaction costs are immediately recognized in operations.

Financial asset impairment:
The Organization assesses impairment of all its financial assets, except those classified as held for trading. Impairment is measured as the difference between the asset's carrying value and its fair value. Any impairment, which is not considered temporary, is included in current year operations.

3. Significant accounting policies *(continued)*

Measurement uncertainty

The preparation of financial statements in conformity with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period.

Accounts receivable are stated after evaluation as to their collectibility and an appropriate allowance for doubtful accounts is provided where considered necessary. Provisions are made for slow moving and obsolete inventory. Amortization is based on the estimated useful lives of capital assets. The accrued pre-retirement obligation and the accrued vacation entitlement liability are stated based on management estimates and actuarial valuations. Changes to the underlying assumptions and estimates or legislative changes in the near term could have a material impact on the provision recognized.

These estimates and assumptions are reviewed periodically and, as adjustments become necessary they are reported in operations in the periods in which they become known.

Recent accounting pronouncements

Financial instrument deferral of Section 3862 and 3863

In December 2006, the Canadian Institute of Chartered Accountants (CICA) issued Section 3862 *Financial Instruments – Disclosures* and Section 3863 *Financial Instruments – Presentation* to replace Section 3861 *Financial Instruments – Disclosure and Presentation*. The effective date for these new Sections was for interim and annual financial statements with fiscal years beginning on or after October 1, 2007, with earlier adoption permitted. However, in light of the uncertainty regarding the future direction in setting standards for not-for-profit organizations, the CICA released a decision to allow deferral of Sections 3862 and 3863 for this sector. Not-for-profit organizations should continue to apply Section 3861 until interim and annual financial statements with fiscal years beginning on or after October 1, 2008.

Financial statement presentation by a not-for-profit organization

In September 2008, amendments were made to CICA Handbook Section 4400 *Financial Statement Presentation by Not-for-profit Organizations.* Amendments to the section included removal of the requirement to treat net assets invested in capital assets as a separate component of net assets, and, instead, permitting such an amount to be presented as a category of internally restricted net assets. In addition, the requirement to recognize and present revenues and expenses on a gross basis when a not-for-profit organization is acting as a principal in the transaction was clarified. Finally, guidance was included to reflect that Section 1540 *Cash Flow Statements* and Section 1751 *Interim Financial Statements* are applicable to not-for-profit organizations.

Disclosure of allocated expenses by not-for-profit organizations

In September 2008, the Canadian Institute of Chartered Accountants issued new recommendations for disclosures regarding allocated expenses by not-for-profit organizations. CICA Handbook Section 4470 *Disclosure of Allocated Expenses by Not-for-profit Organizations* requires disclosure by not-for-profit organizations that allocate fundraising and general support expenses to other functions of the policies adopted for the allocation of such expenses among functions, the nature of the allocated expenses, and the basis on which allocations are made. The section also requires disclosure of the amounts allocated from each of its fundraising and general support functions and the amounts and functions to which they have been allocated

4. Accounts receivable

	2009	*2008*
Trade receivables	2,123,860	1,946,289
GST receivable	245,757	267,043
Allowance for doubtful accounts	(224,078)	(149,496)
	2,145,539	2,063,836

5. Accrued vacation entitlement

The liability for the accrued vacation entitlement, as well as, the appropriate amount receivable from Manitoba Health has been recorded. Prior to April 1, 2004, deferred vacation entitlement costs were treated as Out-of-Globe by Manitoba Health. Since that time, In-Globe funding has been amended to include these costs. There will be an offsetting receivable from Manitoba Health only for the accumulated accrued vacation liability up to March 31, 2004. As at March 31, 2009, the amount receivable is $6,484,052.

	2009	*2008*
Due to Assiniboine Regional Health Authority Employees	8,543,693	7,621,077

6. Accrued retirement obligations

	2009	*2008*
Due to Members of the Health Employees Pension Plan and Members of the Civil Service Superannuation Plan	9,703,033	9,240,843
Due to Diagnostic Services of Manitoba	43,762	40,999
	9,746,795	9,281,842

Pre-retirement

The Authority's contractual commitment, based on an actuarial valuation, for the pre-retirement entitlement for members of the Health Employees Pension Plan is to pay out four days of salary for each year of service upon retirement if the employee complies with one of the following conditions:

i) has ten years service and has reached the age of 55 or
ii) qualifies for the "eighty" rule which is calculated by adding the number of years service to the age of the employee or
iii) retires at or after age 65 or
iv) terminates employment at any time due to permanent disability

6. Accrued retirement obligations *(continued)*

Pre-retirement (continued)

The Authority's contractual commitment, based on an actuarial valuation, for the pre-retirement entitlement for MGEU Community Support members of the Civil Service Superannuation Plan, employed by the Authority on or before May 2, 2003, is to pay out, at retirement to employees who have reached the age of 55 and have nine or more years of service, the following severance pay:

i) one week of severance pay for each year of service up to 15 years of service.
ii) two weeks of additional severance pay for each increment of five years service past the 15 years of service up to 30 years of service.

Funding for the retirement obligation is recoverable from Manitoba Health for pre-retirement costs incurred up to March 31, 2004 on an Out-of-Globe basis in the year of payment. As of April 1, 2004, In-Globe funding has been amended to include these costs. The amount recorded as a receivable from the Province for pre-retirement costs was initially determined based on the value of the corresponding actuarial liability for pre-retirement costs as at March 31, 2004.

Subsequent to March 31, 2004, the Province has included in its ongoing annual funding to the Authority, an amount equivalent to the change in the pre-retirement liability, which includes annual interest accretion related to the receivable. The receivable will be paid by the Province when the Authority requires the funding to discharge the related pre-retirement liabilities. As at March 31, 2008, the amount receivable is $7,336,760.

Pension plans

Most of the employees of the Authority are members of the Health Employees Pension Plan (the "Plan"), which is a multi-employer defined benefit pension plan available to all eligible employees. Plan members will receive benefits based on length of service and on the average annualized earnings calculated on the best five of the eleven consecutive years prior to retirement, termination or death, that provide the highest earnings. The costs of the benefit plan are not allocated to the individual entities within the related group. As a result, individual entities within the related group are not able to identify their share of the underlying assets and liabilities. Therefore the Plan is accounted for as a defined contribution plan in accordance with the requirements of the *Canadian Institute of Chartered Accountants' Handbook, Section 3461*.

Pension assets consist of investment grade securities. Market and credit risk on these securities are managed by the Plan by placing Plan assets in trust and through the Plan investment policy. Pension expense is based on Plan management's best estimates, in consultation with its actuaries, of the amount, together with the 6.6% of basic annual earnings up to the Canada Pension Plan ceiling contributed by employees, and 8.2% thereafter, required to provide a high level of assurance that benefits will be fully represented by fund assets at retirement, as provided by the Plan. The funding objective is for employer contributions to the Plan to remain a constant percentage of employees' contributions.

The Healthcare Employees' Pension Plan is subject to the provisions of the Pension Benefits Act, Manitoba. This Act requires that the Plan's actuaries conduct two valuations – a going-concern valuation and a solvency valuation. At the end of 2007, the Plan was 98.3% funded on a solvency basis. Under legislation, the Plan is required to make special payments to fund the solvency deficiency, and these payments will be made over the course of the next five years to make the Plan solvent. At that time, no contribution increases were necessary. The Plan's going-concern position improved in 2007, showing a surplus of $84 million versus a surplus of $11 million at the end of 2009.

Actual contributions to the Plan made during the year by the Authority on behalf of its employees amounted to $4,916,805 (2008 - $4,433,657) and are included in the statement of operations.

6. Accrued retirement obligations *(continued)*

Pension plans (continued)

Some of the employees of the Authority are eligible for membership in the provincially operated Civil Service Superannuation Plan. The pension liability for Authority employees is included in the Province of Manitoba's liability for the Civil Service Superannuation Fund. Accordingly, no provision is reflected in the financial statements relating to the effects of participating in the Plan by the Authority and its employees. The Authority is in receipt of an actuarial report on the Statement of Pension Obligations under the Civil Service Superannuation Act as at December 31, 2007.

7. Capital assets

		2009		*2008*
	Cost	*Accumulated Amortization*	*Net Book Value*	*Net Book Value*

8. Due to Manitoba Health

	2009	*2008*
Out-of-Globe 2006/2007	-	(654,332)
Out-of-Globe 2007/2008	3,469,599	1,420,892
Out-of-Globe 2008/2009	3,755,073	-
	7,224,672	766,560

In-Globe Funding

In-Globe funding is funding approved by Manitoba Health for Regional Health Authority programs unless otherwise specified as Out-of-Globe funding. This includes volume changes and price increases for the five service categories of Acute Care, Long-term Care, Community and Mental Health, Home Care and Emergency Response and Transport. All additional costs in these five service categories must be absorbed from within the global funding provided.

Any operating surplus greater than 2% of budget related to In-Globe funding arrangements is recorded on the statement of financial position as a payable to Manitoba Health until such time as Manitoba Health reviews the financial statements. At that time, Manitoba Health determines what portion of the approved surplus may be retained by the Authority, or repaid to Manitoba Health.

Under Manitoba Health policy the Authority is responsible for In-Globe deficits, unless otherwise approved by Manitoba Health.

8. Due to Manitoba Health *(continued)*

Out-of-Globe Funding

Out-of-Globe funding is funding approved by Manitoba Health for specific programs.

Any operating surplus related to Out-of-Globe funding arrangements is recorded on the statement of financial position as a payable to Manitoba Health until such time as Manitoba Health reviews the financial statements. At that time Manitoba Health determines what portion of the approved surplus may be retained by the Authority, or repaid to Manitoba Health.

Conversely, any operating deficit related to Out-of-Globe funding arrangements is recorded on the statement of financial position as a receivable from Manitoba Health until such time as Manitoba Health reviews the financial statements. At that time, Manitoba Health determines their final funding approvals, which indicate the portion of the deficit that will be paid to the Authority. Any unapproved costs not paid by Manitoba Health are absorbed by the Authority.

9. Long-term debt

	2009	*2008*
Mortgages payable to Canada Mortgage and Housing Corporation at interest rates from 4.37% to 6.00%, due from December 1, 2013 to March 1, 2018, with monthly payments of principal and interest from $142 to $2,854, secured by buildings.	533,659	588,343
Mortgages payable to Manitoba Housing and Renewal Corporation at interest rates from 7.75% to 10.75%, due from December 31, 2022 to December 31, 2023, with monthly payments of principal and interest from $5,478 to $6,479 secured by buildings.	1,130,558	1,169,929
Mortgage payable to the Royal Bank of Canada, at 5.00%, monthly payments of $8,684 principal and interest, secured by a first charge against the Tiger Hills Villa land and buildings, a general assignment of all rents and leases and a chattel mortgage covering the appliances in the Tiger Hills Villa.	866,888	926,256
	2,531,105	2,684,528
Less: current portion	162,751	153,290
	2,368,354	2,531,238

Principal repayments for the next five years and thereafter are as follows:

2010	162,751
2011	172,880
2012	183,702
2013	195,316
2014	207,713
Thereafter	1,608,743
	2,531,105

9. Long-term debt *(continued)*

In prior years, the Authority entered into long-term loan agreements with various financial institutions to provide debt financing to the Authority. The Province of Manitoba continues to pay the principal and interest on this long-term debt. During the 2005 fiscal year, this long-term debt was assumed by the Province of Manitoba and was recognized as borrowings in the Public Accounts (Special Purpose Financial Statements) of the Province of Manitoba as at April 1, 2004.

Accordingly, since the Province of Manitoba has recognized the long-term debt as its borrowings, the Authority has restated the long-term debt as deferred contributions in its financial statements.

10. Deferred contributions

Expended and unexpended deferred contributions represent restricted capital funding received.

Expended deferred contributions related to capital assets represent the unamortized amount of funds received for the purchase of capital assets and the repayment of capital debt. The amortization of capital deferred contributions is recorded as revenue in the statement of operations.

Unexpended deferred contributions related to expenses of future periods represent unspent externally restricted grants for equipment, major repairs, construction and other expenses.

Other deferred contributions represent donations that were received from other sources restricted by site or by program for the purchase of capital assets or other items, as per the donor's request.

Changes in the deferred contributions balance are as follows:

	Expended	**Unexpended**	**Other**	**2009**	2008
Balance, beginning of year	**78,762,381**	**3,133,907**	**2,814,360**	**84,710,648**	75,637,235
Funding Manitoba Health	**21,081,033**	**2,753,406**	**-**	**23,834,439**	1,645,800
Donations received	**-**	**-**	**793,715**	**793,715**	3,924,513
Interest earned	**-**	**6,073**	**108,278**	**114,351**	122,202

10. Deferred contributions *(continued)*

The lines of credit and long-term debt that have been incorporated in deferred contributions include the following:

	2009	2008
Lines of credit	**11,051,719**	11,304,920
Mortgages payable to Canada Mortgage and Housing Corporation at interest rates from 4.17% to 10.50%, due from January 1, 2009 to May 1, 2029, with monthly payments of principal and interest from $1,368 to $5,718, secured by buildings	**4,113,570**	5,785,117
	15,165,289	17,090,037

Lines of Credit

The Authority has authorized capital lines of credit of $31,605,218 and has authorized $6,900,000 of an operating line of credit. These lines of credit bear interest at the bank's prime rate minus 0.65%. Security provided on these lines of credit includes an overdraft borrowing agreement and a letter of comfort from Manitoba Health.

11. Commitments and contingencies

The nature of the health care industry's activities is such that there is usually litigation pending or in prospect at any time. With respect to claims at March 31, 2009 management believes the Authority has valid defenses and appropriate insurance coverage in place. In the event any claims are successful, management believes that such claims are not expected to have a material effect on the Authority's financial position.

On July 1, 1987, a group of health care organizations, ("subscribers"), formed Healthcare Insurance Reciprocal of Canada ("HIROC"). HIROC is registered as a Reciprocal pursuant to provincial Insurance Acts, which permit person's reciprocal contracts of the indemnity insurance. HIROC facilitates the provision of liability insurance coverage to health care organizations in the provinces of Ontario, Manitoba, Saskatchewan and Newfoundland. Subscribers pay annual premiums, which are actuarially determined, and are subject to assessment for losses in excess of such premiums, of any losses experienced by the group of subscribers for the years in which they were a subscriber. As of December 31, 2007, the Authority has a subscriber's surplus of $387,568.

Environmental Liabilities

In accordance with accounting policy of the Province of Manitoba, the Authority has no known environmental liabilities for contaminated sites for which the Authority will become obligated to incur remediation costs due to reasons of public health and safety, contractual agreements, or to meet such standards which are set out in any act or regulation of government.

12. Invested in capital assets

	2009	2008
Capital Assets	99,695,777	84,695,735
Amounts financed by:		
Deferred contributions related to capital assets	(93,839,353)	(78,762,381)
Long-term debt	(2,531,105)	(2,684,528)
Due from operating account	27,766	26,364
	3,353,085	3,275,190

13. Internally restricted net assets

The Authority has restricted $30,700 (2008 - $210,746) in net assets as this represents parking proceeds. The funds have been internally restricted for future repair or replacement of Health Centre parking lots.

14. Manitoba Health operating income

	2009	2008
Revenue as per Manitoba Health's final funding document	139,298,526	128,437,919

Capital interest on loans	**(730,993)**	(325,986)
	135,870,630	127,370,745

15. Economic dependence

Assiniboine Regional Health Authority receives a substantial portion of its revenue from Manitoba Health.

16. Comparative figures

Certain comparative figures have been reclassified, if necessary, to conform with the current year presentation.

17. Related party transactions

The Authority is responsible for the overall management of the health care services provided in the Assiniboine region. Programs for hospital and personal care services are delivered in the region by the Authority. The Authority transacts business on a regular basis with organizations and agencies described in Notes 3, 5, 6, 8, 9 and 14.

18. Capital disclosures

The Authority considers its capital to be its net assets. The Authority's objectives when managing its capital are to safeguard its ability to operate as a going concern so it can continue to provide services to its members. An Annual Health Plan including operating and capital budgets is developed and monitored to ensure the Authority's capital is maintained at an appropriate level.

If the retainable surplus exceeds 2% of the annual in globe operating budget, as approved by the Authority, the surplus in excess of 2% is an obligation payable to Manitoba Health. For the fiscal year ended March 31, 2009, the Authority was in compliance with this requirement.

The Authority operates a number of elderly persons housing facilities which are subject to capital requirements as part of Canada Housing and Mortgage Corporation (CMHC) and Manitoba Housing and Renewal Corporation (MHRC).

18. Capital disclosures (continued)

Under the terms of agreements with MHRC and CMHC, replacement reserve accounts are to be credited with amounts as determined by either CMHC or MHRC. These funds, along with accumulated interest, must be held in a separate bank account and/or invested only in accounts or instruments insured by the Canada Deposit Insurance Corporation, or as may otherwise be approved by MHRC or CMHC from time to time. The funds in the account may only be used as approved. Withdrawals are credited to interest first and then principal.

Pursuant to the operating agreements with MHRC for Riverdale Personal Care Home Inc. Westwood Lodge, Tiger Hills Villa Inc. and Hamiota District Health Centre Inc. Lilac Residence (North Wing) elderly persons housing facilities, on a cumulative basis for all MHRC properties, any excess subsidy funding provided to the Authority is to be repaid. Where a cumulative deficiency exists for MHRC properties, the shortfall is the responsibility of MHRC subject to MHRC approval of project costs.

AUDITORS' REPORT

To the Board of Directors of
Brandon Regional Health Authority

We have audited the consolidated statement of financial position of Brandon Regional Health Authority as at March 31, 2009 and the consolidated statements of operations, changes in net assets and cash flows for the year then ended. These financial statements are the responsibility of the Authority's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these consolidated financial statements present fairly, in all material respects, the financial position of Brandon Regional Health Authority as at March 31, 2009 and the results of its operations and its cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

1 PURPOSE OF THE ORGANIZATION

The Brandon Regional Health Authority ("Authority") was incorporated under the laws of Manitoba on January 6, 1997. The Authority commenced activity on April 1, 1998. The Authority is principally involved in providing health care services to the community of Brandon and surrounding regions. The Authority is a registered charity under the Income Tax Act and accordingly is exempt from income taxes, provided certain requirements of the Income Tax Act are met.

2 SIGNIFICANT ACCOUNTING POLICIES

The Authority has elected to use the exemption provided by the Canadian Institute of Chartered Accountants (CICA) permitting not for profit organizations not to apply sections 3862 and 3863 of the CICA Handbook which would otherwise have applied to the financial statements of the Authority for the year ended March 31, 2009. The Authority applies the requirements of Section 3861 of the CICA Handbook.

The consolidated financial statements have been prepared in accordance with the Canadian generally accepted accounting prinicples and reflect the following significant accounting policies:

a) *Change in Accounting Policies*

Effective April 1, 2008, the Authority adopted CICA section 1535, *Capital Disclosures,* which establishes standards for the disclosure of: (i) an entity's objectives, policies and processes for managing capital; (ii) quantitative data about what the entity regards as capital; (iii) whether the entity has complied with any capital requirements; and (iv) if it has not complied, the consequences of such non-compliance. See notes 8, 9 and 10 for details on restrictions in the use of capital. There were no other external restrictions.

Effective April 1, 2008 the Authority adopted CICA section 3031, *Inventories*, which replaces, section 3030, *Inventories*. The revised standard provides more extensive guidance on measurement, and expands disclosure requirements to increase transparency. The Authority's accounting policy for inventory is consistent with measurement requirements in the new standard and as a result, no adjustment was recorded on transition; however, additional disclosure requirements will be applied as described below.

The main features of the new standard, which impact the Authority, include:

Consistent use of either a first-in and first-out or weighted average formula to measure the cost of other inventories. The Authority uses the weighted average formula to measure cost and actual cost using first in first out method for pharmacy inventory.

Disclosure of the accounting policies used, carrying amounts, amounts recognized as an expense, write downs, and the amount of any reversal of write downs recognized as a reduction in expenses.

b) *Basis of Reporting*

The Authority provides health care services through devolved and contract facilities. All significant inter-divisional transactions of these organizations have been eliminated.

The assets, liabilities, and operations of the following devolved organizations have been included in these financial statements:

Brandon Regional Health Centre
Child and Adolescent Treatment Centre
Community and Home Care Health Services
Community Mental Health Services
Fairview Home
Rideau Park Personal Care Home
Westman Laundry

2 **SIGNIFICANT ACCOUNTING POLICIES (Continued)**

b) ***Basis of Reporting (Continued)***

The health care services provided by the contract facilities are delivered under the control of the Authority as the major funder. The financial position and results of operations of these related organizations (The Salvation Army Dinsdale Personal Care Home and Westman Regional Laboratory Services Inc.) have not been consolidated. Instead a summary of their financial information has been included in these notes (Note 14).

c) ***Revenue recognition***

The Authority follows the deferral method of accounting for contributions which include donations and government grants.

Under the Health Insurance Act and regulations thereto, the Authority is funded primarily by the Province of Manitoba in accordance with budget arrangements established by Manitoba Health & Healthy Living. Operating grants are recorded as revenue in the period to which they relate. Grants approved but not received at the end of an accounting period are accrued. Where a portion of a grant relates to a future period, it is deferred and recognized in that subsequent period. These financial statements reflect agreed arrangements approved by Manitoba Health & Healthy Living with respect to the year ended March 31, 2009.

Unrestricted contributions are recognized as revenue when received or receivable, if the amount to be received can be reasonably estimated and collection is reasonably assured.

Externally restricted contributions other than endowment contributions are recognized as revenue in the year in which the related expenses are recognized. Contributions restricted for the purchase of capital assets are deferred and amortized into revenue on a straight line basis, at a rate corresponding with the amortization rate for the related capital assets.

Restricted investment income is recognized as revenue in the year in which the related expenses are recognized. Unrestricted investment income is recognized as revenue when earned.

Revenue from preferred accommodation and marketed services is recognized when the goods are sold or the service is provided.

d) ***Contributed services***

A substantial number of volunteers contribute a significant amount of their time each year. Because of the difficulty of determining the fair value, contributed services are not recognized in the financial statements.

e) ***Inventories***

Inventories are valued at average cost, except pharmacy inventory which is valued at the actual cost using the first in, first out method.

f) ***Investments***

Investments are classified as available-for-sale financial assets and are comprised of bonds and guaranteed investment certificates, which are recorded at fair value based on bid prices at year-end. Purchases and sales of investments are recorded at the trade date and transaction costs are expensed as incurred and recorded in the Statement of Operations. Changes in unrealized gains and losses are reflected as direct increase or decrease in net assets.

2 SIGNIFICANT ACCOUNTING POLICIES (Continued)

g) *Financial Instruments*

Financial assets and financial liabilities are initially recognized at fair value and their subsequent measurement is dependent on their classification as described below. Their classification depends on the purpose, for which the financial instruments were acquired or issued, their characteristics and the Authority's designation of such instruments.

Classification

Cash - Held for trading
Accounts receivable - Loans and Receivables
Investments - Available for Sale
Due From Manitoba Health & Healthy Living - Vacation - Loans and Receivables
Due From Manitoba Health & Healthy Living - Vacation - Non-Devolved Facilities - Loans and Receivables
Due From Manitoba Health & Healthy Living - Pre-retirement - Loans and Receivables
Due From Manitoba Health & Healthy Living - Pre-retirement - Non-Devolved Facilities - Loans and Receivables
Accounts payable and accrued liabilities - Other Liabilities
Bank advances - Other Liabilities
Employee Future Benefits - Vacation - Other Liabilities
Due to Non-Devolved Facilities - Employee Future Benefits - Vacation & Pre-retirement - Other Liabilities
Long term debt - Other Liabilities

Available for Sale

Available-for-sale financial assets are those non-derivative financial assets that are designated as available-for-sale, or that are not classified as loans and receivables, held-to-maturity or held-for-trading investments. Available-for-sale financial assets are carried at fair value with unrealized gains and losses included in the consolidated statement of changes in net assets until realized when the cumulative gain or loss is transferred to other income.

Held for trading

Held for trading financial assets are financial assets typically acquired for resale prior to maturity or that are designated as held for trading. They are measured at fair value at the date of the statement of financial position. Fair value fluctuations including interest earned, interest accrued, gains and losses realized on disposal and unrealized gains and losses are included in investment income.

Loans and receivables

Loans and receivables are accounted for at amortized cost using the effective interest method.

Other liabilities

Other liabilities are recorded at amortized cost using the effective interest method and include all financial liabilities.

Fair value of financial instruments

The fair value of cash, accounts receivable, due from the Manitoba Health & Healthy Living –vacation and vacation for non-devolved facilities, bank advances, accounts payable and accrued liabilities and employee future benefits - vacation approximates their carrying values due to their short-term maturity.
The fair value of due from the Manitoba Health & Healthy Living – Pre-retirement, Pre-retirement Non-devolved Faciliites, Empolyee future benefits - Pre-retirement and due to non-devolved facilities - Employee future benefits -Pre-retirement, cannot be determined as there are no specific terms of repayment.
Unless otherwise noted, it is management's opinion that the Entity is not exposed to significant interest, currency or credit risk arising from these financial instruments.

2 SIGNIFICANT ACCOUNTING POLICIES (Continued)

h) *Capital assets*

Purchased capital assets are recorded at cost. Contributed capital assets are recorded at fair value at the date of contribution. Repairs and maintenance costs are charged to expense. Betterments which extend the estimated useful life of an asset are capitalized. When a capital asset no longer contributes to the Authority's ability to provide services, its carrying amount is written down to its residual value.

Capital assets, excluding vehicles are amortized on a straight-line basis using the following annual rates:

Parking lots	10%
Buildings	2.5% - 6.67%
Building service equipment/equipment	5% - 20%

Vehicles are amortized an a declining balance basis using 30% as the annual rate and are included in building service equipment/equipment.

i) *Compensated absences*

Compensation expense is accrued for all employees as entitlement to these payments is earned, in accordance with the Authority's benefit plans for vacation.

j) *Pre-Retirement entitlement obligation*

The Authority has recorded an accrual based on an actuarial valuation that includes employees who qualify at the fiscal year-end date and an estimate for the remainder of the employees who have not yet met the criteria below. Funding for the retirement entitlement prior to March 31, 2004 is recoverable from Manitoba Health & Healthy Living. Effective April 1, 2004, any increase in the entitlement is the responsibility of the Brandon Regional Health Authority.

The benefits paid during the year by the Authority amounted to $1,087,770 (2008 - $638,213.) and are included in the statement of operations. The service costs for the year were $288,447 (2008 - $764,403).

Healthcare Employees Pension Plan

The Authority's contractual commitment, based on an actuarial valuation, for the pre-retirement entitlement for members of the Healthcare Employees Pension Plan is to pay out four days of salary for each year of service upon retirement if the employee complies with one of the following conditions:

- have ten years service and have reached the age of 55 or
- qualify for the "eighty" rule which is calculated by adding the number of years service to the age of the employee
- retire at or after age 65
- terminate employment at any time due to permanent disability

2 SIGNIFICANT ACCOUNTING POLICIES (Continued)

j) *Pre-Retirement entitlement obligation (Continued)*

Civil Service Superannuation Plan

The Authority's contractual commitment, based on an actuarial valuation, for the pre-retirement entitlement for members of the Civil Service Superannuation Plan is to pay out, at retirement to employees who have reached the age of 55 and have nine or more years of service, the following severance pay:

- one week of severance pay for each year of service up to 15 years of service
- two weeks of additional severance pay for each increment of five years service past the 15 years of service up to 35 years of service

The significant actuarial assumptions adopted in measuring the Authority's accrued pre-retirement entitlements include mortality and withdrawal rates, a discount rate of 6.70% (2008 - 5.50%) and a rate of salary increase of 3.50% (2008 - 3.50%) plus age related merit/promotion scale with nil for disability.

k) *Due From Manitoba Health & Healthy Living - Employee Future Benefits*

The amount recorded as a receivable from the Province for pre-retirement costs was initially determined based on the value of the corresponding actuarial liability for pre-retirement costs as at March 31, 2004. Subsequent to March 31, 2004, the Province has included in its on-going annual funding to the Authority, an amount equivalent to the change in pre-retirement liability, which includes annual interest accretion related to the receivable. The receivable will be paid by the Province when it is determined that the funding is required to discharge the the related pre-retirement liabilities.

l) *Due to/from Manitoba Health & Healthy Living*

In Globe Funding

In Globe funding is funding approved by Manitoba Health & Healthy Living for Regional Health Authority programs unless otherwise specified as Out of Globe funding. This includes volume changes and price increases for the five service categories of Acute Care, Long Term Care, Community and Mental Health, Home Care and Emergency Response and Transport. All additional costs in these five service categories must be absorbed within the global funding provided.

Any operating surplus greater than 2% of budget related to In Globe funding arrangements is recorded on the statement of financial position as a payable to Manitoba Health & Healthy Living until such time as Manitoba Health & Healthy Living reviews the financial statements. At that time Manitoba Health & Healthy Living determines what portion of the approved surplus maybe retained by the Authority, or repaid to Manitoba Health & Healthy Living.

Under Manitoba Health & Healthy Living policy the Regional Health Authority is responsible for In Globe deficits, unless otherwise approved by Manitoba Health & Healthy Living.

2 SIGNIFICANT ACCOUNTING POLICIES (Continued)

l) *Due to/from Manitoba Health & Healthy Living (Continued)*

Out of Globe Funding

Out of Globe funding is funding approved by Manitoba Health & Healthy Living for specific programs.

Any operating surplus related to Out of Globe funding arrangements is recorded on the statement of financial position as a payable to Manitoba Health & Healthy Living until such time as Manitoba Health & Healthy Living reviews the financial statements. At that time Manitoba Health & Healthy Living determines what portion of the approved surplus may be retained by the Authority, or repaid to Manitoba Health & Healthy Living.

Conversely, any operating deficit related to Out of Globe funding arrangements is recorded on the statement of financial position as a receivable from Manitoba Health & Healthy Living until such time as Manitoba Health & Healthy Living reviews the financial statements. At that time, Manitoba Health & Healthy Living determines their final funding approvals which indicate the portion of the deficit that will be paid to the Authority. Any unapproved costs not paid by Manitoba Health & Healthy Living are absorbed by the Authority.

m) *Future accounting changes*

In November 2008, the Canadian Institute of Chartered Accountants ("CICA") issued amendments to Section 1540, Cash flow statement, Section 1751, Interim financial statements, Section 4400, Financial statement presentation by not-for-profit organization, Section 4430, Capital assets held by not-for-profit organization, Section 4460, Disclosure of related party transactions by not-for-profit organization and issued Section 4470, Disclosure of allocated expenses by not-for-profit organization. The new standards will be applicable to interim and annual financial statements relating to fiscal years beginning on or after January 1, 2009. Accordingly, the Authority will adopt the new standards as of April 1, 2009.

Sections 1540 and 1751 have been amended to include not-for-profit organizations within their scope.

Section 4400 has been amended in order to eliminate the requirement to treat net assets invested in capital assets as a separate component of net assets and, instead, permit a not-for-profit organization to present such an amount as a category of internally restricted net assets when it chooses to do so. It also clarifies that revenues and expenses must be recognized and presented on a gross basis when a not-for profit organization is acting as a principal in transactions.

Section 4430 has been amended to specify that smaller Organizations that capitalize their capital assets shall capitalize all classes of capital assets, amortize and write down those assets in accordance with relevant Handbook Sections.

Section 4460 has been amended to make the language in Section 4460 consistent with related party transactions, Section 3840.

Section 4470 establishes disclosure standards for a not-for-profit organization that classifies its expenses by function and allocates its expenses to a number of functions to which the expenses relate.

The Authority is currently evaluating the impact of the adoption of these new standards on its financial statements.

n) Capital Management

The Entity's objective when managing capital is to maintain sufficient capital to cover its costs of operations. The Entity's capital consists of net assets.

There were no changes in the Entity's approach to capital management during the period.

3 ACCOUNTS RECEIVABLE

		2009		2008
Manitoba Health & Healthy Living				
Retroactive Salary Increases	$	577,451	$	1,727,021

	$ 201,854,031	**$ 97,072,148**	**$ 104,781,883**

6 BANK ADVANCES

The bank advances have been authorized by the Province of Manitoba . Interest is paid monthly based on an interest rate of prime plus 1.00%. The amount available for operating credit is $8,500,000.

7 LONG TERM DEBT

	2009	2008
City of Brandon 6.5% loan, repayable $159,529 annually, including interest, maturing 2015.	$ 754,061	$ 857,831
Less current portion	(110,515)	(103,770)
	$ 643,546	$ 754,061

The fair value of the Authority's long term debt is $790,615 as at March 31, 2009 calculated using discounted cash flow analysis based on incremental borrowing rates currently available for similar terms and maturities.

Principal payments due in the next five years are as follows:

2010	$ 110,515
2011	117,698
2012	125,349
2013	133,497
2014	142,174

6 DEFERRED CONTRIBUTIONS

a) *Expenses of future periods*

Deferred contributions related to expenses of future periods represent unspent externally restricted grants for equipment and construction projects.

		2009		2008
Balance, beginning of year	$	1,727,395	$	1,296,058
Add amount received		2,380,147		2,214,823
Less amount transferred to deferred contributions related to capital assets		(122,708)		-
Less amount amortized to revenue in the year		(2,445,642)		(1,783,486)
Balance, end of year	$	**1,539,192**	$	**1,727,395**

b) *Capital assets*

Deferred capital contributions related to capital assets represent the unamortized amount and unspent amount of grants and donations received for the purchase of capital assets. The amortization of capital contributions is recorded as revenue in the statement of operations.

		2009		2008
Balance, beginning of year	$	99,479,066	$	100,692,626
Additional contributions received		5,244,634		6,052,629
Add amount transferred from expenses of future periods		122,708		-
Less amounts amortized to revenue in the year		(6,990,423)		(7,266,189)
Balance, end of year	$	**97,855,985**	$	**99,479,066**

The balance of unamortized capital contributions related to capital assets consists of the following:

		2009		2008
Unamortized capital contributions used to purchase assets	$	98,013,654	$	100,802,396
Underspent/(Overspent) contributions		(157,669)		(1,323,330)
	$	**97,855,985**	$	**99,479,066**

8 DEFERRED CONTRIBUTIONS - Capital Assets (Continued)

During the 2006 fiscal year, the Province of Manitoba assumed the long term and third party debt of the Authority and was recognized as borrowings in the Public Accounts of the Province of Manitoba. Accordingly, the Authority has classified the long term debt and short term financing as deferred contributions. The following long term debt related to third party's is included in deferred contributions:

	2009	2008
School of Nursing Building 5.75% mortgage, repayable $27,241 semi-annually, including interest, maturing 2019. The mortgage is secured by land and buildings.	$ 409,996	$ 439,619
Fairview Home 6% mortgage, repayable $3,907 monthly, including interest, maturing 2018. The mortgage is secured by land and buildings.	342,177	367,951
Fairview Home 7 1/2% mortgage, repayable $2,778 monthly, including interest, maturing 2023. The mortgage is secured by land and buildings.	294,259	305,411
Fairview Home 10 1/8%, sinking fund debenture, repayable $97,318 monthly, including interest, matured 2008. The indenture documentation assigns the subsidies provided by Manitoba Health & Healthy Living for payment of the debenture.	-	9,250,000

9 INVESTED IN CAPITAL ASSETS

Invested in capital assets is calculated as follows:

	2009	2008
Capital assets	$ 101,993,695	$ 104,781,883
Funds held by Manitoba Health & Healthy Living		
Amounts financed by:		
Deferred contributions	(98,013,654)	(100,802,396)
Accounts Payable	(575,717)	(76,928)
Loan and mortgage payable	(1,680,769)	(1,957,737)
	$ 1,723,555	$ 1,944,822

10 RESTRICTED ASSETS

Internally Restricted

The Board of Directors has restricted net assets related to non Manitoba Health & Healthy Living activities of $3,784,734 (2008 - $3,322,266). The revenue earned on these restricted assets is used for the operations of these non Manitoba Health & Healthy Living activities and for possible capital asset purchases.

Externally Restricted

Net assets are restricted for scholarship purposes and are subject to externally imposed restrictions that the assets be maintained permanently. Investment income from this fund is restricted for a scholarship.

Total Revenue from Manitoba Health & Healthy Living	$ 173,612,257	$ 162,564,269

12 COMMITMENTS AND CONTINGENCIES

a) The Authority has entered into various operating lease commitments. The amounts payable over the next five years are as follows:

2010	$	1,371,369
2011		1,360,458
2012		738,560
2013		717,110
2014		722,795

b) The Authority is subject to individual legal actions arising in the normal course of business. It is not expected that these legal actions will have a material adverse effect on the financial position of the Authority.

c) Effective January 1, 2003 the Authority joined in the Healthcare Insurance Reciprocal of Canada ("HIROC"). HIROC is a pooling of the public liability insurance risks for its members. All members of the pool pay annual premiums which are actuarially determined. All members are subject to reassessment for losses, if any, experienced by the pool for the years in which they were members, and these losses could be material. No reassessments have been made to March 31, 2009.

13 PENSION PLAN

The majority of the employees of the Authority are members of the Healthcare Employees Pension Plan (HEPP), which is a multi-employer defined benefit pension plan. HEPP plan members will receive benefits based on the length of service and on the average of annualized earnings calculated on the best five of the eleven consecutive years prior to retirement, termination or death, that provide the highest earnings. The costs of the benefit plan are not allocated to the individual health entities within the related group. As a result, individual entities within the related group are not able to identify their share of the underlying assets and liabilities. Therefore, the plan is accounted for as a defined contribution plan.

Pension assets consist of investment grade securities. Market and credit risk on these securities are managed by HEPP. Pension contributions are at 6.8% of basic annual earnings up to the Canada Pension Plan ceiling plus 8.4% of basic earnings in excess of the Canada Pension Plan ceiling contributed by employees. The funding objective is for employer contributions to HEPP to remain a constant percentage of employee's contributions.

The most recent actuarial valuation filed with the Manitoba Pension Commission for the plan was at December 31, 2007, and indicated that the plan was fully funded. Changes in market conditions and other assumptions may affect the funded status. The next actuarial valuation to be filed with the Manitoba Pension Commission will be as at December 31, 2010. Actual Authoritycontributions to HEPP made during the year by the on behalf of its employees amounted to $5,361,178 (2008 - $5,022,300) and are included in the statement of operations.

The remaining employees of the Authority are eligible for membership in the provincially operated Civil Service Superannuation Plan. The pension liability for Authority employees is included in the Province of Manitoba's liability for the Civil Service Superannuation Fund. Accordingly, no provision is required in the financial statements relating to the effects of participation in the pension plan by the Authority and its employees.

14 NON-DEVOLVED FACILITIES

The Authority has a contract arrangement with The Salvation Army Dinsdale Personal Care Home, which provides long term care in the community of Brandon. In addition, the organization carries out the charitable, educational, religious and other benevolent objects and purposes of the Salvation Army. The organization is a registered charity under the Income Tax Act.

Until December 2005 the Authority had the responsibility of providing management services to Westman Regional Laboratory. At that time the management was transferred to Diagnostic Services of Manitoba (DSM). The Authority continues to provide other services which will be transitioned to DSM by 2010. Westman Lab provides laboratory services to a number of health care providers in Manitoba. The majority of Westman Lab's revenue is from Manitoba Health & Healthy Living.

The Authority does recognize that since there is economic dependence of both Dinsdale Personal Care Home and Westman Lab on the Authority, accounting control does exist between the Authority and these organizations. In light of this, management of the Authority has provided a financial summary of these organizations. All revenues received by the Authority on behalf of Westman Lab and Dinsdale Personal Care Home are reflected in the Authorities revenues and payments issued to these entities are recorded as expenses.

Financial statements of Dinsdale Personal Care Home and Westman Lab are available upon request.

AUDITORS' REPORT

To the Governing Council of The Salvation Army in Canada

We have audited the statement of financial position of The Salvation Army Dinsdale Personal Care Home as at March 31, 2009 and the statements of operations and changes in net assets for the year then ended. These financial statements are the responsibility of the Home's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of the Home as at March 31, 2009 and the results of its operations for the year then ended in accordance with Canadian generally accepted accounting principles.

Our audit was made for the purpose of forming an opinion on the basic financial statements taken as a whole. The current year's supplementary information included in the schedules is presented for purposes of additional analysis and is not a required part of the basic financial statements. Such supplementary information has been subjected to auditing procedures applied in the audit of the basic financial statements and, in our opinion, is fairly stated, in all material respects, in relation to the basic financial statements taken as a whole.

Excess (deficiency) of revenue over expenses	$ 9,261	$ (38,404)

See accompanying notes to financial statements.

THE SALVATION ARMY DINSDALE PERSONAL CARE HOME

Statement of Changes in Net Assets

Year ended March 31, 2009, with comparative figures for 2008

	Invested in property, plant and equipment	Internally restricted	Unrestricted	Total 2009	Total 2008
Balance, beginning of year	$ 82,859	$ 182,225	$ (81,262)	$ 183,822	$ 222,226
Excess (deficiency) of revenue over expenses	(2,469)	397	11,333	9,261	(38,404)
Inter-fund transfer	(8,685)	(4,262)	12,947	–	–
Balance, end of year	$ 71,705	$ 178,360	$ (56,982)	$ 193,083	$ 183,822

See accompanying notes to financial statements.

Purpose of organization:

The Salvation Army Dinsdale Personal Care Home (the Home) provides long-term care in the community of Brandon. The Home is owned and operated by The Governing Council of the Salvation Army in Canada pursuant to the Province of Manitoba Acts and Regulations governing supervisory and personal care homes, and licensed under the provisions of the Brandon Regional Health Authority (BRHA). In addition, the Home carries out the charitable, educational, religious and other benevolent objects and purposes of the Salvation Army. The Home is a registered charity under the *Income Tax Act* and accordingly is exempt from income taxes.

1. Continuity of operations:

At March 31, 2009, the Home's current liabilities exceed its current assets by $7,734 (2007 - $112,836). The Home also had an unrestricted net asset deficiency of $56,982 (2008 - $81,262) at March 31, 2009 due mainly as a result of operating losses in fiscal 2008 and prior.

The ability of the Home to continue as a going concern, to realize the carrying value of its assets and to discharge its liabilities when due is dependent on the Home continuing to operate at a break-even or surplus position in future years, and the continued support of the Brandon Regional Health Authority.

2. Significant accounting policies:

(a) Basis of presentation:

The accounts are maintained on the accrual method of reporting income and expenses.

(b) Revenue recognition:

The Home follows the deferral method of accounting for contributions. Restricted contributions are recognized as revenue in the year in which the related expenses are incurred. Unrestricted contributions are recognized as revenue when received or receivable if the amount to be received can be reasonably estimated and collection is reasonably assured. Contributions restricted for the purchase of property, plant and equipment are deferred and amortized into revenue on a straight-line basis, at a rate corresponding with the amortization rate for the related property, plant and equipment.

The Home is funded primarily by the Province of Manitoba in accordance with budget arrangements established by BRHA. Operating grants are recorded as revenue in the period to which they relate. Grants approved but not received at the end of a period are accrued. Where a portion of a grant relates to a future period, it is deferred and recognized in that subsequent period.

2. Significant accounting policies (continued):

(c) Property, plant and equipment:

Property, plant and equipment are recorded at cost. Contributed property, plant and equipment are recorded at fair value at the date of contribution. Repairs and maintenance costs are charged to expense. Betterments which extend the estimated useful life of an asset are capitalized. When an asset no longer contributes to the Home's ability to provide services, its carrying amount is written down to its residual value. Property, plant and equipment are amortized using the straight-line method over the estimated useful life of the assets:

Asset	Term
Building	40 years
Equipment and furnishings	5 - 10 years
Computer equipment	5 years

(d) Operating fund surpluses:

Approved operating fund surpluses are repayable to the BRHA.

(e) Pre-retirement entitlement obligation:

The Home has a contractual commitment to pay out to employees four days salary per year of service upon retirement subject to meeting certain criteria:

- have ten years service and have reached the age of 55 or

- qualify for the "eighty" rule which is calculated by adding the number of years service to the age of the employee.

The Home has recorded an accrual based on an actuarial valuation that includes employees who qualify at the year end balance sheet date and an estimate for the remainder of the employees who have not yet met the criteria above.

(f) Employee future benefits recoverable from BRHA:

Funding for vacation entitlement and pre-retirement obligations is provided by Manitoba Health through BRHA as part of its regular budget in the period in which the expenditures are made. Vacation entitlements and pre-retirement entitlements that will be funded by BRHA have been recorded in the statement of financial position as recoverable from BRHA.

2. Significant accounting policies (continued):

(g) Internally restricted net assets:

Internally restricted net assets consists of donations, bequests and other contributions received by the Home and by Salvation Army on behalf of the Home. It is drawn upon to cover costs not covered by funding from BRHA. As at March 31, 2009, $53,000 is owed by the unrestricted fund to the internally restricted fund.

(h) Cash held for restricted purposes:

Cash held for restricted purposes represents cash related to internally restricted net assets.

(i) Statement of cash flows:

A statement of cash flows has not been provided as it would not provide any further information to the users of the financial statements.

(j) Use of estimates:

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the year. Actual results could differ from those estimates.

(k) Financial instruments:

Financial assets and liabilities held-for-trading are measured at fair value with gains and losses recognized in excess of revenue over expenses. Financial instruments classified as held-to-maturity, loans and receivables and other liabilities are measured at amortized cost. Available-for-sale financial instruments are measured at fair value, with unrealized gains and losses recognized directly in unrestricted net assets.

The Home designated cash and cash held for restricted purposes as held-for-trading; resident trust deposits, accounts receivable, due from BRHA and employee future benefits recoverable from BRHA as loans and receivables; and accounts payable and accrued liabilities, accrued vacation payable, resident trust accounts payable, due to BRHA and long-term debt as other liabilities. The Home does not have held-to-maturity or available-for-sale financial instruments.

2. Significant accounting policies (continued):

Except for held-for-trading designated financial instruments, transaction costs that are directly attributable to the acquisition or issuance of financial assets or liabilities are accounted for as part of the respective asset or liability's carrying value at inception and amortized over the expected life of the financial instrument using the effective interest method. For held-for-trading financial assets and liabilities, transaction costs are recorded in the statement of operations as incurred.

(l) New accounting standards:

The Canadian Institute of Chartered Accountants (CICA) issued the following accounting standards that will come into effect for the Home's next fiscal year. The Home is in the process of determining the impact that these standards will have on its financial reporting.

CICA Section 3862, *Financial Instruments - Disclosure* and Section 3863, *Financial Instruments - Disclosure and Presentation* were to replace the existing Section 3861, *Financial Instruments - Disclosure and Presentation*, effective April 1, 2009 for the Home. These new sections revise and enhance disclosure requirements, and carry forward, unchanged, existing presentation requirements. These new sections place increased emphasis on disclosures about the nature and extent of risks arising from financial instruments and how the entity manages those risks. However, the CICA subsequently amended these sections to eliminate the requirement for not-for-profit entities to adopt these sections. Not-for-profit entities are permitted to continue to apply Section 3861 in place of Section 3862 and 3863. An entity that does so must disclose the fact.

In September 2008, a number of standards applicable to not-for-profit organizations were amended and new Section 4470, *Disclosures of Allocated Expenses by Not-for-Profit Organizations*, was issued. The new Section 4470 requires entities that make allocations of general support and fundraising costs to other functions to disclose the policies adopted for the allocation of expenses among functions, the nature of the expenses being allocated, the basis on which such allocations have been made, and the functions to which they have been allocated. In addition, the amendments to the not-for-profit organization standards include clarification of when revenues and expenses are to be reported on a gross basis; clarification of the treatment of internal and external restriction on net assets; and improved guidance related to application of GAAP hierarchy, capital asset standards and statement of cash flows. The Home will adopt these standards on April 1, 2009.

3. Financial instruments:

Interest rate risk:

Interest rate risk is the risk to the Home's earnings that arises from fluctuations in interest rates and the degree of volatility of these rates. The Home does not use derivative instruments to reduce this risk.

Credit risk:

Credit risk arises from the potential that a counterparty will fail to perform its obligations. However, most of the Home's accounts receivable are amounts due from government funding authorities, which minimizes credit risk.

Fair value:

The fair value of accounts receivable, due from BRHA, accounts payable and accrued liabilities and accrued vacation payable approximate their carrying value due to their short-term maturity.

The fair value of long-term debt approximates the carrying values as management believes the interest rates are comparable to market values.

4. Due from (to) Brandon Regional Health Authority:

	2009	2008
Funding advances from BRHA	$ –	$ (115,402)
Amounts receivable from BRHA	161,768	57,073
	$ 161,768	$ (58,329)

Funding advances received from BRHA are unsecured and non-interest bearing.

5. Property, plant and equipment:

	Cost	Accumulated amortization	2009 Net book value	2008 Net book value
Land	$ 133,615	$ –	$ 133,615	$ 133,615
Buildings	4,218,592	2,259,319	1,959,273	2,072,911
Equipment and furnishings	570,060	549,554	20,506	34,834
	$ 4,922,267	$ 2,808,873	$ 2,113,394	$ 2,241,360

5. Property, plant and equipment (continued):

Title to the Home's land and buildings is held by the Governing Council of the Salvation Army, which owns and operates the Home.

6. Employee benefits:

(a) Vacation payable:

The BRHA funds a portion of the vacation pay benefits of the Home, which is limited to the amount established at March 31, 2004 of $190,916. This amount is included in employee benefits recoverable from BRHA in the statement of financial position. Each year the Home is expected to fund the change in the liability from its annual funding.

(b) Pre-retirement entitlement obligation:

The Home has undertaken an actuarial valuation as of March 31, 2008 of the accrued pre-retirement entitlement obligation. The significant actuarial assumptions adopted in measuring the Home's accrued pre-retirement entitlement obligation include mortality and withdrawal rates, a discount rate of 6.7 percent (2008 - 5.50 percent), a rate of salary increase of 3.5 percent (2008 - 3.5 percent) plus age related merit/promotion scale and a factor ranging from 0 - 2.28 percent (2008 - 0 - 1.31 percent) for disability.

The amount of funding which will be provided by BRHA for these pre-retirement benefits of $199,105 was initially determined based on the accrued pre-retirement entitlement obligation at March 31, 2004, and was recorded as employee future benefits recoverable from BRHA. The Home is responsible for funding the pre-retirement entitlement obligation accumulated after March 31, 2004, including the interest accretion, through its annual funding from BRHA.

The employee future benefits recoverable from BRHA has no specified terms of repayment.

The fair value of the employee future benefits recoverable from BRHA approximates its carrying value as the interest component described above is comparable to current market rates.

7. Deferred contributions:

(a) Expenses of future periods:

Deferred contributions related to expenses of future periods represent unspent externally restricted funds for major repairs:

	2009	2008
Balance, beginning of year	$ 35,987	$ 86,175
Add funding received in current year	51,992	18,840
Less major repairs	(18,032)	(69,028)
	33,960	(50,188)
Balance, end of year	$ 69,947	$ 35,987

(b) Property, plant and equipment:

Deferred capital contributions related to property, plant and equipment represent the unamortized amount and unspent amount of donations and grants received for the purchase of property, plant and equipment and replacement of equipment. The amortization of deferred capital contributions is recorded as revenue in the statement of operations.

	2009	2008
Balance, beginning of year	$ 254,281	$ 258,162
Add:		
Payments of mortgage principal (note 8)	103,420	98,751
Major equipment funding	21,960	23,600
Other	(10,004)	1,583
Less:		
Amounts amortized to revenue	(125,497)	(127,815)
	(10,121)	(3,881)
Balance, end of year	$ 244,160	$ 254,281

The Home has an outstanding loan of $317,163 (2008 - $348,749) payable to the Province of Manitoba. The Province has committed to fund payments of interest and principal on this loan, but does so directly, and does not include these amounts in funding provided directly to the Home. As the Province is funding the payment of principal and interest directly, the loan is not presented as a separate liability on the statement of financial position, but was recognized as an increase in deferred capital contributions when first incurred.

8. Long-term debt:

	2009	2008
Canada Mortgage Housing Corporation, mortgage payable, interest at 4.31%, repayable $15,058 monthly interest and principal, maturing 2021	$ 1,757,243	$ 1,859,672
Current portion	(107,833)	(103,420)
	$ 1,649,410	$ 1,756,252

The Province of Manitoba, via the BRHA, provides funding for all payments of principal (note 7(b)) and interest on this debt.

Principal payments expected in the next five years are as follows:

2010	$ 107,833
2011	112,436
2012	117,195
2013	122,578
2014	127,780

9. Invested in property, plant and equipment:

	2009	2008
Property, plant and equipment	$ 2,113,394	$ 2,241,360
Amounts financed by:		
Deferred contributions	(244,160)	(254,281)
Long-term debt	(1,757,243)	(1,859,672)
Relating to capital assets within internally restricted funds	(40,286)	(44,548)
	$ 71,705	$ 82,859

10. Revenue - Brandon Regional Health Authority:

	2009	2008
Total approved funding	$ 3,114,893	$ 2,836,373
Less funding allocated to deferred contributions:		
Equipment	(21,960)	(23,600)
Major repairs	(18,840)	(18,840)
Mortgage principal	(103,420)	(98,752)
Funding for operations	$ 2,970,673	$ 2,695,181

11. Pension plan:

Substantially all of the employees of the Home are members of the Healthcare Employees Pension Plan - Manitoba (the Plan), which is a multi-employer defined benefit pension plan available to all eligible employees of the participating facilities. Plan members will receive benefits based on their length of service and on their average of annualized earnings calculated on the best five of the eleven consecutive years prior to retirement, termination, or death, that provide the highest earnings. The costs of the benefit plan are not allocated to the individual facilities. As a result, individual participating facilities are not able to identify their share of the underlying assets and liabilities and, accordingly, the Plan is accounted for as a defined contribution plan.

Variances between actuarial funding estimates and actual experience may be material and any differences are generally to be funded by the participating members. The most recent actuarial valuation of the plan as at December 31, 2007 reported the plan had a solvency deficiency. This deficiency will be funded by special payments out of current contributions. Any contribution deficiencies in the plan would be addressed through pension benefit reductions or contribution rate increases from the participating members. A change in underlying actuarial assumptions could cause a change in the actuarial value of accrued pension benefits and required service contributions. Contributions to the Plan made during the year by the Home on behalf of its employees amounted to $154,124 (2008 - $139,739) and are included in the statement of operations.

12. Related party transactions:

During the year, the Home had the following transactions and balances with The Salvation Army:

	2009	2008
Red Shield Appeal revenue designated for supervision	$ 65,000	$ 15,000
DHQ/THQ grant	–	45,000
Territorial Headquarters supervision expense	50,000	50,314

Auditors' Report

To the Members of
Westman Regional Laboratory

We have audited the statement of financial position of **Westman Regional Laboratory** as at March 31, 2009 and the statements of operations and surplus for the year then ended. These financial statements are the responsibility of the organization's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of the organization as at March 31, 2009 and the results of its operations and the changes in its financial position and cashflows for the year then ended in accordance with Canadian generally accepted accounting principles.

Westman Regional Laboratory
Summary of Significant Accounting Policies

March 31, 2009

Nature of Business

The organization is a non-profit entity, providing health services to Brandon and surrounding communities. Therefore any surplus that it generates is non-taxable. Effective December 1, 2005 the management of Westman Regional Laboratory Inc. was transferred to Diagnostic Services of Manitoba (DSM).

Capital Assets

Capital assets are recorded at cost.

Amortization is provided for on a straight-line basis in accordance with the following rates:

Building	-	2.5 %
Computer equipment	-	20 %
Equipment	-	10 %

Compensated Absences

Compensation expense is accrued for all employees as an entitlement to these payments earned, in accordance with the benefit plans for vacation in effect for Westman Regional Laboratory Services Inc.

Deferred Contributions - Capital Assets

Deferred capital contributions related to capital assets represent the unamortized amount and unspent amount of grants and donations received for the purchase of capital assets. The amortization of capital contributions is recorded as revenue in the statement of operations.

During the 2005 fiscal year, the Province of Manitoba assumed the long-term debt and third party debt of Westman Regional Laboratory and was recognized as borrowings in the Public Accounts of the Province of Manitoba.

Accordingly, the Westman Regional Laboratory has reclassified the long term debt and short term financing as deferred contributions in its financial statements.

Deferred Charges - Future Employee Benefits

A provision for future employee benefits including accrued vacation entitlements and accrued retirement obligations is recorded. Funding for the future employee benefits as at March 31, 2005 is recoverable from Manitoba Health and as such has been set up as a receivable. Effective April 1, 2005, any increase in the entitlement is the responsibility of Westman Regional Laboratory.

Surplus and Deficits

Approved surpluses are repayable to Manitoba Health; approved deficits are recoverable from Manitoba Health.

Westman Regional Laboratory
Summary of Significant Accounting Policies

March 31, 2009

Revenue Recognition	This organization receives the majority of its revenue from the Province of Manitoba. Revenue is recognized in the year in which the related operating expenditures are incurred. Revenue for capital assets is recognized in the amount of the amortization expense incurred during the year.
Use of Estimates	The preparation of financial statements in accordance with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from management's best estimates as additional information becomes available in the future.
Financial Instruments	The organization's financial instruments consist of accounts receivable, bank indebtedness, accounts payable and amounts due to (from) related parties. Unless otherwise noted, it is management's opinion that the organization is not exposed to significant interest, currency or credit risks arising from these financial instruments. The fair values of these financial instruments approximate their carrying values, unless otherwise noted. The entity has classified its accounts receivable as loans and receivables and its bank indebtedness, accounts payable and due to (from) related parties as other liabilities, which are measured at amortized cost.

1. Capital Assets

	2009		2008	
	Cost	**Accumulated Amortization**	Cost	Accumulated Amortization
Building	**$ 1,254,408**	**$ 1,124,369**	$ 1,254,408	$ 1,093,009
Equipment	**9,458,860**	**9,176,615**	9,458,860	9,047,627
Computer equipment	**358,356**	**284,514**	356,903	242,318
	$ 11,071,624	**$ 10,585,498**	$ 11,070,171	$ 10,382,954
Net book value		**$ 486,126**		$ 687,217

2. Related Party Transactions

These transactions are in the normal course of operations and are measured at the exchange value (the amount of consideration established and agreed to by the related parties), which approximates the arm's length equivalent value for sales of product.

The entity paid expenses to the Brandon Regional Health Authority, in the following amounts:

2009	2008
$ 457,729	$ 286,373

3. Deferred Contributions - Capital Assets

Deferred capital contributions related to capital assets represent the unamortized amount of grants and donations received for the purchase of capital assets. The amortization of capital contributions is recorded as revenue in the statement of operations.

	2009	2008
Balance, beginning of year	$ 171,238	$ 488,065
Add: Contributions receivable	11,634	87,837
Less: Amount amortized in the year	(202,544)	(404,664)
Balance, end of year	$ (19,672)	$ 171,238

Deferred contributions consist of the following:

	2009	2008
Amortization of capital assets in excess of contributions	$ (1,301,617)	$ (1,222,942)
Short term financing	599,633	665,870
Long-term debt	682,311	728,310
	$ (19,673)	$ 171,238

4. Statement of Cash Flows

A Statement of Cash Flows has not been provided as it would not provide any further information to the users of the financial statements.

5. Economic Dependence

The Westman Regional Laboratory Services Inc. is economically dependent on the Province of Manitoba for funding.

6. Comparative Figures

The comparative figures have been adjusted to conform to the current year's presentation.

AUDITOR'S REPORT

To the Board of Directors of the
BURNTWOOD REGIONAL HEALTH AUTHORITY INC:

We have audited the statement of financial position of BURNTWOOD REGIONAL HEALTH AUTHORITY INC. as at March 31, 2009 and the statements of operations, changes in net assets and cash flows for the year then ended. These financial statements are the responsibility of the Authority's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of the Authority as at March 31, 2009 and the results of its operations and its cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Nature and Purpose of Organization

Burntwood Regional Health Authority Inc. is a not for profit organization incorporated without share capital under the laws of Manitoba. The Authority is involved in the provision of health care services to persons resident in the Burntwood Region. The Authority is a registered charity and, as such, is exempt from income tax and may issue income tax receipts to donors.

Basis of Accounting

These financial statements were prepared using Canadian generally accepted accounting principles for not-for-profit organizations and the accrual basis of accounting. The accrual basis recognizes revenues as they become available and measurable; expenses are recognized as they are incurred and measurable as a result of receipts of goods or services and the creation of a legal obligation to pay.

Measurement Uncertainty

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingencies at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates

Basis of Reporting

These financial statements include the accounts of the following controlled not-for-profit organizations of the Authority:

Community Health Resources Centre
Community Health Services
Gillam Hospital
Ilford Community Health Centre
Leaf Rapids Health Centre
Lynn Lake Hospital
Northern Consultation Centre
Pikwitonei Community Health Centre
Thicket Portage Community Health Centre
Thompson General Hospital
Wabowden Community Health Centre
Northern Spirit Manor

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

New Accounting Policies

Effective April 1, 2008 the Organization adopted the following new accounting standards issued by the Canadian Institute of Chartered Accountants. (CICA).

Section 1535, *Capital Disclosures*

Section 1535 establishes standards for disclosing information about an organization's capital and how it is managed. These standards require an organization to disclose its objectives, policies and processes for managing capital, a summary of quantitative data about what it manages as capital and whether it complied with any externally imposed capital requirements to which it is subject and, if not, the consequences of such non-compliance.

Section 3862, *Financial Instruments – Disclosures and Section 3863, Financial Instruments – Presentation*

Sections 3862 and 3863 are intended to enhance the abilities of users of financial statements to evaluate the significance of financial instruments to an organization, related exposures and the management of these risks. These sections were subsequently amended to eliminate the requirement for not-for-profit entities and rate-regulated enterprises to adopt these sections. These organizations are permitted to continue to apply Section 3861 *Financial Instruments – Disclosure and Presentation* in place of Sections 3862 and 3863. An organization that does so must disclose this fact.

Section 3031, *Inventories*

Section 3031, *Inventories,* replaces Section 3030, *Inventories*. It provides more guidance on the measurement and disclosure requirements for inventories. The adoption of Section 3031 did not have an impact on the recognition, measurement or presentation of inventory in the Health Authority' financial statements.

Future Accounting Policy Changes

The CICA amended a number of standards applicable to not-for-profit organizations.

The CICA Section 4400 *Financial Statement Presentation by Not-For-Profit Organizations* was amended to:

- eliminate the requirement to treat net assets invested in capital assets as a separate component of net assets and, instead, permit a not-for-profit organization (NFPO) to present such an amount as a category of internally restricted net assets when it chooses to do so;
- clarify that revenues and expenses must be recognized and presented on a gross basis when a not-for-profit organization is acting as a principal in transactions;
- make Section 1540 *Cash Flow Statements* applicable to NFPOs; and
- make Section 1751 *Interim Financial Statements* applicable to NFPOs that prepare interim financial statements in accordance with GAAP.

Section 4430 *Capital Assets Held by Not-For-Profit Organizations* was amended to provide additional guidance with respect to the appropriate use of the scope exemption for smaller organizations.

Section 4460 *Disclosure of Related Party Transactions by Not-For-Profit Organizations* was amended to make the language in Section 4460 consistent with Section 3840 *Related Party Transactions*

New Section CICA 4470 *Disclosure of Allocated Expenses by Not-For-Profit Organizations* establishes disclosure standards for not-for-profit organizations that choose to classify their expenses by function and allocate expenses from one function to another. The main features of the new Section are:

- A requirement for an organization that allocates its fundraising and general support expenses to other functions to disclose the policies adopted for the allocation of expenses among functions, the nature of expenses being allocated and the basis on which such allocations have been made; and
- A requirement for an organization to disclose the amounts allocated from each of its fundraising and general support functions and the amounts and functions to which they have been allocated.

These new requirements are effective April 1, 2009 and will only require additional disclosure in the financial statements.

Revenue Recognition

The Authority follows the deferral method of accounting for contributions, which include donations and government grants.

Under the Health Services Insurance Act and regulations thereto, the Authority is funded primarily by the Province of Manitoba in accordance with budget arrangements established by Manitoba Health. Operating grants are recorded as revenue in the period to which they relate. Grants approved but not received at the end of an accounting period are accrued. Where a portion of a grant relates to a future period, it is deferred and recognized in that subsequent period. These financial statements reflect agreed funding arrangements with Manitoba Health with respect to the year ended March 31, 2009.

With respect to actual operating results, certain adjustments to funding will be made by Manitoba Health after completion of their review of the Authority's accounts.

In Globe Funding is funding approved by Manitoba Health for Regional Health Authority programs unless otherwise specified as Out of Globe Funding. This includes volume changes and price increases for the five service categories of Acute Care, Long-term Care, Community and Mental Health, Home Care and Emergency Response and Transportation. All additional costs in these five service categories must be absorbed from within the global funding provided.

Any operating surplus greater than 2% of budget related to global funding arrangements is recorded on the statement of financial position as a payable to Manitoba Health until such time as Manitoba Health reviews the financial statements. At that time Manitoba Health determines what portion of the approved surplus may be retained by the Authority, or repaid to Manitoba Health.

Under Manitoba Health policy the Regional Health Authority is responsible for In Globe deficits, unless otherwise approved by Manitoba Health.

Out of Globe Funding is funding approved by Manitoba Health for specific programs.

Any operating surplus related to Out of Globe funding arrangements is recorded on the statement of financial position as a payable to Manitoba Health until such time as Manitoba Health reviews the financial statements. At that time, Manitoba Health determines what portion of the approved surplus may be retained by the Authority, or repaid to Manitoba Health.

Conversely, any operating deficit related to Out of Globe funding arrangements is recorded on the statement of financial position as a receivable from Manitoba Health until such time as Manitoba Health reviews the financial statements. At that time, Manitoba Health determines their final funding approvals, which indicate the portion of the deficit that will be paid to the Authority. Any unapproved costs not paid to Manitoba Health are absorbed by the Authority.

Any adjustments will be reflected in the year the final statement of recommended costs is received from Manitoba Health.

Unrestricted contributions are recognized as revenue when received or receivable if the amount to be received can be reasonably estimated and collection is reasonably assured.

Externally restricted contributions are recognized as revenue in the year in which the related expenses are recognized. Contributions restricted for the purpose of capital assets are deferred and amortized into revenue on a straight-line basis, at a rate corresponding with the amortization rate for the related capital assets.

Restricted investment income is recognized as revenue in the year in which the related expenses are recognized. Unrestricted investment income is recognized as revenue in the year in which it is earned.

Contributed Materials and Services

Contributed materials and services, which are used in the normal course of the organization's operations and would otherwise have been purchased are recorded at their fair value at the date of contribution if fair value can be reasonably estimated.

Financial Instruments

Financial assets and liabilities are initially recorded at fair value. Measurement in subsequent periods depends on the financial instrument's classification. Financial instruments are classified into one of the following five categories: held for trading; available for sale; held to maturity; loans and receivables; and other financial liabilities. All financial instruments classified as held for trading or available for sale are subsequently measured at fair value with any change in fair value recoded in net earnings and other comprehensive income, respectively. All other financial instruments are subsequently measured at amortized cost.

The organization has designated its financial instruments as follows:

Cash is classified as a financial asset held for trading and is measured at fair value with gains and losses recognized in net earnings.

Accounts receivable, vacation entitlements receivable, pre-retirement receivable, and the amounts due from Province of Manitoba are classified as loans and receivables. These financial assets are recorded at their amortized cost using the effective interest rate method.

Accounts payable and accrued liabilities, vacation entitlements payable and Manitoba Health cash advance, are classified as other financial liabilities. These financial liabilities are recorded at their amortized cost using the effective interest rate method.

The organization has continued to apply Section 3861- *Financial Instruments- Disclosure and Presentation* in place of Sections 3862 and 3863

The fair value of cash, accounts receivable, vacation entitlements receivable, amounts due from the Province of Manitoba, accounts payable and accrued liabilities, vacation entitlements payable and Manitoba Health cash advance approximates their carrying values due to their short-term maturity.

The carrying value of the due from the Province of Manitoba – pre-retirement receivable approximates its fair value, as the annual interest accretion is funded.

The organization's activities are exposed to a variety of financial risks, which include:

a) Interest Rate Risk

The organization's main interest rate risk arises from short-term deposits raised for ongoing operations. The organization has no interest bearing debt. The organization periodically monitors the investment it makes and is satisfied with the credit rating of its banks.

b) Credit Risk

Credit risk arises from non-performance by counterparties of contractual financial obligations and is managed on a group basis. Credit risks arise from cash and deposits with banks, as well as credit exposures to customers for committed transactions. The organization does not have a significant concentration of credit risk with any one group.

c) Liquidity Risk

As at March 31, 2009 the organization had $ 5,199,515 in cash and accounts receivable and $ 5,018,377 in accounts payable. Prudent liquidity risk management implies maintaining sufficient cash through available funding via an adequate amount of committed credit facilities and the ability to close out financing positions. The organization manages liquidity risk by monitoring forecast and actual cash flows and matching the maturity profiles of financial assets and liabilities.

d) Concentration of Credit Risk

Exposure to credit risk arises through the failure of a customer or third party to meet its contractual obligations to the organization. The organization's maximum exposure to credit risk as at March 31, 2009 is its accounts receivable.

Inventories

Inventories are stated at the lower of cost and replacement cost. Cost is generally determined on a moving average basis.

Capital Management

The organization's objective when managing capital is to maintain sufficient capital to cover its cost of operations. The organization's capital consists of net assets.

The organization's capital management policy is to

- Meet short-term capital needs with working capital needs with working capital advances from the Manitoba Health and Healthy Living.
- Meet long term capital needs through long term debt with the Manitoba Health and Healthy Living.

The organization is not subject to externally imposed capital requirements.

There were no changes to the organization's approach to capital management during the period.

Capital Assets

Purchased capital assets are recorded at cost. Amortization based on the estimated useful life of the asset is calculated as follows:

Building	40 years straight-line basis
Computers	4 years straight-line basis
Equipment	10 years straight-line basis

Vacation Entitlements Receivable/Pre-retirement receivable – Manitoba Health

An offsetting receivable from Manitoba Health equal to the liability balance outstanding as at March 31, 2004 has been recorded.

The amount recorded as a receivable from the Province for pre-retirement costs was initially determined based on the value of the corresponding actuarial liability for pre-retirement costs as at March 31, 2004. Subsequent to March 31, 2004, the Province has included in its ongoing annual funding to the Burntwood Regional Health Authority, an amount equivalent to the change in the pre-retirement liability, which includes annual interest accretion related to the receivable. The receivable will be paid by the Province when it is determined that the funding is required to discharge the related pre-retirement liabilities.

Pre - Retirement Obligation

The Authority applies the accounting recommendations for employee future benefits contained in Section 3461 of the Canadian Institute of Chartered Accountants' Handbook.

Net Assets Internally Restricted

Part of the net assets of the Authority have been restricted as approved by the Board of Directors or in accordance with specific directives. Transfers among net asset classes are recorded when approved by the Board of Directors.

1. Accounts Receivable

	2009	2008
Patients Receivable	$ 1,957,264	$1,587,048

Construction in Progress	2,502,619	-	**2,502,619**	8,077,608	-	8,077,608
	$72,067,931	$26,941,222	**$45,126,709**	$70,499,112	$24,830,798	$45,668,314

Included in capital asset additions during the year is interest of $ nil (2008 - $165,057) which has been capitalized.

4. Bank Indebtedness

The Burntwood Regional Health Authority Inc. has an authorized operating line of credit of $2.6 million bearing interest at the bank's prime rate minus ½%. Security provided on this line of credit includes an overdraft borrowing agreement and a Letter of Comfort from Manitoba Health.

5. Deferred Revenue

Deferred revenue consists of Manitoba Health funding received in the fiscal year for various programs. This allocation of funding is recognized as revenue when program expenses are incurred. The change in the deferred revenue balance for the year is as follows:

	2009	2008
Balance, beginning of year	**$1,061,673**	$1,169,193
Amount recognized as revenue in the current year	**(843,645)**	(758,708)
Funding received	**1,721,132**	651,188
Balance, end of year	**$1,939,160**	$1,061,673

6. Line of Credit

	2009	2008
Demand operating line of credit payable to the Royal Bank of Canada bearing interest at prime minus 0.65% to a maximum of $ 253,000.	**$ 0**	$ 481,682

The Royal Bank line of credit is secured by a Letter of Comfort from Manitoba Health.

7. Capital Lease Obligation

	2009	2008
Burntwood Community Health Resource Centre		
The obligation under the capital lease is at an interest rate of 2% above prime adjusted semi-annually. The lease which is under flexible repayment terms is currently being repaid over 15 years with monthly payments of $16,681 (principal and interest)	$ 691,156	$ 839,896
Lease Payable – Nexcap; monthly payments of $ 1,149.66 including interest at 8.258 %. Due September 1, 2011	$ 33,774	$ -
Amount due within one year included in current liabilities	(171,697)	(148,740)
	$ 553,233	$ 691,156

The obligation under capital leases is secured by certain plant and office equipment.

The future minimum lease payments for the next 5 years are as follows:

2010	$171,697
2011	$183,608
2012	$188,795
2013	$180,830
2014	$ -

8. Deferred Contributions

a) Expenses of future periods

Deferred contributions related to expenses of future periods represent unspent externally restricted grants for major repairs and construction projects.

	2009	2008
Balance, beginning of year	$ 266,444	$ 252,405
Add amount received during year	31,692	14,039
Deduct: transfer re: Personal Care Home	(60,038)	-
Balance, end of year	$ 238,098	$ 266,444

b) Capital Assets

Deferred capital contributions related to capital assets represent the unamortized amount and unspent amount of donations, grants received and funding received for the purchase of capital assets. The amortization of deferred capital contributions is recorded as revenue in the statement of operations at rates which match the amortization of the related capital asset purchased with the donations, grants or funding received.

	2009	2008
Balance, beginning of year	$ 39,386,757	$32,575,279
Additional contributions received	1,358,540	10,002,117
Less amounts amortized to revenue	(2,144,516)	(1,877,017)
Less: transfer of DSM assets (Note 15)	-	(1,313,622)
Balance, end of year	$ 38,600,781	$39,386,757

9. Net Assets Invested in Capital Assets

a) Investment in capital assets is calculated as follows:

	2009	2008
Capital assets	$45,126,709	$45,668,314
Amount financed by:		
Deferred contributions	38,600,781	39,386,757
Lines of credit	-	481,682
Capital leases	724,930	839,896
	$ 5,800,998	$ 4,959,979

b) Change in net assets invested in capital assets is calculated as follows:

	2009	2008
Excess (Deficiency) of revenue over expenses for the year		
Amortization of deferred contributions related to capital assets	$ 2,144,516	$1,877,017
Amortization of capital assets	2,110,424	2,056,550
	$ 34,092	$(179,533)
Net changes in investment in capital assets		
Purchase of capital assets	$ 1,568,819	$6,589,550
Payment of capital lease obligation	155,016	139,186
Increase in capital lease obligation	(40,050)	-
Advances on line of credit	481,682	2,493,500
Manitoba Health – Capital asset funding	(930,630)	(9,625,725)
Manitoba Health deferred asset funding	(427,910)	(376,392)
	806,927	(779,881)
	$ 841,019	$ (959,414)

10. **Revenue from Manitoba Health**	2009	2008
Revenue as per Manitoba Health funding document	$ 73,363,934	$65,448,755
Add: 2008 – 2009 Waitlist Funding	184,000	-
2007 – 2008 Waitlist funding	-	127,445
2008-2009 Funding for STI/HIV Control	114,300	-
HPV Funding -	9,428	-
Wage standardization and market adjustment	690,062	127,927
PDN Upgrade	7,300	2,825
MNU Northern Retention Allowance	1,298,850	-
Medical remuneration	-	45,164
2008-2009 Accelerated Surge Capacity	2,727	-
Immunization funding	46,703	-
Accelerated Supply Payments	260,100	-
Interest on debt repayment	36,193	-
Reciprocal Revenue	-	252,275
Acquired Brain Injury Unit	-	195,053
Ilford	-	41,865
Louis Riel Day	-	37,580
Med 2020	-	33,662
Deferred Personal Care Home Recruitment	-	130,000
Dialysis	-	87,308
	$ 2,649,663	$1,081,104
Deduct:		
Nelson House PCH funding – flow through	$ (340,854)	$ (335,938)
Healthy Living budget transfer	(75,000)	-
Interest funding (actual)	(226,633)	(161,934)
	$ (642,487)	$ (497,872)
Total funding approved by Manitoba Health	$ 75,371,110	$66,031,987
Deduct:		
Amounts recorded as deferred contributions	(964,203)	(596,592)
Revenue from Manitoba Health	$ 74,406,907	$65,435,395

11. Pension Plans

Most of the employees of the Authority are members of the Healthcare Employees Pension Plan (the "Plan"), which is a multi-employer defined benefit pension plan available to all eligible employees. Plan members will receive benefits based on the length of service and on the average annualized earnings calculated on the best five of the eleven consecutive years prior to retirement, termination or death, that provide the highest earnings. The costs of the benefit plan are not allocated to the individual entities within the related group. As a result, individual entities within the related group are not able to identify their share of the underlying assets and liabilities. Therefore the plan is accounted for as a defined contribution plan in accordance with the requirements of the Canadian Institute of Chartered Accountants' Handbook section 3461.

Pension assets consist of investment grade securities. Market and credit risk on these securities are managed by the Plan by placing plan assets in trust and through the Plan investment policy. Pension expense is based on Plan management's best estimates, in consultation with its actuaries, of the amount, together with the 5% of basic annual earnings up to the Canada Pension Plan ceiling contributed by employees, required to provide a high level of assurance that benefits will be fully represented by fund assets at retirement, as provided by the Plan. The funding objective is for employer contributions to the Plan to remain a constant percentage of employees' contributions.

Variances between actuarial funding estimates and actual experience may be material and any differences are generally to be funded by the participating members. The most recent actuarial valuation of the plan as at December 31, 2006, indicates the current contribution levels are adequate to fund the cost of benefits. Effective July 1, 2008, the contribution rates increased by 1.4% for each of the employer and employee. Actual contributions to the plan made during the year by the Authority on behalf of its employees amounted to $ 1,660,226 (2008 – $1,472,362) and are included in the statement of operations.

Some of the employees of the Authority are eligible for membership in the provincially operated Civil Service Superannuation Plan. The pension liability for Authority employees is included in the Province of Manitoba liability related to the Civil Service Superannuation Plan. Accordingly, no provision is required in the financial statements relating to the effects of participating in the plan by the Authority and its employees.

12. Pre-retirement Obligations

	2009	2008
Members of the Health Employees Pension Plan	**$ 1,920,423**	$1,920,423
Members of the Civil Service Superannuation Plan	**199,530**	199,530
	$ 2,119,953	$2,119,953

The RHA's contractual commitment, based on an actuarial valuation, for the pre-retirement entitlement for members of the Healthcare Employees Pension Plan is to pay out four days of salary for each year of service upon retirement if the employee complies with one of the following conditions:

- have ten year service and have reached the age of 55 or
- qualify for the "eighty" rule which is calculated by adding the number of years service to the age of the employee or
- retire at or after age 65 or
- terminate employment at any time due to permanent disability

The RHA's contractual commitment, based on an actuarial valuation, for the pre-retirement entitlement for members of the Civil Service Superannuation Plan is to pay out, at retirement to employees who have reached the age of 55 and have nine or more years of service, the following severance pay:

- one week of severance pay for each year of service up to 15 years of service
- two weeks of additional severance pay for each increment of five years of service past the 15 years of service up to 35 years of service

The Authority undertook an actuarial valuation of the accrued pre-retirement entitlements as of March 31, 2009. The significant actuarial assumptions adopted in measuring the Authority's accrued retirement entitlements include mortality and withdrawal rates, a discount rate of 6.70% (2008- 5.50%) and a rate of salary increase of 3.5% (2008 – 3.5%) plus age related merit/promotion scale with no provision for disability.

13. Contingencies

a) The nature of the health care industry's activities is such that there is usually litigation pending or in prospect at any time. With respect to claims at March 31, 2009, management believes the Authority has valid defenses and appropriate insurance coverage in place. In the event any claims are successful, management believes that such claims are not expected to have a material effect on the Authority's financial position.

b) On July 1, 1987, a group of health care organizations, ("subscribers"), formed Healthcare Insurance Reciprocal of Canada ("HIROC"). HIROC is registered as a Reciprocal pursuant to provincial Insurance Acts, which permits persons reciprocal contracts of the indemnity insurance. HIROC facilitates the provision of liability insurance coverage to health care organizations in the provinces of Ontario, Manitoba, Saskatchewan and Newfoundland. Subscribers pay annual premiums, which are actuarially determined, and are subject to assessment for losses in excess of such premiums of any experience by the group of subscribers for the years in which they were a subscriber. No such assessments have been made to March 31, 2009.

c) Due to the dismissal of three senior executives in a previous period, litigation proceedings were on going at the time of the audit report. The likelihood or financial implications if any, are not determinable at the time of this report.

14. Inter Program Charges

Included in the statement of operations are inter program charges which result in a reduction in Regional Health Authority costs of $30,502 and an increase in ancillary costs of $30,502.

15. Transfer of DSM Assets

During the prior fiscal year, the Health Authority was advised by Manitoba Health that designated assets were to be transferred to Diagnostic Services of Manitoba Inc. at net book value. At the date of transfer the value of these assets were $1,313,622.

16. Economic Dependence

The Health Authority is economically dependent on Manitoba Health as substantially all the revenue of the organization is funding by Manitoba Health.

Auditors' Report

To the Board of Directors of
Churchill Regional Health Authority Inc.

We have audited the statement of financial position of Churchill Regional Health Authority Inc. (RHA) as at March 31, 2009, and the statements of operations, changes in net assets and cash flows for the year then ended. These financial statements are the responsibility of the RHA's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of the RHA as at March 31, 2009, and the results of its operations and its cash flows for the year then ended, in accordance with Canadian generally accepted accounting principles.

Churchill Regional Health Authority Inc.
Summary of Significant Accounting Policies

March 31, 2009

Nature and Purpose of Organization

Churchill Regional Health Authority Inc. (RHA) is a non-profit organization incorporated in 1996 without share capital under the Corporations Act of Manitoba. Churchill RHA Inc. is the regional health authority for the Churchill Health Centre. The RHA provides hospital and social service facilities to Churchill and the surrounding area, including eight communities in the Kiviliq Region.

The RHA is a registered charitable organization under the Income Tax Act and, as such, is exempt from income tax and may issue income tax receipts to donors.

The following accounting policies followed by the Churchill Regional Health Authority Inc. are in accordance with Canadian generally accepted accounting principles for not-for-profit organizations.

Revenue Recognition

The RHA follows the deferral method of accounting for contributions, which include donations and Government funding.

Externally restricted contributions are recognized as revenue in the year in which the related expenses are incurred. Contributions restricted for the purchase of capital assets are deferred and amortized into revenue on a straight-line basis, at a rate corresponding with the amortization rate for the related capital assets.

Unrestricted contributions are recognized as revenue when received or receivable if the amount to be received can be reasonably estimated and collection is reasonably assured.

Revenue from ancillary activities are recorded when the product is sold or when the service is rendered.

Management Estimates

The preparation of financial statements, in accordance with Canadian generally accepted accounting principles, requires management to make certain estimates and assumptions that affect the reported amount of assets and liabilities, and disclosure of contingent assets and liabilities, at the date of the financial statements and the reported amount of revenues and expenses during the period. These estimates are reviewed periodically and, as adjustments become necessary, they are reported in earnings in the period in which they become known.

Churchill Regional Health Authority Inc.
Summary of Significant Accounting Policies

March 31, 2009

Inventory

Inventory is stated at the lower of cost, using a first-in, first-out basis of calculation, and net realizable value. Included in the hospital expense line are inventory purchases of $429,991 (2008 - $390,730).

Capital Assets

Purchased capital assets are recorded at cost. Contributed capital assets are recorded at fair value at the date of contribution. Where fair value cannot be reasonably determined, contributed capital assets are recorded at a nominal amount. Assets acquired under capital leases are amortized over the estimated life of the assets. Capital assets are amortized on a straight-line basis using the following annual rates.

Buildings	2.5 %
Building service equipment	4 - 10 %
Major equipment	6.7 - 20 %
Equipment under capital leases	20 %
Computer equipment	20 %

Separately Funded Programs

Adjustments to prior years, if any, resulting from a final review by the funding agency are reported in the statement of operations in the year the funding agency completes their review.

Accrued Benefit Entitlements

Benefit entitlements, which include vacation pay and pre-retirement leave entitlements are recorded in the year that the services to which they relate are provided.

Retirement Entitlement Obligations

The Authority applies the accounting recommendations for employee future benefits contained in Section 3461 of the Canadian Institute of Chartered Accountants' Handbook.

Capital Disclosures

The Authority considers its capital to be its unrestricted net assets, externally restricted net assets, deferred contributions related to capital assets and amounts invested in capital assets. The Authority's objectives when managing its capital are to safeguard its ability to continue as a going concern so it can continue to provide health services to the community. Annual budgets are developed and monitored to ensure the Authority's capital is maintained at an appropriate level. Debt is utilized for projects where specific approvals from Manitoba Health have been obtained in advance of borrowings. There are no externally imposed restrictions other than the information provided in note 11.

Financial Instruments

The RHA utilizes various financial instruments. Unless otherwise noted, it is management's opinion that the RHA is not exposed to significant interest, currency or credit risks arising from these financial instruments and the carrying amounts approximate fair values.

The RHA classifies its financial instruments into one of the following categories based on the purpose for which the asset was acquired. The RHA's accounting policy for each category is as follows:

Held-for-trading

This category is comprised of cash and bank. They are carried in the balance sheet at fair value with changes in fair value recognized in the income statement. Transaction costs related to instruments classified as held-for-trading are expensed as incurred.

Loans and receivables

These assets are non-derivative financial assets resulting from the delivery of cash or other assets by a lender to a borrower in return for a promise to repay on a specified date or dates, or on demand. They arise principally through the provision of goods and services to customers, but also incorporate other types of contractual monetary assets comprised of accounts receivable, Due from Manitoba Health and the accounts receivable - Province of Manitoba. They are initially recognized at fair value and subsequently carried at amortized cost, using the effective interest rate method, less any provision for impairment. Transaction costs related to loans and receivables are expensed as incurred The carrying value of all loans and receivables approximates their fair values. This applies to the long-term accounts receivable - Province of Manitoba as well as the annual interest accretion is funded.

Other financial liabilities

Other financial liabilities includes all financial liabilities other than those classified as held-for-trading and comprises accounts payable and accruals, due to Manitoba Health and vacation, overtime and statutory holiday pay payable. These liabilities are initially recognized at fair value and subsequently carried at amortized cost using the effective interest rate method. Transaction costs related to other financial liabilities are expensed as incurred. The carrying value all financial liabilities approximate their fair value.

New Accounting Pronouncements

Recent accounting pronouncements that have been issued but are not yet effective, and have a potential implication for the RHA, are as follows:

Financial Statement Concepts

CICA Handbook Section 1000, Financial Statement Concepts has been amended to focus on the capitalization of costs that truly meet the definition of an asset and de-emphasizes the matching principle.

The revised requirements are effective for annual and interim financial statements relating to fiscal years beginning on or after October 1, 2008. The RHA is currently evaluating the impact of the adoption of this change on the disclosure within its financial statements.

Cash Flow Statements

Section 1540 was amended to include not-for-profit organizations within its scope. This standard is effective for interim and annual financial statements relating to fiscal years beginning on or after January 1, 2009. The RHA is currently assessing the impact of the new standard.

Financial Statement Presentation by Not-for-Profit Organizations

Section 4400 has been amended for the treatment of net assets invested in capital assets and for the presentation of revenues and expenses. The new standard is effective for interim and annual financial statements relating to fiscal years beginning on or after January 1, 2009. The RHA is currently assessing the impact of the new standard.

Disclosure of Related Party Transactions by Not-for-Profit Organizations

Section 4460 includes modifications to the scope of the standards. The changes are effective for interim and annual financial statements beginning on or after January 1, 2009. The RHA is currently assessing the impact of the new standard.

Financial instruments - disclosures and presentation

On October 15, 2008, the CICA deferred indefinately the requirement of not-for-profit organizations to implement new standards dealing with certain financial instrument disclosures and presentation. The RHA elected to defer application of these standards.

1. Change in Accounting Policy

Capital Disclosures

On April 1, 2008, the RHA adopted a requirement of the CICA to provide disclosure about how it manages its net assets (see Summary of Significant Accounting Policies).

Inventory

On April 1, 2008, the RHA adopted a requirement of the CICA to provide additional disclosures regarding the amount of inventory recognized as an expense during the year, any write-down of inventory or reversal of write-down of inventory during the year and any circumstances surrounding any write-downs. The applicable information required by the RHA is noted in the Summary of Signficant Accounting Policies for inventory.

2. Accounts Receivable

	2009	2008
General operating	$ 212,374	$ 209,593
Pharmacy	2,703	2,703
Separately funded and working capital advance	(13,805)	14,463
Daycare	47,561	27,343
Other	(15,283)	(16,842)
	$ 233,550	$ 237,260

3. Due from Manitoba Health

	2009	2008
Approved capital funding	$ 7,517	$ 7,517
Other	74,350	34,067
	$ 81,867	$ 41,584

4. Current and Future Employee Benefits Recoverable from Manitoba Health

Employee pre-retirement obligations are accrued as incurred based on an actuarial estimation while vacation benefits are accrued as earned by the employees.

Due to the nature of the benefits, the pre-retirement benefits recoverable and payable are classified as long-term whereas the vacation benefits recoverable and payable are classified as current.

Prior to March 31, 2004 changes in the liability related to vacation were recoverable from Manitoba Health. At that date, Manitoba Health advised that subsequent to March 31, 2004 all funding related to past and future vacation entitlement costs would be included in in-globe funding and that the maximum liability to be recognized by Manitoba Health to facilities would be capped at March 31, 2004 levels. Accordingly, each year as vacation entitlements are paid and earned by Authority's employees, the related vacation entitlement receivable is collected and re-established up to this maximum amount.

5. Capital Assets

	2009		2008	
	Cost	Accumulated Amortization	Cost	Accumulated Amortization
Buildings	$ 1,145,179	$ 730,320	$ 1,145,179	$ 701,690
Building service equipment	4,299,334	1,861,695	4,264,347	1,624,333
Major equipment	3,197,847	2,756,788	3,139,768	2,657,864
Computer equipment	706,509	568,035	696,522	521,618
Equipment under capital lease	121,427	121,427	121,427	121,427
	$ 9,470,296	$ 6,038,265	$ 9,367,243	$ 5,626,932
Net book value		$ 3,432,031		$ 3,740,311

6. Due to Manitoba Health

In Globe Funding

In Globe funding is funding approved by Manitoba Health for Regional Health Authority programs unless otherwise specified as Out of Globe funding. This includes volume changes and price increases for the five service categories of Acute Care, Long-term Care, Community and Mental Health, Home Care, and Emergency Response and Transport. All additional costs in these five service categories must be absorbed from within the global funding provided.

Any operating surplus greater than 2% of budget related to In Globe funding arrangements is recorded on the statement of financial position as an amount repayable to Manitoba Health until such time as Manitoba Health reviews the financial statements. At that time, Manitoba Health determines what portion of the approved surplus may be retained by the Authority, or repaid to Manitoba Health. For the year ended March 31, 2009, the RHA recorded $746,800 (2008 - $997,500) as a surplus repayable to Manitoba Health.

Under Manitoba Health policy, the Regional Health Authority is responsible for In Globe deficits, unless otherwise approved by Manitoba Health.

	2009	2008
2006/2007 surplus repayable	$ -	$ 937,500
2007/2008 surplus repayable	997,500	997,500
2008/2009 surplus repayable	746,800	-
	$ 1,744,300	$ 1,935,000

Out of Globe Funding

Out of Globe funding is funding approved by Manitoba Health for specific programs.

Any operating surplus related to Out of Globe funding arrangements is recorded on the statement of financial position as a payable to Manitoba Health until such time as Manitoba Health reviews the financial statements. At that time, Manitoba Health determines what portion of the approved surplus may be retained by the Authority or repaid to Manitoba Health.

Conversely, any operating deficit related to Out of Globe funding arrangements is recorded on the statement of financial position as a receivable from Manitoba Health until such time as Manitoba Health reviews the financial statements. At that time, Manitoba Health determines their final funding approvals, which indicate the portion of the deficit that will be paid to the Authority. Any unapproved costs, not paid by Manitoba Health, are absorbed by the RHA.

7. Capital Lease Obligations

The following is a schedule of minimum lease payments under a capital lease, expiring November 2011, together with the balance of the obligation under the capital lease.

2010	$ 8,643
2011	8,643
2012	16,809
	34,095
Less imputed interest at 5.75%	3,245
	30,850
Less amount due within one year included in current liabilities	6,660
	$ 24,190

8. Pre-retirement Entitlements

a) Accrued Pre-retirement Entitlement

	2009	2008
Members of the Health Employees Pension Plan	**$ 254,096**	$ 229,204

Accrued retirement obligations are based on an actuarial valuation as at March 31, 2009. The RHA's contractual commitment for the pre-retirement entitlement for members of the Health Employee Pension Plan is to pay out four days of salary for each year of service upon retirement if the employee complies with one of the following conditions.

- have ten years service and have reached the age of 55;
- qualify for the "eighty" rule which is calculated by adding the number of years service to the age of the employee;
- retire at or after age 65; or
- terminate employment at any time due to permanent disability.

The significant actuarial assumptions adopted in measuring the RHA's accrued pre-retirement entitlements include mortality and withdrawal rates, a discount rate of 6.7% (2008 - 5.5%) and a rate of salary increase of 3.5% (2008 - 3.5%) plus age related merit / promotion scale.

Funding of the retirement obligation is recoverable from Manitoba Health and has been recorded as a receivable. The amount of recoverable and the receivable from Manitoba Health has been capped at the amount of the liability owing as at March 31, 2004 being $197,540. Subsequent to March 31, 2004, the Province has included in its annual funding to the Churchill Regional Health Authority, an amount equivalent to the change in the pre-retirement liability, which includes annual interest accretion related to the receivable. The annual increase in obligation over the balance of the liability as at March 31, 2004 will be recognized as an expense in the statement of operations.

8. Pre-retirement Entitlements continued

b) Pension Plan

Most of the employees of the RHA are members of the Healthcare Employees Pension Plan (the "Plan"), which is a multi-employer defined benefit pension plan available to all eligible employees. Plan members will receive benefits based on the length of service and on the average annualized earnings calculated on the best five of the eleven consecutive years prior to retirement, termination or death, that provide the highest earnings. The cost of the benefit plan is not allocated to the individual entities within the related group. As a result, individual entities within the related group are not able to identify their share of the underlying assets and liabilities. Therefore, the Plan is accounted for as a defined contribution plan in accordance with the requirement of the Canadian Institute of Chartered Accountants' Handbook section 3461.

Pension assets consist of investment-grade securities. Market and credit risk on these securities are managed by the Plan by placing plan assets in trust and through the Plan investment policy.

Pension expense is based on Plan management's best estimates, in consultation with its actuaries, of the amount together with the 5% of basic annual earnings up to the Canada Pension Plan ceiling contributed by employees, required to provide a high level of assurance that benefits will be fully represented by fund assets at retirement, as provided by the Plan. The funding objective is for employer contributions to the Plan to remain a constant percentage of employee contributions.

Variances between actuarial funding estimates and actual experience may be material and any differences are generally to be funded by the participating members. The most recent actuarial valuation of the Plan as at December 31, 2007 indicates that the Plan is in deficit. Actual contributions to the Plan made during the year by the RHA on behalf of its employees amounted to $278,604 (2008 - $253,141) and are included in the statement of operations.

9. Deferred Contributions Related to Capital Assets

Deferred capital contributions related to capital assets represent the unamortized amount of funding assistance received for the purchase of capital assets. The amortization of deferred capital contributions is recorded as revenue in the statement of operations.

Changes in the deferred contribution balance are as follows.

	2009	2008
Balance, beginning of year	**$ 3,671,480**	$ 4,030,144
Add deferred contributions received in the current year	**124,538**	277,110
Less deferred contribution reduction - disposed capital assets	**-**	(234,841)
Less amount amortized to revenue in the year	**(394,837)**	(400,933)
Balance, end of year	**$ 3,401,181**	$ 3,671,480

10. Net Assets Invested in Capital Assets

Net assets invested in capital assets is determined as follows.

	2009	2008
Capital assets	$ 3,432,031	$ 3,740,311
Deferred contributions related to capital assets	(3,401,181)	(3,671,480)
Capital lease obligations	(30,850)	(39,010)
	$ -	$ 29,821

11. Externally Restricted - Separately Funded Programs

The various surpluses and deficits of the separately funded programs are aggregated and recorded as one figure in the financial statements. They remain designated for the respective separately funded programs.

	2009	2008
Accumulated deficit - Churchill Child and Family Services (schedule 1)	$ (80,877)	$ (17,008)
Accumulated deficit - Receiving Home (schedule 2)	(187,235)	(204,462)
Accumulated surplus - Nunavut Services (schedule 3)	61,724	47,989
Accumulated surplus - Baby First and Healthy Baby (schedule 4)	(6,405)	61,560
Accumulated surplus - Health Promotion	2,748	2,748
	$ (210,045)	$ (109,173)

12. Contingencies

The nature of the RHA's activities is such that there can be litigation or arbitration pending or in prospect at any time. With respect to claims at March 31, 2009, management believes the RHA has valid defences and appropriate insurance coverage in place. In the event any claims are successful, management believes that such claims would not have a material effect on the RHA's financial position.

A group of hospitals, including the RHA, have formed the Healthcare Insurance Reciprocal of Canada ("HIROC"). HIROC is a pooling of the public liability insurance risks of its members. All members of the pool pay annual premiums which are actuarially determined. All members are subject to reassessment for losses, if any, experienced by the pool for the years in which they were members, and these losses could be material. No reassessments have been made to March 31, 2009.

13. Net Asset Transfer

The transfer of net assets from (to) the amount invested in capital assets from unrestricted net assets is determined as follows.

	2009	2008
Capital asset additions	**$ (103,051)**	$ (308,267)
Annual funding for capital assets purchases	**124,538**	277,110
Capital lease debt payments	**(8,160)**	(12,112)
	$ 13,327	$ (43,269)

14. Revenue from Manitoba Health

Revenue as per Manitoba Health's final funding document	$ 10,928,352	
Deduct:		
Capital interest	(58,752)	
Total funding approved by Manitoba Health	10,869,600

Auditors' Comments on Supplementary Financial Information

To the Board of Directors of
Churchill Regional Health Authority Inc.

We have audited the financial statements of Churchill Regional Health Authority Inc. as at March 31, 2009 and reported thereon dated May 21, 2009. The financial information presented hereinafter was derived from the accounting records tested by us as part of the auditing procedures followed in our examination of the financial statements and, in our opinion, it is fairly presented in all material respects in relation to the financial statements taken as a whole.

Auditors' Report

To the Board of Directors of
INTERLAKE REGIONAL HEALTH AUTHORITY INC.:

We have audited the consolidated statement of financial position of **INTERLAKE REGIONAL HEALTH AUTHORITY INC.** as at March 31, 2009 and the consolidated statements of operations, changes in net assets and cash flows for the year then ended. These financial statements are the responsibility of the Authority's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, the financial statements present fairly, in all material respects, the financial position of the Authority as at March 31, 2009 and the results of its operations and its cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

Supplementary Information		
Interest paid during the year	**$ 25,718**	$ 28,394

The accompanying summary of significant accounting policies and notes are an integral part of these financial statements.

The financial statements have been prepared by management in accordance with Canadian generally accepted accounting principles for not-for-profit organizations.

Revenue Recognition

The Authority follows the deferral method of accounting for contributions which include donations and government grants.

Under the Health Services Insurance Act and regulations thereto, the Authority is funded primarily by the Province of Manitoba in accordance with budget arrangements established by Manitoba Health and Healthy Living (MHHL). Operating grants are recorded as revenue in the period to which they relate. Grants approved but not received at the end of an accounting period are accrued. Where a portion of a grant relates to a future period, it is deferred and recognized in that subsequent period. These financial statements reflect agreed funding arrangements with MHHL with respect to the year ended March 31, 2009.

With respect to actual operating results, certain adjustments to funding will be made by MHHL after completion of their review of the Authority's accounts.

In-Globe Funding is funding approved by MHHL for the five service categories of Acute Care, Long-term Care, Community and Mental Health, Home Care and Emergency Response and Transport.

Any operating surplus greater than 2% of budget related to global funding arrangements is recorded on the statement of financial position as a payable to MHHL until such time as MHHL reviews the financial statements. At that time, MHHL determines what portion of the approved surplus may be retained by the Authority, or repaid to MHHL.

Under MHHL policy, the Regional Health Authority is responsible for In-Globe deficits, unless otherwise approved by MHHL.

Out-of-Globe Funding is funding approved by MHHL for specific programs.

Any operating surpluses related to Out-of-Globe funding arrangements are recorded on the statement of financial position as a payable to MHHL until such time as MHHL reviews the financial statements. At that time, MHHL determines what portion of the approved surplus may be retained by the Authority, or repaid to MHHL.

Revenue Recognition (continued)

Conversely, any operating deficits related to Out-of-Globe funding arrangements are recorded on the statement of financial position as a receivable from MHHL until such time as MHHL reviews the financial statements. At that time, MHHL determines their final funding approvals which indicate the portion of the deficit that will be paid to the Authority. Any unapproved costs not paid by MHHL are absorbed by the Authority.

Any adjustments will be reflected in the year the final statement of recommended costs is received from MHHL.

Unrestricted contributions are recognized as revenue when received or receivable if the amount to be received can be reasonably estimated and collection is reasonably assured.

Externally restricted contributions are recognized as revenue in the year in which the related expenses are recognized. Contributions restricted for the purchase of capital assets are deferred and amortized into revenue on a straight-line basis, at a rate corresponding with the amortization rate for the related capital assets.

Restricted investment income is recognized as revenue in the year in which the related expenses are recognized. Unrestricted investment income is recognized as revenue in the year in which it is earned.

Inventories

Inventories are valued at the lower of cost and net realizable value, cost being determined by the first-in, first-out method.

Employee Future Benefits

Pension and other employee future benefit costs are determined using the projected benefit method prorated on years of service and based on best estimate assumptions.

Compensated Absences

Compensation expense is accrued to all employees as entitlement to these payments is earned in accordance with the Authority's benefit plans for vacation and retirement allowances.

Use of Estimates

In preparing the Authority's financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements and reported amounts of revenue and expenditures during the period. Actual results could differ from these estimates.

INTERLAKE REGIONAL HEALTH AUTHORITY INC.
Summary of Significant Accounting Policies

March 31, 2009

Contributed Services

A substantial number of volunteers contribute a significant amount of their time each year. Because of the difficulty of determining the fair value, contributed services are not recognized in the financial statements.

Capital Assets

Purchased capital assets are recorded at cost. Contributed capital assets are recorded at fair value at the date of contribution. Repairs and maintenance costs are charged to expense. Betterments which extend the estimated useful life of an asset are capitalized. When a capital asset no longer contributes to the Authority's ability to provide services, its carrying amount is written down to its residual value.

Capital assets are amortized on a straight-line basis using the following annual rates:

Land improvements	5%
Buildings	3.33% and 5%
Ambulances	20%
Equipment and computers	10% - 20%

Financial Instruments

The Authority utilizes various financial instruments.

All transactions related to financial instruments are recorded on a settlement date basis.

The Authority classifies its financial instruments into one of the following categories based on the purpose for which the asset was acquired. The Authority's accounting policy for each category is as follows:

Held-for-trading

This category is comprised of cash and short-term investments (guaranteed investment certificates). They are carried in the consolidated statement of financial position at fair value with changes in fair value recognized in the statement of operations. Transaction costs related to instruments classified as held-for-trading are expensed as incurred.

Financial Instruments (continued)

Loans and receivables

These assets are non-derivative financial assets resulting from the delivery of cash or other assets by a lender to a borrower in return for a promise to repay on a specified date or dates, or on demand. They arise principally through the provision of goods and services to customers, but also incorporate other types of contractual monetary assets comprised of accounts receivable, amounts due from the Province of Manitoba, vacation entitlements receivable and retirement obligations receivable. They are initially recognized at fair value and subsequently carried at amortized cost, using the effective interest rate method, less any provision for impairment. Transaction costs related to loans and receivables are expensed as incurred.

Other financial liabilities

Other financial liabilities includes all financial liabilities other than those classified as held-for-trading and comprises accounts payable and accruals. These liabilities are initially recognized at fair value and subsequently carried at amortized cost using the effective interest rate method. Transaction costs related to other financial liabilities are expensed as incurred.

New Accounting Pronouncements

Recent accounting pronouncements that have been issued but are not yet effective, and have a potential implication for the Authority, are as follows:

Financial Statement Concepts

CICA Handbook Section 1000, Financial Statement Concepts has been amended to focus on the capitalization of costs that truly meet the definition of an asset and de-emphasizes the matching principle. The revised requirements are effective for annual and interim financial statements relating to fiscal years beginning on or after October 1, 2008. The Authority is currently evaluating the impact of the adoption of this change on the disclosure within its financial statements.

New Accounting Pronouncements (continued)

Financial Instruments - Disclosure and Presentation

On October 15, 2008 the CICA deferred indefinitely the requirement of not-for-profit organizations to implement new standards dealing with certain financial instrument disclosures and presentation. The Authority elected to defer application of these standards.

Financial Statements by Not-for-Profit Organizations

In September 2008, a number of standards applicable to not-for-profit organizations were amended and issued. The changes are intended to improve financial reporting by not-for-profit organizations and make not-for-profit standards consistent with those of profit-oriented enterprises when they address the same issues. These amendments which are effective for fiscal years beginning on or after January 1, 2009 will not have a significant impact on the results of operations or financial position.

In December 2008, the AcSB and the Public Sector Accounting Board issued a joint Invitation to Comment, "Financial Reporting by Not-for-Profit Organizations," to invite feedback on the future of financial reporting by not-for-profit organizations. The financial reporting options under consideration by the AcSB include IFRSs, private enterprise standards and public sector standards. Until the strategy has been determined and implemented, not-for-profit organizations will continue to apply current accounting standards.

The Authority continues to monitor the developments in this area and evaluate the implications of the potential changes in financial reporting standards.

1. Entity Definition and Basis of Financial Statements

Interlake Regional Health Authority Inc. was incorporated under the laws of the Province of Manitoba. The Authority commenced providing health care services on April 1, 1997 in the Interlake Region of Manitoba. The Authority is a registered charity under The Income Tax Act and accordingly is exempt from income taxes, provided certain requirements of The Income Tax Act are met.

Under the Regional Health Authorities and Consequential Amendments Act, the Authority entered into negotiations with all health care facilities in the region to either transfer those facilities' operations, property, liabilities and obligations to the Authority or to operate as a contract facility funded by the Authority. These negotiations have been completed.

Two facilities within the region operate under contract arrangements for funding with the Authority. They are Betel Home - Gimli and Betel Home - Selkirk. The operations of these facilities have been consolidated in these financial statements as the Authority exercises significant influence over them by virtue of acting as funding agent. Any non-MHHL funded activities of these facilities (i.e. apartments, seniors' housing) have been excluded from these financial statements.

2. Change in Accounting Policy

Capital disclosures

On April 1, 2008 the Authority adopted a requirement of the CICA to provide disclosure about how it manages its net assets (see Note 14).

3. Due from (to) Manitoba Health and Healthy Living

	2009	2008
Selkirk Surgical Program waitlist	$ -	$ 668,500

Selkirk Colonoscopies funding	**37,500**	-
	$ 1,817,652	$ 2,261,548

4. Accrued Vacation Entitlements

The Authority records a provision for accrued vacation entitlements. Prior to March 31, 2004 changes in the liability related to vacation were recoverable from MHHL. At that date, MHHL advised that subsequent to March 31, 2004 all funding related to past and future vacation entitlement costs would be included in in-globe funding and that the maximum liability to be recognized by MHHL to facilities would be capped at March 31, 2004 levels. Accordingly, each year as vacation entitlements are paid and earned by the Authority's employees, the related vacation entitlement receivable is collected and re-established up to this maximum amount.

An analysis of the changes in the vacation entitlements receivable from MHHL is as follows:

	2009	2008
Balance, beginning of year	**$ 3,688,400**	$ 3,688,400
Net changes in vacation entitlements receivable	**-**	-
Balance, end of year	**$ 3,688,400**	$ 3,688,400

An analysis of the changes accrued in the vacation entitlements is as follows:

Balance, beginning of year	**$ 4,570,645**	$ 4,426,132
Net increase in accrued vacation entitlements	**297,533**	144,513
Balance, end of year	**$ 4,868,178**	$ 4,570,645

5. Capital Assets

	2009		2008 (Restated (Note 17))	
	Cost	**Accumulated Amortization**	Cost	Accumulated Amortization
Land	**$ 180,667**	**$ -**	$ 180,667	$ -
Land improvements	**370,102**	**370,102**	370,102	370,102
Buildings	**62,007,458**	**29,491,368**	61,307,458	27,557,716
Ambulances	**183,621**	**183,621**	183,621	183,621
Equipment	**18,411,479**	**12,526,200**	17,440,853	11,473,490
Equipment - computers	**2,213,786**	**1,467,512**	1,884,823	1,211,997
Construction in progress	**3,597,257**	-	2,811,783	-
	$ 86,964,370	**$ 44,038,803**	$ 84,179,307	$ 40,796,926
Cost less accumulated amortization		**$ 42,925,567**		$ 43,382,381

6. Bank Indebtedness

The Authority has an approved operating line of credit with the Canadian Imperial Bank of Commerce to a maximum amount of $500,000. The line of credit bears interest at Canadian Imperial Bank of Commerce prime rate less 0.75% and is supported by an authorization letter from MHHL. As at March 31, 2009 the line of credit was unutilized.

7. Long-term Debt

	2009	2008
CMHC mortgage payable, bearing interest at 4.63% per annum, due September 1, 2017 and requiring monthly principal and interest payments of $6,338, secured by a first charge on land and building (Stonewood Place)	$ 534,431	$ 584,770
Current portion of long-term debt	52,634	50,338
	$ 481,797	$ 534,432

The fair value of the mortgage payable is estimated to be approximately equal to carrying value as the interest rate is comparable to current market rates.

Principal payments due in the next five years and thereafter are as follows:

2010	$ 52,634
2011	55,099
2012	57,641
2013	60,174
2014	62,238
Thereafter	246,645
	$ 534,431

8. Deferred Contributions

a) Expenses of future periods

Deferred contributions related to expenses of future periods represent the unspent amount of donations, grants received and grants for major repairs.

	2009	2008
Balance, beginning of year	$ 1,463,312	$ 1,575,237
Additional amounts received during year	3,564,163	1,461,568
Funding for reserve for major repairs	49,187	49,168
Less expenditures	(2,258,622)	(1,622,661)
Balance, end of year	$ 2,818,040	$ 1,463,312

b) Capital assets

Deferred capital contributions related to capital assets represent the unamortized amount of donations, grants received and funding of approved borrowings for the purchase of capital assets. The amortization of deferred capital contributions is recorded as revenue in the statement of operations at rates which match the amortization of the related capital asset purchased with the donations, grants or approved borrowings.

	2009	2008 (Restated (Note 17))
Balance, beginning of year		
As previously reported	$ 40,840,993	$ 42,360,995
Adjustment to deferred contribution (see (Note 17))	(1,163,844)	(775,896)
As restated	39,677,149	41,585,099
Additional contributions received, net	3,535,875	2,624,310
Less amounts transferred to DSM	-	(1,344,032)
Less amounts amortized to revenue	(3,206,499)	(3,188,228)
Balance, end of year	$ 40,006,525	$ 39,677,149

9. Investment in Capital Assets

a) Investment in capital assets is calculated as follows:

	2009	2008
Capital assets	$ 42,925,567	$ 43,382,381
Amounts financed by		
Deferred contributions	40,006,525	39,677,149
Long-term debt	534,431	584,770
	$ 2,384,611	$ 3,120,462

b) Change in net assets invested in capital assets is calculated as follows:

	2009	2008
Deficiency of revenue over expenditures		
Amortization of deferred contributions related to capital assets	$ 3,206,499	$ 3,188,228
Amortization of capital assets	(3,245,254)	(3,226,903)
	$ (38,755)	$ (38,675)
Net changes in investment in capital assets		
Purchase of capital assets	$ 2,788,440	$ 2,548,084
Amounts funded by		
MHHL funding	(3,466,953)	(2,441,963)
Donations	(68,922)	(182,347)
Repayment of long-term debt	50,339	47,836
	$ (697,096)	$ (28,390)

10. Revenue from Manitoba Health and Healthy Living

	2009	2008
Revenue from MHHL		
Revenue as per MHHL's final funding document	$ 94,077,754	$ 86,917,186
Debt interest allocation	(271,022)	(257,772)
Equipment allocation	(414,408)	(398,332)
Funds for loans held by the Province of Manitoba	(481,240)	(362,834)
Reserve for major repairs funding	(26,965)	(26,965)
	92,884,119	85,871,283
Add: Selkirk Surgical Expansion	668,500	668,500
CUPE wage standardization	91,479	601,616
MNU wage standardization	(4,780)	280,500
Other wage standardization	-	100,000
MGEU Community support wage standardization	127,171	-
Interfacility ambulance transfers	1,420,378	783,555
Safety and renovations	488,523	226,761
Influenza and Immunizations	98,803	156,593
Percy E. Moore related cost reimbursement	-	31,483
Spiritual care	-	5,750
Out-of-globe items and adjustments	153,699	(526,124)
MGEU TP Market supplement	648,991	251,942
Children's therapy initiative	59,449	60,426
Speech wait list initiative	-	8,333
Long-term care strategy	-	23,166
Early start and healthy child programs	993,530	924,267
PCH Staffing initiative funding	678,362	-
Nurse recruitment and retention	53,744	49,371
Early years research program	98,725	90,875
Mobile ultrasound funding	241,111	33,360
Chronic disease prevention	78,039	71,375
Mental health wait list	55,919	167,300
St. Paul EMS station	25,715	42,000
Louis Riel Day funding	-	169,899
Provincial Data Network	11,000	46,616
Cardiac Care	452	36,523
Risk Factor Complication Assessments	29,707	459
Aboriginal health transition fund	112,620	-
Primary care and healthy living funding	100,600	-
Mental health positions funding	97,082	-
Community health assessment	77,828	-
Selkirk Emergency Department positions	49,931	-
RIS/PACS Billing clerk position	29,000	-
Colonoscopies funding	37,500	-
Non-Medical reciprocal recoveries	70,117	-
Patient safety position	5,200	-
Aboriginal employment initiative	12,865	-
Total Revenue from MHHL	$ 99,495,379	$ 90,175,829

11. Commitments and Contingencies

a) The nature of the health care industry's activities is such that there is usually litigation pending or in prospect at any time. With respect to claims at March 31, 2009, management believes the Authority has valid defences and appropriate insurance coverages in place. In the event any claims are successful, management believes that such claims are not expected to have a material effect on the Authority's financial position.

b) On July 1, 1987, a group of health care organizations, ("subscribers"), formed Healthcare Insurance Reciprocal of Canada ("HIROC"). HIROC is registered as a Reciprocal pursuant to provincial Insurance Acts, which permit persons reciprocal contracts of the indemnity insurance. HIROC facilitates the provision of liability insurance coverage to health care organizations in the provinces of Ontario, Manitoba, Saskatchewan and Newfoundland. Subscribers pay annual premiums, which are actuarially determined, and are subject to assessment for losses in excess of such premiums, if any, experienced by the group of subscribers for the years in which they were a subscriber. No such assessments have been made to March 31, 2009.

The Authority's coverage also includes contract facilities as named insured parties.

12. Employee Future Benefits

a) Accrued retirement entitlement

Accrued retirement obligations are based on an actuarial valuation as at March 31, 2009. The RHA's contractual commitment for the pre-retirement entitlement for members of the Health Employees Pension Plan is to pay out four days of salary for each year of service upon retirement if the employee complies with one of the following conditions:

- has ten years service and has reached the age of 55 or;
- qualifies for the "eighty" rule which is calculated by adding the number of years service to the age of the employee or;
- retires at or after age 65 or;
- terminates employment at any time due to permanent disability

The significant actuarial assumptions adopted in measuring the Authority's accrued retirement entitlements include mortality and withdrawals rates, a discount rate of 6.7% (5.5% in 2008) and a rate of salary increase of 3.5% (3.5% in 2008) plus an age related merit/promotion scale.

The amount recorded as a receivable from the Province for pre-retirement costs was initially determined based on the value of the corresponding actuarial liability for pre-retirement costs as at March 31, 2004. Subsequent to March 31, 2004, the Province has included in its ongoing annual in-globe funding to the Authority, an amount equivalent to the change in the pre-retirement liability, which includes annual interest accretion related to the receivable. The receivable will be paid by the Province when required.

12. Employee Future Benefits (continued)

An analysis of the changes in the employee benefits payable is as follows:

	2009	2008
Balance, beginning of year	**$ 5,475,722**	$ 5,462,445
Net increase in pre-retirement entitlements	**472,483**	13,277
Balance, end of year	**$ 5,948,205**	$ 5,475,722

b) Pension plan

Substantially all of the employees of the Authority are members of the Healthcare Employees Pension Plan (a successor of the Manitoba Health Organization Inc. Plan) (the "Plan") which is a multi-employer defined benefit pension plan available to all eligible employees of the participating members of the Plan. Plan members will receive benefits based on the length of service and on the average of annualized earnings during the best five years of the last eleven years prior to retirement, termination or death, that provides the highest earnings.

Pension assets consist of investment grade securities. Market and credit risk on these securities are managed by the Plan by placing Plan assets in trust and through the Plan investment policy.

Pension expense is based on Plan management's best estimates, in consultation with its actuaries, of the amount, together with the 6.8% of salary under $46,300 and 8.4% of salary over $46,300 contributed by employees, required to provide a high level of assurance that benefits will be fully represented by fund assets at retirement, as provided by the Plan. The funding objective is for employer contributions to the Plan to remain a constant percentage of employees' contributions.

Variances between actuarial funding estimates and actual experience may be material and any differences are generally to be funded by the participating members. The most recent actuarial valuation of the Plan as at December 31, 2007 indicates the Plan is in deficit; however, it is anticipated that recently implemented increases in contribution rates will correct this deficiency within the allowed timeframe. Contributions to the Plan made during the year by the Authority on behalf of its employees amounted to $3,274,925 (2008 - $2,935,370) and are included in the statement of operations.

The remainder of employees are members of the Province of Manitoba's defined benefit Civil Service Superannuation Plan. Liability for variances between actuarial funding estimates and actual experience lies with the Province.

13. Related Parties

The contract facilities, Betel Home - Selkirk, and Betel Home - Gimli, are operated by the Betel Home Foundation. Any fundraising of the Betel Home Foundation is solely for the benefit of the contract facilities.

14. Net Assets - Internal Restrictions and External Restrictions

The Authority considers its capital to comprise its internally and externally restricted net assets, unrestricted net assets and investment in capital assets balances. There have been no changes to what the Authority considers to be its capital since the previous period.

The Authority's objective for managing capital is to safeguard its ability to provide health services to Interlake residents. Debt is utilized for projects where specific approvals from MHHL have been obtained in advance of borrowings.

Internal Restrictions

The Board of Directors has internally restricted $16,181 (2008 - $39,192) of interest earned on donation funds. The cumulative balance of internally restricted net assets is $202,326 (2008 - $208,145). These are Board restricted community based health promotion projects and recruitment initiatives. The Authority is in compliance with these restrictions.

External Restrictions

Net assets subject to externally imposed restrictions represent the former balances of net assets of facilities integrated into the Authority, including accumulated interest. Such net assets are restricted to community contributions and/or for the benefit of the community from which the net assets originated. The Authority is in compliance with these restrictions.

As a not-for-profit entity, the Authority's operations are reliant on revenues generated annually. The Authority has accumulated a deficit over its history, which are included in the unrestricted net assets in the statement of financial position.

The Authority is currently endeavounng to eliminate this accumulated deficit and return to a position which would enable it to more adequately fund its working capital requirements.

15. Financial Risk Management

The Authority is exposed to different types of risk in the normal course of operations, including credit risk and market risk. The Authority's objective in risk management is to optimize the risk return trade-off, within set limits, by applying intergrated risk management and control strategies, policies and procedures throughout the Authority's activities.

Credit risk

Credit risk is the risk that one party to a financial instrument fails to discharge an obligation and causes financial loss to another party. Financial instruments which potentially subject the Authority to credit risk consist principally of accounts receivable.

The Authority's maximum exposure to credit risk without taking account of any collateral or other credit enhancements is as follows:

	2009	2008
Accounts receivable	$ 1,309,043	$ 1,218,437
Due from Manitoba Health and Healthy Living	1,817,652	2,261,548
Vacation entitlements receivable	3,688,400	3,688,400
Retirement obligations receivable	4,183,222	4,183,222
	$ 10,998,317	$ 11,351,607

Accounts receivable: The Authority is not exposed to significant credit risk as the receivable is spread among a large client base and geographic region and payment in full is typically collected when it is due. The Authority establishes an allowance for doubtful accounts that represents its estimate of potential credit losses. The allowance for doubtful accounts is based on management's estimates and assumptions regarding current market conditions, customer analysis and historical payment trends. These factors are considered when determining whether past due accounts are allowed for or written off.

Due from MHHL, vacation entitlements receivable and retirement obligations receivable: The Authority is not exposed to significant credit risk as these receivables are from the Province of Manitoba.

Market Risk

Market risk is the risk the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: interest rate risk, foreign exchange risk and other price risk.

Interest rate risk is the risk that the value of a financial instrument will fluctuate due to changes in market interest rates. The Authority is not exposed to significant interest rate risk. Its cash and short-term deposts are held in short-term or variable rate products and its exposure arising from its fixed rate long-term debt is not significant.

15. Financial Risk Management (continued)

The Authority is not exposed to significant foreign currency risk as it does not have any financial instruments denominated in foreign currency and the number of transactions in foreign currency are minimal and the Authority is not exposed to other price risk.

Fair Value

The carrying values of cash and term investments, accounts receivable, amounts due from MHHL, vacation entitlements receivable and retirement obligations receivable, accounts payable and accrued liabilities approximate their fair value due to the relatively short periods to maturity of these items or because they are receivable or payable on demand.

16. Comparative Figures

Certain of the comparative figures have been reclassified to provide better comparison with the current year's results.

17. Adjustment to Capital Assets and Deferred Contributions - Capital

During our current year audit it was noted that certain Capital Assets, classified under Buildings, has not been amortized since the 2004/05 fiscal year. As a result, prior year accumulated amortization was understated by $1,163,844 and deferred contributions was overstated by $1,163,844. Also, prior year amortization of capital assets was understated by $387,948 and amortization of deferred contributions was understated by $387,948. An adjustment has been made to the prior year Statement of Financial Position and the Statement of Operations for the above noted items, resulting in a net change of zero in deficiency of revenues over expenditures for 2007/08 fiscal year-end.

AUDITOR'S REPORT

To the Chairperson and Board of Directors

We have audited the statement of financial position of Nor-Man Regional Health Authority Inc. as at March 31, 2009 and the Statements of Operations, Net Assets, Deferred Contributions, and Cash Flow for the year then ended. These financial statements are the responsibility of the Health Authority's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of the Nor-Man Regional Health Authority Inc. as at March 31, 2009 and the results of its operations and cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

NOR-MAN REGIONAL HEALTH AUTHORITY INC.

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

YEAR ENDED MARCH 31, 2009

NATURE AND PURPOSE OF THE ORGANIZATION

NOR-MAN Regional Healthy Authority Inc. (the "Authority") is a corporation without share capital continued under The Regional Health Authorities and Consequential Amendments Act, Statues of Manitoba 1996 c.53. The Authority operates health care programs and services in a geographic region that extends from Grand Rapids/Grand Rapids First Nation in the southeast to Flin Flon in the northwest. Pukatawagan is also part of the Region. The Authority delivers its services through hospitals and other health care facilities. Hospitals are located in Flin Flon, The Pas, and Snow Lake. The Authority is a registered charity under the Income Tax Act and accordingly, is exempt from income taxes, provided requirements of the Income Tax Act are met.

ASSUMPTION OF RESPONSIBILITY FOR FACILITIES AND OPERATING AUTHORITY

Pursuant to certain terms and conditions under various transfer agreements, the Authority took over management of facilities consisting of land and buildings together with equipment, other assets, liabilities and general operating authority as of April 1, 1997 from the following previously independently operating boards:

- The Board of Directors of the Flin Flon General Hospital, Flin Flon Personal Care Corporation and Northern Lights Manor
- The Board of Directors of The Pas Health Complex
- The Board of Directors of the Snow Lake Medical Nursing Unit
- Manitoba Health (Community Services)

BASIS OF ACCOUNTING

These financial statements have been prepared in accordance with Canadian generally accepted accounting principles (GAAP) for not for profit organizations and reflect the following policies:

(a) CONTRIBUTED SERVICES

Because of the difficulty of determining the fair value, contributed services are not recognized in the financial statements.

(b) INVENTORY

Medical, drugs and other supplies are valued at the lower of average invoice cost and net realizable value. The Health Authority's disclosure is in compliance with new CICA section 3031.

(c) PRE-RETIREMENT ENTITLEMENT OBLIGATIONS

The Authority applies the accounting recommendations for employee future benefits contained in Section 3461 of the Canadian Institute of Chartered Accountants' Handbook.

(d) REVENUE RECOGNITION

The Authority follows the deferral method of accounting for contributions which include donations and government grants.

Under the Health Insurance Act and Regulations thereto, the Authority is funded primarily by the Province of Manitoba in accordance with budget arrangements established by the Ministry of Health. Operating grants are recorded as revenue in the period to which they relate. Grants approved, but not received, at the end of an accounting period are accrued. Where a portion of a grant relates to a future period, it is deferred and recognized in that subsequent period.

Unrestricted contributions are recognized as revenue when received or receivable, if the amount to be received can be reasonably estimated and collection is reasonably assured.

Externally restricted contributions are recognized as revenue in the year in which the related expenses are recognized. Externally restricted donations are recognized as direct increases in deferred contributions. Restricted investment income is recognized as revenue in the year in which related expenses are recognized. Unrestricted investment income is recognized as revenue when earned.

(e) CAPITAL ASSETS

Purchased capital assets are recorded at cost. Contributed capital assets are recorded at fair value at the date of contribution. Repairs and maintenance costs are charged to expense. Improvements and betterments which extend the estimated useful life of an asset are capitalized. When a capital asset has diminished its usefulness in providing the service, its carrying amount is written down to its residual value.

The Authority has adopted the policy of amortizing its capital assets on a straight-line basis using the following annual rates:

Land improvements	2.5%
Buildings	2.5%
Equipment	10.0%
Computer equipment	20.0%

No amortization is provided for construction in progress until the project is complete or until the principal retirement of related debt commences.

(f) EXTERNAL RESTRICTIONS

Net assets are restricted for endowment purposes, and are subject to externally imposed restrictions that the assets be maintained permanently in the St. Paul Residents Trust Fund. Investment income from this fund is restricted for residents' expenses.

(g) CAPITAL MANAGEMENT

The Entity's objective when managing capital is to maintain sufficient capital to cover its costs of operations. The Entity's capital consists of net assets.

The Entity's capital management policy is to meet capital needs with working capital advances from Manitoba Health and Healthy Living.

The Entity met its externally imposed capital requirements.

There were no changes in the Entity's approach to capital management during the period.

(h) REVENUE FROM MANITOBA HEALTH

In Globe Funding
In Globe funding is funding approved by Manitoba Health for Regional Health Authority programs unless otherwise specified as Out of Globe funding. This includes volume changes and price increases for the five service categories of Acute Care, Long Term Care, Community and Mental Health, Home Care and Emergency Response and Transport. All additional costs in these five service categories must be absorbed from within the global funding provided.

Any operating surplus greater than 2% of budget related to In Globe funding arrangements is recorded on the statement of financial position as a payable to Manitoba Health until such time as Manitoba Health reviews the financial statements. At that time Manitoba Health determines what portion of the approved surplus may be retained by the Authority, or repaid to Manitoba Health.

Under Manitoba Health policy the Regional Health Authority is responsible for In Globe deficits, unless otherwise approved by Manitoba Health.

Out of Globe Funding
Out of Globe funding is funding approved by Manitoba Health for specific programs.

Any operating surplus related to Out of Globe funding arrangements is recorded on the statement of financial position as a payable to Manitoba Health until such time as Manitoba Health reviews the financial statements. At that time Manitoba Health determines what portion of the approved surplus may be retained by the Authority, or repaid to Manitoba Health.

Conversely, any operating deficit related to Out of Globe funding arrangements is recorded on the statement of financial position as a receivable from Manitoba Health until such time as Manitoba Health reviews the financial statements. At that time, Manitoba Health determines their final funding approvals which indicate the portion of the deficit that will be paid to the Authority. Any unapproved costs not paid by Manitoba Health are absorbed by the Authority.

(i) NEW ACCOUNTING POLICIES

Effective April 1, 2008 the Health Authority adopted the following new accounting standards issued by the Canadian Institute of Chartered Accountants (CICA):

Section 1535, Capital Disclosure
Section 1535 establishes standards for disclosing information about an entity's capital and how it is managed. These standards require an entity to disclose its objectives, policies and processes for managing capital, a summary of quantitative data about what it manages as capital and whether it complied with any externally imposed capital requirements to which it is subject and, if not, the consequences of such non-compliance.

Section 3862, Financial Instruments – Disclosures and Section 3863, Financial Instruments – Presentation
Sections 3862 and 3863 are intended to enhance the abilities of users of financial statements to evaluate the significance of financial instruments to an organization, related exposures and the management of these risks. These sections were subsequently amended to eliminate the requirement for not-for-profit entities and rate-regulated enterprises to adopt these sections. These organizations are permitted to continue to apply Section 3861 Financial Instruments – Disclosure and Presentation in place of Sections 3862 and 3863. An organization that does so must disclose this fact.

(j) FINANCIAL INSTRUMENTS

Financial assets and liabilities are initially recorded at fair value. Measurement in subsequent periods depends on the financial instrument's classification. Financial instruments are classified into one of the following five categories: held for trading; available for sale; held to maturity; loans and receivables; and other financial liabilities. All financial instruments classified as held for trading or available for sale are subsequently measured at fair value with any change in fair value recorded in net earnings and other comprehensive income respectively. All other financial instruments are subsequently measured at amortized cost.

The Health Authority has designated its financial instrument's as follows:

Cash is classified as a financial asset held for trading and is measured at fair value with gains and losses recognized in the statement of operations and net assets for the current period.

Accounts receivable, and the amounts due from the Province of Manitoba are classified as loans and receivables. These financial assets are recorded at their amortized cost using the effective interest rate method with gains and losses recognized in the statement of operations and net assets in the period the gain or loss occurs.

Accounts payable, and accrued vacation benefit entitlements are classified as other financial liabilities. These financial liabilities are recorded at their amortized cost using the effective interest rate method with gains and losses recognized in the statement of operations and net assets in the period the gain or loss occurs.

Unless otherwise noted, it is management's opinion that The Health Authority is not exposed to significant interest, currency or credit risk arising from these financial instruments.

The Health Authority has continued to apply section 3861, Financial Instruments – Disclosures and Presentation in place of Sections 3862 and 3863.

Fair value of financial instruments
The fair value of bank indebtedness, accounts receivable, due from Manitoba Health (Note 2b), accounts payable, due to DSM, and accrued vacation benefit entitlements approximates their carrying values due to short-term maturity.

The carrying value of the due from Manitoba Health (Note 2c) approximates its fair value, as the annual interest accretion is funded.

(k) FUTURE ACCOUNTING POLICY CHANGES

Not-For-Profit Organizations
The CICA amended a number of standards applicable to not-for-profit organizations (NFPOs).

CICA 4400 *Financial Statement Presentation by Not-For-Profit Organizations* was amended to:

- eliminate the requirement to treat net assets invested in capital assets as a separate component of net assets and, instead, permit a not-for-profit organization (NFPO) to present such an amount as a category of internally restricted net assets when it chooses to do so;
- clarify that revenues and expenses must be recognized and presented on a gross basis when a not-for-profit organization is acting as a principal in transactions;
- make Section 1540 *Cash Flow Statements* applicable to NFPOs; and
- make Section 1751 *Interim Financial Statements* applicable to NFPOs that prepare interim financial statements in accordance with GAAP.

Section 4430 *Capital Assets Held by Not-For-Profit Organizations* was amended to provide additional guidance with respect to the appropriate use of the scope exemption for smaller entities.

Section 4460 *Disclosure of Related Party Transactions by Not-For-Profit Organizations* was amended to make the language in Section 4460 consistent with Section 3840 *Related Party Transactions*.

These new requirements are effective April 1, 2009 and will only require additional disclosure in the financial statements.

(l) USE OF ESTIMATES/MEASUREMENT UNCERTAINTY

The preparation of financial statements in conformity with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from these estimates.

NOR-MAN REGIONAL HEALTH AUTHORITY INC.

NOTES TO FINANCIAL STATEMENTS

YEAR ENDED MARCH 31, 2009

1. ECONOMIC DEPENDENCE

The Authority is funded primarily by the Province of Manitoba in accordance with budget arrangements established by the Ministry of Health.

(c)	**Due from Manitoba Health**		
	Pre-retirement obligation entitlements	$2,654,372	$2,654,372

The amount recorded as a receivable from the Province for pre-retirement costs was initially determined based on the value of the corresponding actuarial liability for pre-retirement costs as at March 31, 2004. Subsequent to March 31, 2004, the Province has included in its ongoing annual funding to Norman Regional Health Authority Inc., an amount equivalent to the change in the pre-retirement liability, which includes annual interest accretion related to the receivable. The receivable will be paid by the Province when it is determined that the funding is required to discharge the related pre-retirement liabilities.

3. DEFERRED CONTRIBUTIONS

(a) **Expenses of future periods**

(i) **Funds in reserve for major repairs and improvements**

Deferred contributions related to funds in reserve for major repairs and improvements represent unspent externally restricted funds from the Province for major repairs and improvements to buildings.

(ii) **Donations**

Deferred contributions related to donations represent externally restricted unspent amounts of donations for various purposes.

3. DEFERRED CONTRIBUTIONS (continued)

(iii) **Grants**
Deferred contributions related to grants represent externally restricted unspent amounts of grants for various programs.

(b) **Related to capital assets**
Deferred capital contributions represent the unamortized amounts of grants received for the purchase of capital assets. The amortization of capital contributions is recorded as revenue in the statement of operations.

4. NET ASSETS INVESTED IN CAPITAL ASSETS

Net assets invested in capital assets are calculated as follows:

	2009	2008
Capital assets	$ 32,740,558	$ 32,799,670
Amounts financed by:		
Deferred contributions	(28,730,941)	(28,033,426)
Long-term debt	(674,196)	(3,355,827)
	$ 3,335,421	$ 1,410,417

5. CAPITAL ASSETS

	2009		
	Cost	Accumulated Amortization	Net Book Value
Land and land improvements	$ 599,060	$ 294,735	$ 304,325

Energy Retro Fit Guarantee	2,921,409	0	2,921,409
	$56,568,929	$23,769,259	$32,799,670

6. ACCRUED PRE-RETIREMENT OBLIGATIONS

	2009	2008
Members of the Health Employees Pension Plan and Civil Service Superannuation Plan	$3,567,943	$3,894,222

The Authority's contractual commitment, based on an actuarial valuation, for the pre-retirement entitlement for members of the Healthcare Employees Pension Plan and the Civil Service Superannuation Plan is to pay out four days of salary per year of service upon retirement if the employee complies with one of the following conditions:

- (i) have ten years service and have reached the age of 55 or
- (ii) qualify for the "eighty" rule which is calculated by adding the number of years service to the age of the employee
- (iii) retire at or after age 65
- (iv) terminate employment at any time due to permanent disability

The Authority undertook an actuarial valuation April 24, 2009 of the accrued retirement entitlements as at March 31, 2009. The significant actuarial assumptions adopted in measuring the Authority's accrued retirement entitlements include mortality and withdrawal rates, a discount rate of 6.7% (2008 - 5.50%) and a rate of salary increase of 3.5% (2008 - 3.5%) plus age related merit/promotion scale with no provision for disability.

Funding for the retirement obligation is recoverable from Manitoba Health on an out of globe basis in an amount equal to the amount receivable at March 31, 2004 of $2,654,372.

7. REVENUE FROM MANITOBA HEALTH

Revenue as per Manitoba Health's March 15/09 funding document		$73,882,996
Add: Accruals approved by Manitoba Health:		
Capital Operation Cost – The Pas Dialysis	377,040	
Patient Safety Coordinator	5,270	
NLM Structural Floor Project	1,569	
Wage Standardization	147,896	
Medical Remuneration (Estimated)	1,487,670	2,019,445
Deduct:		
Payments on prior year receivables	1,080,570	
MHHL advances	2,200,000	
Deferred equipment 09/10	272,000	
Ancillary Program	610,136	
Ambulance	248,473	
Other	148,650	4,559,829
Total funding approved by Manitoba Health		71,342,612
Deduct: Amounts recorded as deferred contributions		
PCH Reserve	8,160	
Major Repairs and improvement and Equipment	416,797	
Debt Servicing	552,542	
Contribution for Basic Equipment	237,600	1,215,099
Revenue from Manitoba Health		$70,127,513

8. PENSION PLAN

Most of the employees of the Authority are members of the Healthcare Employees Pension Plan (the "Plan"), which is a multi-employer defined benefit pension plan available to all eligible employees. Plan members will receive benefits based on the length of service and on the average annualized earnings calculated on the best five of the eleven consecutive years prior to retirement, termination or death, that provide the highest earnings. The costs of the benefit plan are not allocated to the individual entities within the related group. As a result, individual entities within the related group are not able to identify their share of the underlying assets and liabilities. Therefore the plan is accounted for as a defined contribution plan in accordance with the requirements of the Canadian Institute of Chartered Accountant's Handbook section 3461.

Pension assets consist of investment grade securities. Market and credit risk on these securities are managed by the Plan by placing plan assets in trust and through the Plan investment policy. Pension expense is based on Plan management's best estimate, in consultation with its actuaries, of the amount, together with the 5% of basic annual earnings up to the Canada Pension Plan ceiling contributed by employees, required to provide a high level of assurance that benefits will be fully represented by fund assets at retirement, as provided by the Plan. The funding objective is for employer contributions to the Plan to remain a constant percentage of employee' contributions.

Variances between actuarial funding estimates and actual experience may be material and any differences are generally to be funded by the participating members. The most recent actuarial valuation of the plan as at December 31, 2004, indicates that the plan is fully funded. Actual contributions to the plan made during the year by the Authority on behalf of its employees amounted to $2,166,649 (2008 - $1,903,307) and are included in the statement of operations.

Some of the employees of the Authority are eligible for membership in the provincially operated Civil Service Superannuation Plan. The pension liability for Authority employees is included in the Province of Manitoba's liability for Civil Service Superannuation Fund. Accordingly, no provision is required in the financial statements relating to the effects of participating in the plan by the Authority and its employees.

9. RELATED ENTITIES

The Pas Health Complex Foundation, Inc. (the Foundation) is a non-profit voluntary association whose purpose is the betterment of health care at The Pas Health Complex facilities. While there is no formal relationship between the Authority and this registered Charitable Foundation, the aims and objectives coincide. The Authority regularly provides the Foundation with a listing of project/equipment requirements for the Foundation to consider in their annual funding process. During the year the Authority received donated equipment valued at $42,131 (2008 - $17,266).

10. ENERGY RETROFIT/MANUFACTURER'S LIFE INSURANCE COMPANY LOAN

During the year, the Health Authority entered into an agreement with the Government of Canada, Department of Natural Resource to receive Energy Retro-Fit Assistance. Under the terms of the agreement, MCW Custom Energy Solutions Ltd (MCW) manages and contracts the work to be performed with the amounts, net of the grants, funded by Manufacturers Life Insurance Company (Manufacturers). The Health Authority pays a monthly amount equivalent to the energy savings to Manufacturers with MCW providing an annual payment to the Health Authority for any deficiency of estimated energy savings to actual energy savings.

Although this project is expenditure neutral, the asset and loan have been reflected in these financial statements to ensure payments to third parties are adequately reflected. An expected payout of September, 2021 is implicit in this project with interest at the rate of 6.3%.

11. COMMITMENTS

(a) The Authority has entered into a 5 year operating lease at $60,000 per annum and two 15 year operating leases totalling $211,200 per annum for buildings housing some of its operations. Annual lease payments over the next five years are as follows:

2010	$271,200
2011	$211,200
2012	$211,200
2013	$211,200
2014	$211,200

Aggregate future minimum operating lease payments total $2,654,400.

(b) The Authority, on behalf of the Province of Manitoba, is making payments of principal and interest related to Province of Manitoba long-term debt. The $3,089,537 principal balance is reflected as deferred contributions related to capital assets. Funding is received from the Province for the principal and interest payments. Principal payments are estimated over the next five years as follows:

2010	$449,080
2011	$449,080
2012	$404,089
2013	$303,400
2014	$303,400

12. CAPITAL LEASE

The Authority has entered into a 6 year capital lease with the Royal Bank of Canada to purchase beds costing $294,532. Lease payments of $4,846 per month include interest at 5.74%. Lease principal payments over the next five years are as follows:

2010	$ 47,946
2011	$ 50,771
2012	$ 53,764
2013	$ 47,126
2014	$ 0

Aggregate future capital lease payments total $222,916 including $23,309 of imputed expenses.

Auditors' Report

To the Board of Directors of
NORTH EASTMAN HEALTH ASSOCIATION INC.

We have audited the statement of financial position of **NORTH EASTMAN HEALTH ASSOCIATION INC.** as at March 31, 2009 and the statements of operations, changes in net assets and cash flows for the year then ended. These financial statements are the responsibility of the Association's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, the financial statements present fairly, in all material respects, the financial position of the Association as at March 31, 2009 and the results of its operations and its cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

Cash, end of year	$ 5,259,554	$ 3,815,849

The accompanying summary of significant accounting policies and notes are an integral part of these financial statements.

These financial statements have been prepared by Management in accordance with Canadian generally accepted accounting principles for not-for-profit organizations.

Revenue Recognition

The Association follows the deferral method of accounting for contributions, which include donations and government grants.

Under the Health Insurance Act and Regulations thereto, the Association is funded primarily by the Province of Manitoba in accordance with budget arrangements established by Manitoba Health. Operating grants are recorded as revenue in the period to which they relate. Grants approved but not received at the end of an accounting period are accrued. Where a portion of a grant relates to a future period, it is deferred and recognized in that subsequent period. These financial statements reflect agreed arrangements approved by the Ministry with respect to the year ended March 31, 2009.

With respect to actual operating results, certain adjustments to funding will be made by Manitoba Health after completion of their review of the Association's accounts.

In-Globe funding is funding approved by Manitoba Health for Regional Health Association programs unless otherwise specified as Out-of-Globe funding. This includes volume changes and price increases for the five service categories of Acute Care, Long-term Care, Community and Mental Health, Home Care and Emergency Response, and Transport. All additional costs in these five service categories must be absorbed from within global funding provided.

Any operating surplus greater than 2% of budget related to In-Globe funding arrangements is recorded on the statement of financial position as a payable to Manitoba Health until such time as Manitoba Health reviews the financial statements. At that time, Manitoba Health determines what portion of the approved surplus may be retained by the Association, or repaid to Manitoba Health.

Under Manitoba Health policy, the Regional Health Association is responsible for In-Globe deficits, unless otherwise approved by Manitoba Health.

Out-of-Globe funding is funding approved by Manitoba Health for specific programs.

Revenue Recognition (continued)

Any operating surplus related to Out-of-Globe funding arrangements is recorded on the statement of financial position as a payable to Manitoba Health until such time as Manitoba Health reviews the financial statements. At that time, Manitoba Health determines what portion of the approved surplus may be retained by the Association, or repaid to Manitoba Health.

Conversely, any operating deficit related to Out-of-Globe funding arrangements is recorded on the statement of financial position as a receivable from Manitoba Health until such time as Manitoba Health reviews the financial statements. At that time, Manitoba Health determines their final funding approvals, which indicate the portion of the deficit that will be paid to the Association. Any unapproved costs not paid by Manitoba Health are absorbed by the Association.

Any adjustments will be reflected in the year the final statement of recommended costs is received from Manitoba Health.

Unrestricted contributions are recognized as revenue when received or receivable if the amount to be received can be reasonably estimated and collection is reasonably assured.

Externally restricted contributions are recognized as revenue in the year in which the related expenses are recognized. Contributions restricted for the purchase of capital assets are deferred and amortized into revenue on a straight line basis, at a rate corresponding with the amortization rate for the related capital assets.

Restricted investment income is recognized as revenue in the year in which the related expenses are recognized. Unrestricted investment income is recognized as revenue when earned.

Revenue from the Provincial Insurance Plan and marketed services is recognized when the goods are sold or the service is provided.

Inventories

Inventories are valued at lower of cost net realizable value. Cost is generally determined on an average cost basis.

Employee Future Benefits

Pension and other employee future benefit costs are determined using the projected benefit method prorated on years of service and based on best estimate assumptions.

Contributed Services

A substantial number of volunteers contribute a significant amount of their time each year. Because of the difficulty of determining the fair value, contributed services are not recognized in the financial statements.

Capital Assets

Purchased capital assets are recorded at cost. Contributed capital assets are recorded at fair value at the date of contribution. Repairs and maintenance costs are charged to expense. Betterments, which extend the estimated life of an asset, are capitalized. When a capital asset no longer contributes to the facility's ability to provide services, its carrying amount is written down to its residual value.

Capital assets are amortized on a straight-line basis using the following annual rates:

Land improvements	5% - 10%
Buildings	2% - 5%
Leasehold improvements	5%
Building service equipment	4% - 10%
Equipment	5% - 20%
Vehicles	8% - 15%
Software and licenses	20%

Compensated Absences

Compensation expense is accrued for all employees as entitlement to these payments is earned in accordance with the Association's benefit plans for vacation, statutory holiday and retirement allowances.

Financial Instruments

The Association utilizes various financial instruments.

All transactions related to financial instruments are recorded on a settlement date basis.

The Association classifies its financial instruments into one of the following categories based on the purpose for which the asset was acquired. The Association's accounting policy for each category is as follows:

Held-for-trading - This category is comprised of cash and bank. They are carried in the statement of financial position at fair value with changes in fair value recognized in the statement of operations. Transaction costs related to instruments classified as held-for-trading are expensed as incurred.

Financial Instruments (continued)

Loans and Receivables - These assets are non-derivative financial assets resulting from the delivery of cash or other assets by a lender to a borrower in return for a promise to repay on a specified date or dates, or on demand. They arise principally through the provision of goods and services to customers, but also incorporate other types of contractual monetary assets comprised of accounts receivable, amounts due from Manitoba Health, employee benefits recoverable and retirement obligations receivable. They are initially recognized at fair value and subsequently carried at amortized cost, using the effective interest rate method, less any provision for impairment. Transaction costs related to loans and receivables are expensed as incurred.

Other Financial Liabilities - Other financial liabilities includes all financial liabilities other than those classified as held-for-trading and comprises accounts payable and accrued liabilities. These liabilities are initially recognized at fair value and subsequently carried at amortized cost using the effective interest rate method. Transaction costs related to other financial liabilities are expensed as incurred.

Use of Estimates

In preparing the Association's financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements and reported amounts of revenue and expenditures during the period. Actual results could differ from these estimates.

New Accounting Pronouncements

Recent accounting pronouncements that have been issued but are not yet effective, and have a potential implication for the Association, are as follows:

Financial Statement Concepts - CICA Handbook Section 1000, Financial Statement Concepts has been amended to focus on the capitalization of costs that truly meet the definition of an asset and de-emphasizes the matching principle. The revised requirements are effective for annual and interim financial statements relating to fiscal years beginning on or after October 1, 2008. The Association is currently evaluating the impact of the adoption of this change on the disclosure within its financial statements.

Financial Instruments - Disclosure and Presentation - On October 15, 2008 the CICA deferred indefinitely the requirement of not-for-profit organizations to implement new standards dealing with certain financial instrument disclosures and presentation. The Association elected to defer application of these standards.

New Accounting Pronouncements (continued)

Financial Statements by Not-for-Profit Organizations - In September 2008, a number of standards applicable to not-for-profit organizations were amended and issued. The changes are intended to improve financial reporting by not-for-profit organizations and make not-for-profit standards consistent with those of profit-oriented enterprises when they address the same issues. These amendments which are effective for fiscal years beginning on or after January 1, 2009 will not have a significant impact on the results of operations or financial position.

In December 2008, the AcSB and the Public Sector Accounting Board issued a joint Invitation to Comment, "Financial Reporting by Not-for-Profit Organizations," to invite feedback on the future of financial reporting by not-for-profit organizations. The financial reporting options under consideration by the AcSB include IFRSs, private enterprise standards and public sector standards. Until the strategy has been determined and implemented, not-for-profit organizations will continue to apply current accounting standards.

The Association continues to monitor the developments in this area and evaluate the implications of the potential changes in financial reporting standards.

1. Entity Definition and Basis of Financial Statements

North Eastman Health Association Inc. ("the Association") was incorporated under the Health Authorities Act on April 1, 1997. The Association is principally involved in providing health care services to the north-eastern regions of Manitoba. The Association is a registered charity under the Income Tax Act and accordingly is exempt from income taxes, provided certain requirements of the Income Tax Act are met.

These financial statements include the following sites and services:

Beausejour District Ambulance
Beausejour Health Centre
Bissett Ambulance
East-Gate Lodge
Kin Place Health Complex
Lac du Bonnet Ambulance
Lac du Bonnet PCH and Health Centre
Pinawa Ambulance
Pinawa Hospital
Pine Falls Ambulance
Pine Falls Health Complex
Reynolds Ambulance
Springfield Ambulance
Springfield Handivan
Stony Plains Terrace
Sunnywood Manor PCH
Whitemouth District Ambulance
Whitemouth District Health Centre
Whitemouth Handivan
Winnipeg River Handivan

Capital Management

The Association considers its capital to be comprised of its externally restricted and unrestricted net assets as well as its Investment in Capital Assets. There have been no changes in what the Association considers to be its capital since the previous period.

Externally Restricted Net Assets

Externally restricted net assets shall only be expended on items and/or projects that are authorized jointly by the Board of Directors of North Eastman Health Association Inc. and the contributing organizations.

2. Change in Accounting Policy

Capital Disclosures - On April 1 , 2008 the Association adopted a requirement of the CICA to provide disclosure about how it manages its net assets. (See Note 1)

3. Accounts Receivable

	2009	2008
Ambulance	$ 230,287	$ 216,877
Canada Revenue Agency - GST Rebate	200,411	210,378
Clients	59,079	75,325
Other	239,100	181,538
Receivable from foundations	-	5,589
	$ 728,877	$ 689,707

4. Due (to) from Manitoba Health

	2009	2008
In-Globe funding	$ 728,589	$ 1,046,079
Approved capital funding	164,032	123,296
Out-of-Globe funding	(359,705)	(317,476)
MSSP Payroll and PCH drug program	(297,623)	(689,272)
	$ 235,293	$ 162,627

5. Employee Benefits Recoverable/Payable

The Association records a provision for accrued vacation entitlements and retirement obligations. Prior to March 31, 2004 changes in the liability related to vacation and retirement obligations were recoverable from Manitoba Health. At that date, Manitoba Health advised that subsequent to March 31, 2004 all funding related to past and future vacation entitlement costs and retirement obligations would be included in in-globe funding and that the maximum liability to be recognized by Manitoba Health to facilities would be capped at March 31, 2004 levels. Accordingly, each year as vacation entitlements are paid and earned by the Authority's employees, the related vacation entitlement recoverable and retirement obligation recoverable is collected and re-established up to this maximum amount.

An analysis of the changes in the employee benefits payable is as follows:

	2009	2008
Balance, beginning of year	$ 2,583,206	$ 2,527,641
Net changes in employee benefits	390,225	55,565
Balance, end of year	$ 2,973,431	$ 2,583,206

5. Employee Benefits Recoverable/Payable (continued)

An analysis of the changes accrued in the accrued retirement obligations is as follows:

	2009	2008
Balance, beginning of year	$ 2,418,342	$ 2,208,395
Net changes in retirement obligations	95,789	209,947
Balance, end of year	$ 2,514,131	$ 2,418,342

6. Capital Assets

	2009		2008	
	Cost	Accumulated Amortization	Cost	Accumulated Amortization
Land	$ 333,035	$ -	$ 333,034	$ -
Land improvements	463,273	355,514	463,273	336,778
Buildings	42,813,668	16,063,266	42,870,682	14,913,894
Leasehold improvements	118,851	13,590	14,399	8,411
Building service equipment	1,175,580	150,060	233,794	122,320
Equipment	8,879,029	6,792,567	8,824,138	6,922,650
Vehicles	694,296	622,251	939,049	868,991
Software and licenses	-	-	51,395	51,395
	$ 54,477,732	$ 23,997,248	$ 53,729,764	$ 23,224,439
		$ 30,480,484		$ 30,505,325

7. Long-term Debt

	2009	2008
CMHC mortgage payable, bearing interest at a rate of 4.39% per annum, due January 1, 2020 and requiring monthly principal and interest payments of $7,587 secured by a mortgage on the land and buildings.	**$ 785,307**	$ 840,939
CMHC mortgage payable, bearing interest at a rate of 4.17% per annum, due June 1, 2020 and requiring monthly principal and interest payments of $3,573 secured by a mortgage on the land and buildings.	**385,117**	411,505
Loan payable, bearing interest at a rate of 0% per annum, due July 6, 2012 and requiring monthly principal and interest payments of $583.	**23,333**	30,333
	1,193,757	1,282,777
Current portion of long-term debt	**92,476**	89,019
	$ 1,101,281	$ 1,193,758

Principal payments due in the next five years and thereafter are as follows:

2010	$ 92,476
2011	96,209
2012	100,015
2013	99,585
2014	101,412
Thereafter	704,060
	$ 1,193,757

8. Deferred Contributions

(a) Expenses of Future Periods

Deferred contributions related to expenses of future periods represent the unspent externally restricted grants and donations for research and other purposes.

	2009	2008
Balance, beginning of year	$ 1,428,011	$ 1,333,252
Amounts received related to future periods	1,257,985	1,156,020
Amounts amortized to revenue	(844,238)	(992,876)
Funding amounts transferred to capital assets	(90,540)	(68,385)
Balance, end of year	$ 1,751,218	$ 1,428,011

(b) Capital Assets

Deferred capital contributions related to capital assets represent the unamortized amount and unspent amount of donations, grants received and funding of approved borrowings for the purchase of capital assets. The amortization of deferred capital contributions is recorded as revenue in the statement of operations at rates which match the amortization of the related capital asset purchased with the donations, grants or approved borrowings.

	2009	2008
Balance, beginning of the year	$ 28,425,242	$ 29,330,414
Increase from Pinawa Construction	893,517	157,271
Increase for specialized equipment	2,084	-
Additional contributions received/receivable	876,795	819,318
Amounts transferred from expenses of future periods	90,540	68,385
Amounts amortized to revenue in the year	(1,587,653)	(1,499,647)
Transfer of capital assets to Diagnostic Services Manitoba	-	(450,499)
Transfer of handivan replacement funding to the Town of Lac du Bonnet	(75,500)	-
Balance, end of the year	$ 28,625,025	$ 28,425,242
Comprised of:		
Unspent	$ 470,909	$ 436,133
Spent	28,154,116	27,989,109
Balance, end of the year	$ 28,625,025	$ 28,425,242

9. Investment in Capital Assets

Investment in capital assets is calculated as follows:

	2009	2008
Capital assets	**$ 30,480,484**	$ 30,505,325
Amounts financed by		
Deferred contributions	**(28,154,116)**	(27,989,109)
Mortgages payable	**(1,193,757)**	(1,282,777)
Due to (from) operating account	**21,029**	(49,521)
	$ 1,153,640	$ 1,183,918

Change in net assets invested in capital assets is calculated as follows:

	2009	2008
Excess of revenues over expenditures		
Amortization of deferred contributions related to capital assets	**$ 1,587,653**	$ 1,499,647
Amortization of capital assets	**(1,681,777)**	(1,571,841)
	$ (94,124)	$ (72,194)
Net changes in investment in capital assets		
Purchase of capital assets	**$ 1,656,950**	$ 1,139,438
Amounts funded by		
Deferred contributions	**(709,570)**	(777,664)
Specialized equipment	**(2,084)**	-
Due to operating account	**(2,307)**	(79,844)
Deferred contributions - Pinawa construction	**(844,234)**	(157,271)
Transfers		
Deferred contributions - expenses of future periods (net)	**(90,540)**	(68,385)
- unrestricted net assets	**55,631**	53,106
Sale of building	**-**	(58,300)
	$ 63,846	$ 51,080
Total change in net assets invested in capital assets	**$ (30,278)**	$ (21,114)

10. Manitoba Health Income

		2009	2008
Revenue as per Manitoba Health's final funding document		**$ 45,213,840**	$ 42,316,416
Add:	Public Health Programs	**562,413**	543,671
	Nurse recruitment and retention	**20,747**	40,284
	Other	**6,336**	6,151
	MSSP payroll	**3,130,007**	1,514,462
	PCH Drug program	**372,509**	210,463
Deduct:	Amounts related to prior year	**(77,136)**	(430,312)
Total Funding Approved by Manitoba Health		**49,228,716**	44,201,135
Add:	Salary funding receivable - MGEU & MNU	**332,034**	641,169
	Immunization programs	**-**	44,809
	Wait list funding	**-**	410
	Out-of-globe - capital	**189,704**	114,966
	Other	**144,787**	11,759
	Interfacility transfer	**124,797**	122,493
Deduct:	Amounts recorded as deferred contributions	**(1,488,932)**	(753,690)
	Medical remuneration	**(359,705)**	(317,476)
	Out-of-globe - Interest	**(25,672)**	(1,034)
Revenue from Manitoba Health		**$ 48,145,729**	$ 44,064,541

11. Commitments and Contingencies

a) The nature of the health care industry's activities is such that there is usually litigation pending or in prospect at any time. With respect to claims at March 31, 2009, management believes the Association has valid defences and appropriate insurance coverages in place. In the event any claims are successful, management believes that such claims are not expected to have a material effect on the Association's financial position.

b) On July 1, 1987, a group of health care organizations, ("subscribers"), formed Healthcare Insurance Reciprocal of Canada ("HIROC"). HIROC is registered as a Reciprocal pursuant to provincial Insurance Acts, which permit persons reciprocal contracts of the indemnity insurance. HIROC facilitates the provision of liability insurance coverage to health care organizations in the provinces of Ontario, Manitoba, Saskatchewan and Newfoundland. Subscribers pay annual premiums, which are actuarially determined, and are subject to assessment for losses in excess of such premiums, if any, experienced by the group of subscribers for the years in which they were a subscriber. No such assessments have been made to March 31, 2009.

11. Commitments and Contingencies (continued)

c) The Association has entered into various operating leases for its operations. The minimum annual payments for the next five years are as follows:

2010	$	177,171
2011		179,610
2012		182,098
2013		184,636
2014		187,224

d) Credit facility - The Association has an approved operating line of credit with Sunova Credit Union to a maximum amount of $1.8 million. The line of credit bears interest at prime minus 0.625% and is secured by an authorization letter from Manitoba Health. The line of credit was unutilized at March 31, 2009.

12. Pension Plan

Substantially all of the employees of the Association are members of the Healthcare Employees Pension Plan (the "Plan"), which is a multi employer defined benefit pension plan available to all eligible employees. Plan members will receive benefits based on the length of service and on the average annualized earnings calculated on the best five years of the last eleven years prior to retirement, termination or death, that provides the highest earnings. The costs of the benefit plan are not allocated to the individual entities within the related group. As a result, individual entities within the related group are not able to identify their share of the underlying assets and liabilities. Therefore, the plan is accounted for as a defined contribution plan in accordance with the requirements of the Canadian Institute of Chartered Accountants' Handbook Section 3461.

Pension assets consist of investment grade securities. Market and credit risk on these securities are managed by the Plan by placing plan assets in trust and through the Plan investment policy.

Pension expense is based on Plan management's best estimates, in consultation with its actuaries, of the amount, together with the 6.8% (6.8% in 2008) of basic annual earnings up to the Canada Pension Plan ceiling plus 8.4% (8.4% in 2008) of basic earnings in excess of the Canada Pension Plan ceiling contributed by employees, required to provide a high level of assurance that benefits will be fully represented by fund assets at retirement, as provided by the Plan. The funding objective is for employer contributions to the Plan to remain a constant percentage of employees' contributions.

Variances between actuarial funding estimates and actual experience may be material and any differences are generally to be funded by the participating members. The most recent actuarial valuation of the Plan as at December 31, 2007, indicates that the Plan is in deficit; however, it is anticipated that recently implemented increases in contribution rates will correct this deficiency within the allowed timeframe.

12. **Pension Plan** (continued)

Certain of the employees of the Association are eligible for membership in the Manitoba Homecare Employees Pension Plan, a multi-employer plan.

Actual contributions to the Healthcare Employees Pension Plan and the Manitoba Homecare Employees Pension Plan made during the year by the Association on behalf of its employees amounted to $1,679,370 ($1,501,034 in 2008) and are included in the statement of operations.

Many of the employees of the Association are eligible for membership in the provincially operated Civil Service Superannuation Plan. The pension liability for Association employees is included in the Province of Manitoba's liability for the Civil Service Superannuation Fund. Accordingly, no provision is required in the financial statements relating to the effects of participation in the pension plan by the Association and its employees.

13. Accrued Retirement Obligations

Accrued retirement obligations are based on an actuarial valuation as at March 31, 2009.

The Association has a contractual commitment, based on an actuarial valuation, for pre-retirement entitlement for members of the Health Employees Pension Plan and members of the Civil Service Superannuation Fund to pay out to employees four days salary per year of service upon retirement if they comply with one of the following conditions:

- have ten years service and have reached the age 55;
- qualify for the "eighty" rule which is calculated by adding the number of years service to the age of the employee;
- retire at or after age 65;
- terminate employment at any time due to permanent disability.

The significant actuarial assumptions adopted in measuring the Association's accrued retirement entitlements include mortality and withdrawals rates, a discount rate of 6.7% (5.5% in 2008) and a rate of salary increase of 3.5% (3.5% in 2008) plus an age related merit/promotion scale with no provision for disability.

The amount recorded as a receivable from the Province for pre-retirement costs was initially determined based on the value of the corresponding actuarial liability for pre-retirement costs as at March 31, 2004. Subsequent to March 31, 2004, the Province has included in its ongoing annual in-globe funding to the Authority, an amount equivalent to the change in the pre-retirement liability, which includes annual interest accretion related to the receivable. The receivable will be paid by the Province when required.

14. Financial Risk Management

The Association is exposed to different types of risk in the normal course of operations, including credit risk and market risk. The Association's objective in risk management is to optimize the risk return trade-off, within set limits, by applying intergrated risk management and control strategies, policies and procedures throughout the Association's activities.

Credit Risk

Credit risk is the risk that one party to a financial instrument fails to discharge an obligation and causes financial loss to another party. Financial instruments that potentially subject the Association to credit risk consist principally of accounts receivable.

The Association's maximum exposure to credit risk without taking account of any collateral or other credit enhancements is as follows:

	2009	2008
Accounts receivable	**$ 728,877**	$ 689,707
Due from Manitoba Health	**235,293**	162,627
Employee benefits recoverable	**1,796,024**	1,796,024
Retirement obligations recoverable	**1,729,643**	1,729,643
	$ 4,489,837	$ 4,378,001

Accounts receivable: The Association is not exposed to significant credit risk as the receivable is spread among a large client base and geographic region and payment in full is typically collected when it is due. The Association establishes an allowance for doubtful accounts that represents its estimate of potential credit losses. The allowance for doubtful accounts is based on management's estimates and assumptions regarding current market conditions, customer analysis and historical payment trends. These factors are considered when determining whether past due accounts are allowed for or written off.

Due from Manitoba Health and employee benefits and retirement obligation recoverable. The Association is not exposed to significant credit risk as the receivable is from the Province of Manitoba.

Market Risk

Market risk is the risk the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: interest rate risk, foreign exchange risk and other price risk.

Interest rate risk is the risk that the value of a financial instrument will fluctuate due to changes in market interest rates. The Association is not exposed to significant interest rate risk. Its cash is held in short-term or variable rate products.

14. Financial Risk Management (continued)

The Association is not exposed to significant foreign currency risk as it does not have any financial instruments denominated in foreign currency and the number of transactions in foreign currency are minimal and the Authority is not exposed to other price risk.

Fair Value

The carrying values of cash, accounts receivable, amounts due from (to) Manitoba Health, Employee benefits recoverable and retirement obligations recoverable and accounts payable and accrued liabilities approximate their fair value due to the relatively short periods to maturity of these items or because they are receivable or payable on demand.

To the Board of Directors of Parkland Regional Health Authority Inc.:

Management has responsibility for preparing the accompanying consolidated financial statements. This responsibility includes selecting appropriate accounting principles and making objective judgments and estimates in accordance with Canadian generally accepted accounting principles.

In discharging its responsibilities for the integrity and fairness of the consolidated financial statements, management designs and maintains the necessary accounting systems and related internal controls to provide reasonable assurance that transactions are authorized, assets safeguarded and financial records are properly maintained to provide reliable information for the preparation of financial statements.

The Board of Directors and the Audit Committee are composed primarily of Directors who are neither management nor employees of the Organization. The Audit Committee is appointed by the Board to review the consolidated financial statements in detail with management and to report to the Board prior to their approval of the consolidated financial statements for publication.

Meyers Norris Penny LLP, an independent firm of Chartered Accountants, is appointed by the Board of Parkland Regional Health Authority Inc. to audit the consolidated financial statements and report directly to them; their report follows. The external auditors have full and free access to, and meet periodically and separately with, both the Audit Committee and management to discuss their audit findings.

Mary K Hudyma Management Allan Bradley Management

To the Board of Directors of Parkland Regional Health Authority Inc.

We have audited the consolidated statement of financial position of the Parkland Regional Health Authority Inc. as at March 31, 2009 and the consolidated statements of changes in net assets, operations and cash flows for the year then ended. These financial statements are the responsibility of the Organization's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these consolidated financial statements present fairly, in all material respects, the financial position of the Parkland Regional Health Authority Inc. as at March 31, 2009 and the results of its operations and its cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

Meyers Norris Penny LLP

The accompanying notes are an integral part of these financial statements.

1. Organization

The Parkland Regional Health Authority Inc. is a non-profit organization incorporated without share capital under the laws of the Province of Manitoba. The Parkland Regional Health Authority Inc. is involved in the provision of health care services to persons resident in the Parkland Region.

The Parkland Regional Health Authority Inc. is a registered charity and, as such, is exempt from income tax and may issue income tax receipts to donors.

2. Change in accounting policies

Capital disclosures

Effective April 1, 2008, the Organization adopted the Canadian Institute of Chartered Accountants' new recommendations for disclosures about capital. Section 1535 Capital Disclosures establishes standards for disclosing what an entity regards as capital and an entity's objectives, policies and processes for managing its capital. The Section also prescribes disclosure regarding whether an entity has complied with any externally imposed capital requirements, and if not, the consequences of such non-compliance. The adoption of this new standard did not have a material impact on the Organization's consolidated financial statements.

Inventory

Effective April 1, 2008, the Organization adopted the Canadian Institute of Chartered Accountants' new recommendation for inventory under CICA 3031 Inventories. The new Section provides guidance on the measurement and disclosure of inventories. The new recommendation establishes that inventories should be measured at the lower of cost and net realizable value and provides guidance on the determination of cost. There was no material impact on the financial statements from the retrospective application of the new accounting recommendations

3. Significant accounting policies

The financial statements have been prepared in accordance with Canadian generally accepted accounting principles for not-for-profit organizations, and include the following significant accounting policies:

Basis of accounting

These financial statements were prepared using the accrual basis of accounting. The accrual basis recognizes revenues as they become available and measurable; expenses are recognized, as they are incurred and measurable as a result of receipts of goods or services and the creation of a legal obligation to pay.

The financial statements include the accounts of all controlled not-for-profit organizations of the Parkland Regional Health Authority Inc. All significant inter-departmental transactions have been eliminated.

3. Significant accounting policies *(continued)*

The assets, liabilities, revenues and expenses of the following not-for-profit operations have been included in these financial statements:

Devolved facilities:

Dauphin Regional Health Centre
Roblin District Health Centre
Gilbert Plains Health Centre
Grandview Hospital District
Dauphin & District Ambulance Service
Roblin & District Ambulance Service
Grandview Personal Care Home
Parkland Regional Hospital Laundry Ltd.
Ste. Rose Ambulance Service
Swan Valley Ambulance Service
Swan Valley Lodge
Swan Valley Health Centre
Swan River Valley Personal Care Home
Benito Health Centre
Waterhen Ambulance Service

Affiliates:

McCreary/Alonsa Health Centre
Hôpital Général – Ste. Rose – General Hospital
Winnipegosis – Mossey River Personal Care Home Inc.
Winnipegosis General Hospital
St. Paul's Home (Inc.)
Dr. Gendreau Personal Care Home Inc.

The McCreary/Alonsa Health Centre will devolve to the Parkland Regional Health Authority Inc. April 1, 2009.

The Parkland Regional Health Authority Inc. also receives funding from independent organizations, which organize fundraising drives in various geographical areas exclusively for the use of the Parkland Regional Health Authority Inc. or its related entities. The extent of any funding provided by these independent entities is solely at the discretion of the board of directors of the independent entities.

A number of facilities within the Parkland Regional Health Authority Inc. receive donations from charitable foundations. As there is no control, significant influence or economic interest between the Parkland Regional Health Authority Inc. and these foundations, no financial information regarding these foundations is reported or disclosed in the financial statements of the Parkland Regional Health Authority Inc.

Inventory

Inventory is stated at the lower of cost and replacement cost. Cost is determined on the first-in, first-out basis.

3. Significant accounting policies *(continued)*

Capital assets

Capital assets are recorded at cost. Amortization is provided using the straight-line method at rates intended to amortize the cost of the assets over their estimated useful lives.

Buildings	20 to 40 years
Equipment	4 to 20 years

Long-lived assets

Long-lived assets consist of capital assets with finite useful lives. Long-lived assets held for use are measured and amortized as described in the applicable accounting policies.

The Organization performs impairment testing on long-lived assets held for use whenever events or changes in circumstances indicate that the carrying value of an asset, or group of assets, may not be recoverable. Impairment losses are recognized when undiscounted future cash flows from its use and disposal are less than the asset's carrying amount. Impairment is measured as the amount by which the asset's carrying value exceeds its fair value. Any impairment is included in operations for the year.

Quoted market prices and prices for similar items are used to measure fair value of long-lived assets.

Benefits obligation

The Health Authority applies the accounting recommendations for employee future benefits contained in *Section 3461 of the Canadian Institute of Chartered Accountant's Handbook.* The pre-retirement benefits are determined by actuarial valuation.

Revenue recognition

The Parkland Regional Health Authority Inc. follows the deferral method of accounting for contributions. Restricted contributions are recognized as revenue in the year in which the related expenses are incurred. Unrestricted contributions are recognized as revenue when received or receivable if the amount to be received can be reasonably estimated and collection is reasonably assured.

Contributed services

A number of individuals donate significant amounts of time to the Organization's activities. No amount is reflected in the statements for donated services since no objective basis is available to measure the value of such services.

Measurement uncertainty

The preparation of financial statements in conformity with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period.

Accounts receivable are stated after evaluation as to their collectability and an appropriate allowance for doubtful accounts is provided where considered necessary. Provisions are made for slow moving and obsolete inventory. Estimates are made for amortization, based on the useful lives of capital assets, amounts due from Manitoba Health, revenue from Manitoba Health and In-Globe and Out-of-Globe funding that is not yet approved. Retirement obligations are based on actuarial valuations.

These estimates and assumptions are reviewed periodically and, as adjustments become necessary, they are reported in operations in the periods in which they become known.

3. Significant accounting policies *(continued)*

Financial instruments

Held for trading:
The Organization has classified the following financial assets and liabilities as held for trading: cash. These instruments are initially recognized at their fair value.

Loans and receivables:
The Organization has classified the following financial assets as loans and receivables: accounts receivable and current investments. These assets are initially recognized at their fair value approximated by the instrument's initial cost in a transaction between unrelated parties. Transactions to purchase or sell these items are recorded on the trade date, and transaction costs are immediately recognized in operations.

Other financial liabilities:
The Organization has classified the following financial liabilities as other financial liabilities: accounts payable and accruals. These liabilities are initially recognized at their fair value approximated by the instrument's initial cost in a transaction between unrelated parties. Transactions to purchase or sell these items are recorded on the trade date, and transaction costs are immediately recognized in operations. Total interest expense, calculated using the effective interest rate method, is recognized in operations.

Financial asset impairment:
The organization assesses impairment of all its financial assets, except those classified as held for trading. Impairment is measured as the difference between the asset's carrying value and its fair value. Any impairment, which is not considered temporary, is included in current year operations.

Recent accounting pronouncements

Financial instrument deferral of Section 3862 and 3863

In December 2006, the Canadian Institute of Chartered Accountants (CICA) issued Section 3862 *Financial Instruments – Disclosures* and Section 3863 *Financial Instruments – Presentation* to replace Section 3861 *Financial Instruments – Disclosure and Presentation.* The effective date for these new Sections was for interim and annual financial statements with fiscal years beginning on or after October 1, 2007, with earlier adoption permitted. However, in light of the uncertainty regarding the future direction in setting standards for not-for-profit organizations, the CICA released a decision to allow deferral of Sections 3862 and 3863 for this sector. Not-for-profit organizations should continue to apply Section 3861 until interim and annual financial statements with fiscal years beginning on or after October 1, 2008.

Financial statement presentation by a not-for-profit organization
In September 2008, amendments were made to CICA Handbook Section 4400 *Financial Statement Presentation by Not-for-profit Organizations.* Amendments to the section included removal of the requirement to treat net assets invested in capital assets as a separate component of net assets, and, instead, permitting such an amount to be presented as a category of internally restricted net assets. In addition, the requirement to recognize and present revenues and expenses on a gross basis when a not-for-profit organization is acting as a principal in the transaction was clarified. Finally, guidance was included to reflect that Section 1540 *Cash Flow Statements* and Section 1751 *Interim Financial Statements* are applicable to not-for-profit organizations.

3. Significant accounting policies *(continued)*

Disclosure of allocated expenses by not-for-profit organizations

In September 2008, the Canadian Institute of Chartered Accountants issued new recommendations for disclosures regarding allocated expenses by not-for-profit organizations. CICA Handbook Section 4470 *Disclosure of Allocated Expenses by Not-for-profit Organizations* requires disclosure by not-for-profit organizations that allocate fundraising and general support expenses to other functions of the policies adopted for the allocation of such expenses among functions, the nature of the allocated expenses, and the basis on which allocations are made. The section also requires disclosure of the amounts allocated from each of its fundraising and general support functions and the amounts and functions to which they have been allocated.

In-Globe Funding

In-Globe funding is funding approved by Manitoba Health for Regional Health Authority programs unless otherwise specified as Out-of-Globe funding. This includes volume changes and price increases for the five service categories of Acute Care, Long-Term Care, Community and Mental Health, Home Care and Emergency Response and Transport. All additional costs in these five service categories must be absorbed from within the global funding provided.

Any operating surplus greater than 2% of budget related to In-Globe funding arrangements is recorded on the statement of financial position as a payable to Manitoba Health until such time as Manitoba Health reviews the financial statements. At that time Manitoba Health determines what portion of the approved surplus may be retained by the Authority, or repaid to Manitoba Health.

5. Due from Manitoba Health (continued)

Under Manitoba Health policy the Regional Health Authority is responsible for In-Globe deficits, unless otherwise approved by Manitoba Health.

Out-of-Globe Funding

Out-of-Globe funding is funding approved by Manitoba Health for specific programs.

Any operating surplus related to Out-of-Globe funding arrangements is recorded on the statement of financial position as a payable to Manitoba Health until such time as Manitoba Health reviews the financial statements. At that time Manitoba Health determines what portion of the approved surplus may be retained by the Authority, or repaid to Manitoba Health.

Conversely, any operating deficit related to Out-of-Globe funding arrangements is recorded on the statement of financial position as a receivable from Manitoba Health until such time as Manitoba Health reviews the financial statements. At that time, Manitoba Health determines their final funding approvals, which indicate the portion of the deficit that will be paid to the Authority. Any unapproved costs not paid by Manitoba Health are absorbed by the Authority.

6. Investments

	147,550,878	**64,595,598**	**82,955,280**	81,898,952

8. Benefits obligation

The Health Authority recorded pre-retirement, accrued vacation, statutory holiday and overtime salary liability as benefits obligation. Funding for the entitlement as at March 31, 2004 is recoverable from Manitoba Health.

Benefit entitlement obligation
The Health Authority has a contractual commitment to pay out to employees four days salary per year of service upon retirement if they comply with the following conditions:

i. have ten years service and have reached the age of 55 or
ii. qualifies for the "eighty" rule which is calculated by adding the number of years service to the age of the employee
iii. retires at or after age 65 or
iv. terminates employment at any time due to permanent disability

The Health Authority has recorded an accrual amount based on an actuarial valuation that includes employees who qualify at the year-end balance sheet date and an estimate for the remainder of the employees who have not yet met the criteria above. Funding for the retirement entitlement accrued prior to March 31, 2004 is recoverable from Manitoba Health on an Out-of-Globe basis in the year of payment.

Each year, the Health Authority updates an actuarial valuation of the accrued retirement entitlements. The significant actuarial assumptions adopted in measuring the accrued retirement entitlements include mortality and withdrawal rates, a discount rate of 6.70% (5.50% in 2008) and a rate of salary increase of 3.5% (3.5% in 2008) plus age related merit/promotion scale with nil disability.

Pension plan
Most of the employees of the Authority are members of the Healthcare Employees Pension Plan (the "Plan"), which is a multi-employer defined benefit pension plan available to all eligible employees. Plan members will receive benefits based on the length of service and on the average annualized earnings calculated on the best five of the eleven consecutive years prior to retirement, termination or death, that provide the highest earnings. The costs of the benefit plan are not allocated to the individual entities within the related group. As a result, individual entities within the related group are not able to identify their share of the underlying assets and liabilities. Therefore, the Plan is accounted for as a defined contribution plan in accordance with the requirements of the *Canadian Institute of Chartered Accountants' Handbook section 3461.*

Pension assets consist of investment grade securities. Market and credit risk on these securities are managed by the Plan by placing assets in trust and through the Plan investment policy. Pension expense is based on Plan management's best estimates, in consultation with its actuaries, together with the 6.8% (6.8% in 2008) of basic annual earnings up to the Canada Pension Plan ceiling contributed by employees and 8.4% (8.4% in 2008) thereafter, required to provide a high level of assurance that benefits will be fully represented by fund assets at retirement, as provided by the Plan. The funding objective is for the employer contributions to the Plan to remain a constant percentage of employees' contributions. Variances between actuarial funding estimates and actual experience may be material and any differences are generally to be funded by the participating members. The most recent actuarial valuation of the Plan as at December 31, 2007, indicates a solvency deficiency which will be funded by special payments to the Plan over the next five years out of current contributions in those years. Should these special payments not be sufficient in returning the Plan to solvency, contribution rate increases or pension benefit reductions may be necessary.

Actual contributions to the Plan made during the year by the Authority on behalf of its employees amounted to $3,866,382 (2008 – $3,652,753) and are included in the statement of operations.

	703,414	2,140,156	**2,843,570**	2,566,506

14. Financial instruments

The Parkland Regional Health Authority Inc.'s financial instruments consist of cash, accounts receivable, temporary investments, accounts payable, amounts due to (from) Manitoba Health and long-term debt. Unless otherwise noted, it is management's opinion that the Parkland Regional Health Authority Inc. is not exposed to significant interest, currency or credit risks arising from these financial instruments.

Fair Value

The carrying amounts of cash, accounts receivable, temporary investments, accounts payable, amounts due to (from) Manitoba Health and accrued liabilities approximate their fair values due to the short-term maturities of these items. The carrying amounts of the organization's investments and loans approximate their fair values as the investments and loans have currently prevailing interest rates.

15. Economic dependence

The Parkland Regional Health Authority Inc. received 87% of its total revenue for the year ended March 31, 2009 from Manitoba Health.

16. Comparative amounts

Certain comparative figures have been reclassified to conform with the current year presentation.

17. Reclassification

During the year it was noted that an adjustment of $2,618,205 was required to the Health Authoritiy's net assets to correct an amount originally posted to deferred contributions.

There was also an adjustment for $67,701 to invested in capital assets due to a change in an accounting estimate for the useful life of the capital assets for Parkland Laundry.

18. Related party transactions

The Authority is responsible for the overall management of the health care services provided in the Parkland region. Programs for hospital and personal care services are delivered in the region by the Health Authority. The Health Authority transacts business on a regular basis with organizations and agencies as described in Note 5, 6, 8, 9, 10, 12 and 13.

19. Capital disclosures

The Authority considers its capital to be its net assets. The Authority's objectives when managing its capital are to safeguard its ability to operate as a going concern so it can continue to provide services to its residents. An Annual Health Plan including operating and capital budgets is developed and monitored to ensure the Authority's capital is maintained at an appropriate level.

If the retainable surplus exceeds 2% of the annual in globe operating budget, as approved by the Authority, the surplus in excess of 2% is an obligation payable to Manitoba Health. For the fiscal year ended March 31, 2009, the Authority was in compliance with this requirement. For the affiliates, if the retainable surplus exceeds 1.5% of the annual in globe operating budget, as approved by the Authority, the surplus in excess of 1.5% is an obligation payable to Parkland Regional Health Authority.

MANAGEMENT'S RESPONSIBILITY

To the Board of Directors of
Regional Health Authority – Central Manitoba Inc.

Management is responsible for the preparation and presentation of the accompanying consolidated financial statements, including responsibility for significant accounting judgments and estimates in accordance with Canadian generally accepted accounting principles and ensuring that all information in the annual report is consistent with the statements. This responsibility includes selecting appropriate accounting principles and methods, and making decisions affecting the measurement of transactions in which objective judgment is required.

In discharging its responsibilities for the integrity and fairness of the consolidated financial statements, management designs and maintains the necessary accounting systems and related internal controls to provide reasonable assurance that transactions are authorized, assets are safeguarded and financial records are properly maintained to provide reliable information for the preparation of financial statements.

The Board of Directors and Audit Committee are composed entirely of Directors who are neither management nor employees of the Authority. The Board is responsible for overseeing management in the performance of its financial reporting responsibilities, and for approving the financial information included in the annual report. The Board fulfils these responsibilities by reviewing the financial information prepared by management and discussing relevant matters with management. The Audit Committee has the responsibility of meeting with management and external auditors to discuss the internal controls over the financial reporting process, auditing matters and financial reporting issues. The Committee is also responsible for recommending the appointment of the Authority's external auditors.

Meyers Norris Penny LLP, an independent firm of Chartered Accountants, is appointed by the Board to audit the consolidated financial statements and report directly to them; their report follows. The external auditors have full and free access to, and meet periodically and separately with, both the Committee and management to discuss their audit findings.

AUDITORS' REPORT

To the Board of Directors of
Regional Health Authority – Central Manitoba Inc.

We have audited the consolidated statement of financial position of Regional Health Authority – Central Manitoba Inc. as at March 31, 2009 and the consolidated statements of operations, consolidated changes in net assets and the consolidated cash flows for the year then ended. These consolidated financial statements are the responsibility of the Authority's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the consolidated financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these consolidated financial statements present fairly, in all material respects, the financial position of the Authority as at March 31, 2009 and the results of its operations and its cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

Our audit was conducted for the purpose of forming an opinion on the financial statements as a whole. The supplemental information presented in Schedules 1-3 are presented for the purpose of additional analysis and are not a required part of the basic financial statements. Such supplemental information has been subjected to auditing procedures applied in the audit of the basic financial statements and, in our opinion, is fairly stated, in all material respects, in relation to the basic financial statements taken as a whole.

1. NATURE OF BUSINESS

Regional Health Authority - Central Manitoba Inc. (the Authority) was incorporated under the laws of Manitoba on January 2, 1996. The Authority commenced activity on April 1, 1997. The Authority is principally involved in providing health care services to the central region of Manitoba. The Authority is a registered charity under the Income Tax Act and accordingly is exempt from income taxes, provided certain requirements of the Income Tax Act are met.

2. SIGNIFICANT ACCOUNTING POLICIES

Management has prepared the financial statements in accordance with Canadian generally accepted accounting principles for not-for-profit organizations. The following is a summary of significant accounting policies for the Authority:

a) Basis of reporting

The Authority provides health care services through devolved and contract facilities. The contract facilities include Salem Home Inc., Tabor Home Inc., Eden Mental Health Centre, Rock Lake Health District and Prairie View Lodge, Inc..

The health care services provided by the contract facilities are delivered under the control of the Authority as the majority funder. Accordingly, the financial position and results of operations of these related organizations are consolidated in the financial statements of the Authority. A financial summary of these contract facilities is provided in Schedules 2 and 3.

All significant inter-company and inter-divisional transactions have been eliminated. Transactions with non-controlled contract entities and certain non-devolved ambulance services have not been consolidated and the transactions are recorded as a purchased service.

b) Revenue recognition

The Authority follows the deferral method of accounting for contributions which include government grants and donations.

Under the Health Insurance Act and regulations thereto, the Authority is funded primarily by the Province of Manitoba in accordance with budget arrangements established by Manitoba Health. Operating grants are recorded as revenue in the period to which they relate. Grants approved but not received at the end of an accounting period are accrued. Where a portion of a grant relates to a future period, it is deferred and recognized in that subsequent period. These financial statements reflect agreed arrangements approved by Manitoba Health with respect to the year ended March 31, 2009.

Unrestricted contributions are recognized as revenue when received or receivable if the amount to be received can be reasonably estimated and collection is reasonably assured.

Externally restricted contributions other than endowment contributions are recognized as revenue in the year in which the related expenses are recognized. Contributions restricted for the purchase of capital assets are deferred and amortized into revenue on a straight-line basis, at a rate corresponding with the amortization rate for the related capital assets.

Restricted investment income is recognized as revenue in the year in which the related expenses are recognized. Unrestricted investment income is recognized as revenue when earned.

c) Contributed services

A substantial number of volunteers contribute a significant amount of their time each year. Due to the difficulty of determining the fair value, contributed services are not recognized in the financial statements.

2. SIGNIFICANT ACCOUNTING POLICIES (continued)

d) Inventories

Inventories are recorded at the lower of cost and net realizable value. Cost is determined on the first-in, first-out basis.

e) Capital assets

Purchased capital assets are recorded at cost. Contributed capital assets are recorded at fair value at the date of contribution. Repairs and maintenance are charged to expense. Betterments which extend the estimated useful life of an asset are capitalized. When a capital asset no longer contributes to the Authority's ability to provide services, its carrying value is written down to its residual value.

Capital assets are amortized on a straight-line basis using the following annual rates:

Buildings	2%
Major equipment	10% - 20%

Construction in progress is recorded at cost. When the specific project is completed, all capitalized costs are transferred to capital assets.

f) Vacation pay

The Authority records the accrued vacation pay entitlement liability. Funding for the entitlement is recoverable as a component of salary cost funding for the subsequent year.

g) Retirement entitlement obligations

The Authority applies the accounting recommendations for employee future benefits contained in section 3461 of the Canadian Institute of Chartered Accountants' Handbook.

h) Use of Estimates

The preparation of financial statements in accordance with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the period. Actual results could differ from management's best estimates as additional information becomes available in the future.

i) Long-lived Assets

Long-lived assets consist of capital assets with finite useful lives. Long-lived assets held for use are measured and amortized as described in the applicable accounting policies

The Authority performs impairment testing on long-lived assets held for use whenever events or changes in circumstances indicate that the carrying value of an asset, or group of assets may not be recoverable. Impairment losses are recognized when undiscounted future cash flows from it use and disposal are less than the asset's value. Any impairment is included in earnings for the year.

2. SIGNIFICANT ACCOUNTING POLICIES (continued)

j) Financial Instruments

Held for trading:

Any financial instrument whose fair value can be reliably measured may be designated as held for trading on initial recognition or adoption of CICA 3855 Financial Instruments - Recognition and Measurement, even if that instrument would not otherwise satisfy the definition of held for trading. The Authority has classified the following financial assets and liabilities as held for trading: cash and short term investments and other assets. These instruments are initially recognized at their fair value.

Held for trading financial instruments are subsequently measured at their fair value. Net gains and losses arising from changes in fair value including interest income are recognized immediately in the statement of operations.

Loans and receivables:

The Authority has classified the following financial assets as loans and receivables: accounts receivable, accounts receivable due from Manitoba Health, due from Manitoba Health - vacation entitlements and due from Manitoba Health - retirement entitlements. These assets are initially recognized at their fair value which is the same as their cost due to the current nature of the asset.

Loans and receivables are subsequently measured at their amortized cost, using the effective interest method. Under this method, estimated future cash receipts are exactly discounted over the asset's expected life, or other appropriate period, to its net carrying value. Amortized cost is the amount at which the financial asset is measured at initial recognition less principal repayments, plus or minus the cumulative amortization using the effective interest method of any difference between the initial amount and the maturity amount, and less any reduction for impairment or uncollectibility. Net gains and losses arising from changes in fair value are recognized into the statement of operations upon derecognition or impairment.

Other financial liabilities:

The Authority has classified the following financial liabilities as other financial liabilities: accounts payable, accrued liabilities, wages payable, accrued vacation benefit entitlements and accrued retirement benefit entitlements. These liabilities are initially recognized at their fair value which approximates their cost due to the current nature of these liabilities.

Other financial liabilities are subsequently measured at amortized cost using the effective interest method. Under this method, estimated future cash payments are exactly discounted over the liability's expected life, or other appropriate period, to its net carrying value. Amortized cost is the amount at which the financial liability is measured at initial recognition less principal repayments, and plus or minus the cumulative amortization using the effective interest method of any difference between that initial amount and the maturity amount. Net gains and losses arising from changes in fair value are recognized in the statement of operations upon derecognition or impairment.

The Authority as part of its operations carries a number of financial instruments. It is managements' opinion that the Authority is not exposed to significant interest, currency or credit risks from these instruments except as otherwise noted.

3. RECENT ACCOUNTING PRONOUNCEMENTS

Financial statement presentation by not-for-profit organizations

In September 2008, amendments were made to CICA Handbook Section 4400 Financial Statement Presentation by Not-for-profit Organizations. Amendments to the section included removal of the requirement to treat net assets invested in capital assets as a separate component of net assets, and, instead, permitting such an amount to be presented as a category of internally restricted net assets. In addition, the requirement to recognize and present revenues and expenses on a gross basis when a not-for-profit organization is acting as a principal in the transaction was clarified. Finally, guidance was included to reflect that Section 1540 Cash Flow Statements and Section 1751 Interim Financial Statements are applicable to not-for-profit organizations.

These amendments apply to interim and annual financial statements relating to fiscal years beginning on or after January 1, 2009. The Authority does not expect the changes to the standard to have a material impact on its financial statements.

Financial statement presentation by not-for-profit organizations

CICA Handbook Section 4430 Capital Assets Held by Not-for-profit Organizations has been amended to provide additional guidance with respect to the appropriate use of the scope exemption for smaller entities that expense their capital assets. It was clarified that the exemption does not allow NFPOs to capitalize but not amortize their capital assets, nor does it allow different methods of accounting for various types of capital assets.

This amendment applies to interim and annual financial statements relating to fiscal years beginning on or after January 1, 2009. The Authority does not expect the change to this standard to have a material impact on its financial statements.

Disclosure of allocated expenses by not-for-profit organizations

In September 2008, the Canadian Institute of Chartered Accountants issued new recommendations for disclosures regarding allocated expenses by not-for-profit organizations. CICA Handbook Section 4470 Disclosure of Allocated Expenses by Not-for-profit Organizations requires disclosure, by not-for-profit organizations that allocate fundraising and general support expenses to other functions, of the policies adopted for the allocation of such expenses among functions, the nature of the allocated expenses, and the basis on which allocations are made. The section also requires disclosure of the amounts allocated from each of its fundraising and general support functions and the amounts and functions to which they have been allocated.

This new Section is effective for interim and annual financial statements relating to fiscal years beginning on or after January 1, 2009. The Authority does not expect this new standard to have a material impact on its financial statements.

Financial instruments deferral of section 3862 and 3863

In December 2006, the Canadian Institute of Chartered Accountants (CICA) issued Section 3862 Financial Instruments – Disclosures and Section 3863 Financial Instruments – Presentation to replace Section 3861 Financial Instruments – Disclosure and Presentation. The effective date for these new Sections was for interim and annual financial statements with fiscal years beginning on or after October 1, 2007, with earlier adoption permitted. However, in light of the uncertainty regarding the future direction in setting standards for not-for-profit organizations, the CICA released a decision to allow deferral of Sections 3862 and 3863 for this sector.

Not-for-profit organizations should continue to apply Section 3861 until interim and annual financial statements with fiscal years beginning on or after October 1, 2008. The Authority does not expect this new standard to have a material impact on its financial statements.

4. CHANGE IN ACCOUNTING POLICIES

Effective April 1, 2008, the Authority adopted the Canadian Institute of Chartered Accountants' new recommendation for inventory under CICA 3031 Inventories. The new Section provides guidance on the measurement and disclosure of inventories. The new recommendation establishes that inventories should be measured at the lower of cost and net realizable value and provides guidance on the determination of cost. There was no material impact on the financial statements from the retrospective application of the new accounting recommendations.

Effective April 1, 2008, the Authority adopted the Canadian Institute of Chartered Accountants' new recommendations for disclosures about capital. Section 1535 Capital Disclosures prescribes disclosure regarding whether a non-publicly accountable enterprise has complied with any externally imposed capital requirements, and if not, the consequences of such non-compliance.
The adoption of this new standard did not have a material impact on the Authority's financial statements.

5. ACCOUNTS RECEIVABLE/PAYABLE - MANITOBA HEALTH

Accounts Receivable/Payable - Manitoba Health includes the following:

	2009	2008
Current year's operating funding		
Medical year end adjustments	$ (1,712,446)	$ (1,305,731)
Orthopaedic wait list funding	1,076,043	680,399

In Globe Funding

In Globe funding is funding approved by Manitoba Health for Regional Health Authority programs unless otherwise specified as Out of Globe funding. This includes volume changes and price increases for the five service categories of Acute Care, Long Term Care, Community and Mental Health, Home Care and Emergency Response and Transport. All additional costs in these five service categories must be absorbed from within the global funding provided by Manitoba Health.

Any operating surplus greater than 2% of budget related to In Globe funding arrangements is recorded on the statement of financial position as a payable to Manitoba Health until such time as Manitoba Health reviews the financial statements. At that time, Manitoba Health determines what portion of the approved surplus may be retained by the Authority, or repaid to Manitoba Health.

Under Manitoba Health policy, the Regional Health Authority is responsible for In Globe deficits, unless otherwise approved by Manitoba Health.

Out of Globe Funding

Out of Globe funding is funding approved by Manitoba Health for specific programs.

Any operating surplus related to Out of Globe funding arrangements is recorded on the statement of financial position as a payable to Manitoba Health until such time as Manitoba Health reviews the financial statements. At that time, Manitoba Health determines what portion of the approved surplus may be retained by the Authority, or repaid to Manitoba Health.

5. ACCOUNTS RECEIVABLE/PAYABLE - MANITOBA HEALTH (continued)

Conversely, any operating deficit related to Out of Globe funding arrangements is recorded on the statement of financial position as a receivable from Manitoba Health until such time as Manitoba Health reviews the financial statements. At that time, Manitoba Health determines their final funding approvals which indicate the portion of the deficit that will be paid to the Authority. Any unapproved costs not paid by Manitoba Health are absorbed by the Authority.

6. CAPITAL ASSETS

	2009			2008
	Cost	Accumulated Amortization	Net Book Value	Net Book Value
Land	$ 1,037,305	$ -	$ 1,037,305	$ 983,537
Buildings	101,017,873	35,106,196	65,911,677	64,355,062
Major equipment	54,821,466	41,207,785	13,613,681	13,891,324
	$ 156,876,644	$ 76,313,981	$ 80,562,663	$ 79,229,923

7. LONG TERM DEBT

	2009	2008
CMHC mortgage payable in monthly blended installment of $17,071 bearing interest at 4.170% due June 1, 2020. Secured by land and buildings with a net book value of $1,717,985.	$ 1,594,853	$ 1,704,132
CMHC mortgage payable in monthly blended installment of $486 bearing interest at 5.875% due August 1, 2017. Secured by land and buildings with a net book value of $20,628.	38,798	42,272
CMHC mortgage payable in monthly blended installment of $5,683 bearing interest at 5.42% due November 1, 2017. Secured by land and buildings with a net book value of $320,862.	471,844	513,580
CMHC mortgage payable in monthly blended installment of $7,768 bearing interest at 10.0% due June 1, 2014. Secured by land and buildings with a net book value of $484,816.	381,382	434,376
CMHC mortgage payable in monthly blended installment of $887 bearing interest at 7.875% due August 1, 2020. Secured by land and buildings with a net book value of $28,780.	80,498	84,726
Mortgage payable in monthly blended installment of $650 bearing interest at prime, due 2028. Secured by land and building with a net book value of $112,477.	88,698	-
	2,656,073	2,779,086
Less: current portion	230,364	212,711
	$ 2,425,709	$ 2,566,375

Estimated principal repayment requirements for the next five years are as follows:

2010	230,364
2011	244,246
2012	258,759
2013	271,526
2014	284,927

8. DEFERRED CONTRIBUTIONS

a) Expenses of future periods

Deferred contributions related to expenses of future periods represent unspent externally restricted donations and grants received for future expenditures including capital assets. Amortization is recorded as revenue in the statement of operations and matched with expenditures incurred with these funds.

	2009	2008
Balance, beginning of year	$ 3,091,315	$ 2,710,162
Additional contributions received	4,846,146	3,429,023
Amount transferred to capital assets	(1,154,893)	(706,125)
Less amounts amortized to revenue	(2,732,299)	(2,341,745)
	$ 4,050,269	$ 3,091,315

b) Capital assets

Deferred capital contributions related to capital assets represent the unamortized amount of grants and donations received for the purchase of capital assets. The amortization of capital contributions is recorded as revenue in the statement of operations.

	2009	2008
Balance, beginning of year	$ 75,069,879	$ 76,526,493
Additional contributions received	4,989,571	5,402,164
Amount transferred from expenses of future periods	1,154,893	706,125
Assets transferred to Diagnostics Services of Manitoba	-	(2,968,950)
Less amounts amortized to revenue	(5,027,360)	(4,595,953)
	$ 76,186,983	$ 75,069,879

9. NET ASSETS - INVESTED IN CAPITAL ASSETS

a) Invested in capital assets is calculated as follows:

	2009	2008
Capital assets	$ 80,562,663	$ 79,229,923
Amounts financed by:		
Deferred contributions	(76,186,983)	(75,069,879)
Long term debt	(2,656,073)	(2,779,086)
Working capital	188	188
	$ 1,719,795	$ 1,381,146

b) Change in net assets invested in capital assets is calculated as follows:

	2009	2008
Excess (deficiency) of revenues over expenses		
Amortization of deferred contributions related to capital assets	$ 5,027,360	$ 4,595,953
Amortization of capital assets	(5,239,335)	(4,801,600)
	(211,975)	(205,647)
Repayment of non-Manitoba Health funded long term debt	213,015	199,254
Investment in capital assets		
	6,572,070	6,151,310
Amounts funded by deferred contributions	(6,144,458)	(6,108,287)
Amounts funded with debt	(90,000)	-
	337,612	43,023
	$ 338,652	$ 36,630

10. NET ASSETS - CONTRACT FACILITIES

Contract facilities - net assets represent the net assets, other than invested in capital assets, of the contract facilities that have been consolidated in the financial statements of the Authority.

The amounts are as follows:

	2009	2008
Internally restricted	$ 144,060	$ 116,687
Externally restricted	14,774	13,559
Unrestricted	877,907	1,097,562
	$ 1,036,741	$ 1,227,808

11. NET ASSETS - INTERNALLY RESTRICTED

The board of directors has restricted $270,170 (2008 - $276,773) in net assets to be used for the purchase of specified capital assets.

12. COMMITMENTS AND CONTINGENCIES

a) The Authority is subject to individual legal actions arising in the normal course of business. The effect of any contingent claims relating to these legal actions is not determinable at the date of the audit report.

b) The Healthcare Insurance Reciprocal of Canada ("HIROC") is an organization that pools the public liability insurance risks of all its members. The Authority may be subject to reassessment for losses, if any, experienced by the pool for the years in which it was a member, and these losses could be material. No reassessments have been made to March 31, 2009.

13. MANITOBA HEALTH REVENUE

Manitoba Health revenue includes the following:

	2009	2008
Revenue as per final approved budget	$ 163,231,363	$ 150,357,360
Province of Manitoba loan principal	(302,610)	(672,030)
Amounts recorded as deferred contributions	(777,426)	(750,124)
	162,151,327	148,935,206
Current year's estimated out of globe amounts	(19,090)	(17,290)
One time funding - contract settlements	1,077,562	1,824,365
One time funding - wait list	1,308,691	2,624,489
One time funding - EMS Inter-facility transfer	546,730	239,166
One time funding - medical remuneration	(1,712,446)	(1,305,731)
One time funding - Personal care home staffing guideline	471,924	-
One time funding - other	973,593	947,631
Prior years' funding adjustments	-	(140,985)
	$ 164,798,291	$ 153,106,851

14. RELATED PARTY AND ECONOMIC DEPENDENCE

The Authority receives in excess of 80% of its total revenue from Manitoba Health and is economically dependent on Manitoba Health for its continued operations.

15. ACCOUNTING TREATMENT FOR FOUNDATIONS

The Authority has not disclosed the inter-relationships nor the degree of economic dependence with its Foundations because none of the large number of organizations that make up this group are controlled by the Authority and the organizations are individually immaterial to the Authority as a whole.

16. RETIREMENT ENTITLEMENT OBLIGATIONS

a) Accrued Retirement Entitlement

The Authority's contractual commitment, based on an actuarial valuation, for the pre-retirement entitlement for all employees, is to pay out four days of salary per year of service upon retirement if the employee complies with one of the following conditions:

i) have ten years service and have reached age 55 or
ii) qualify for the "eighty" rule which is calculated by adding the number of years of service to the age of the employee or
iii) retire at of after age 65 or
iv) terminate employment at any time due to permanent disability

The Authority undertook an actuarial valuation of the accrued retirement entitlements. The significant actuarial assumptions adopted in measuring the Authority's accrued retirement entitlements include mortality and withdrawal rates, a discount rate of 4.2% (5.0% in 2008) and a rate of salary increase of 3.0% (3.0% in 2008) plus age related merit / promotion scale with actuarial derived provisions for disability.

Funding for the retirement obligation at March 31, 2004 in the amount of $9,106,000 has been set up as a non-current receivable from the Province. The amount recorded as a receivable from the Province for pre-retirement costs was initially determined based on the value of the corresponding actuarial liability for pre-retirement costs as at March 31, 2004. Subsequent to March 31, 2004, the Province has included in its ongoing annual funding to the Organization, an amount equivalent to the change in the pre-retirement liability, which includes annual interest accretion related to the receivable. The receivable will be paid by the Province when the organization requires the funding to discharge the related pre-retirement liabilities.

b) Pension Plan

Most of the employees of the Authority are members of the Healthcare Employees Pension Plan (the "Plan"), which is a multi-employer defined benefit pension plan available to all eligible employees. Plan members will receive benefits based on the length of service and on the average annualized earnings calculated on the best five of the eleven consecutive years prior to retirement, termination or death, that provide the highest earnings. The costs of the benefit plan are not allocated to the individual entities within the related group. As a result, individual entities within the related group are not able to identify their share of the underlying assets and liabilities. Therefore, the plan is accounted for as a defined contribution plan in accordance with the requirements of the Canadian Institute of Chartered Accountants' Handbook section 3461.

Pension assets consist of investment grade securities. Market and credit risk on these securities are managed by the Plan by placing assets in trust and through the Plan investment policy. Pension expense is based on Plan management's best estimates, in consultation with its actuaries, of the amount, together with the 5% of basic annual earnings up to the Canada Pension Plan ceiling contributed by employees, required to provide a high level of assurance that benefits will be fully represented by fund assets at retirement, as provided by the Plan. The funding objective is for the employer contributions to the Plan to remain a constant percentage of employee' contributions.

Variances between actuarial funding estimates and actual experience may be material and any differences are generally to be funded by the participating members. The most recent actuarial valuation of the plan as at December 31, 2007, indicates an excess of actuarial value of net assets over actuarial present value of accrued pension benefits of $83,993,000 as well as a solvency deficiency of $61,050,000. Actual contributions to the plan made during the year by the Authority on behalf of its employees amounted to $5,085,000 (2008 - $4,852,000) and are included in the statement of operations.

Some of the employees of the Authority are eligible for membership in the provincially operated Civil Service Superannuation Plan. The pension liability for Authority employees is included in the Province of Manitoba's liability for Civil Service Superannuation Fund. Accordingly, no provision is required in the financial statements relating to the effects of participating in the plan by the Authority and its employees.

17. CAPITAL MANAGEMENT

The Authority defines its capital as the amounts included in the Net Asset balances.

The Authority's objective when managing capital is to safeguard its ability to continue as a going concern so that it can continue to provide the appropriate level of care and service to the region.

The Authority sets the amount of capital in proportion to risk and manages the capital structure and makes adjustments to it in light of changes to economic conditions and the risk characteristics of the underlying assets. The Authority has complied with its externally imposed capital requirements.

18. PRIOR PERIOD ADJUSTMENT

Contract facility net assets have been increased by $72,198 to reflect a change in the Authority's contract facility receivables subsequent to the release of the Authority's March 31, 2008 financial statements. Unrestricted net assets have been increased by $67,223 to reflect a change in the pre-retirement liability from a past reporting period.

Auditors' Report

To the Board of Directors of
SOUTH EASTMAN HEALTH/SANTÉ SUD-EST INC.

We have audited the consolidated statement of financial position of **SOUTH EASTMAN HEALTH/SANTÉ SUD-EST INC.** as at March 31, 2009 and the consolidated statements of operations, changes in net assets and cash flows for the year then ended. These financial statements are the responsibility of the Authority's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, the financial statements present fairly, in all material respects, the financial position of the Authority as at March 31, 2009 and the results of its operations and its cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

Interest paid	$ -	$ 4,813

The accompanying summary of significant accounting policies and notes are an integral part of these financial statements.

The financial statements have been prepared by management in accordance with Canadian generally accepted accounting principles for not-for-profit organizations.

Revenue Recognition

The Authority follows the deferral method of accounting for contributions which include donations and government grants.

Under the Health Services Insurance Act and regulations thereto, the Authority is funded primarily by the Province of Manitoba in accordance with budget arrangements established by Manitoba Health and Healthy Living (MHHL). Operating grants are recorded as revenue in the period to which they relate. Grants approved but not received at the end of an accounting period are accrued. Where a portion of a grant relates to a future period, it is deferred and recognized in that subsequent period. These financial statements reflect agreed funding arrangements with MHHL with respect to the year ended March 31, 2009.

With respect to actual operating results, certain adjustments to funding will be made by MHHL after completion of their review of the Authority's accounts.

In-Globe Funding is funding approved by MHHL for Regional Health Authority programs unless otherwise specified as Out-of-Globe Funding. This includes volume changes and price increases for the seven service categories of Acute Care, Long Term Care, Community and Mental Health, Home Care and Emergency Response and Transport, Diagnostic Services and Regional Health Authority. All additional costs in these seven service categories must be absorbed from within the global funding provided.

Any operating surplus greater than 2% of budget related to global funding arrangements is recorded on the statement of financial position as a payable to MHHL until such time as MHHL reviews the financial statements. At that time, MHHL determines what portion of the approved surplus may be retained by the Authority, or repaid to MHHL.

Under MHHL policy, the Authority is responsible for In-Globe deficits, unless otherwise approved by MHHL.

Out-of-Globe Funding is funding approved by MHHL for specific programs.

Any operating surpluses related to Out-of-Globe funding arrangements are recorded on the statement of financial position as a payable to MHHL until such time as MHHL reviews the financial statements. At that time, MHHL determines what portion of the approved surplus may be retained by the Authority, or repaid to MHHL.

SOUTH EASTMAN HEALTH/SANTÉ SUD-EST INC.
Summary of Significant Accounting Policies

March 31, 2009

Revenue Recognition (continued)

Conversely, any operating deficits related to Out-of-Globe funding arrangements are recorded on the statement of financial position as a receivable from MHHL until such time as MHHL reviews the financial statements. At that time, MHHL determines their final funding approvals which indicate the portion of the deficit that will be paid to the Authority. Any unapproved costs not paid by MHHL are absorbed by the Authority.

Any adjustments will be reflected in the year the final statement of recommended costs is received from MHHL.

Unrestricted contributions are recognized as revenue when received or receivable if the amount to be received can be reasonably estimated and collection is reasonably assured.

Externally restricted contributions are recognized as revenue in the year in which the related expenses are recognized. Contributions restricted for the purchase of capital assets are deferred and amortized into revenue on a straight-line basis, at a rate corresponding with the amortization rate for the related capital assets.

Restricted investment income is recognized as revenue in the year in which the related expenses are recognized. Unrestricted investment income is recognized as revenue in the year in which it is earned.

Inventories

Inventories are valued at the lower of cost and net realizable value, cost being determined by the first-in, first-out method in all areas excluding materials management which is determined by the average cost method.

Employee Future Benefits

Pension and other employee future benefit costs are determined using the projected benefit method prorated on years of service and based on best estimate assumptions.

Contributed Services

A substantial number of volunteers contribute a significant amount of their time each year. Because of the difficulty of determining the fair value, contributed services are not recognized in the financial statements.

Capital Assets

Purchased capital assets are recorded at cost. Contributed capital assets are recorded at fair value at the date of contribution. Repairs and maintenance costs are charged to expense. Betterments which extend the estimated useful life of an asset are capitalized. When a capital asset no longer contributes to the Authority's ability to provide services, its carrying amount is written down to its residual value.

Capital assets are amortized on a straight-line basis using the following annual rates:

Buildings	2.5%
Building renovations and upgrades	5%
Building service equipment	5%
Major equipment	10%
Computer hardware and software	20%

Use of Estimates

In preparing the Authority's financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements and reported amounts of revenue and expenditures during the period. Actual results could differ from these estimates.

Financial Instruments

The Authority utilizes various financial instruments.

All transactions related to financial instruments are recorded on a settlement date basis.

The Authority classifies its financial instruments as follows based on the purpose for which the asset was acquired and follows the disclosed accounting policy for each category.

Assets/Liability	Category	Measurement
Cash	Held for trading	Fair value
Bank indebtedness	Held for trading	Fair value
Accounts receivable	Loans and receivables	Amortized cost
Vacation entitlements receivable	Loans and receivables	Amortized cost
Retirement obligations receivable	Loans and receivables	Amortized cost
Due to/from MHHL	Loans and receivables	Amortized cost
Accounts payable and accruals	Other financial liabilities	Amortized cost

Financial Instruments (continued)

- Held for trading items are carried at fair value, with changes in their fair value recognized in the statement of operations.
- Other financial liabilities are carried at amortized cost, using the effective interest method.
- Loans and receivables are carried at amortized cost, using the effective interest rate method, less any provision for impairment.

Transaction costs are expensed as incurred.

New Accounting Pronouncements

Recent accounting pronouncements that have been issued but are not yet effective, and have a potential implication for the Authority, are as follows:

Financial Statement Concepts

CICA Handbook Section 1000, Financial Statement Concepts has been amended to focus on the capitalization of costs that truly meet the definition of an asset and de-emphasizes the matching principle.

The revised requirements are effective for annual and interim financial statements relating to fiscal years beginning on or after October 1, 2008. The Authority is currently evaluating the impact of the adoption of this change on the disclosure within its financial statements.

Financial Instruments - Disclosure and Presentation

On October 15, 2008 the CICA deferred indefinitely the requirement of not-for-profit organizations to implement new standards dealing with certain financial instrument disclosures and presentation. The Authority has elected to defer application of these standards.

New Accounting Pronouncements (continued)

Financial Statements by Not-for-Profit Organizations

In September 2008, a number of standards applicable to not-for-profit organizations were amended and issued. The changes are intended to improve financial reporting by not-for-profit organizations and make not-for-profit standards consistent with those of profit-oriented enterprises when they address the same issues. These amendments which are effective for fiscal years beginning on or after January 1, 2009 will not have a significant impact on the results of operations or financial position.

In December 2008, the AcSB and the Public Sector Accounting Board issued a joint Invitation to Comment, "Financial Reporting by Not-for-Profit Organizations," to invite feedback on the future of financial reporting by not-for-profit organizations. The financial reporting options under consideration by the AcSB include IFRSs, private enterprise standards and public sector standards. Until the strategy has been determined and implemented, not-for-profit organizations will continue to apply current accounting standards.

The Authority continues to monitor the developments in this area and evaluate the implications of the potential changes in financial reporting standards.

1. Entity Definition and Basis of Financial Statements

South Eastman Health/Santé Sud-Est Inc. was incorporated under the laws of the Province of Manitoba on January 2, 1996. The Authority commenced providing health care services on April 1, 1997 in the southeastern region of Manitoba. The Authority is a registered charity under The Income Tax Act and accordingly is exempt from income taxes, provided certain requirements of The Income Tax Act are met.

Under the Regional Health Authorities and Consequential Amendments Act, the Authority entered into negotiations with all health care facilities in the region to either transfer those facilities' operations, property, liabilities and obligations to the Authority or to operate as a contract facility funded by the Authority. These negotiations have been completed. Obligations under these agreements are detailed further in Note 6.

Three facilities within the region operate under contract arrangements for funding with the Authority. They are Rest Haven Nursing Home, Menno Home for the Aged and Villa Youville Inc. - Nursing. The operations of these facilities have been consolidated in these financial statements as the Authority exercises significant influence over them by virtue of acting as funding agent. Any non-MHHL funded activities of these facilities (i.e. apartments, seniors' housing) have been excluded from these financial statements.

2. Change in Accounting Policy

Capital disclosures

On April 1, 2008 the Authority adopted a requirement of the CICA to provide disclosure about how it manages its unrestricted net assets (See Note 14).

3. Accounts Receivable

	2009	2008
Receivables from patients	$ **140,472**	$ 132,934
Receivables from residents	**34,277**	47,050
Goods and services tax	**148,605**	120,892
Due from related parties of Contract facilities	**56,197**	282,508
Capital funding receivable	**815,421**	559,799
Receivables from foundations	**555,981**	816,096
Other		
RHA	**144,332**	485,676
Contract facilities	**48,530**	46,364
	$ **1,943,815**	$ 2,491,319

4. Accrued Vacation Entitlements

The Authority records a provision for accrued vacation entitlements. Prior to March 31, 2004 changes in the liability related to vacation were recoverable from MHHL. At that date, MHHL advised that subsequent to March 31, 2004 all funding related to past and future vacation entitlement costs would be included in in-globe funding and that the maximum liability to be recognized by MHHL to facilities would be capped at March 31, 2004 levels. Accordingly, each year as vacation entitlements are paid and earned by the Authority's employees, the related vacation entitlement receivable is collected and re-established up to this maximum amount.

An analysis of the changes in the vacation entitlements receivable from MHHL is as follows:

	2009	2008
Balance, beginning of year	**$ 2,653,549**	$ 2,653,549
Net changes in vacation entitlements receivable	**-**	-
Balance, end of year	**$ 2,653,549**	$ 2,653,549

An analysis of the changes accrued in the vacation entitlements is as follows:

	2009	2008
Balance, beginning of year	**$ 3,444,943**	$ 3,198,008
Net increase in accrued vacation entitlements	**310,201**	246,935
Balance, end of year	**$ 3,755,144**	$ 3,444,943

5. Due from (to) Manitoba Health and Healthy Living

	2009	2008

Capital interest	(6,621)	102,546
Medical remuneration 2007/08	(651,889)	(651,889)
Medical remuneration 2008/09	(611,343)	-
	$ (359,460)	$ 832,732

6. Restricted Assets

The Authority entered and completed negotiations with the health facilities in the region to have their obligations, property, and liabilities transferred to the Authority. The Authority agreed to use prior operating surpluses to promote health within the specific districts. These operating surpluses were as follows:

	De Salaberry District Health Centre	Ste. Anne Hospital	Total
Balance, beginning of year	$ 79,582	$ 18,393	$ 97,975
Interest	3,080	712	3,792
Balance, end of year	$ 82,662	$ 19,105	$ 101,767

7. Capital Assets

	2009		2008	
	Cost	**Accumulated Amortization**	Cost	Accumulated Amortization
Land	**$ 768,088**	**$ -**	$ 768,088	$ -
Buildings	**62,158,059**	**18,152,637**	61,579,841	15,971,270
Major equipment	**10,047,889**	**3,514,618**	19,829,508	14,100,323
Construction in progress	**976,887**	**-**	922,669	-
	$ 73,950,923	**$ 21,667,255**	$ 83,100,106	$ 30,071,593
Cost less accumulated amortization		**$ 52,283,668**		$ 53,028,513

During the year, the Authority completed a project to inventory all capital assets. As a result of the project, capital assets which were fully amortized and no longer in use have been removed from the Authority's accounting records. The original cost of these items totalled $11,892,398, however the related net book value was nil and there was no gain or loss.

8. Bank Indebtedness

The Authority has an approved operating line of credit with the Royal Bank of Canada to a maximum amount of $2,700,000. The line of credit bears interest at Royal Bank prime less 0.80% and is supported by an authorization letter from MHHL and assignment of fire insurance covering property of every description.

In addition, the contract facilities have approved operating lines of credit with various financial institutions for an aggregate of $380,000. The lines of credit bear interest at prime to prime plus 1% and are supported by authorization letters from MHHL and general security agreements.

9. Deferred Contributions

a) Expenses of future periods

Deferred contributions related to expenses of future periods represent the unspent amount of donations, grants received and grants for major repairs and construction projects.

	2009	2008
Balance, beginning of year	$ 893,046	$ 1,157,939
Additional amounts received during year	908,686	502,893
Less expenditures	(581,548)	(344,863)
Reclassifications to unearned revenues	-	(55,945)
Transfers to externally restricted - contract facilities	-	(972)
Transfers (to) from deferred contributions - capital assets	-	(366,006)
Balance, end of year	$ 1,220,184	$ 893,046

b) Capital assets

Deferred capital contributions related to capital assets represent the unamortized amount of donations, grants received and funding of approved borrowings for the purchase of capital assets. The amortization of deferred capital contributions is recorded as revenue in the statement of operations at rates which match the amortization of the related capital asset purchased with the donations, grants or approved borrowings.

Changes in the deferred contribution balance are as follows:

	2009	2008
Balance, beginning of year	$ 52,289,265	$ 49,667,195
Additional contributions received, net	2,743,215	6,257,142
Transfers to deferred contributions		
- expenses of future periods	-	366,006
- investment in capital assets	(28,840)	(71,304)
Less assets transferred to Diagnostic Services of Manitoba	(225,497)	(1,157,986)
Less amounts amortized to revenue	(3,262,563)	(2,771,788)
Balance, end of year	$ 51,515,580	$ 52,289,265

10. Investment in Capital Assets

a) Investment in capital assets is calculated as follows:

	2009	2008
Capital assets	$ 52,283,668	$ 53,028,513
Amounts financed by		
Deferred contributions	51,515,580	52,289,265
	$ 768,088	$ 739,248

b) Change in net assets invested in capital assets is calculated as follows:

	2009	2008
Excess of revenue over expenditures		
Amortization of deferred contributions related to capital assets	$ 3,262,563	$ 2,771,788
Amortization of capital assets	(3,262,563)	(2,771,788)
	$ -	$ -
Net changes in investment in capital assets		
Purchase of capital assets (net)	$ 2,743,215	$ 4,988,709
Amounts funded		
MHHL funding	(2,717,589)	(4,923,372)
Donations	(25,626)	(1,333,770)
Transfers to (from)		
Deferred contributions		
- expenses of future periods (net)	-	(366,006)
Repayment of long-term debt	-	100,840
	$ -	$ (1,533,599)

11. Revenue from Manitoba Health and Healthy Living

	2009	2008
Revenue from MHHL		
Revenue as per MHHL's final funding document	**$ 74,144,002**	$ 65,380,462
Add: Manitoba Department of Finance reallocations	**975,465**	998,029
Wage standardization	**194,609**	834,638
	75,314,076	67,213,129
Deduct: Medical remuneration	**611,343**	651,889
Total Funding Approved by MHHL	**74,702,733**	66,561,240
Deduct: Amounts recorded as deferred contributions		
- expenses of future periods	**908,686**	19,794
- capital assets	**934,764**	1,214,792
- capital interest funded	**262,450**	404,128
- capital interest receivable	**46,266**	76,135
Revenue from MHHL	**$ 72,550,567**	$ 64,846,391

12. Commitments and Contingencies

a) The nature of the health care industry's activities is such that there is usually litigation pending or in prospect at any time. With respect to claims at March 31, 2009, management believes the Authority has valid defences and appropriate insurance coverages in place. In the event any claims are successful, management believes that such claims are not expected to have a material effect on the Authority's financial position.

b) On July 1, 1987, a group of health care organizations, ("subscribers"), formed Healthcare Insurance Reciprocal of Canada ("HIROC"). HIROC is registered as a Reciprocal pursuant to provincial Insurance Acts, which permit persons reciprocal contracts of the indemnity insurance. HIROC facilitates the provision of liability insurance coverage to health care organizations in the provinces of Ontario, Manitoba, Saskatchewan and Newfoundland. Subscribers pay annual premiums, which are actuarially determined, and are subject to assessment for losses in excess of such premiums, of any experienced by the group of subscribers for the years in which they were a subscriber. No such assessments have been made to March 31, 2009.

The Authority's coverage also includes contract facilities as named insured parties.

c) At March 31, 2009, minimum annual lease payments under operating leases for premises expiring at various dates up to 2021 are $325,246 to be adjusted annually for inflation.

13. Employee Future Benefits

a) Accrued retirement entitlement

Accrued retirement obligations are based on an actuarial valuation as at March 31, 2009.

The RHA's contractual commitment for the pre-retirement entitlement for members of the Health Employee Pension Plan is to pay out four days of salary for each year of service upon retirement if the employee complies with one of the following conditions:

- has ten years service and has reached the age of 55 or;
- qualifies for the "eighty" rule which is calculated by adding the number of years service to the age of the employee or;
- retires at or after age 65 or;
- terminates employment at any time due to permanent disability

The significant actuarial assumptions adopted in measuring the Authority's accrued retirement entitlements include mortality and withdrawals rates, a discount rate of 6.7% (5.5% in 2008) and a rate of salary of 3.5% (3.5% in 2008) plus an age related merit/promotion scale with no provision for disability.

The amount recorded as a receivable from the Province for pre-retirement costs was initially determined based on the value of the corresponding actuarial liability for pre-retirement costs as at March 31, 2004. Subsequent to March 31, 2004, the Province has included in its ongoing annual in-globe funding to the Authority, an amount equivalent to the change in the pre-retirement liability, which includes annual interest accretion related to the receivable. The receivable will be paid by the Province when required.

An analysis of the changes in the employee benefits payable is as follows:

	2009	2008
Balance, beginning of year	**$ 3,699,024**	$ 3,311,699
Net increase in pre-retirement entitlements	**84,471**	387,325
Balance, end of year	**$ 3,783,495**	$ 3,699,024

b) Pension plan

Substantially all of the employees of the Authority are members of the Healthcare Employees Pension Plan (a successor to the Manitoba Health Organization Inc. Plan) (the "Plan") which is a multi-employer defined benefit pension plan available to all eligible employees of the participating members of the Plan. Plan members will receive benefits based on the length of service and on the average of annualized earnings during the best five years of the last eleven years prior to retirement, termination or death, that provides the highest earnings.

13. Employee Future Benefits (continued)

Pension assets consist of investment grade securities. Market and credit risk on these securities are managed by the Plan by placing plan assets in trust and through the Plan investment policy.

Pension expense is based on Plan management's best estimates, in consultation with its actuaries, of the amount, together with the 6.80% of salary, 8.40% for salaries greater than $46,300, contributed by employees, required to provide a high level of assurance that benefits will be fully represented by fund assets at retirement, as provided by the Plan. The funding objective is for employer contributions to the Plan to remain a constant percentage of employees' contributions.

Variances between actuarial funding estimates and actual experience may be material and any differences are generally to be funded by the participating members. The most recent actuarial valuation of the plan as at December 31, 2007 indicates the Plan is in a deficit; however, it is anticipated that recently implemented increases in contribution rates will correct this deficiency within the allowed timeframe. Contributions to the plan made during the year by the Authority on behalf of its employees amounted to $2,081,397 (2008 - $1,877,394) and are included in the statement of operations.

The remainder of employees are members of the Province of Manitoba's defined benefit Civil Service Superannuation Plan. Liability for variances between actuarial funding estimates and actual experience lies with the Province.

14. Capital Management

The Authority considers its capital to comprise its externally restricted and unrestricted net assets and investment in capital assets balances. There have been no changes to what the Authority considers to be its capital since the previous period.

As a not-for-profit entity, the Authority's operations are reliant on revenue generated annually. The Authority has accumulated unrestricted funds over its history, which are included in the unrestricted net asset balance in the statement of changes in net assets. A portion of the accumulated unrestricted funds is retained as working capital (current assets less current liabilities) which may be required from time to time due to timing delays in receiving its primary funding. The remaining unrestricted funds are available for the use of the Authority at the Board's discretion subject to the restrictions of MHHL. There are external restrictions on the restricted net assets and the Authority has complied with these restrictions.

15. Financial Risk Management

The Authority is exposed to different types of risk in the normal course of operations, including credit risk and market risk. The Authority's objective in risk management is to optimize the risk return trade-off, within set limits, by applying integrated risk management and control strategies, policies and procedures throughout the Authority's activities.

Credit risk

Credit risk is the risk that one party to a financial instrument fails to discharge an obligation and causes financial loss to another party. Financial instruments which potentially subject the Authority to credit risk consist principally of accounts receivable.

The Authority's maximum exposure to credit risk without taking account of any collateral or other credit enhancements is as follows:

	2009	2008
Accounts receivable	$ **1,943,815**	$ 2,491,319
Due from Manitoba Health and Healthy Living	**-**	832,732
Vacation entitlements receivable	**2,653,549**	2,653,549
Retirement obligations receivable	**2,357,152**	2,357,152
	$ **6,954,516**	$ 8,334,752

Accounts receivable: The Authority is not exposed to significant credit risk as the receivable is spread among a large client base and geographic region and payment in full is typically collected when it is due. The Authority establishes an allowance for doubtful accounts that represents its estimate of potential credit losses. The allowance for doubtful accounts is based on management's estimates and assumptions regarding current market conditions, customer analysis and historical payment trends. These factors are considered when determining whether past due accounts are allowed for or written off.

Due from MHHL, vacation entitlements receivable and retirement obligations receivable: The Authority is not exposed to significant credit risk as these receivables are from the Province of Manitoba.

Market Risk

Market risk is the risk the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: interest rate risk, foreign exchange risk and other price risk.

Interest rate risk is the risk that the value of a financial instrument will fluctuate due to changes in market interest rates. The Authority is not exposed to significant interest rate risk. Its cash is held in short-term or variable rate products and its bank indebtedness is also at variable rates.

15. Financial Risk Management (continued)

The Authority is not exposed to significant foreign currency risk as it does not have any financial instruments denominated in foreign currency and the number of transactions in foreign currency are minimal and the Authority is not exposed to other price risk.

Fair Value

The carrying values of cash (bank indebtedness), accounts receivable, amounts due from (to) MHHL, vacation entitlements receivable and retirement obligations receivable and accounts payable and accrued liabilities approximate their fair value due to the relatively short periods to maturity of these items or because they are receivable or payable on demand.

WINNIPEG REGIONAL HEALTH AUTHORITY

MANAGEMENT'S RESPONSIBILITY FOR FINANCIAL REPORTING
CONSOLIDATED FINANCIAL STATEMENTS
MARCH 31, 2009

The accompanying consolidated financial statements are the responsibility of management and have been approved by the Winnipeg Regional Health Authority. The consolidated financial statements were prepared in accordance with Canadian generally accepted accounting principles and of necessity include some amounts that are based on estimates and judgements.

To discharge its responsibility for the integrity and objectivity of financial reporting, management maintains a system of internal accounting controls comprising written policies, standards and procedures, a formal authorization structure, and satisfactory processes for reviewing internal controls. This system is designed to provide management with reasonable assurance that transactions are in accordance with governing legislation, are properly authorized, reliable financial records are maintained, and assets are adequately accounted for and safeguarded.

Deloitte & Touche LLP provides an independent audit of the consolidated financial statements. Their examination is conducted in accordance with Canadian generally accepted auditing standards and includes tests and other procedures, which allow them to report on the fairness of the consolidated financial statements prepared by management.

AUDITORS' REPORT

To the Directors of
Winnipeg Regional Health Authority

We have audited the consolidated statement of financial position of Winnipeg Regional Health Authority (the "Authority") as at March 31, 2009 and the consolidated statements of operations, changes in net assets and cash flows for the year then ended. These financial statements are the responsibility of the Authority's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these consolidated financial statements present fairly, in all material respects, the financial position of the Authority as at March 31, 2009 and the results of its operations and its cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

1. NATURE OF BUSINESS

The Winnipeg Regional Health Authority ("the Authority", "WRHA") was established on December 1, 1999. The Authority provides community health services directly through its operations of Home Care, Mental Health and Public Health and provides acute care services through its Health Sciences Centre, Deer Lodge Centre, Grace General Hospital and Pan Am Clinic sites. Acute care services are also provided by Concordia Hospital, Seven Oaks General Hospital, Victoria General Hospital ("the Community Hospitals") and the three non-devolved hospitals, Misericordia Health Centre, Riverview Health Centre, Inc., St. Boniface General Hospital ("the Other Hospitals"), and the Manitoba Adolescent Treatment Centre ("MATC"). Long term care, community health and other health services are delivered in the region through non-proprietary and proprietary personal care homes and community health agencies as well as through a number of non-profit organizations.

The Authority is a not-for-profit organization under the Income Tax Act and accordingly is exempt from income taxes, provided certain requirements of the Income Tax Act are met.

2. CHANGES IN ACCOUNTING POLICIES

The Authority has adopted the following recommendations of the CICA Handbook:

a) Section 3031, Inventories

Effective April 1, 2008, the Authority adopted CICA section 3031, *Inventories*, which replaces section 3030, *Inventories*. The revised standard provides more extensive guidance on measurement, and expands disclosure requirements to increase transparency. The Authority's accounting policy for inventory is consistent with measurement requirements in the new standard and as a result, no adjustment was recorded on transition; however, additional disclosures are required. The additional disclosure requirements will be applied as described below.

The main features of the new standard, which impact the Authority, include:

- Consistent use of either a first-in first-out or weighted average formula to measure the cost of other inventories. The Authority uses the weighted average formula to measure cost.
- Disclosure of the accounting policies used, carrying amounts, amounts recognized as an expense, write-downs, and the amount of any reversal of any write-downs recognized as a reduction in expenses.

b) Section 3861, Financial Instruments – Disclosure and Presentation

The Authority has elected to use the exemption provided by the Canadian Institute of Chartered Accountants (CICA) permitting not-for-profit organizations not to apply Sections 3862 and 3863 of the CICA Handbook which would otherwise have applied to the financial statements of the Authority for the year ended December 31, 2008. The Authority applies the requirements of Section 3861 of the CICA Handbook.

2. CHANGES IN ACCOUNTING POLICIES (continued)

c) Section 1535, Capital Disclosures

Effective April 1, 2008, the Authority adopted CICA section 1535, *Capital Disclosures*, which establishes standards for the disclosure of: (i) an entity's objectives, policies and processes for managing capital; (ii) quantitative data about what the entity regards as capital; (iii) whether the entity has complied with any capital requirements; and (iv) if it has not complied, the consequences of such non-compliance.

d) Section 3855, Financial Instruments – Recognition and Measurement

Effective April 1, 2007, the Authority adopted CICA section 3855, Financial Instruments – Recognition and Measurement, which describes the standards for recognizing and measuring financial instruments in the statement of financial position and the standards for reporting gains and losses in the financial statements. Under the new standard, financial assets and liabilities are initially recorded at fair value. Subsequently, financial instruments classified as financial assets or liabilities held for trading, financial assets available-for-sale and derivative financial instruments, part of a hedging relationship or not, have to be measured at fair value on the balance sheet at each reporting date, whereas other financial instruments are measured at amortized cost using the effective interest method.

3. SIGNIFICANT ACCOUNTING POLICIES

The financial statements have been prepared in accordance with Canadian generally accepted accounting principles.

a) The reporting entity

The scope of the Authority's operations is classified into these three distinct segments:

i. Direct Operations provided through:
   - Direct Ownership – Home Care services, Mental Health services, Public Health services, Primary Care services, Acute Care services (Health Sciences Centre, Deer Lodge Centre, Grace General Hospital and Pan Am sites), and Medical Remuneration.
   - Agreement – the Community Hospitals by means of agreements to further regionalization and operating agreements.
   - Non-devolved Other Hospitals and MATC – by means of operating agreements

ii. Long term care and community health services – provided through non-proprietary and proprietary personal care homes and community health agencies by means of service purchase agreements.

iii. Other health services – provided through various agencies by means of grant funding mechanisms.

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

b) Definition of controlled entity

The Authority is the majority funder of the Community Hospitals, the Other Hospitals and MATC, which act as the Authority's agents in providing health care services mandated by the Province of Manitoba. These health care services are delivered under the control of the Authority from an accounting perspective. This determination of control is based largely on the fact that the Community Hospitals', the Other Hospitals', and MATC's purposes are integrated with that of the WRHA such that they and the WRHA have common and complementary objectives. Moreover, due to the existence of operating agreements between the Authority and the Community Hospitals, Other Hospitals and MATC, the WRHA has the ability to determine their strategic operating, investing and financing policies.

Additionally, the Deer Lodge Centre Foundation is a controlled entity by virtue of the fact that its purpose is to raise funds under the direction of the Deer Lodge Centre.

As permitted by Canadian generally accepted accounting principles, the controlled Community Hospitals, Other Hospitals and MATC have been consolidated into the Authority's financial statements due to the nature of the agreements in existence, while the controlled Deer Lodge Centre Foundation has not since it is not directly involved in the delivery of health care services. Note 20 provides a financial summary of this controlled non-consolidated entity.

c) Revenue recognition

The Authority follows the deferral method of accounting for contributions:

i. Operating contributions – recorded as revenue in the period to which they relate.

ii. Unrestricted contributions – recognized as revenue when received or receivable if the amount to be received can be reasonably estimated and collection is reasonably assured.

iii. Externally restricted contributions – recognized as revenue in the year in which the related expenses are recognized.

iv. Contributions restricted for the purchase of capital assets are deferred and amortized into revenue on a straight-line basis, at a rate corresponding with the amortization rate for the related capital assets.

v. Contributions approved but not received at the end of an accounting period are accrued. Where a portion of a contribution relates to a future period, it is deferred and recognized in that subsequent period.

The Authority is funded by the Province of Manitoba using Manitoba Health and Healthy Living funding mechanisms. These financial statements use funding mechanisms approved by Manitoba Health and Healthy Living for the year ended March 31, 2009.

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

d) Inventory

Inventory consists of medical supplies, drugs, linen and other supplies that are measured at the lower of cost and net realizable value. Cost is calculated using the weighted average cost formula. Inventory is expensed when sold or put into use.

e) Capital assets

Purchased capital assets are recorded at cost. Contributed capital assets are recorded at fair value at the date of contribution. Capital assets are amortized on a straight-line basis using an annual rate of:

Buildings	2-20%
Furniture & equipment	5-33%
Computer hardware and software	10-20%
Leasehold improvements	over the life of the lease

f) Surplus retention and use policy

Non-proprietary personal care homes, and community health agencies are eligible to retain insured services surpluses based on an agreed upon formula. The non-retainable portion of the surplus is recorded on their Statement of Financial Position as a payable to WRHA.

g) Use of estimates

The preparation of financial statements in conformity with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from these estimates. The amounts estimated by management include amortization of capital assets, employee future benefits payable and allowance for doubtful accounts.

h) Internally restricted net assets

The Authority has allocated some of the net assets to future capital purchases through internal restrictions by the Boards of Directors.

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

i) Financial instruments

Credit risk

Credit risk arises from the potential that a counterparty will fail to perform its obligations. The Authority's accounts receivable are comprised mostly of amounts due from the Government of Manitoba and from the sites that it funds, minimizing credit risk. The Authority also has some credit risk associated with an interest rate swap. This risk is minimized by entering into the agreement with a major Canadian financial institution.

Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of change in market prices. Market risk comprises three types of risk: foreign exchange risk, interest rate risk, and other price risk.

The Authority is exposed to market risks through the derivative instruments entered into. The Authority uses derivative instruments only for risk management purposes and not for generating trading profit. As such, any change in cash flows associated with derivative instruments due to their exposure to market risks is designed to be offset by changes in cash flows related to the risk being hedged.

The Authority's primary market risk exposure is interest rate risk. This interest rate risk is the risk arising from fluctuations in short term interest rates and the volatility of those rates on the issuance of floating rate debt. The Authority mitigates this risk by retaining the ability to convert all floating rate borrowings to fixed rate borrowings. The Authority has entered into an interest rate swap to manage a proportion of total debt that is subject to variable rates.

The Authority has minimal exposure to exchange and other price risks.

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

i) Financial instruments (continued)

Financial assets and liabilities

Under the standards, financial assets and financial liabilities are initially recognized at fair value and are subsequently accounted for based on their classification as described below. The classification depends on the purpose for which the financial instruments were acquired and their characteristics. Except in very limited circumstances, the classification is not changed subsequent to initial recognition.

Classification	
Cash and marketable securities	Held for trading
Specific purpose funds	Held for trading
Nurse recruitment and retention fund	Held for trading
Derivative Instruments	Held for trading
Investments (bonds, money market and mutual funds)	Held for trading
Investments (mortgage)	Loans and receivables
Accounts receivable	Loans and receivables
Employee benefits recoverable from Manitoba Health and Healthy Living	Loans and receivables
Employee future benefits recoverable from Manitoba Health and Healthy Living	Loans and receivables
Accounts payable and accrued liabilities	Other liabilities
Employee benefits payable	Other liabilities
Long-term debt	Other liabilities
Specific purpose funds	Other liabilities
Nurse recruitment and retention fund	Other liabilities

The carrying value of accounts receivable, employee benefits recoverable from Manitoba Health and Healthy Living, employee future benefits recoverable from Manitoba Health and Healthy Living, accounts payable and accrued liabilities and employee benefits payable approximates their fair value due to the short-term nature of these instruments. The carrying value of specific purpose funds and nurse recruitment and retention fund approximates their fair value due to the held for trading classification of the underlying investments.

Held for trading

Held for trading financial assets are financial assets typically acquired for resale prior to maturity or that are designated as held for trading. They are measured at fair value at the balance sheet date. Fair value fluctuations including interest earned, interest accrued, gains and losses realized on disposal and unrealized gains and losses are included in investment income.

Loans and receivables

Loans and receivables are accounted for at amortized cost using the effective interest method.

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

i) Financial instruments (continued)

Other liabilities

Other liabilities are recorded at amortized cost using the effective interest method and include all financial liabilities, other than derivative instruments.

Effective interest method

The Authority uses the effective interest method to recognize interest income or expense, which includes transaction costs or fees, premiums or discounts earned or incurred for financial instruments.

j) Derivative Financial Instruments

The Authority is using a derivative instrument to manage exposure to changes in interest rates. The Authority's objective for holding this derivative is to minimize risk using the most efficient methods to eliminate or reduce the impacts of this exposure.

The Authority entered into the interest rate swap to manage the interest rate cash flow exposure associated with certain debt obligations. The contract has an effect of converting the floating rate of interest on certain debt to a fixed rate.

Under this swap, the Authority agrees with other parties to exchange, at specified intervals, the difference between fixed contract rates and floating-rate interest amounts calculated by reference to the agreed notional amounts, as well as, amounts reflecting the amortization of principal amounts.

This derivative is measured at fair value at the end of each year and the unrealized gains or losses arising from remeasurement are recorded and presented under interest expense in the consolidated statement of operations.

It is the Authority's policy not to speculate on derivative instruments; thus, these instruments are purchased for risk management purposes.

k) Investments

Effective April 1, 2007, bonds, money market and mutual fund investments are classified as held for trading and are stated at fair value. Unrealized gains and losses, representing the change in the difference between the fair value and the cost of these investments at the beginning and end of each year, are reflected in other income in the Consolidated Statement of Operations. Fair value of investments is determined based on quoted market prices.

The mortgage is classified as loans and receivables and is measured at amortized cost.

For periods prior to April 1, 2007, all investments were recorded at cost, and investment income was recorded on an accrual basis.

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

l) Due to/from Manitoba Health and Healthy Living

In Globe funding

In Globe funding is funding approved by Manitoba Health and Healthy Living for Regional Health Authority programs unless otherwise specified as Out of Globe funding. This includes volume changes and price increases for the five service categories of Acute Care, Long Term Care, Community and Mental Health, Home Care, and Emergency Response and Transport. All additional costs in these five service areas must be absorbed from within the global funding provided.

Any operating surplus greater than 2% of budget related to In Globe funding arrangements is recorded on the statement of financial position as a payable to Manitoba Health and Healthy Living until such time as Manitoba Health and Healthy Living reviews the financial statements. At that time, Manitoba Health and Healthy Living determines what portion of the approved surplus may be retained by the Authority, or repaid to Manitoba Health and Healthy Living.

Under Manitoba Health and Healthy Living policy, the Authority is responsible for In Globe deficits, unless otherwise approved by Manitoba Health and Healthy Living.

Out of Globe funding

Out of Globe funding is funding approved by Manitoba Health and Healthy Living for specific programs.

Any operating surplus related to Out of Globe funding arrangements is recorded on the statement of financial position as a payable to Manitoba Health and Healthy Living until such time as Manitoba Health and Healthy Living reviews the financial statements. At that time, Manitoba Health and Healthy Living determines what portion of the approved surplus may be retained by the Authority, or repaid to Manitoba Health and Healthy Living.

Conversely, any operating deficits related to Out of Globe funding arrangements are recorded on the statement of financial position as a receivable from Manitoba Health and Healthy Living until such time as Manitoba Health and Healthy Living reviews the financial statements. At that time, Manitoba Health and Healthy Living determines their final funding approvals which indicate the portion of the deficit that will be paid to the Authority. Any unapproved costs not paid by Manitoba Health and Healthy Living are absorbed by the Authority.

4. RECENT ACCOUNTING PRONOUNCEMENTS ISSUED AND NOT YET APPLIED

In November 2008, the Canadian Institute of Chartered Accountants issued amendments to Section 1540, Cash flow statements, Section 1751, Interim financial statements, Section 4400, Financial statement presentation by not-for-profit organizations, and issued Section 4470, Disclosure of allocated expenses by not-for-profit organizations. These new standards are effective for fiscal years beginning on or after January 1, 2009, specifically April 1, 2009 for the Authority.

Sections 1540 and 1751 have been amended to include not-for-profit organizations within their scope.

Section 4400 has been amended in order to eliminate the requirement to treat net assets invested in capital assets as a separate component of net assets and, instead, permit a not-for-profit organization to present such an amount as a category of internally restricted net assets when it chooses to do so. It also clarifies that revenues and expenses must be recognized and presented on a gross basis when a not-for profit organization is acting as a principal in transactions.

Section 4470 establishes disclosure standards for a not-for-profit organization that classifies its expenses by function and allocates its expenses to a number of functions to which the expenses relate.

The Authority does not expect that the adoption of these new standards will have a material impact on its financial statements.

5. ACCOUNTS RECEIVABLE

	2009	2008
Manitoba Health and Healthy Living - operating, capital and fee for service	**$ 90,489**	$ 65,629
Accounts Receivable from other Province of Manitoba Departments	**1,420**	1,529
Facility advances and receivables	**5,578**	12,711
Patient related and other	**26,034**	39,405
Allowance for doubtful accounts	**(7,394)**	(712)
	$ 116,127	$ 118,562

6. INVENTORY

	2009			2008
	Held for Sale	Held for Internal Use	Total	Total
Balance, beginning of year	**$ 1,232**	**$ 16,980**	**$ 18,212**	$ 16,324
Amount purchased in year	**139**	**151,359**	**151,498**	147,714
Amount expensed in year	**(155)**	**(151,147)**	**(151,302)**	(145,675)
Amount written down in year	**(3)**	**(57)**	**(60)**	(342)
Writedowns reversed in year	**13**	**377**	**390**	191
Balance, end of year	**$ 1,226**	**$ 17,512**	**$ 18,738**	$ 18,212

7. EMPLOYEE BENEFITS

The Authority records a provision for employee benefits including accrued vacation, overtime, and statutory holiday entitlements. Prior to March 31, 2004 changes in the liability related to employee benefits were recoverable from Manitoba Health and Healthy Living. Manitoba Health and Healthy Living advised that changes subsequent to March 31, 2004 are no longer recoverable and must be included in the current year operations.

An analysis of the changes in the employee benefits recoverable from Manitoba Health and Healthy Living is as follows:

	2009	2008
Balance, beginning of year	**$ 78,675**	$ 78,675
Balance, end of year	**$ 78,675**	$ 78,675

An analysis of the changes in the employee benefits payable is as follows:

	2009	2008
Balance, beginning of year	**$ 92,802**	$ 87,252
Increase in vacation / overtime / statutory holidays entitlements	**6,202**	5,550
Balance, end of year	**$ 99,004**	$ 92,802

8. CAPITAL ASSETS

	2009			2008
	Cost	Accumulated Amortization	Net Book Value	Net Book Value
Land	$ 16,534	$ -	$ 16,534	$ 16,484
Buildings	1,045,742	(368,771)	676,971	651,810
Furniture & equipment	727,095	(576,768)	150,327	159,407
Computer hardware and software	87,128	(29,426)	57,702	12,540
Leasehold improvements	18,860	(6,983)	11,877	9,950
Construction in Progress	142,181	-	142,181	133,425
	$ 2,037,540	$ (981,948)	$ 1,055,592	$ 983,616

The Authority has capitalized interest on some projects up until they are substantially complete. The amount of interest capitalized in the year was $ 2,334 (2008 - $578).

9. INVESTMENTS

	2009	2008
Money market investments	$ 3,443	$ 4,618
Government bonds	37,075	43,740
Corporate bonds (rated A or better)	25,000	10,317
Guaranteed Investment Certificates (GICs)	1,220	1,343
Mutual funds	47	4,461
Mortgage	1,597	2,095
	68,382	66,574
Less: amounts included with cash and marketable securities	(3,443)	(4,618)
Less: amounts included with specific purpose funds	(36,356)	(35,331)
Less: amounts maturing/ redeemable within one year, included in current assets	(12,787)	(8,365)
	$ 15,796	$ 18,260

Investments are carried at fair value using quoted market prices, except for the mortgage, which is at amortized cost.

The mortgage of $1,597 (2008 - $2,094) to Parkade Inc., a corporation without share capital whose Member is the same as that of the St. Boniface General Hospital. Interest is charged at the rate of 4.2% per annum and mortgage payments are $48 per month including principal and interest. Under the current terms it is estimated the mortgage will retire by March 15, 2012. The mortgage covers the parkade structure and the leasehold title for the land on which the parkade is situated. The fair value of the mortgage is estimated at $1,640 (2008 - $2,123). The fair value was determined using estimated market rates available to the Authority for the same or similar instruments.

9. INVESTMENTS (Continued)

The Authority manages the credit risk associated with its investments by limiting the types of eligible investments. Corporate Bonds are limited to a rating of A or higher and Money market investments are limited to R1 or better.

The Authority manages the interest rate risk exposure of its Government and Corporate Bonds and GICs by staggering maturity dates. As of March 31, 2009, the maturity dates are as follows:

	Government	Corporate	GICs	Interest Rates
Within 1 year	$ 5,324	$ 6,668	$ 276	3.50 - 5.65%
2 to 5 years	18,628	12,898	944	1.84 - 10.00%
5 to 10 years	8,780	5,266	-	3.80 - 6.44%
Over 10 years	4,343	168	-	4.39 - 10.80%
	$ 37,075	$ 25,000	$ 1,220	

Money market investments are not exposed to significant interest rate risk due to the short-term maturity of these investments. Investments in mutual funds are not exposed to significant interest rate risk.

10. SPECIFIC PURPOSE FUNDS

Cash and investments held for specific purposes include the following:

	2009	2008
Cash and investments, at carrying value	**$ 48,547**	$ 46,851

The Authority maintains numerous research and trust accounts designated for specific purposes. An analysis of the changes in these funds is as follows:

	2009	2008
Balance, beginning of year	**$ 46,851**	$ 46,228
Grants, bequests and donations	**28,557**	25,860
Investment income	**1,769**	1,379
Disbursements	**(28,630)**	(26,616)
Balance, end of year	**$ 48,547**	$ 46,851

Certain of the funds designated for specific purposes are subject to externally imposed restrictions stipulating that the principal be maintained intact, or that the principal be used for specifically stated purposes.

11. NURSE RECRUITMENT AND RETENTION FUND

In 2000, Manitoba Health and Healthy Living had established a $7 million Nurse Recruitment and Retention Fund in order to assist with the implementation of recruitment and retention strategies for nurses throughout Manitoba. The Authority holds, invests and disburses funds on behalf of the Nurse Recruitment and Retention Committee. The Fund is administered by a tri-partite committee comprised of the Regional Health Authorities of Manitoba, Manitoba Health and Healthy Living, and the Manitoba Nurses Union. The Authority can only disburse funds authorized by the committee.

Cash and investments held for the Nurse Recruitment and Retention Fund include the following:

	2009	2008
Cash and investments, at carrying value	$ 4,358	$ 2,847

Investments are carried at fair value using quoted market prices.

An analysis of the changes in the Nurse Recruitment and Retention Fund is as follows:

	2009	2008
Balance, beginning of year	$ 2,847	$ 3,419
Additions to fund	3,961	1,400
Interest earned on investment	51	133
Fund expenditures	(2,501)	(2,105)
Balance, end of year	$ 4,358	$ 2,847

12. ACCOUNTS PAYABLE AND ACCRUED LIABILITIES

	2009	2008
Accounts payable and accrued liabilities	$ 137,609	$ 144,575
Accrued salaries	47,543	48,351
Accrued interest on long term debt	455	462
Holdbacks on construction contracts	6,766	3,425
	$ 192,373	$ 196,813

13. LONG-TERM DEBT

	2009	2008
0.915% Banker's Acceptance, maturing April 23, 2009 Health Sciences Centre Tecumseh Street Parkade Fair value $38,252 (2008 - $nil)	$ 38,252	$ -
7.38% Mortgage payable, maturing August 31, 2018 Nutrition & Food Services Fair value $13,998 (2008 - $13,461)	12,782	13,690
5.8% Bank Loan, maturing September 30, 2014 St. Boniface General Hospital Atrium Fair value $10,841 (2008 - $12,398)	10,708	11,122
Prime less 1.0% Mortgage, maturing 2017 Health Sciences Centre Emily Street Parkade Fair value $nil (2008 - $7,595)	-	7,595
0.836% Banker's Acceptance, maturing April 27, 2009 Health Sciences Centre Emily Street Parkade Fair value $6,857 (2008 - $nil)	6,857	-
Government of Canada, Technology 2000 Inc. loan St. Boniface Hospital Fair value undeterminable	522	522
Prime plus 0.25% Demand Loan, maturing 2015 Grace General Hospital Hospice Fair value $271 (2008 - $321)	271	321
Prime less 0.5% Term Loan, maturing 2011 Concordia Energy Saving Project Fair value $136 (2008 - $209)	136	209
	69,528	33,459
Less amounts due within one year, included in current liabilities	(47,097)	(2,264)
	$ 22,431	$ 31,195

The fair value of long term debt has been calculated using discounted cash flow analysis based on incremental borrowing rates currently available for similar terms and maturities.

13. LONG-TERM DEBT (Continued)

The Technology 2000 Inc. loan is from the Government of Canada, through the Western Economic Diversification Program. The loan is unsecured and no further interest is accrued. It is not practical to determine the fair value of the Technology 2000 Inc. loan due to the underlying terms.

The 5.8% Bank Loan maturing on September 30, 2014 is secured by an assignment of existing and future leases and rents related to the St. Boniface Hospital Atrium. In accordance with the terms of the loan agreement, the Hospital cannot sell, transfer, assign, mortgage, lease, encumber, or otherwise dispose of any building or land associated with the Atrium without the lender's consent.

The two HSC parkade loans have been secured with the properties of the respective parkades, in addition to the assigned rents of the HSC parking operations.

The principal repayments over the next five fiscal years are as follows:

2009/10	$	47,097
2010/11		1,624
2011/12		1,675
2012/13		1,790
2013/14		1,914

14. DERIVATIVE FINANCIAL INSTRUMENTS

During the year, the Authority entered into an interest rate swap to convert a floating interest rate debt instrument into a fixed interest rate debt instrument for the Emily Street Parkade at the Health Sciences Centre. The notional amount of this swap at March 31, 2009 is $6,857 and will it mature on July 23, 2017. The fair value of this swap has been calculated at $60, resulting in a derivative liability of $60.

This derivative is measured at fair value at the end of each year and the unrealized gains or losses arising from remeasurement are recorded and presented under interest expense in the consolidated statement of operations and in accounts payable and accrued liabilities in the consolidated statement of financial position.

The counterparty to this contract is a major Canadian financial institution. The Authority does not anticipate any material adverse effect on its financial position resulting from the involvement in this type of contract, nor does it anticipate non-performance by the counterparty given their high credit rating.

15. DEFERRED CONTRIBUTIONS

	2009	2008
Deferred contributions, future expenses		
- operating expenses	$ 19,086	$ 12,985
- contract settlement expenses	2,715	3,524
	21,801	16,509
Deferred contributions, capital	869,487	829,480
Deferred contributions, total	$ 891,288	$ 845,989

a) Deferred contributions, future expenses

Deferred contributions related to future expenses represent the unspent amount of funding received for the Authority's operating expenses. The recognition of deferred contributions, future expenses is recorded as revenue in the statement of operations.

	2009	2008
Balance, beginning of year	$ 16,509	$ 17,715
Amount received during the year	10,162	7,637
Transferred to deferred contributions, capital	(1,573)	(983)
Less: amount recognized as revenue - Programs	(2,430)	(7,054)
Less: amount recognized as revenue - Non-insured services	(867)	(806)
Balance, end of year	$ 21,801	$ 16,509

b) Deferred contributions, capital

Deferred contributions related to capital assets represent the unamortized and unspent amount of funding received for the purchase of the Authority's capital assets. The amortization of deferred contributions, capital is recorded as revenue in the statement of operations.

	2009	2008
Balance, beginning of year	$ 829,480	$ 792,417
Amount received during the year	100,600	95,024
Transferred from deferred contributions, future expenses	1,573	983
Less: amount amortized to revenue – Programs	(58,972)	(55,756)
Less: amount amortized to revenue – Non-insured services	(3,194)	(3,188)
Balance, end of year	$ 869,487	$ 829,480

15. DEFERRED CONTRIBUTIONS (continued)

b) Deferred contributions, capital (continued)

In prior years, the Authority entered into long term loan agreements with various financial institutions to provide debt financing to the Authority. The Province of Manitoba continues to pay the principal and interest on this long-term debt. During the 2005 fiscal year, this long-term debt was assumed by the Province of Manitoba and was recognized as borrowings in the Public Accounts (Special Purpose Financial Statements) of the Province of Manitoba as at April 1, 2004. Accordingly, since the Province of Manitoba has recognized the long-term debt as its borrowings, the Authority has incorporated the following long-term debt as deferred contributions:

	2009	2008
Demand bank loans for capital projects in anticipation of the future issuance of long-term debt by Manitoba Health and Healthy Living, Prime less 1.0% to Prime plus .5%	$ 45,396	$ 50,009
Sinking fund debentures, Series 91, 10.00%, maturing June 11, 2011 Health Sciences Centre	25,000	25,000
Sinking fund debentures, Series D, 10.25%, maturing July 15, 2008 St. Boniface General Hospital	-	23,000
Sinking fund debentures, Series E, 8.69%, maturing May 30, 2016 St. Boniface General Hospital	51,500	51,500
	$ 121,896	$ 149,509

At March 31, 2009 the value of the sinking fund assets and accumulated interest aggregated $41,975 (2008 - $61,045). Annual payments are made by the Authority/Manitoba Health and Healthy Living from cash held in trust, which at March 31, 2008 was $2,112 (2008 - $2,112).

16. INVESTMENT IN CAPITAL ASSETS

Investment in capital assets is calculated as follows:

	2009	2008
Capital assets	$ 1,055,592	$ 983,616
Amounts financed by:		
Deferred contributions	$ (869,487)	$ (829,480)
Loans and accounts payable	(112,185)	(59,289)
Investment in capital assets	$ 73,920	$ 94,847

Change in investment in capital assets is calculated as follows:

	2009	2008
a) Excess of expenses over revenues		
Amortization of capital assets included in programs	$ (61,848)	$ (56,438)
Amortization of capital assets included in non-insured services	(6,369)	(6,037)
Amortization of deferred contributions related to capital assets included in programs	58,972	55,756
Amortization of deferred contributions related to capital assets included in non-insured services	3,194	3,188
	$ (6,051)	$ (3,531)
b) Purchase of capital assets	$ 140,193	$ 135,464
Amounts funded by:		
Capital contributions received in the year	(100,600)	(95,024)
Capital contributions transferred from future expenses	(1,573)	(983)
Change in capital contributions receivable, loans and accounts payable	(52,896)	(8,443)
	$ (14,876)	$ 31,014
Change in Investment in Capital Assets	$ (20,927)	$ 27,483

17. COMMITMENTS AND CONTINGENCIES

a) The Authority is subject to legal actions arising in the normal course of business. It is not expected that these legal actions will have a material adverse effect on the financial position of the Authority.

b) At March 31, 2009, annual lease payments for the various premises occupied by the Authority over the next five fiscal years are as follows:

2009/10	$ 8,987
2010/11	7,727
2011/12	7,512
2012/13	7,238
2013/14	6,345

c) At March 31, 2009, the Authority had capital commitments of approximately $38,876 (2008 - $22,143) and equipment purchase commitments of approximately $14,629 (2008 - $12,309).

d) The Authority has entered into various operating lease commitments. The minimum amounts payable over the next five fiscal years are as follows:

2009/10	$ 5,093
2010/11	4,385
2011/12	3,641
2012/13	2,768
2013/14	519

18. HIROC

On July 1, 1987, a group of health care organizations ("subscribers"), formed Healthcare Insurance Reciprocal of Canada ("HIROC"). HIROC is registered as a Reciprocal pursuant to provincial Insurance Acts, which permit persons to exchange with other persons reciprocal contracts of indemnity insurance. HIROC facilitates the provision of liability insurance coverage to health care organizations in the provinces of Ontario, Manitoba, Saskatchewan and Newfoundland. Subscribers pay annual premiums, which are actuarially determined, and are subject to assessment for losses in excess of such premiums, if any, experienced by the group of subscribers for the years in which they were a subscriber. No such assessments have been made to March 31, 2009.

19. ECONOMIC DEPENDENCE

The Authority received approximately 92% (2008 - 91%) of its total revenue from Manitoba Health and Healthy Living and is economically dependent on Manitoba Health and Healthy Living for continued operations. This volume of funding transactions is normal within the industry, as regional health authorities are primarily funded by their respective provincial Ministries of Health.

20. RELATED PARTY RELATIONSHIPS

The Authority provides community health services through operations directly owned by the Authority as well as through other organizations and agencies via a variety of agreements (Notes 1 and 3a). For accounting purposes the relationships with these organizations and agencies are as follows:

a) Controlled entities

The Community Hospitals, Other Hospitals, and MATC are controlled (Note 3b) and have been consolidated into the Authority's financial statements.

The Deer Lodge Centre Foundation, which is incorporated under the Corporations Act of Manitoba, is a registered charity for the purposes of the Income Tax Act and accordingly is exempt from income taxes. The Deer Lodge Centre Foundation's aims and objectives are to raise, invest and allocate funds to or for the benefit of the Deer Lodge Centre.

A financial summary of the Deer Lodge Centre Foundation, which has not been consolidated into the Authority's financial statements, is as follows:

		2009		2008
Financial Position				
Total assets	**$**	**3,240**	$	3,910
Total liabilities & deferred contributions		**500**		620
Total net assets	**$**	**2,740**	$	3,290
Results of Operations				
Total revenues	**$**	**683**	$	663
Total expenses		**683**		663
Surplus from operations	**$**	**-**	$	-
Cash Flows				
From operating activities	**$**	**(235)**	$	(309)
Used for financing & investing		**200**		257
Decrease in cash	**$**	**(35)**	$	(52)

20. RELATED PARTY RELATIONSHIPS (continued)

b) Significant influence

The Health Sciences Centre Foundation Inc.'s ("HSCF") aims and objectives are to promote health care excellence by funding medical research and clinical projects. The Authority exercises significant influence on HSCF as the Health Sciences Centre appoints two of HSCF's board members and a portion of the funds raised by HSCF are directed to the Health Sciences Centre.

HSCF is incorporated under the Corporations Act of Manitoba and is a registered charity for the purposes of the Income Tax Act and accordingly exempt from income taxes.

c) Economic interest

Funding is provided to proprietary and non-proprietary personal care homes and community health agencies through service purchase agreements to deliver service on behalf of the Authority. As a result, the Authority has economic interest in these entities.

Schedules 2, 3, and 4 disclose the funding provided to these entities for the delivery of service.

d) Related parties

The Authority and its Controlled Entities have relationships with the following parties:

Health Sciences Centre
- Children's Hospital Foundation of Manitoba Inc.

Concordia Hospital
- The Concordia Foundation Inc.
- Concordia Wellness Projects Inc.
- Concordia Hospital Fund Inc.

Seven Oaks General Hospital
- Seven Oaks General Hospital Foundation Inc.

Grace Hospital
- Grace General Hospital (Winnipeg) Foundation Inc.
- Grace Hospital Auxiliary

Victoria General Hospital
- The Victoria General Hospital Foundation Inc.

21. EMPLOYEE FUTURE BENEFITS

a) Accrued retirement entitlement

Based upon collective agreements and/or non-union policy, employees are entitled to a pre-retirement leave benefit if they are retiring in accordance with the provisions of the applicable group pension plan. The Authority's contractual commitment is to pay based upon one of the following (dependant on the agreement/policy applicable to the employee):

1. Four days of salary per year of service upon retirement if the employee complies with one of the following conditions:
   i. has 10 years service* and has reached the age 55
   ii. qualifies for the "eighty" rule which is calculated by adding the number of years of service to the age of the employee
   iii. retires at or after age 65
   iv. terminates employment at any time due to permanent disability

   *Non-union policy requires 5 years service for staff not covered by a collective agreement.

2. One week of pay for each year of service up to 15 years of service and two weeks of additional pay for each five years past the 15 years of service up to 35 years of service upon retirement if the employee complies with the following conditions:
   i. has 9 or more years of service
   ii. has reached the age of 55

3. One week of pay for each year of accumulated service or portion thereof to a maximum of fifteen weeks pay upon retirement if the employee complies with the following conditions:
   i. has 10 or more years of service
   ii. has reached the age of 55

21. EMPLOYEE FUTURE BENEFITS (continued)

a) Accrued retirement entitlement (continued)

4. Payment or pre-retirement leave equivalent to the number of unused sick leave days accumulated during the last 5 years service plus 25% of the unused sick days accumulated prior to the last 5 years of service multiplied by the daily rate of the employee's permanent or regular position in effect on the employee's last day of service payable upon:
    i. Retirement, death, or termination of service caused by a transfer of departmental function.

The Authority undertook an actuarial valuation of the pre-retirement leave benefit for accounting purposes as at December 31, 2008, projected to March 31, 2009. The significant actuarial assumptions adopted in measuring the Authority's accrued retirement entitlements include mortality and withdrawal rates, a discount rate of 6.7% (2008 – 5.5%) and a rate of salary increase of 3.5% (2008 – 3.5%) plus age related merit/promotion scale with no provision for disability.

The amount of funding which will be provided by Manitoba Health and Healthy Living for pre-retirement entitlement obligations has been capped at the amount owing as at March 31, 2004 and has been recorded as a receivable on the statement of financial position. Manitoba Health and Healthy Living has indicated that payment of this receivable, when required, is guaranteed by the Province. Any changes from the March 31, 2004 liability amount are reflected in the statement of operations.

	2009	2008
Employee future benefits recoverable from Manitoba Health and Healthy Living	**$ 82,302**	$ 82,302

An analysis of the changes in the employee benefits payable is as follows:

	2009	2008
Balance, beginning of year	**$ 116,764**	$ 111,528
Net increase in pre-retirement entitlements	**4,135**	5,236
Balance, end of year	**$ 120,899**	$ 116,764

b) Pension plan

Most of the employees are members of the Healthcare Employees Pension Plan (the "Plan"), which is a multi-employer defined benefit pension plan available to all eligible employees. Plan members will receive benefits based on the length of service and on the average annualized earnings calculated on the best five of the eleven consecutive years prior to retirement, termination or death, that provide the highest earnings. The costs of the benefit plan are not allocated to the individual entities within the related group. As a result, individual entities within the related group are not able to identify their share of the underlying assets and liabilities. Therefore the plan is accounted for as a defined contribution plan in accordance with the requirements of the Canadian Institute of Chartered Accountants' Handbook section 3461.

21. EMPLOYEE FUTURE BENEFITS (continued)

Pension assets consist of investment grade securities. Market and credit risk on these securities are managed by the Plan by placing plan assets in trust and through the Plan investment policy. Pension expense is based on Plan management's best estimates, in consultation with its actuaries, of the amount, together with the 5% of basic annual earnings up to the Canada Pension Plan ceiling contributed by employees, required to provide a high level of assurance that benefits will be fully represented by fund assets at retirement, as provided by the Plan. The funding objective is for employer contributions to the Plan to remain a constant percentage of employee's contributions.

Variances between actuarial funding estimates and actual experience may be material and any differences are generally to be funded by the participating members. The most recent actuarial valuation for funding purposes occurred on December 31, 2007. The valuation indicated that the plan was fully funded. The plan is required to have its next actuarial valuation for funding purposes on or before December 31, 2010. Actual contributions to the plan made during the year by the Authority on behalf of its employees amounted to $58,598 (2008 - $51,373) and are included in the statement of operations.

Some employees are eligible for membership in the provincially operated Civil Service Superannuation Plan. The pension liability for Authority employees is included in the Province of Manitoba's liability for Civil Service Superannuation Fund. Accordingly, no provision is required in the financial statements relating to the effects of participating in the plan by the Authority and its employees.

Some employees are eligible for membership in the multi employer City of Winnipeg Employee's Benefits Program which includes of the Civic Employee's Pension Plan. The Civic Employee's Pension Plan is a defined benefit pension plan operated by the City of Winnipeg. During the year, the Authority expensed $235 (2008 - $238) for current year's contributions.

Some employees are eligible for membership in the multi employer Home Care Worker's Benefit Trust, which includes the Manitoba Home Care Pension Plan. The Manitoba Home Care Pension Plan is a defined contribution pension plan. During the year, the Authority expensed contributions to the pension plan of $1,160 (2008 - $1,118).

The Authority is aware that market values of plan investments have declined and as a result have impacted the valuation of these abovementioned pension plans. The managers of the pension plans are evaluating further courses of action.

22. CAPITAL DISCLOSURES

The Authority's objective when managing capital is to safeguard the entity's ability to continue as a going concern, so that it can continue to provide health care services to the community. The capital position of the Authority is managed through its net assets, deferred contributions and loans.

The Authority relies mainly on government funding to finance its operations. The funds provided by government are allocated to the various programs based on the priorities identified by the Authority's Board of Directors.

During the year, the Board of Directors internally restricted $2,093 (2008 - $8,274) of unrestricted net assets to be used for future capital purchases. Internally restricted amounts are not available for other purposes without approval of the Board of Directors.

The Authority also receives restricted contributions from government, private companies and individuals. Contributions received but not spent by the end of an accounting period are deferred and recognized in the appropriate period. During the year ended March 31, 2009, the Authority complied with the external restrictions imposed by its funders.

The Authority has entered into borrowing facilities to finance the purchase of capital assets. These facilities contain financial covenants. For all borrowing facilities, the Authority is to ensure that the proceeds of external financing arranged to refinance project loans will be first utilized to repay relevant project loans. Additionally, for the Emily Street Parkade and Tecumseh Street Parkade Loans, the Authority is required to maintain a Debt Service Coverage ratio, of not less than 110%. During the year ended March 31, 2009, the Authority complied with the financial covenants imposed by its financial institution.

23. COMPARATIVE FIGURES

Certain of the prior year's figures have been reclassified to conform to the current year's presentation.

ADMINISTRATIVE COSTS

The Canadian Institute of Health Information (CIHI) defines a standard set of guidelines for the classification and coding of financial and statistical information for use by all Canadian health service organizations. The Authority adheres to these coding guidelines.

The most current definition of administrative costs determined by CIHI includes: General Administration (including Acute/Long Term Care/Community Administration, Patient Relations, Community Needs Assessment, Risk Management, Quality Assurance, and Executive costs), Finance, Human Resources, Labour Relations, Nurse/Physician Recruitment and Retention, and Communications.

The administrative cost percentage indicator (administrative costs as a percentage of total operating costs) adheres to CIHI definitions.

Administrative costs and percentages for the Authority (including hospitals, non-proprietary personal care homes and community health agencies) are:

	2009	2008 (Restated)
Administrative costs	**$ 89,806**	$ 86,019
Administrative cost %	**4.1%**	4.2%

The figures presented are based on data available at time of publication. Restatements are made in the subsequent year to reflect final data and changes in the CIHI definition, if any.

AUDITORS' REPORT

To the Board of Directors
3885136 Manitoba Association Inc.
(Operating as Calvary Place Personal Care Home)

We have audited the statement of financial position of 3885136 Manitoba Association Inc. (Operating as Calvary Place Personal Care Home) as at March 31, 2009 and the statements of operations, changes in net assets, and cash flows for the year then ended. These financial statements are the responsibility of the Association's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of the Association as at March 31, 2009 and the results of its operations and its cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

1. DESCRIPTION OF ORGANIZATION

3885136 Manitoba Association Inc. (Operating as Calvary Place Personal Care Home) was incorporated on August 20, 1998 and commenced active operations on January 24, 2000. The Personal Care Home is overseen by a Board of Directors pursuant to the Province of Manitoba Acts and Regulations governing supervisory and personal care homes.

The Personal Care Home is a registered charity under the Income Tax Act and accordingly is exempt from income taxes.

2. ACCOUNTING POLICIES CHANGES

On April 1, 2008 the Personal Care Home adopted the recommendations of the Canadian Institute of Chartered Accountants (CICA) Handbook Section 1535, Capital Disclosures. This section requires the disclosure of information about its objectives, policies and processes for managing capital. The required disclosures are in Note 10.

Future Accounting Changes

In November 2008, the CICA issued amendments to Section 4400 Financial statement presentation by not-for-profit organizations, Section 4460 Disclosure of related party transactions by not-for-profit organizations, and issued Section 4470 Disclosure of allocated expenses by not-for-profit organizations. All three Sections will be applicable to financial statements relating to fiscal years beginning on or after January 1, 2009. Accordingly the Personal Care Home will adopt the new standards as of April 1, 2009.

Section 4400 has been amended in order to eliminate the requirement to treat net assets invested in capital assets as a separate component of net assets and, instead, permit a not-for-profit organization to present such an amount as a category of internally restricted net assets when it chooses to do so. It also clarifies that revenues and expenses must be recognized and presented on a gross basis when a not-for profit organization is acting as a principal in transactions.

Section 4460 has been amended to make the language in Section 4460 consistent with related party transactions, Section 3840.

Section 4470 establishes disclosure standards for a not-for-profit organization that classifies its expenses by function and allocates its expenses to a number of functions to which the expenses relate.

The Personal Care Home is currently evaluating the impact of the adoption of these new standards on its financial statements.

3. SIGNIFICANT ACCOUNTING POLICIES

The Personal Care Home has elected to use the exemption provided by the CICA permitting not for profit organizations not to apply Sections 3862 and 3863 of the CICA Handbook which would otherwise have applied to the financial statements of the Organization for the year ended March 31, 2009. The Personal Care Home applies the requirements of Section 3861 of the CICA Handbook.

The financial statements have been prepared in accordance with Canadian generally accepted accounting principles and include the following significant accounting policies of the Personal Care Home:

a) Revenue recognition

The Personal Care Home follows the deferral method of accounting for contributions which include donations and government grants.

The Personal Care Home is funded primarily by the Province of Manitoba in accordance with budget arrangements established by the Winnipeg Regional Health Authority. Operating grants are recorded as revenue in the period to which they relate. Grants approved but not received at the end of a period are accrued. Where a portion of a grant relates to a future period, it is deferred and recognized in that subsequent period.

Unrestricted contributions are recognized as revenue when received or receivable if the amount to be received can be reasonably estimated and collection is reasonably assured.

Externally restricted contributions are recognized as revenue in the year in which the related expenses are recognized. Contributions restricted for the purchase of fixed assets are deferred and amortized into revenue on a straight-line basis, at a rate corresponding with the amortization rate for the related fixed assets.

b) Fixed assets

Purchased fixed assets are recorded at cost. Contributed fixed assets are recorded at fair value at the date of contribution.

Fixed assets are amortized on a straight-line basis over the following estimated useful lives:

Building	40 years
Computer equipment and software	5 years
RDF equipment	5 – 7 years
Nursing equipment	7 years
Furniture	15 years
Major equipment	5 – 25 years

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

c) *Retirement entitlement obligation*

The Personal Care Home has a contractual commitment to pay out to employees four days salary per year of service upon retirement if they comply with the following conditions:

- Have ten years service and have reached the age of 55, or
- Qualify for the "eighty" rule which is calculated by adding the number of year's service to the age of the employee.

The Personal Care Home has recorded an accrual based on an actuarial valuation that includes employees who qualify at the year-end balance sheet date and an estimate for the remainder of employees who have not yet met the criteria above. A long term receivable has also been recorded in the same amount at year-end to represent the funding commitment for these retirement entitlements from Manitoba Health.

d) *Due from Manitoba Health – vacation pay*

Until the fiscal year ended March 31, 2004, funding for vacation entitlements was provided by the Winnipeg Regional Health Authority in the period in which expenditures were made. Accordingly, the cost of the estimated vacation pay at March 31, 2004 was accrued to enable an appropriate matching of expenses with income secured at that date. For the year ended March 31, 2005 and onwards Manitoba Health is no longer funding this liability and the change in the current year liability is recorded as a charge against current year operations. The receivable from Manitoba Health includes only the accrued liability to March 31, 2004.

e) *Financial risk*

Financial risk is the risk that arises from fluctuations in interest rates, and the degree of volatility of those rates. The Personal Care Home does not use derivative instruments to reduce its exposure to interest rate risk.

Credit risk

Credit risk arises from the potential that a counter party will fail to perform its obligations. In addition, the Personal Care Home is exposed to credit risk from its residents. However, at year-end virtually all of the accounts receivable were due from government agencies, which minimizes the credit risk.

Fair value

The fair value of accounts receivable, accounts payable and accrued liabilities, and due to Winnipeg Regional Health Authority approximate their carrying value due to their short-term maturity.

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

e) Financial risk (continued)

Fair value (continued)

The fair value of the current and long term asset future employee benefits recoverable from Manitoba Health and the long term liability pre-retirement entitlements payable could not be determined because there are no specific terms of repayment.

f) Use of estimates

The preparation of financial statements in conformity with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Significant estimates include the allowance for doubtful accounts and the estimated useful life of fixed assets. Actual results could differ from these estimates.

g) Financial assets and financial liabilities

Financial assets and financial liabilities are initially recognized at fair value and their subsequent measurement is dependent on their classification as described below. Their classification depends on the purpose, for which the financial instruments were acquired or issued, their characteristics and the Organization's designation of such instruments. Settlement date accounting is used.

Classifications

Cash	Held for trading
Accounts receivable	Loans and receivables
Due from Manitoba Health – vacation pay and pre-retirement entitlements	Loans and receivables
Accounts payable and accrued liabilities	Other liabilities
Due to Winnipeg Regional Health Authority	Other liabilities
Pre-retirement entitlements	Other liabilities

Held for trading

Held for trading financial assets are measured at fair value at the balance sheet date. Fair value fluctuations including interest earned, interest accrued, gains and losses realized on disposal and unrealized gains and losses are included in investment income.

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

g) Financial assets and financial liabilities (continued)

Loans and receivables

Loans and receivables are accounted for at amortized cost using the effective interest method.

Other liabilities

Other liabilities are recorded at amortized cost using the effective interest method and include all financial liabilities, other than derivative instruments.

4. FIXED ASSETS

	2009			2008
	Cost	Accumulated Amortization	Net Book Value	Net Book Value
Land	**$ 424,712**	**$ -**	**$ 424,712**	$ 424,712
Building	**8,563,541**	**1,976,757**	**6,586,784**	6,800,874
Computer equipment and software	**94,608**	**94,608**	**-**	2,410
RDF equipment	**300,947**	**300,947**	**-**	-
Nursing equipment	**103,287**	**90,198**	**13,089**	-
Furniture	**608,868**	**373,073**	**235,795**	276,281
Major equipment	**127,488**	**110,823**	**16,665**	14,970
	$ 10,223,451	**$ 2,946,406**	**$ 7,277,045**	$ 7,519,247

5. ACCOUNTS PAYABLE AND ACCRUED LIABILITIES

	2009	2008
Trade	**$ 136,507**	$ 134,971
Wages and employee benefits payable	**129,463**	136,936
Accrued vacation pay	**333,270**	280,714
	$ 599,240	$ 552,621

6. DEFERRED CONTRIBUTIONS

The deferred contributions balance at the beginning of the year relates primarily to fixed assets and represents the unamortized amount and unspent amount of funding received for repayment of the principal portion on the long-term debt. These contributions were received from Heritage Benevolent Association Inc. and Manitoba Health. In the prior year, contributions were received from Heritage Benevolent Association Inc. to be utilized on future training.

	2009	2008
Balance, beginning of year	$ 7,239,530	$ 7,446,930
Contributions received	-	25,000
Amortization	(232,406)	(232,400)
Balance, end of year	$ 7,007,124	$ 7,239,530

7. INVESTED IN FIXED ASSETS

a) Invested in fixed assets is calculated as follows:

	2009	2008
Fixed assets	$ 7,277,045	$ 7,519,247
Deferred contributions – related to fixed assets	(6,982,124)	(7,214,530)
Balance, end of year	$ 294,921	$ 304,717

b) Change in net assets invested in fixed assets is calculated as follows:

	2009	2008
Deficiency of income over expenses		
Amortization of deferred contributions related to fixed assets	$ 232,406	$ 232,400
Amortization of fixed assets	(262,742)	(284,190)
	(30,336)	(51,790)
Net change in invested in fixed assets		
Purchase of fixed assets	20,540	3,505
Total change in net assets invested in fixed assets	$ (9,796)	$ (48,285)

8. CONTINGENCY

The Personal Care Home is responsible for any in-globe deficits but may unconditionally retain the greater of 50% of its operating surplus and 2% of the global budget indicated in its funding letter from Winnipeg Regional Health Authority. The actual amount of the settlement is determined after a review of the details by Winnipeg Regional Health Authority and negotiation with the Personal Care Home.

If deficits are incurred, additional funding may be provided by Winnipeg Regional Health Authority for expenses not initially included in the budget.

9. PENSION PLAN

Substantially all employees of the Personal Care Home are members of the Health Employees Pension Plan (the "Plan") which is a multi-employer defined benefit pension plan available to all eligible employees. Plan members will receive benefits based on the length of service and on the average of annualized earnings calculated on the best five of the eleven consecutive years prior to retirement, termination or death, that provide the highest earnings. The costs of the benefit plan are not allocated to the individual entities within the related group. As a result, individual entities within the related group are not able to identify their share of the underlying assets and liabilities. Therefore, the plan is accounted for as a defined contribution plan in accordance with the requirements of the Canadian Institute of Chartered Accountants' Handbook section 3461.

The Personal Care Home's liability under the pension plan is limited to the contributions required during the year under the respective agreements. Contributions to the Plan made during the year by the Personal Care Home on behalf of its employees amounted to $270,202 (2008 - $243,511) and are included in the statement of operations.

10. CAPITAL MANAGEMENT

The objective of the Board of Directors of the Residence, when managing capital, is to safeguard the ability to continue as a going concern. The Board of Directors sets the amount of capital in proportion to risk. The Board of Directors manages the capital structure and makes adjustments to it in the light of changes in economic conditions and the risk characteristics of the underlying assets.

Auditors' Report

To the Directors of
BETHANIA MENNONITE PERSONAL CARE HOME, INC.

We have audited the statement of financial position of **BETHANIA MENNONITE PERSONAL CARE HOME, INC.** as at March 31, 2009 and the statements of operations, changes in net assets and cash flows for the year then ended. These financial statements are the responsibility of the Home's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of the Home's operations as outlined in Note 1 - Entity Definition, as at March 31, 2009 and the results of its operations and its cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

Bank indebtedness, end of year	$	(602,516)	$	(387,402)

The accompanying summary of significant policies and notes are an integral part of these financial statements.

Revenue Recognition

The Home follows the deferral method of accounting for contributions which include donations and government grants.

Under the Health Insurance Act and regulations hereto, the Home is funded primarily by the Province of Manitoba in accordance with budget arrangements established by the Winnipeg Regional Health Authority ("WRHA"). Operating grants are recorded as revenue in the period to which they relate. Grants approved but not received at the end of an accounting period are accrued. Where a portion of a grant is related to a future period, it is deferred and recognized in that subsequent period. These financial statements reflect agreed arrangements approved by the WRHA with respect to the year ended March 31, 2009.

With respect to actual operating results, certain adjustments to funding will be made by the WRHA after completion of their review of the Home's accounts. Any adjustments will be reflected in the year the final statement of recommended costs is received from the WRHA.

a) Deficits - The WRHA shall not be responsible for past or future deficits of the Home in providing the services and debt service charges for any debt incurred resulting from operating deficits unless the parties otherwise mutually agree.

   The WRHA shall not be responsible for the costs incurred by the Home other than those set forth in the service purchase agreement.

b) Surpluses - The Home may unconditionally retain the greater of 50% of its operating surplus in any fiscal year and 2% of the global budget indicated in its funding letter from the WRHA for such fiscal year. Any surplus beyond the foregoing levels shall be remitted to the WRHA on demand.

Unrestricted contributions are recognized as revenue when received or receivable if the amount to be received can be reasonably estimated and collection is reasonably assured.

Externally restricted contributions are recognized as revenue in the year in which the related expenses are recognized. Contributions restricted for the purchase of capital assets are deferred and amortized into revenue on a straight-line basis, at a rate corresponding with the amortization rate for the related capital assets.

Revenue from the residential services and marketed services is recognized when the goods are sold or the service is provided.

Inventories	Inventories are carried at the lower of cost and net realizable value, cost being determined on a first-in, first-out basis.
Employee Future Benefits	Pre-retirement entitlement, pension and other employee future benefit costs are determined using the projected benefit method prorated on years of service and based on best estimate assumptions. Commencing with the 2004-2005 fiscal year, out of globe funding for these costs is not provided by Manitoba Health/WRHA.
Contributed Services	A substantial number of volunteers contribute a significant amount of their time each year. Due to the difficulty of determining the fair value, contributed services are not recognized in the financial statements.
Investments	Investments are recorded at cost. If the market value of investments becomes lower than cost and this decline in value is considered to be other than temporary, the investments are written-down to market value.
Capital Assets	Purchased capital assets are recorded at cost. Contributed capital assets are recorded at fair value at the date of contribution. Repairs and maintenance costs are charged to expense. Betterments which extend the estimated useful life of an asset are capitalized. When a capital asset no longer contributes to the Home's ability to provide services, its carrying amount is written down to its residual value. Capital assets are amortized on a straight-line basis using the following annual rates:

Building	2-10%
Computer equipment	20%
Furniture, fixtures and equipment	5-20%
Intangible assets	10%
Land improvements	4-6.7%

Use of Estimates	The preparation of financial statements in accordance with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from management's best estimates as additional information becomes available in the future.

Financial Instruments

The Home utilizes various financial instruments. Unless otherwise noted, it is management's opinion that the Home is not exposed to significant interest, currency or credit risks arising from these financial instruments and the carrying amounts approximate fair values.

All transactions related to financial instruments are recorded on a settlement date basis.

The Home classifies its financial instruments as follows based on the purpose for which the asset was acquired and follows the disclosed accounting policy for each category.

Assets/Liability	Category	Measurement
Cash	Held for trading	Fair value
Accounts receivable	Loans and receivables	Amortized cost
Accounts payable	Other financial liabilities	Amortized cost
Related party payable	Other financial liabilities	Amortized cost

- Held for trading items are carried at fair value, with changes in their fair value recognized in the statement of operations.
- Other financial liabilities are carried at amortized cost, using the effective interest method.
- Loans and receivables are carried at amortized cost, using the effective interest rate method, less any provision for impairment.

Transaction costs are expensed as incurred.

Restricted Cash

Restricted cash and investment balances represent assets segregated for use for replacement reserves or debenture repayment reserves.

New Accounting Pronouncements

Recent accounting pronouncements that have been issued but are not yet effective, and have a potential implication for the Home, are as follows:

Financial Statement Concepts

CICA Handbook Section 1000, Financial Statement Concepts has been amended to focus on the capitalization of costs that truly meet the definition of an asset and de-emphasizes the matching principle.

The revised requirements are effective for annual and interim financial statements relating to fiscal years beginning on or after October 1, 2008. The Home is currently evaluating the impact of the adoption of this change on the disclosure within its financial statements.

Financial Instruments - Disclosure and Presentation

On October 15, 2008 the CICA deferred indefinitely the requirement of not-for-profit organizations to implement new standards dealing with certain financial instrument, disclosures and presentation. The Home has elected to defer application of these standards.

Financial Statements by Not-for-Profit Organizations

In September 2008, a number of standards applicable to not-for-profit organizations were amended and issued. The changes are intended to improve financial reporting by not-for-profit organizations and make not-for-profit standards consistent with those of profit-oriented enterprises when they address the same issues. These amendments which are effective for fiscal years beginning on or after January 1, 2009 will not have a significant impact on the results of operations or financial position.

The Home continues to monitor the developments in this area and evaluate the implications of the potential changes in financial reporting standards.

1. Entity Definition

Bethania Mennonite Personal Care Home, Inc. is incorporated under the laws of the Province of Manitoba. The Home is principally involved in providing licensed personal care services. The Home is a registered charity under the Income Tax Act and accordingly is exempt from income taxes, provided certain requirements of the Income Tax Act are met. Bethania is a Mennonite organization that demonstrates Christian love by compassionately offering a continuum of wellness, housing and personal care services for older adults.

Effective April 1, 2005, all assets of Bethania Mennonite Personal Care Home, Inc. - Memorial Fund were transferred to Bethania Mennonite Memorial Foundation Inc.

These financial statements present the financial position and results of operations of the personal care home operated as Bethania Mennonite Personal Care Home, Inc. As such, the financial statements for the year ended March 31, 2009 do not include the assets, liabilities, equity, revenues and expenses of Bethania Mennonite Memorial Foundation Inc.

2. Change in Accounting Policy

Capital Disclosures

On April 1, 2008 the Home adopted a requirement of the CICA to provide disclosure about how it manages its unrestricted net assets (See Note 17).

The adoption of these new standards had no material impact on the Home's statement of financial position and operations.

3. Restricted Cash and Investments

	2009	2008
Restricted cash	$ **62,190**	$ 107,502
Guaranteed Investment Certificates	**172,352**	165,185
Debenture Retirement Fund (see below)	**-**	123,559
	$ **234,542**	$ 396,246

The fair value of cash on deposit is equal to its carrying value. The GICs have an effective interest rate of 4.01 to 5.12% (2008 - 4.01 to 5.12%) with the latest maturing in June 2012. The fair value of the GICs is based on the year end quoted market bid price.

Debenture Retirement Fund

In accordance with the agreement relating to debenture issues, the WRHA retains and holds in trust sufficient funds from amounts otherwise payable by it to the Home to ensure the availability of funds to meet debenture principal and interest payments as they fall due. On June 1, 2008, WHRA transferred the funds and fully paid the debenture principal amount.

4. Accounts Receivable

		2009		2008
Receivable from residents	$	**14,940**	$	21,535
Accrued interest receivable		**4,179**		4,085
Canada Mortgage and Housing Corporation		**15,507**		15,507
Other		**6,076**		561
GST rebate receivable		**22,415**		25,344
	$	**63,117**	$	67,032

5. Due from (to) Related Parties

		2009		2008

ArlingtonHaus Inc.		**1,346**		392
Bethania Housing & Projects Inc.		**(27,352)**		(82,507)
Bethania Mennonite Memorial Foundation Inc.		**25,693**		17,517
BethaniaHaus Inc.		**6,732**		1,962
Pembina Place Mennonite Personal Care Home, Inc.		**21,164**		10,066
	$	**29,496**	$	(52,178)

Amounts due from (to) related parties are non-interest bearing with no specific terms of repayment.

6. Accrued Vacation Entitlements

The Home records a provision for accrued vacation entitlements. Prior to March 31, 2004 changes in the liability related to vacation were recoverable from Manitoba Health. At that date, Manitoba Health advised that subsequent to March 31, 2004 all funding related to past and future vacation entitlement costs would be included in in-globe funding and that the maximum liability to be recognized by Manitoba Health to facilities would be capped at March 31, 2004 levels. Accordingly, each year as vacation entitlements are paid and earned by the Home's employees, the related vacation entitlement receivable is collected and re-established up to this maximum amount.

An analysis of the changes in the vacation entitlements receivable from Manitoba Health is as follows:

		2009		2008
Balance, beginning of year	$	**497,632**	$	497,632
Net changes in vacation entitlements receivable		**-**		-
Balance, end of year	$	**497,632**	$	497,632

6. Accrued Vacation Entitlements (continued)

An analysis of the changes in the accrued vacation entitlements is as follows:

Balance, beginning of year	**$ 412,104**	$ 428,840
Net increase (decrease) in accrued vacation entitlements	**63,299**	(16,736)
Balance, end of year	**$ 475,403**	$ 412,104

7. Capital Assets

	2009		2008	
	Cost	Accumulated Amortization	Cost	Accumulated Amortization
Land	**$ 1**	**$ -**	$ 1	$ -
Land improvements	**340,263**	**280,359**	340,263	265,586
Building	**4,879,360**	**3,253,887**	4,841,344	3,109,116
Computer equipment	**337,093**	**304,262**	337,093	294,034
Furniture, fixtures and equipment	**3,725,841**	**3,470,753**	3,678,469	3,384,555
Intangible assets	**10,208**	**-**	10,208	-
Deferred software licenses	**5,518**	**-**	5,518	-
	$ 9,298,284	**$ 7,309,261**	$ 9,212,896	$ 7,053,291
Cost less accumulated amortization		**$ 1,989,023**		$ 2,159,605

Amortization of capital assets for the year ended March 31, 2009 is $256,498 (2008 - $247,006).

8. Accounts Payable and accrued liabilities

	2009	2008
Trade accounts payable	**$ 170,049**	$ 152,907
Accrued liabilities	**34,600**	58,913
Salaries and employee benefits payable	**336,885**	304,576
Winnipeg Regional Health Authority	**113,140**	260,011
	$ 654,674	$ 776,407

9. Long-term Debt

		2009		2008
Debenture payable Debenture #2 - bearing interest at 11 1/8%, payable semi-annually with annual principal payments of $118,000, maturing June 1, 2008	$	-	$	119,945
Current portion of long-term debt		-		119,945
	$	-	$	-

10. Deferred Contributions

Capital Assets

Deferred capital contributions related to capital assets represent the unamortized amount of donations and grants received for the purchase of capital assets. The amortization of capital contributions is recorded as revenue in the statement of operations.

Changes in the deferred contribution balance are as follows:

		2009		2008
Balance, beginning of year	$	**1,009,723**	$	1,084,316
Funding for principal repayments on debenture		**126,547**		69,336
Transfer from replacement reserves		**85,388**		172,973
Long-term debt principal reductions		**(25,185)**		(23,313)
Construction loan reduction		**-**		(46,583)
Amounts amortized to revenue		**(256,498)**		(247,006)
Balance, end of year (carried forward)	$	**939,975**	$	1,009,723

Unspent Equipment Funding

Unspent equipment funding related to equipment replacement represents the unspent amount of funding received for the purchase of equipment. Equipment funding is not recorded as revenue in the statement of operations.

		2009		2008
Balance, beginning of year	$	**95,573**	$	100,183
Contributions - Winnipeg Regional Health Authority		**25,900**		124,292
Interest allocation		**7,837**		6,811
Transfer to deferred contributions - capital asset purchases		**(47,373)**		(135,713)
Balance, end of year (carried forward)	$	**81,937**	$	95,573

10. Deferred Contributions (continued)

	2009	2008
Capital assets (brought forward)	$ 939,975	$ 1,009,723
Unspent equipment funding (brought forward)	81,937	95,573

Unspent Major Repairs Funding

Unspent major repairs funding related to equipment repairs represent the unspent amount of funding received for the replacement of equipment. Major repairs funding is not recorded as revenue in the statement of operations.

	2009	2008
Balance, beginning of year	$ 28,813	$ 47,706
Contributions - Winnipeg Regional Health Authority	80,345	14,423
Interest allocation	1,143	3,944
Transfer to deferred contributions - capital asset purchases	(38,016)	(37,260)
Balance, end of year	72,285	28,813
Insurance Reserve		
Balance, beginning of year	7,440	5,952
Contributions - Winnipeg Regional Health Authority	1,512	1,488
Balance, end of year	8,952	7,440
Total deferred contributions balance	$ 1,103,149	$ 1,141,549

The long-term debt that has been incorporated in deferred contributions includes the following:

	2009	2008
CMHC Mortgage - interest at 7 7/8%, requiring monthly principal and interest payments of $5,217 funded by the Winnipeg Regional Health Authority, secured by a first charge against land and building, maturing July 1, 2020	$ 474,259	$ 499,445

11. Commitments and Contingencies

a) Bethania Mennonite Personal Care Home, Inc. has signed a borrowing resolution covering capital expenditures of $2,575,090 for Pembina Place Mennonite Personal Care Home Inc. The borrowing resolution is secured by a letter of comfort from Manitoba Health.

b) The nature of the Home's activities is such that there is usually litigation pending or in prospect at any time. With respect to potential claims at March 31, 2009, management believes the Home has valid defences and appropriate insurance coverage in place. In the event any claims are successful, management believes that such claims are not expected to have a material effect on the Home's financial position.

c) On July 1, 1987, a group of health care organizations ("subscribers"), formed Healthcare insurance Reciprocal of Canada ("HIROC"). HIROC is registered as a reciprocal pursuant to provincial Insurance Acts, which permit reciprocal contracts of indemnity insurance. HIROC facilitates the provision of liability insurance coverage to health care organizations in the provinces of Ontario, Manitoba, Saskatchewan and Newfoundland. Subscribers pay annual premiums, which are actuarially determined, and are subject to assessment for losses in excess of such premiums, of any experienced by the group of subscribers for the years in which they were a subscriber. No such assessments have been made to March 31, 2009. The Home is a named insured under the WRHA policy with HIROC.

d) A lawsuit has been filed against the Home for an incident which arose in the ordinary course of business. In the opinion of management and legal counsel, the outcome of the lawsuit, now pending, is not determinable. Should any loss result from the resolution of this claim, such loss will be charged to operations in the year of resolution.

12. Changes in Non-cash Working Capital

	2009	2008
Accounts receivable	**$ 3,915**	$ 2,699
Restricted cash and investments	**161,704**	32,096
Inventories	**23,635**	(30,641)
Prepaid expenses	**966**	10,360
Due from (to) related parties	**(81,674)**	38,959
Accounts payable and accrued liabilities	**(121,733)**	109,902
Accrued vacation payable	**63,299**	(16,736)
	$ 50,112	$ 146,639

13. Bank Indebtedness

The Home has a line of credit with The Royal Bank to a maximum of $500,000 which carries an interest rate of Royal Bank prime. The line of credit is secured by a general assignment of accounts receivable.

14. Employee Future Benefits

a) Accrued retirement obligation

Based upon collective agreements and/or non-union policy, employees of the Home are entitled to a pre-retirement leave benefit if they are retiring in accordance with the provisions of the applicable Home Group Pension Plan. The Home's contractual commitment is to pay based upon the following:

Four days (pro-rated) of salary per year of service upon retirement if the employee complies with one of the following conditions:

i. has 10 years service and has reached the age 55

ii. qualifies for the "eighty" rule which is calculated by adding the number of years of service to the age of the employee

iii. retires at or after age 65

iv. terminates employment at any time due to permanent disability

The Home undertook an actuarial valuation of the pre-retirement leave benefit for accounting purposes as at March 31, 2008. The significant actuarial assumptions adopted in measuring the Home's accrued retirement entitlements include mortality and withdrawal rates, a discount rate of 6.7% (2008 - 5.5%) and a rate of salary increase of 3.5% (2008 - 3.5%) plus age related merit/promotion scale with no provision for disability.

The amount recorded as a receivable from the Province for pre-retirement costs was initially determined based on the value of the corresponding actuarial liability for pre-retirement costs as at March 31, 2004. Subsequent to March 31, 2004, the Province has included in its ongoing annual funding to the Home, an amount equivalent to the change in the pre-retirement liability, which includes annual interest accretion related to the receivable. The receivable will be paid by the Province when required.

Commencing in 2006/07, the Winnipeg Regional Health Authority assumed responsibility for funding the annual increase in the obligation each year. This amount will also be paid when required and the WRHA holds funding to meet this obligation.

	2009	2008
Employee future benefits recoverable from		
Manitoba Health	**$ 652,360**	$ 652,360
Winnipeg Regional Health Authority	**54,851**	74,183
	$ 707,211	$ 726,543

14. **Employee Future Benefits** (continued)

a) Accrued retirement entitlement (continued)

An analysis of the changes in the employee benefits payable is as follows:

	2009	2008
Balance, beginning of year	**$ 554,274**	$ 563,683
Net increase (decrease) in pre-retirement entitlements	**(19,332)**	(9,409)
Balance, end of year	**$ 534,942**	$ 554,274

b) Pension plan

Substantially all of the employees of the Home are members of the Healthcare Employees Pension Plan (a successor to the Manitoba Health Organization Inc. Plan (the "Plan")) which is a multi-employer defined benefit pension plan available to all eligible employees of the participating members of the Plan. Plan members will receive benefits based on the length of service and on the average of annualized earnings during the best five years of the last ten years prior to retirement, termination or death, that provides the highest earnings.

Pension assets consist of investment grade securities. Market and credit risk on these securities are managed by the Plan by placing plan assets in trust and through the Plan investment policy.

Pension expense is based on Plan management's best estimates, in consultation with its actuaries, of the amount, combined with the contributions by employees, required to provide a high level of assurance that benefits will be fully represented by fund assets at retirement, as provided by the Plan. The funding objective is for employer contributions to the Plan to remain a constant percentage of employees' contributions.

Variances between actuarial funding estimates and actual experience may be material and any differences are generally to be funded by the participating members. The most recent actuarial valuation of the Plan as at December 31, 2007 indicates the Plan is in a deficit position however, it is anticipated that recently implemented increases in contribution rates will correct the deficiency within the allowed time frame. Contributions to the Plan made during the year by the Home on behalf of its employees amounted to $310,557 (2008 - $300,044) and are included in the statement of operations.

15. Related Party Transactions

During the year, the Home had the following transactions with related organizations:

Management fee income	$ 60,000
Maintenance fee recovery	28,888

These transactions are in the normal course of operations and are measured at the exchange amount, which is the amount of consideration established and agreed to by the related parties. All parties are related by common control.

16. Funding of Future Employee Benefits

Effective April 1, 2004 Manitoba Health directed all health care facilities (including non-profit personal care homes) to discontinue establishing a receivable from Manitoba Health for the funding of future employee benefits given that the responsibility for payment of same would be transferred to the WRHA. Contrary to the long-standing practice prior to April 1, 2004, the WRHA has since directed all health care facilities to record the future employee benefits liability, but not the corresponding receivable. Commencing in 2007, the WRHA has agreed to fund the change in accrued pre-retirement liability for the WRHA funded portions; however, they did not agree to fund changes in accrued vacation pay.

The Home has taken the position that Unfunded Future Employee Benefits (which include Pre-retirement Leave and Vacation Accrual) should be recoverable from the WRHA.

The Home's position is based on the fact that employee benefits are negotiated centrally by the Labour Relations Secretariat, and the Service Purchase Agreement explicitly states that the level of funding will be commensurate with any settlement agreed to by the Labour Relations Secretariat.

Based on this understanding, the corresponding responsibility for the future funding of the these benefits should be recognized by Manitoba Health to the WRHA and the WRHA to Winnipeg non-profit personal care homes (including Bethania Mennonite Personal Care Home, Inc.).

The Home has expressed considerable concern to the WRHA regarding the impact of the policy change referred to above, and the manner in which Employee Future Benefit liabilities are to be funded and recorded in the Home's Audited Financial Statements.

17. Capital Management

The Home considers its capital to comprise its Net Assets balance. There have been no changes to what the organization considers to be its capital since the previous period.

The Home manages its capital to ensure it retains sufficient resources to enable it to meet its obligations for resident care. The determination of this amount is based on historical expense requirements relative to funding commitments.

BETHANIA MENNONITE PERSONAL CARE HOME, INC.
Schedule of Supplementary Information

For the year ended March 31		2009		2008
Other Income				
BethaniaHaus meal recoveries	$	**8,993**	$	9,643
Dietary recoveries		**44,680**		44,603

AUDITORS' REPORT

To the Member of Centre Taché Centre

We have audited the statement of financial position of Centre Taché Centre as at March 31, 2009 and the statements of operations and changes in fund balances and cash flows for the year then ended. These financial statements are the responsibility of the Corporation's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of the Corporation as at March 31, 2009 and the results of its operations and its cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

Our audit was made for the purpose of forming an opinion on the basic financial statements taken as a whole. The current year's supplementary information included in the schedule is presented for purposes of additional analysis and is not a required part of the basic financial statements. Such supplementary information has been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, is fairly stated, in all material respects, in relation to the basic financial statements taken as a whole.

See accompanying notes to financial statements.

General:

Centre Taché Centre (the Corporation) was incorporated on July 9, 1968 under the laws of Manitoba as Taché Nursing Centre Hospitalier Taché Inc. and operates under the name Centre Taché Centre. The Corporation functions as a bilingual, long-term care facility dedicated to the elderly, chronically ill and disabled. The Centre also provides a respite program, as part of the operating fund, a day centre program and provides care services at Chez-Nous, for the Supportive Housing Program.

1. Significant accounting policies:

(a) Revenue recognition:

The Corporation is funded primarily by the Winnipeg Regional Health Authority (WRHA) in accordance with a Service Purchase Agreement. The current Service Purchase Agreement will expire March 31, 2012. As the care provider for the Supportive Housing Program at a residential complex known as Chez Nous, located at 187 Avenue de la Cathédral, the Corporation receives funding from WRHA in accordance with a Service Purchase Agreement created May 1, 2007 which will expire September 30, 2010. Operating grants are recorded as revenue in the period to which they relate.

The Corporation follows the deferral method of accounting for contributions as follows:

Restricted contributions are recognized as revenue of the appropriate fund in the year in which the related expenses are incurred. Contributions restricted for the purchase of capital assets are deferred and amortized into revenue at a rate corresponding with the amortization rate for the related capital assets. Unrestricted contributions are recognized as revenue of the appropriate fund when the amount to be received can be reasonably estimated and collection is reasonably assured.

Unrestricted investment income is recognized in the Operating Fund in the year in which it is earned. Restricted investment income is recognized on an accrual basis and is allocated to the Internally Restricted Fund.

Volunteers are an integral part of carrying out the activities of the Corporation. These contributed services are not recognized in the financial statements because of the difficulty in determining their fair value.

1. Significant accounting policies (continued):

(b) Operating deficits or surpluses:

In accordance with the terms and conditions of the Service Purchase Agreement, annual operating deficits are the responsibility of the Corporation. For both Operating and Adult Day Program, annual operating surpluses less than 2 percent of the net cost of insured services are retained by the Corporation. Those surpluses that are retained by the Corporation are subject to review by the WRHA. Annual operating surpluses in excess of 2 percent of the net cost of insured services are repayable to the WRHA.

(c) Capital assets:

Capital asset purchases are recorded at cost and equipment donations are recorded at fair market value at the time of receipt. Amortization is recorded for the full year in the year of acquisition and no amortization is taken in the year of disposal. Amortization of work in progress commences when construction of the related asset is completed and the asset is used in the operations of the Corporation.

Amortization is calculated using the straight-line method at rates which amortize the assets over their estimated useful lives. The amortization rates are as follows:

Asset	Rate
Land improvements	5%
Buildings	2%
Equipment and building service equipment and software licences and fees	6 1/4% to 20%

(d) Leasehold estate:

The value assigned to the leasehold estate is being amortized against the deferred contribution to which it relates on a straight-line basis over the 60 year period of the lease.

(e) Fund accounting:

Assets, liabilities, revenues and expenses related to the Corporation's capital assets are recorded in the Capital Fund.

Assets, liabilities, revenues and expenses related to the Corporation's ancillary activities are recorded in the Ancillary Operations Fund.

1. Significant accounting policies (continued):

The Internally Restricted Fund represents funds received through donations, interest and retainable surpluses from operations. Certain expenditures from the fund require the approval of the Member of the Corporation, while the remaining expenditures require only the approval of the Board of Directors.

All other assets, liabilities, revenues and expenses are reported in the Operating Fund.

(f) Financial instruments:

Initially, all financial assets and liabilities must be recorded on the statement of financial position at fair value. Subsequent measurement is determined by the classification of each financial asset and liability. Financial assets and liabilities held-for-trading are measured at fair value with gains and losses recognized in excess (deficiency) of revenue over expenses. Financial instruments classified as held-to-maturity, loans and receivables and other liabilities are measured at amortized cost. Available-for-sale financial instruments are measured at fair value, with unrealized gains and losses recognized directly in fund balances.

The Corporation designated cash as held-for-trading; accounts receivable, receivable from Winnipeg Regional Health Authority, employee benefits and future employee pre-retirement benefits recoverable from Winnipeg Regional Health Authority as loans and receivables; other assets as available-for-sale; and advances from Winnipeg Regional Health Authority, accounts payable, accrued liabilities and mortgages payable as other liabilities. The Corporation does not have held-to-maturity financial instruments.

Except for held-for-trading designated financial instruments, transaction costs that are directly attributable to the acquisition or issuance of financial assets or liabilities are accounted for as part of the respective asset or liability's carrying value at inception and amortized over the expected life of the financial instrument using the effective interest rate method. For held-for-trading financial assets and liabilities, transaction costs are recorded in the statement of operations as incurred.

(g) Inventory:

Inventory is valued at the lower of cost and net realizable value.

1. Significant accounting policies (continued):

(h) Employee benefits:

The Corporation records a provision for employee benefits comprised of accrued vacation. A further provision for future employee pre-retirement benefits, being an actuarial estimate of the Corporation's obligation to make a cash payment to certain qualifying employees based on years of service upon retirement has also been recorded. Funding for portions of these obligations remains outstanding as disclosed in note 4.

The cost of the Corporation's employee pre-retirement benefits is accrued as earned based on an actuarial estimation.

The estimation of the future pre-retirement benefits has been performed using the projected unit credit service pro-rated on service actuarial cost method. The significant actuarial assumptions adopted in measuring the Corporation's future employee benefit payable include mortality and withdrawal rates, a discount rate of 6.70 percent (2008 - 5.5 percent), a rate of salary increase of 3.50 percent (2008 - 3.50 percent) plus an age-related merit/promotion scale with no provision for disability.

(i) Income taxes:

The Corporation is a registered charity within the meaning of the *Income Tax Act* and therefore is exempt from income taxes under Section 149(1) of the Act.

(j) Use of estimates:

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the year. Actual results could differ from those estimates.

2. Receivable from (payable to) Winnipeg Regional Health Authority:

	2009	2008
Receivable:		
Prior years	$ 212,616	$ 302,236
Salaries and benefits	553,409	604,191
Employee pre-retirement benefits	138,425	93,042
Other	8,042	23,907
	912,492	1,023,376
Payable:		
Prior years	217,208	217,537
Resident charges	173,760	100,839
Capital interest	612	563
Other	595	1,930
	392,175	320,869
	520,317	702,507
Current future employee pre-retirement benefits recoverable (note 4)	-	226,498
Net receivable	$ 520,317	$ 929,005

Over/under funding occurs when non-global items (including resident charges revenue and interest expense) are over/under the amounts budgeted by the Winnipeg Regional Health Authority. Over/under funded amounts are payable to/receivable from the Winnipeg Regional Health Authority.

3. Capital assets:

			2009	2008
	Cost	Accumulated amortization	Net book value	Net book value
Land improvements	$ 459,258	$ 316,512	$ 142,746	$ 178,384
Buildings	13,939,582	6,362,239	7,577,343	7,860,732
Building service equipment	765,207	458,006	307,201	318,958
Equipment	2,820,405	2,474,207	346,198	386,876
Software licences and fees	198,222	194,205	4,017	5,356
Work in progress	110,338	-	110,338	-
	$ 18,293,012	$ 9,805,169	$ 8,487,843	$ 8,750,306

4. Employee benefits:

(i) The Corporation maintains an employee pre-retirement benefit plan for substantially all of its employees. The plan provides benefit payments to eligible retirees based on length of service and on career earnings from initial eligibility.

At March 31, 2009, based on an actuarial estimate, the pre-retirement benefit plan's obligations are estimated to be approximately $1,803,676 (2008 - $1,826,198) for which the Corporation has provided an accrued future employee pre-retirement benefits liability on the statement of financial position.

The amount of funding which will be provided by the WRHA for pre-retirement benefits was initially determined based on the pre-retirement liability at March 31, 2004, and was recorded as a long-term receivable on the statement of financial position.

The recoverable has been adjusted, based on direction from WRHA, to include the incremental increases or decreases in the related liability since 2007, which include an .,interest component. The decrease recorded in fiscal 2009 was $22,522 (2008 – increase of $115,095) and is recorded in the statement of operations.

In addition, during 2007, the WRHA approved partial funding of the incremental increases in the future employee pre-retirement benefits liability for fiscal 2005 and 2006 of $226,498. This amount also included an interest component, and was received in fiscal 2009.

The future employee pre-retirement benefits recoverable from WRHA at March 31, 2009 aggregates $1,423,245 (2008 - $1,445,767) and has no specified terms of repayment.

Prior to 2004, Manitoba Health funded 100 percent of actual pre-retirement benefits paid over and above the operating grant provided to the Corporation. Beginning April 1, 2005, the WRHA established a policy of providing additional funding for approximately 70 percent of actual pre-retirement benefits paid. Actual additional funding provided by WRHA for 2009 was 65.1 percent (2008 - 64.25 percent) of actual pre-retirement benefits paid. The shortfall for 2009 of $74,210 (2008 - $51,770) was paid from funding received for operations.

(ii) The cost of the Corporation's vacation benefits is accrued when the benefits are earned by the employees and is included in accrued liabilities on the statement of financial position. The vacation benefits liability at March 31, 2009 is $1,041,686 (2008 - $1,020,565).

The funding received in each subsequent fiscal year from the Winnipeg Regional Health Authority includes the employee benefits recoverable of $921,099 as included on the statement of financial position. The employee benefits recoverable from Winnipeg Regional Health Authority are maintained at the value of the vacation benefits liability at March 31, 2004.

CENTRE TACHÉ CENTRE

Notes to Financial Statements (continued)

Year ended March 31, 2009

---

5. Residents' funds in trust:

Residents' funds in trust represents monies held in trust for the residents in the name of the Corporation and generally do not exceed $400 per resident.

6. Bank indebtedness:

At March 31, 2009, the Corporation had a $300,000 authorized line of credit available with no outstanding borrowings.

7. Mortgages payable:

	2009	2008
7 7/8% first mortgage on 1973 construction, payable in monthly blended payments of $14,783, due April 1, 2023	$ 1,517,881	$ 1,575,221
First mortgage on 1978 construction, payable in monthly blended payments of $13,375, due February 1, 2028. The effective interest rate after giving consideration to forgiveness clauses is 8%	1,696,366	1,725,936
	3,214,247	3,301,157
Current portion	94,544	86,908
	$ 3,119,703	$ 3,214,249

Both mortgages are payable to the Canada Mortgage and Housing Corporation.

Principal repayments required over the next five years and thereafter are as follows:

2010	$ 94,544
2011	102,859
2012	111,917
2013	121,784
2014	132,533
Thereafter	2,650,610
	$ 3,214,247

8. Advances from Winnipeg Regional Health Authority:

During the fiscal year the Corporation received funding advances from the Winnipeg Regional Health Authority in the amounts of $97,278 and $109,958 for funding commitments relating to the 2007/08 and 2008/09 fiscal years. These advances are unsecured, non-interest bearing and have no fixed terms of repayment. In fiscal 2009, the advances owing at March 31, 2008 of $602,121 were offset against related receivables from the Winnipeg Regional Health Authority.

9. Deferred contributions:

(a) Expenses of future periods:

Deferred contributions related to expenses of future periods represent unspent externally restricted grants and donations for resident programs.

		2009		2008
Balance, beginning of year	$	13,654	$	12,240
Add amount received related to future periods		5,704		13,588
Less amount recognized as revenue in the year		(6,094)		(12,174)
	$	13,264	$	13,654

(b) Capital assets:

Deferred capital contributions related to capital assets represent the unamortized amount and unspent amount of donations and grants received for the purchase of capital assets. The amortization of these contributions is recorded as revenue in the statement of operations.

		2009		2008
Balance, beginning of year	$	5,796,556	$	6,150,443
Additional contributions received		281,503		123,501
Less amounts amortized to revenue		(471,491)		(477,388)
	$	5,606,568	$	5,796,556

The balance of unamortized capital contributions related to capital assets consists of the following:

		2009		2008
Unamortized capital contributions used to purchase assets	$	5,289,524	$	5,480,458
Unspent contributions:				
Equipment reserve		223,910		188,419
Major repairs		79,330		114,107
Donations		13,804		13,572
	$	5,606,568	$	5,796,556

CENTRE TACHÉ CENTRE

Notes to Financial Statements (continued)

Year ended March 31, 2009

10. Capital fund:

	2009	2008
Capital assets	$ 8,487,843	$ 8,750,306
Leasehold estate	72,477	75,812
	8,560,320	8,826,118
Amount financed by:		
Deferred contributions	(5,289,524)	(5,480,458)
Mortgages	(3,214,247)	(3,301,157)
	$ 56,549	$ 44,503

11. Internally restricted fund:

	2009	2008
To be expended only with the approval of the Member of the Corporation	$ 1,525,006	$ 1,209,988
Other internal projects	253,558	286,605
	$ 1,778,564	$ 1,496,593

12. Related party transactions:

Foundation:

An amount of $50,000 (2008 - $50,000) was funded by Les Amis de Taché Friends Incorporated, a corporation with the same Member of the Corporation.

Shared and contributed services:

The Corporation and Foyer Valade Inc., a corporation with the same Board of Directors and Member of the Corporation, have an agreement to share the cost of specific employee services based on the time spent on each entity. The Corporation provided services to Foyer Valade Inc. in the amount $238,893 (2008 - $287,382) which is included in shared services revenue. The Corporation purchased services from Foyer Valade Inc. in the amount of $210,629 (2008 - $213,540) which is included in salaries and wages.

In addition to these shared services, the Corporation contributed services to Foyer Valade Inc. in the amount of $70,846 (2008 - $22,920) free of charge.

These transactions are in the normal course of operations and are measured at the exchange amount which is the amount of consideration established and agreed to by the related parties.

13. Employee pension plan:

During the year, the Corporation contributed $826,021 (2008 - $767,322) on behalf of its employees. Eligible employees of the Corporation are members of the Healthcare Employees Pension Plan - Manitoba, a multi-employer defined benefit pension plan. As individual entities within the plan are not able to identify their share of the underlying assets and liabilities, the Corporation is accounting for the plan as a defined contribution plan. The cost of the plan is recognized based on the contributions required to be made during each period.

The most recent actuarial valuation of the plan as at December 31, 2007 indicated a solvency deficiency of $61,050,000 that will be funded over five years commencing calendar 2008 out of current contributions in each respective year. A change in underlying actuarial assumptions could cause a change in the actuarial value of accrued pension benefits and required service contributions. Contribution rates were increased on July 1, 2007 to 6.8 percent of pensionable earnings up to the yearly maximum pensionable earnings limit (YMPE) and 8.4 percent on earnings in excess of the YMPE. No rate changes have been issued since.

14. Ladies Auxiliary - Taché Centre:

The Ladies Auxiliary - Taché Centre operates the gift shop at the Centre. The funds raised are used to enhance the residents' environment. The fund balance at March 31, 2009 is $52,366 (2008 - $44,120) and this amount is not included in the Corporation's financial statements.

15. Fair value:

The fair value of accounts receivable, receivable from Winnipeg Regional Health Authority, employee benefits recoverable from Winnipeg Regional Health Authority, accounts payable, accrued liabilities and advances from Winnipeg Regional Health Authority approximate their carrying value due to their immediate or short-term nature.

The fair value of the mortgages payable was not practical to determine due to the underlying terms and conditions.

The fair value of the future employee pre-retirement benefits recoverable from Winnipeg Regional Health Authority approximates its carrying value as the interest component is comparable to current market rates. The fair value of other assets, representing shares of a private entity, is not readily determinable because these shares are neither liquid nor are they traded in an active market.

---

16. Leasehold estate:

The original Centre is situated on property leased from Despins Charities Inc., a corporation with the same Member of the Corporation, at a rental of $1 per annum. The 60 year lease expires December 31, 2030. The land is held as a leasehold estate registered under the *Real Property Act* in the Winnipeg Land Titles Office. At the termination of the lease, the title to the land reverts to the lessor.

The 1971 estimated fair market value of the economic rent of the leasehold estate was $16,500 per annum, based on an appraisal made by E. Karl Farstad & Associates Ltd. as of January 17, 1972. The discounted present value of such rental over the 60 year period is estimated to be $200,000 using an interest factor of 8 ¼ percent per annum. The $200,000 discounted present value of the lease was recorded in the accounts at December 31, 1971 as an asset with an offsetting credit to deferred contributions to recognize the value of the donation of the leasehold estate made by Taché Hospital for Chronic and Geriatric Patients.

The addition to the original Centre is situated on two properties leased from Despins Charities Inc. and the Catholic Health Corporation of Manitoba (CHCM), the Member of the Corporation, at a rental of $2 per annum. The leases expire December 31, 2030. The land is held as a leasehold estate registered under the *Real Property Act* in the Winnipeg Land Titles Office. At the termination of the lease, the title to the land reverts to the lessor. No economic value of these additional leases is reflected in the financial statements.

The Centre also leases additional property from Despins Charities Inc. at a rental of $1 per annum. No economic value of this additional lease is reflected in the financial statements.

17. Future accounting changes:

The Canadian Institute of Chartered Accountants (CICA) issued the following accounting standards that will come into effect for the Corporations's next fiscal year. The Corporation is in the process of determining the impact that these standards will have on its financial reporting.

CICA Section 3862, Financial Instruments - Disclosures and Section 3863, Financial Instruments - Presentation were to replace the existing Section 3861, Financial Instruments - Disclosure and Presentation, effective April 1, 2009 for the corporation. These new sections revise and enhance disclosure requirements, and carry forward, unchanged, existing presentation requirements. These new sections place increased emphasis on disclosures about the nature and extent of risks arising from financial instruments and how the entity manages those risks. However, the CICA subsequently amended these sections to eliminate the requirement for not-for-profit entities to adopt these sections. Not-for-profit entities are permitted to continue to apply Section 3861 in place of Section 3862 and 3863. An entity that does so must disclose the fact.

17. Future accounting changes (continued):

In September 2008, a number of standards applicable to not-for-profit organizations were amended and new Section 4470, *Disclosures of Allocated Expenses by Not-for-Profit Organizations,* was issued. The new Section 4470 requires entities that make allocations of general support and fundraising costs to other functions to disclose the policies adopted for the allocation of expenses among functions, the nature of the expenses being allocated, the basis on which such allocations have been made, and the functions to which they have been allocated. In addition, the amendments to the not-for-profit organization standards include clarification of when revenues and expenses are to be reported on a gross basis; clarification of the treatment of internal and external restriction on net assets; and improved guidance related to application of GAAP hierarchy, capital asset standards and statement of cash flows. The Corporation will adopt these standards on April 1, 2009.

18. Comparative figures:

Certain comparative figures have been reclassified to conform with the financial statement presentation adopted in the current year.

AUDITORS' REPORT

To the Member of Clinique Youville Clinic Inc.

We have audited the statement of financial position of Clinique Youville Clinic Inc. as at March 31, 2009 and the statements of operations and changes in fund balances and cash flows for the year then ended. These financial statements are the responsibility of the corporation's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of the corporation as at March 31, 2009 and the results of its operations and its cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

CLINIQUE YOUVILLE CLINIC INC.

Notes to Financial Statements

Year ended March 31, 2009

General:

The corporation was established March 3, 1983 by the Grey Nuns of Manitoba, without share capital and operates under the name Centre Youville Centre. Effective October 5, 2000, the Catholic Health Corporation of Manitoba assumed sponsorship. The corporation operates two health resource centres, a Community Health Resource Centre in St. Vital and a Diabetes Education Resource Centre in St. Boniface. The mandate of the corporation includes:

- The creation of a comprehensive community based resource for the promotion of healthy lifestyles by assisting people to assume responsibility for their own health and well-being, and to create an awareness of their own resources by offering education, direction and support.
- Nurse managed care and an expanded role outside of the traditional illness focused model of care for health professionals.
- Services for people across their life span with health care teams working together with the community to support programs that range from: maternal child health to chronic diseases; prenatal to parenting workshops; adolescent to women's health services; as well as a community health information line.

1. Significant accounting policies:

(a) Revenue recognition:

The corporation follows the deferral method of accounting for contributions, which include donations and government grants.

Operating grants are recorded as revenue in the period to which they relate.

Unrestricted contributions are recognized as revenue when received or receivable if the amount to be received can be reasonably estimated and collection is reasonably assured.

Externally restricted contributions are recognized as revenue in the year in which the related expenses are recognized. Contributions restricted for the purchase of capital assets are deferred and amortized into revenue at a rate corresponding with the amortization rate for the related capital assets.

Volunteers are an integral part of carrying out the activities of the corporation. These contributed services are not recognized in the financial statements because of the difficulty in determining their fair value.

---

1. Significant accounting policies (continued):

(b) Operating deficits or surpluses:

The corporation is funded primarily by the Winnipeg Regional Health Authority (WRHA). The corporation's Service Purchase Agreement with the WRHA continues in effect until March 31, 2012.

In accordance with the terms and conditions of the Service Purchase Agreement between the corporation and the WRHA, annual operating deficits are the responsibility of the corporation. The corporation may retain the greater of 50 percent of the annual operating surplus and 2 percent of the global budget as provided by the WRHA, in any fiscal year. Those surpluses that are retained by the corporation are subject to review by the WRHA. Annual operating surpluses in excess of 2 percent of the net cost of insured services are repayable to the WRHA.

(c) Fund accounting:

Assets, liabilities, revenues and expenses related to the corporation's capital assets are recorded in the Capital Fund.

The Restricted fund represents funds received through donations and interest income. All expenditures from this fund requires the approval of the Board of Directors.

Funds designated as restricted require the approval of the Board of Directors before disbursement. Ancillary program surplus is transferred to restricted funds once the programs are completed.

All other assets, liabilities, revenues and expenses are reported in the Unrestricted Fund.

(d) Financial instruments:

The corporation has designated cash as held-for-trading; accounts receivable, receivable from WRHA, employee benefits recoverable from WRHA and future employee pre-retirement benefits recoverable from WRHA as loans and receivables; and accounts payable and accrued liabilities as other liabilities. The corporation does not have held-to-maturity or available-for-sale financial instruments.

1. Significant accounting policies (continued):

Except for held-for-trading designated financial instruments, transaction costs that are directly attributable to the acquisition or issuance of financial assets or liabilities are accounted for as part of the respective asset or liability's carrying value at inception and amortized over the expected life of the financial instrument using the effective interest method. For held-for-trading financial assets and liabilities, transaction costs are recorded in the statement of operations as incurred.

(e) Capital assets:

Capital assets are recorded at cost and are amortized over their estimated useful lives using the following annual rates and methods:

Asset	Basis	Rate
Furniture and fixtures	Declining balance	20%
Computer equipment	Declining balance	30%
Leasehold improvements	Straight-line	5 years

(f) Future employee benefits:

The cost of the corporation's employee retirement benefits is accrued as earned based on an actuarial estimation.

The estimation of the future pre-retirement benefits has been performed using the projected unit credit service pro-rated on service actuarial cost method. The significant actuarial assumptions adopted in measuring the corporation's future employee benefit payable include mortality and withdrawal rates, a discount rate of 6.7 percent (2008 - 5.5 percent), a rate of salary increase of 3.5 percent (2008 - 3.5 percent) plus an age-related merit/promotion scale with no provision for disability.

(g) Employee benefits:

The cost of the corporation's vacation benefits is accrued when the benefits are earned by the employees and is reported in accounts payable and accrued liabilities on the statement of financial position. The Winnipeg Regional Health Authority (WRHA) provides funding for a portion of vacation benefits payable, and this amount is reported as employee benefits recoverable from WRHA on the statement of financial position.

1. **Significant accounting policies (continued):**

(h) Income taxes:

The corporation is a registered charity within the meaning of the *Income Tax Act* and therefore is exempt from income taxes under Section 149 (1) of the *Income Tax Act*.

(i) Use of estimates:

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the year. Actual results could differ from those estimates.

(j) Future accounting policy changes:

The Canadian Institute of Chartered Accountants (CICA) issued the following accounting standards that will come into effect for the corporation's next fiscal year. The corporation is in the process of determining the impact that these standards will have on its financial reporting.

On April 1, 2009, the corporation was expected to adopt CICA Section 3862, *Financial Instruments - Disclosures* and Section 3863, *Financial Instruments - Presentation* replacing the existing Section 3861, *Financial Instruments - Disclosure and Presentation*. These new sections revise and enhance disclosure requirements, and carry forward, unchanged, existing presentation requirements. These new sections place increased emphasis on disclosures about the nature and extent of risks arising from financial instruments and how the entity manages those risks. However, the CICA subsequently amended these sections to eliminate the requirement for not-for-profit entities to adopt these sections. Not-for-profit entities are permitted to continue to apply Section 3861 in place of Section 3862 and 3863. An entity that does so must disclose this fact.

In September 2008, a number of standards applicable to not-for-profit organizations were amended and new Section 4470, *Disclosures of Allocated Expenses by Not-for-Profit Organizations,* was issued. The new Section 4470 requires entities that make allocations of general support and fundraising costs to other functions to disclose the policies adopted for the allocation of expenses among functions, the nature of the expenses being allocated, the basis on which such allocations have been made, and the functions to which they have been allocated. In addition, the amendments to the not-for-profit organization standards include clarification of when revenues and expenses are to be reported on a gross basis; clarification of the treatment of internal and external restriction on net assets; and improved guidance related to application of GAAP hierarchy, capital asset standards and statement of cash flows. The corporation will adopt these standards on April 1, 2009.

2. Correction of an error:

During the year ended March 31, 2009, it was identified that certain salaries and benefits accruals as at March 31, 2008 were understated by $64,983. As a result, comparative balances in the prior period have been restated as follows:

	Previously reported	Restated
Statement of operations for the year ended March 31, 2008:		
Salaries and benefits expense	$ 2,009,824	$ 2,074,807
Excess of revenue over expenses	181,651	116,668
Statement of financial position as at March 31, 2008:		
Accounts payable and accrued liabilities	202,494	267,477
Unrestricted fund balance	155,207	90,224

3. Capital assets:

	Cost	Accumulated amortization	2009 Net book value	2008 Net book value
Furniture and fixtures	$ 173,254	$ 93,854	$ 79,400	$ 19,897
Computer equipment	230,628	212,361	18,267	26,096
Leasehold improvements	394,853	39,485	355,368	–
	$ 798,735	$ 345,700	$ 453,035	$ 45,993

4. Employee benefit plans:

(a) Employee benefits:

The corporation records a provision for employee benefits including vacation and statutory holiday entitlements. At March 31, 2009, accounts payable and accrued liabilities includes employee benefits payable of $141,169 (2008 - $139,947).

4. Employee benefit plans (continued):

During fiscal 2008, WRHA confirmed that it will fund a portion of these employee benefits, which is limited to the amount estimated at March 31, 2004. Accordingly, the corporation has recorded a recoverable in the amount of $125,848, representing amounts due from WRHA, and reflects the estimated liability for accumulated employee benefits at that date. Each year thereafter, the corporation is expected to fund the change in the liability from annual funding provided by the WRHA.

(b) Future employee pre-retirement benefits:

The corporation maintains an employee pre-retirement benefit plan for substantially all of its employees. The plan provides benefit payments to eligible retirees based on length of service and on career earnings from initial eligibility.

At March 31, 2009, based on an actuarial estimate, the pre-retirement benefit plan's obligations are estimated to be approximately $131,228 (2008 - $125,155) for which the corporation has recorded a future employee pre-retirement benefits payable on the statement of financial position.

The amount of funding which will be provided by the WRHA for pre-retirement benefits was initially determined based on the pre-retirement liability at March 31, 2004 and was recorded as a long-term receivable on the statement of financial position.

The recoverable has been adjusted, based on direction from WRHA, to include the incremental increases in the related liability since 2007, which include an interest component. The net increase recorded in fiscal 2009 was $6,073 (2008 - decrease of $7,003) and is recorded in the statement of operations.

In addition, during fiscal 2007, the WRHA approved partial funding of the incremental increases in the future employee per-retirement benefits liability for fiscal 2005 and 2006 of $22,708. The future employee pre-retirement benefits recoverable from WRHA at March 31, 2009 aggregates $93,087 (2008 - $87,014) and has no specified terms of repayment.

Beginning April 1, 2005, the WRHA established a policy of providing additional funding for approximately 70 percent of actual pre-retirement benefits paid. Cash funding provided by the WRHA for 2009 was 65.1 percent (2008 - 64.25 percent) of actual pre-retirement benefits paid. The cash shortfall is considered to be funded as part of the annual operating grant from the WRHA.

5. Deferred contributions:

(a) Future expense:

Deferred contributions related to future expense represent unspent externally restricted grants and donations for research, education and programs.

	2009	2008
Balance, beginning of year	$ 278,328	$ 264,448
Add amount received related to future periods	270,279	82,089
Less amount recognized as revenue in the year	(312,704)	(68,209)
	$ 235,903	$ 278,328

The amount of future expenses recognized as revenue during the year is recorded on the statement of operations in other programs.

(b) Capital assets:

Deferred capital contributions related to capital assets represent the unamortized amount of donations and grants received for the purchase of capital assets. The amortization of capital contributions is recorded as revenue in the statement of operations.

	2009	2008
Balance, beginning of year	$ 34,661	$ 47,173
Additional contributions received or receivable	465,389	–
Less amounts amortized to revenue	(55,485)	(12,512)
	$ 444,565	$ 34,661

During the year, the corporation undertook a significant renovation to its main premises, which was funded through donations from a variety of sources. At March 31, 2009, $130,000 is due from the WRHA related to the project and is recorded in accounts receivable. A further $48,500 has been accrued as contributions receivable related to capital expenditures incurred in fiscal 2009. Subsequent to year-end, the corporation incurred costs of approximately $46,061 on the project, which is expected to be entirely funded by additional contributions to be received in fiscal 2010.

6. Employee pension plan:

Eligible employees of the corporation are members of the Healthcare Employees Pension Plan - Manitoba, a multi-employer defined benefit pension plan (the Plan). As individual entities within the plan are not able to identify their share of the underlying assets and liabilities, the corporation is accounting for the plan as a defined contribution plan. The cost of the plan is recognized based on the contributions required to be made during each period. The corporation's liability under the Plan is limited to the contributions required during the year.

During the year, the corporation contributed $116,093 (2008 - $99,151) on behalf of its employees. The most recent actuarial valuation of the plan as at December 31, 2007, reported the plan had a solvency deficiency. This deficiency will be funded by special payments out of current contributions. Any contribution deficiencies in the plan would be addressed through pension benefit reductions or contribution rate increases from the participating members. A change in the underlying actuarial assumptions could cause a change in the actuarial value of accrued pension benefits and required service contributions.

7. Other information:

The Regina Grey Nuns and the Grey Nuns of Manitoba Inc. have contributed $1,494,026 to the Clinique Youville Clinic Inc., from its incorporation to March 31, 2009. The Grey Nuns of Manitoba Inc. contributed $5,000 during the year ended March 31, 2009. There have been no contributions by Regina Grey Nuns since 1996.

8. Commitments:

The corporation has committed to lease premises for the St. Boniface and St. Vital centres through January 2011 and August 2014 respectively, as per the following schedule:

2010	$ 171,732
2011	165,912
2012	90,912
2013	90,912
2014	37,880

9. Financial instruments:

Fair value:

The fair value of accounts receivable, receivable from WRHA and accounts payable and accrued liabilities approximates their carrying value due to their short-term nature.

The fair value of the future employee benefits recoverable from WRHA approximates its carrying value as the interest component, as described in note 4, is comparable to current market rates.

Auditors' Report

To the Board of Directors of
DONWOOD MANOR PERSONAL CARE HOME INC.

We have audited the statement of financial position of **DONWOOD MANOR PERSONAL CARE HOME INC.** as at March 31, 2009 and the statements of operations, changes in net assets and cash flows for the year then ended. These financial statements are the responsibility of the Home's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of the Home as at March 31, 2009 and the results of its operations and cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

The budget figures presented have not been audited, and are presented for informational purposes only.

Cash and cash equivalents, end of year	$ (458,373)	$ (79,604)
Supplementary Information		
Interest received	$ 4,645	$ 9,911

The accompanying summary of significant accounting policies and notes are an integral part of these financial statements.

The financial statements have been prepared by management in accordance with Canadian generally accepted accounting principles for the not-for-profit organizations.

Revenue Recognition

The Home follows the deferral method of accounting for contributions which include donations and government grants.

Under the Health Insurance Act and regulations thereto, the Home is funded primarily through the Winnipeg Regional Health Authority (WRHA) by the Province of Manitoba in accordance with budget arrangements established by WRHA. Operating grants are recorded as revenue in the period to which they relate. Grants approved but not received at the end of an accounting period are accrued. Where a portion of a grant relates to a future period, it is deferred and recognized in that subsequent period. These financial statements reflect discussions with WRHA with respect to the year ended March 31, 2009.

With respect to actual operating results, certain adjustments to funding will be made by WRHA after completion of their review of the Home's accounts as follows:

a) Deficits - The WRHA shall not be responsible for past or future deficits of the Home in providing the services and debt service charges for any debt incurred resulting from operating deficits unless the parties otherwise mutually agree.

   The WRHA shall not be responsible for the costs incurred by the Home other than those set forth in the service purchase agreement dated March 6, 2002.

b) Surpluses - The Home may unconditionally retain the greater of 50% of its operating surplus in any fiscal year and 2% of the global budget indicated in its funding letter from the WRHA for such fiscal year. Any surplus beyond the foregoing levels shall be remitted to the WRHA on demand.

Unrestricted contributions are recognized as revenue when received or receivable if the amount to be received can be reasonably estimated and collection is reasonably assured.

Externally restricted contributions are recognized as revenue in the year in which the related expenditures are recognized. Contributions restricted for the purchase of capital assets are deferred and amortized into revenue on a straight-line basis, at a rate corresponding with the amortization rate for the related capital assets.

DONWOOD MANOR PERSONAL CARE HOME INC.

Summary of Significant Accounting Policies

March 31, 2009

Revenue Recognition (continued)

Restricted investment income is recognized as revenue in the year in which the related expenditures are recognized. Unrestricted investment income is recognized as revenue when earned.

Revenue from residential and other services is recognized when the goods are sold or the service is provided.

Inventories

Inventories are carried at the lower of cost and net realizable value, cost being determined on a first-in, first-out basis.

Employee Future Benefits

Pension and other employee future benefit costs are determined using the projected benefit method prorated on years of service and based on best estimate assumptions.

For the 2004-05 and 2005-06 fiscal years, out-of-globe funding for these costs is not provided by Manitoba Health/WRHA.

Contributed Services

A substantial number of volunteers contribute a significant amount of their time each year. Because of the difficulty of determining the fair value, contributed services are not recognized in the financial statements.

Capital Assets

Purchased capital assets are recorded at cost. Contributed capital assets are recorded at fair value at the date of contribution. Repairs and maintenance costs are charged to expenditures. Betterments which extend the estimated useful life of an asset are capitalized. When a capital asset no longer contributes to the Home's ability to provide services, its carrying amount is written down to its residual value.

Capital assets are amortized on a straight-line basis using the following rates:

Buildings - 40 years
Furniture and equipment - 10 years

Financial Instruments

The Home utilizes various financial instruments.

All transactions related to financial instruments are recorded on a settlement date basis.

The Home classifies its financial instruments as follows based on the purpose for which the asset was acquired and follows the disclosed accounting policy for each category.

Assets/Liability	Category	Measurement
Due from WRHA	Loans and receivables	Amortized cost
Accounts receivable	Loans and receivables	Amortized cost
Due from Related Parties	Loans and receivables	Amortized cost
Vacation entitlements receivable	Loans and receivables	Amortized cost
Retirement obligations assets	Loans and receivables	Amortized cost
Bank indebtedness	Held for trading	Fair value
Accounts payable and accruals	Other financial liabilities	Amortized cost
Advances from WRHA	Other financial liabilities	Amortized cost

- Held for trading items are carried at fair value, with changes in their fair value recognized in the statement of operations.
- Other financial liabilities are carried at amortized cost, using the effective interest method.
- Loans and receivables are carried at amortized cost, using the effective interest rate method, less any provision for impairment.

Transaction costs are expensed as incurred.

Use of Estimates

The preparation of financial statements in accordance with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenditures during the reporting period. Actual results could differ from management's best estimates as additional information becomes available in the future.

New Accounting Pronouncements

Recent accounting pronouncements that have been issued but are not yet effective, and have a potential implication for the Home, are as follows:

Financial Statement Concepts

CICA Handbook Section 1000, Financial Statement Concepts has been amended to focus on the capitalization of costs that truly meet the definition of an asset and de-emphasizes the matching principle.

The revised requirements are effective for annual and interim financial statements relating to fiscal years beginning on or after October 1, 2008. The Home is currently evaluating the impact of the adoption of this change on the disclosure within its financial statements.

Financial Instruments - Disclosure and Presentation

On October 15, 2008 the CICA deferred indefinitely the requirement of not-for-profit organizations to implement new standards dealing with certain financial instrument, disclosures and presentation. The Nursing Home has elected to defer application of these standards.

Financial Statements by Not-for-Profit Organizations

In September 2008, a number of standards applicable to not-for-profit organizations were amended and issued. The changes are intended to improve financial reporting by not-for-profit organizations and make not-for-profit standards consistent with those of profit-oriented enterprises when they address the same issues. These amendments which are effective for fiscal years beginning on or after January 1, 2009 will not have a significant impact on the results of operations or financial position.

New Accounting Pronouncements (continued)

In December 2008, the AcSB and the Public Sector Accounting Board issued a joint Invitation to Comment, "Financial Reporting by Not-for-Profit Organizations," to invite feedback on the future of financial reporting by not-for-profit organizations. The financial reporting options under consideration by the AcSB include IFRSs, private enterprise standards and public sector standards. Until the strategy has been determined and implemented, not-for-profit organizations will continue to apply current accounting standards.

The Home continues to monitor the developments in this area and evaluate the implications of the potential changes in financial reporting standards.

1. Entity Definition

Donwood Manor Personal Care Home Inc. changed its name effective June 3, 1997. Previously it was known as the Mennonite Brethren Geriatric Association of Metro Winnipeg Inc., which was incorporated on February 13, 1969. The entity continues to provide residential care and has retained its registration as a charitable organization.

Effective April 1, 1999, government funding is primarily provided by the Winnipeg Regional Health Authority through a service purchase agreement. The Winnipeg Regional Health Authority is responsible for the overall planning and integration of services to the region and the appropriate allocation of funding to Winnipeg's hospitals, community based health services, long-term care services, health promotion and disease prevention services.

Donwood Manor Personal Care Home Inc. is a member of the Donwood Group of companies which operate under the control of a common Board of Directors and provide long-term care and assisted living services to senior citizens in Winnipeg. Other entities in the Group include Donwood Manor EPH Inc., Donwood South Inc., Winnipeg Condominium Corporation No. 297 and Donwood West Inc.

Also related to the Group is The Donwood Foundation Inc. by virtue of overlapping board membership and management.

Consolidated financial statements for the Group have been compiled, however separate financial statements are presented for each entity to facilitate reporting to the funders and other users of each entity.

2. Changes in Accounting Policies

Capital disclosures

On April 1, 2008 the Home adopted a requirement of the CICA to provide disclosure about how it manages its unrestricted net assets (See Note 15).

The adoption of these new standards had no material impact on the organization's consolidated statement of operations.

3. Accounts Receivable

	2009	2008
Receivable from residents	$ 314	$ 7,360
Goods and Services Tax	20,166	8,202
Insurance claim	32,500	-
	$ 52,980	$ 15,562

4. Related Party Transactions

	2009	2008
Donwood Manor EPH Inc.	$ 7,428	$ 7,137
Donwood South Inc.	2,118	830
Donwood Manor Foundation Inc.	22,693	41,871
Winnipeg Condominium Corporation No. 297	(35)	1,141
	$ 32,204	$ 50,979

Amounts due from (to) related parties are non-interest bearing with no specific terms of repayment. Administrative salaries are charged to Winnipeg Condominium Corporation No. 297 in the amount of $5,547 (2008 - $5,547). These transactions are in the normal course of operations and are measured at the exchange value (the amount of consideration established and agreed to by the related parties), which approximates the arm's length equivalent for sales of product or services.

5. Accrued Vacation Entitlements

The Home records a provision for accrued vacation entitlements. Prior to March 31, 2004 changes in the liability related to vacation were recoverable from Manitoba Health. At that date, Manitoba Health advised that subsequent to March 31, 2004 all funding related to past and future vacation entitlement costs would be included in in-globe funding and that the maximum liability to be recognized by Manitoba Health to facilities would be capped at March 31, 2004 levels. Accordingly, each year as vacation entitlements are paid and earned by the Home's employees, the related vacation entitlement receivable is collected and re-established up to this maximum amount.

An analysis of the changes in the vacation entitlements receivable from Manitoba Health is as follows:

	2009	2008
Balance, beginning of year	$ 273,191	$ 273,191
Net changes in vacation entitlements receivable	-	-
Balance, end of year	$ 273,191	$ 273,191

An analysis of the changes accrued in the vacation entitlements is as follows:

	2009	2008
Balance, beginning of year	$ 313,632	$ 305,480
Net increase in accrued vacation entitlements	15,275	8,152
Balance, end of year	$ 328,907	$ 313,632

6. Capital Assets

	2009		2008	
	Cost	Accumulated Amortization	Cost	Accumulated Amortization
Land	$ 15,000	$ -	$ 15,000	$ -
Buildings	9,476,211	3,391,244	9,476,211	3,155,828
Furniture and equipment	1,460,805	933,742	1,108,958	903,736
	$ 10,952,016	$ 4,324,986	$ 10,600,169	$ 4,059,564
Cost less accumulated amortization		$ 6,627,030		$ 6,540,605

7. Bank Indebtedness

The Home has an approved line of credit of $500,000 with the Royal Bank of Canada. This line of credit is secured by a general assignment of book debts and bears interest at prime.

8. Due to (from) WRHA

	2009	2008
2004/2005 funding adjustment	$ 84,460	$ 84,460
2005/2006 funding adjustment	(3,646)	(3,646)
2006/2007 funding adjustment	32,258	(77,152)
2007/2008 funding adjustment	(192,542)	(337,417)
2008/2009 funding adjustment	(804,773)	-
	$ (884,243)	$ (333,755)

The reviews of the 2004/2005, 2005/2006, 2006/2007 and 2007/2008 fiscal years, as well as the current year, are not completed at this time; however the Home has adjusted the amounts reflected as due to (from) the WRHA for these years to reflect its current estimate of possible settlement based on the outcome of the completed reviews for earlier years.

9. Deferred Contributions

Expenses of future periods

Deferred contributions related to expenses of future periods represent unspent externally restricted grants for major repairs, equipment replacement and insurance deductibles.

	2009	2008
Balance, beginning of year	$ 69,106	$ 74,844
Add amount received during the year	24,799	26,311
Less 2007/2008 expenditures	(42,434)	(32,049)
Balance, end of year	$ 51,471	$ 69,106

Capital assets

Deferred capital contributions related to capital assets represent the unamortized amount of donations and grants received for the purchase of capital assets. The amortization of capital contributions is recorded as revenue in the statement of operations.

Changes in the deferred contribution balance are as follows:

	2009	2008
Balance, beginning of year	$ 6,443,700	$ 6,641,971
Additional contributions received		
WRHA	351,847	62,459
Less amounts amortized to revenue	(265,422)	(260,730)
Balance, end of year	$ 6,530,125	$ 6,443,700

10. Investment in Capital Assets

A. Investment in capital assets is calculated as follows:

	2009	2008
Capital assets	$ 6,627,030	$ 6,540,605
Amounts financed by Deferred contributions	(6,530,125)	(6,443,700)
	$ 96,905	$ 96,905

B. Change in net assets invested in capital assets is calculated as follows:

	2009	2008
Excess of revenues over expenditures		
Amortization of deferred contributions related to capital assets	$ 265,422	$ 260,730
Amortization of capital assets	(265,422)	(260,730)
	$ -	$ -
Net changes in investment in capital assets		
Purchase of capital assets	$ 351,847	$ 62,459
Amounts funded by WRHA capital asset funding	(351,847)	(62,459)
	$ -	$ -

11. Commitments and Contingencies

a) The nature of the Home's activities is such that there may be litigation pending or in prospect at any time. With respect to claims at March 31, 2009 management believes the Home has valid defences and appropriate insurance coverage in place or has made sufficient provision for any uninsured payments to be made. In the event any claims are successful, management believes that such claims are not expected to have a material effect on the Home's financial position.

b) On July 1, 1987, a group of health care organizations, ("subscribers"), formed Healthcare Insurance Reciprocal of Canada ("HIROC"). HIROC is registered as a Reciprocal pursuant to provincial Insurance Acts, which permit persons to exchange with other persons reciprocal contracts of indemnity insurance. HIROC facilitates the provision of liability insurance coverage to health care organizations in the provinces of Ontario, Manitoba, Saskatchewan and Newfoundland. Subscribers pay annual premiums, which are actuarially determined, and are subject to assessment for losses in excess of such premiums, if any, experienced by the group of subscribers for the years in which they were a subscriber. No such assessments have been made to March 31, 2009.

The Home is a named insured under the WRHA policy with HIROC.

12. Revenue from the WRHA

Revenue as per WRHA final funding document (adjusted)	**$ 4,354,350**
Add:	
Estimated median rate adjustment 2008/09	81,373
Influenza and pneumococcal immunization	459
MNU and related contract	40,883
2007/08 Preliminary median rate adjustment	103,641
Related contract 2008/09 baseline	136,824
Staffing increase hours of care	236,136
PIECES Training	2,530
Pre-retirement funding 2008/09	49,229
One on one care	8,657
Union related 2008/09 wage increases	86,385
	746,117
Deduct	
Residential charges adjustment	(115,710)
Insurance deductible	(1,500)
Reserve major repairs	(3,621)
Adjustment to deferred grants	(662)
	(121,493)
Revenue from WRHA	**$ 4,978,974**

13. Employee Future Benefits

a) Accrued retirement entitlement

Based upon collective agreements and/or non-union policy, employees of the Home are entitled to a pre-retirement leave benefit if they are retiring in accordance with the provisions of the applicable Home Group Pension Plan. The Home's contractual commitment is to pay based upon the following:

Four days (pro-rated) of salary per year of service upon retirement if the employee complies with one of the following conditions:

i. has 10 years service and has reached the age 55

ii. qualifies for the "eighty" rule which is calculated by adding the number of years of service to the age of the employee

iii. retires at or after age 65

iv. terminates employment at any time due to permanent disability

The Home undertook an actuarial valuation of the pre-retirement leave benefit for accounting purposes as at March 31, 2009. The significant actuarial assumptions adopted in measuring the Home's accrued retirement entitlements include mortality and withdrawal rates, a discount rate of 6.7% (2008 - 5.5%) and a rate of salary increase of 3.5% (2008 - 3.5%) plus age related merit/promotion scale with no provision for disability.

The amount recorded as a receivable from the Province for pre-retirement costs was initially determined based on the value of the corresponding actuarial liability for pre-retirement costs as at March 31, 2004. Subsequent to March 31, 2004, the Province has included in its ongoing annual funding to the Home, an amount equivalent to the change in the pre-retirement liability, which includes annual interest accretion related to the receivable. The receivable will be paid by the Province when required.

Commencing in 2006/07, the Winnipeg Regional Health Authority assumed responsibility for funding the annual increase in the obligation each year. This amount will also be paid when required and the WRHA holds funding to meet this obligation.

	2009	2008
Employee future benefits recoverable from		
Manitoba Health	$ 372,737	$ 372,737
Winnipeg Regional Health Authority	41,238	93,156
	$ 413,975	$ 465,893

13. Employee Future Benefits (continued)

a) Accrued retirement entitlement (continued)

An analysis of the changes in the employee benefits payable is as follows:

	2009	2008
Balance, beginning of year	$ 465,561	$ 417,016
Net increase (decrease) in pre-retirement entitlements	(51,918)	48,545
Balance, end of year	$ 413,643	$ 465,561

b) Pension plan

Substantially all of the employees of the Home are members of the Healthcare Employees Pension Plan (successor to the Manitoba Health Organization, Inc. Plan (the "Plan")) which is a multi-employer defined benefit pension plan available to all eligible employees of the participating members of the Plan. Plan members will receive benefits based on the length of service and on the average of annualized earnings during the best five years of the last ten years prior to retirement, termination or death, that provides the highest earnings.

Pension assets consist of investment grade securities. Market and credit risk on these securities are managed by the Plan by placing plan assets in trust and through the Plan investment policy.

Pension expense is based on Plan management's best estimates, in consultation with its actuaries, of the amount, combined with the contribution by employees, required to provide a high level of assurance that benefits will be fully represented by fund assets at retirement, as provided by the Plan. The funding objective is for employer contributions to the Plan to remain a constant percentage of employees' contributions.

Variances between actuarial funding estimates and actual experience may be material and any differences are generally to be funded by the participating members. The most recent actuarial valuation of the Plan as at December 31, 2007 indicates the plan is in a deficit; however, it is anticipated that recently implemented increases in contribution rates will correct this deficiency within the allowed timeframe. Contributions to the plan made during the year by the Home on behalf of its employees amounted to $312,855 (2008 - $288,877) and are included in the statement of operations.

14. Funding of Future Employee Benefits

Effective April 1, 2004 Manitoba Health directed all health care facilities (including non-profit personal care homes) to discontinue establishing a receivable from Manitoba Health for the funding of future employee benefits given that the responsibility for payment of same would be transferred to the WRHA. Contrary to the long-standing practice prior to April 1, 2004, the WRHA has since directed all health care facilities to record the future employee benefits liability, but not the corresponding receivable for the fiscal years ending March 31, 2005 and 2006.

For the fiscal years ending March 31, 2007, 2008 and 2009, the WRHA has agreed to fund the change in pre-retirement leave and as such, the receivable has been adjusted to reflect this.

The Home has taken the position that Unfunded Future Employee Benefits (which include Pre-retirement Leave and Vacation Accrual) should be recoverable from the WRHA. For the fiscal year ending March 31, 2009, the unfunded portion of future employee benefits amounts to $23,979.

The Home's position is based on the fact that employee benefits are negotiated centrally by the Labour Relations Secretariat, and the Service Purchase Agreement explicitly states that the level of funding will be commensurate with any settlement agreed to by the Labour Relations Secretariat.

Based on this understanding, the corresponding responsibility for the future funding of the these benefits should be recognized by Manitoba Health to the WRHA and the WRHA to Winnipeg non-profit personal care homes (including Donwood Manor PCH).

15. Capital Management

The Home considers its capital to comprise its Unrestricted Net Assets and net invested in capital assets balances. There have been no changes to what the Home considers to be its capital since the previous period.

As a not-for-profit entity, the Home's operations are reliant on revenues generated annually. The Home has accumulated a deficit over its history, which are included in the unrestricted net assets in the statement of financial position.

The Home is currently endeavouring to eliminate this accumulated deficit and return to a position which would enable it to more adequately fund its working capital requirements.

16. Financial Risk Management

The Home is exposed to different types of risk in the normal course of operations, including credit risk and market risk. The Home's objective in risk management is to optimize the risk return trade-off, within set limits, by applying integrated risk management and control strategies, policies and procedures throughout the Home's activities.

16. Financial Risk Management (continued)

Credit risk

Credit risk is the risk that one party to a financial instrument fails to discharge an obligation and causes financial loss to another party. Financial instruments which potentially subject the Home to credit risk consist principally of accounts receivable.

The Home's maximum exposure to credit risk without taking account of any collateral or other credit enhancements is as follows:

	2009	2008
Accounts receivable	$ 52,980	$ 15,562
Due from WRHA	884,243	333,755
Vacation entitlements receivable	273,191	273,191
Retirement obligations receivable	413,975	465,893
	$ 1,624,389	$ 1,088,401

Accounts receivable: The Home is not exposed to significant credit risk as the receivable is spread among a broad client base and payment in full is typically collected when it is due. The Home establishes an allowance for doubtful accounts that represents its estimate of potential credit losses. The allowance for doubtful accounts is based on management's estimates and assumptions regarding current market conditions, customer analysis and historical payment trends. These factors are considered when determining whether past due accounts are allowed for or written off.

Due from WRHA, vacation entitlements receivable and retirement obligations receivable: The Home is not exposed to significant credit risk as these receivables are from the Province of Manitoba and the regional Health Authority.

Market Risk

Market risk is the risk the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: interest rate risk, foreign exchange risk and other price risk.

Interest rate risk is the risk that the value of a financial instrument will fluctuate due to changes in market interest rates. The Home is not exposed to significant interest rate risk. Its restricted cash is held in short-term or variable rate products and its bank indebtedness is also at variable rates.

The Home is not exposed to significant foreign currency risk as it does not have any financial instruments denominated in foreign currency and the number of transactions in foreign currency are minimal and the Home is not exposed to other price risk.

Fair Value

The carrying values of cash (bank indebtedness), accounts receivable, amounts due from WRHA, vacation entitlements receivable and retirement obligations receivable and accounts payable and accruals approximate their fair value due to the relatively short periods to maturity of these items or because they are receivable or payable on demand.

DONWOOD MANOR PERSONAL CARE HOME INC.

Schedule of Supplementary Information

For the year ended March 31	2009		2008
	Budget	Actual	Actual

AUDITORS' REPORT

To the Member of Foyer Valade Inc.

We have audited the statement of financial position of Foyer Valade Inc. as at March 31, 2009 and the statements of operations and changes in fund balances and cash flows for the year then ended. These financial statements are the responsibility of the Corporation's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of the Corporation as at March 31, 2009 and the results of its operations and its cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

Our audit was made for the purpose of forming an opinion on the basic financial statements taken as a whole. The current year's supplementary information included in the schedule is presented for purposes of additional analysis and is not a required part of the basic financial statements. Such supplementary information has been subjected to auditing procedures applied in the audit of the basic financial statements and, in our opinion, is fairly stated, in all material respects, in relation to the basic financial statements taken as a whole.

Cash, end of year	$ 1,027,857	$ 1,014,315

See accompanying notes to financial statements.

General:

Foyer Valade Inc. (the Corporation) was established January 22, 1976 under the laws of Manitoba as Foyer St. Boniface Inc. - St. Boniface Home Inc. and subsequently changed its name to Foyer Valade Inc. in 1988 to coincide with the relocation of the facility to River Road. The Corporation functions as a long-term care facility mandated by the Provincial government to provide services to the French speaking elderly, chronically ill and disabled.

1. Significant accounting policies:

(a) Revenue recognition:

The Corporation is funded primarily by the Winnipeg Regional Health Authority (WRHA) in accordance with a Service Purchase Agreement. The current Service Purchase Agreement will expire March 31, 2012. Operating grants are recorded as revenue in the period to which they relate.

The Corporation follows the deferral method of accounting for contributions as follows:

Restricted contributions are recognized as revenue of the appropriate fund in the year in which the related expenses are incurred. Contributions restricted for the purchase of capital assets are deferred and amortized into revenue at a rate corresponding with the amortization rate for the related capital assets. Unrestricted contributions are recognized as revenue of the appropriate fund when the amount to be received can be reasonably estimated and collection is reasonably assured.

Unrestricted investment income is recognized in the Operating Fund in the year in which it is earned. Restricted investment income is recognized on an accrual basis and is allocated to the appropriate category in the Internally Restricted Fund.

Volunteers are an integral part of carrying out the activities of the Corporation. These contributed services are not recognized in the financial statements because of the difficulty in determining their fair value.

1. Significant accounting policies (continued):

(b) Operating deficits or surpluses:

In accordance with the terms and conditions of the Service Purchase Agreement, annual operating deficits are the responsibility of the Corporation. Annual operating surpluses less than 2 percent of the net cost of insured services are retained by the Corporation. Those surpluses that are retained by the Corporation are subject to review by the WRHA. Annual operating surpluses in excess of 2 percent of the net cost of insured services are repayable to the WRHA.

(c) Capital assets:

Capital asset purchases are recorded at cost and equipment donations are recorded at fair market value at the time of receipt. Amortization is recorded for the full year in the year of acquisition and no amortization is taken in the year of disposal.

Amortization is calculated using the straight-line method at rates which amortize the assets over their estimated useful lives. The amortization rates are as follows:

Asset	Rate
Building	2% to 2.5%
Equipment and building service equipment	6 ¼% to 20%

(d) Fund accounting:

Assets, liabilities, revenues and expenses related to the Corporation's capital assets are recorded in the Capital Fund.

Assets, liabilities, revenues and expenses related to the Corporation's ancillary activities are recorded in Ancillary Operations Fund.

The Internally Restricted Fund represents funds received through donations, interest and retainable surpluses from operations. Certain expenditures from the fund require the approval of the Member of the Corporation, while the remaining expenditures require only the approval of the Board of Directors.

All other assets, liabilities, revenues and expenses are recorded in the Operating Fund.

1. Significant accounting policies (continued):

(e) Financial instruments:

Initially, all financial assets and liabilities must be recorded on the statement of financial position at fair value. Subsequent measurement is determined by the classification of each financial asset and liability. Financial assets and liabilities held-for-trading are measured at fair value with gains and losses recognized in excess (deficiency) of revenue over expenses. Financial instruments classified as held-to-maturity, loans and receivables and other liabilities are measured at amortized cost. Available-for-sale financial instruments are measured at fair value, with unrealized gains and losses recognized directly in fund balances.

The Corporation designated cash and bank indebtedness as held-for-trading, accounts receivable, receivable from Winnipeg Regional Health Authority, employee benefits and future employee pre-retirement benefits recoverable from the Winnipeg Regional Health Authority as loans and receivables; other assets as available-for-sale; and advances from Winnipeg Regional Health Authority, accounts payable, accrued liabilities and bank loan as other liabilities. The Corporation does not have held-to-maturity or available-for-sale financial instruments.

Except for held-for-trading designated financial instruments, transaction costs that are directly attributable to the acquisition or issuance of financial assets or liabilities are accounted for as part of the respective asset or liability's carrying value at inception and amortized over the expected life of the financial instrument using the effective interest method. For held-for-trading financial assets and liabilities, transaction costs are recorded in the statement of operations as incurred.

(f) Inventory:

Inventory is valued at the lower of cost and net realizable value.

(g) Employee benefits:

The Corporation records a provision for employee benefits comprised of accrued vacation. A further provision for future employee pre-retirement benefits, being an actuarial estimate of the Corporation's obligation to make a cash payment to certain qualifying employees based on years of service upon retirement, has also been recorded. Funding for portions of these obligations remains outstanding as disclosed in note 4.

The cost of the Corporation's employee pre-retirement benefits is accrued as earned based on an actuarial estimation.

1. Significant accounting policies (continued):

The estimation of the future pre-retirement benefits has been performed using the projected unit credit service pro-rated on service actuarial cost method. The significant actuarial assumptions adopted in measuring the Corporation's future employee benefit payable include mortality and withdrawal rates, a discount rate of 6.70 percent (2008 - 5.50 percent), a rate of salary increase of 3.50 percent (2008 - 3.50 percent) plus an age-related merit/promotion scale with no provision for disability.

(h) Income taxes:

The Corporation is a registered charity within the meaning of the *Income Tax Act* and therefore is exempt from income taxes under Section 149(1) of the Act.

(i) Use of estimates:

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the year. Actual results could differ from those estimates.

2. Receivable from (payable to) Winnipeg Regional Health Authority:

	2009	2008
Receivable:		
Prior years	$ 42,159	$ 114,990
Salaries and benefits	291,122	245,023
Employee pre-retirement benefits	29,656	34,582
Other	81,226	6,989
	444,163	401,584
Payable:		
Prior years	116,710	105,108
Resident charges	87,746	92,903
Interest	1,449	476
	205,905	198,487
	238,258	203,097
Current future employee pre-retirement benefits recoverable (note 4)	-	469
Net receivable	$ 238,258	$ 203,566

2. Receivable from (payable to) Winnipeg Regional Health Authority (continued):

Over/under funding occurs when non-global items (including resident charges revenue and interest expense) are over/under the amounts budgeted by the Winnipeg Regional Health Authority. Over/under funded amounts are payable to/receivable from the Winnipeg Regional Health Authority.

3. Capital assets:

			2009	2008
	Cost	Accumulated amortization	Net book value	Net book value
Building	$ 13,317,539	$ 3,502,420	$ 9,815,119	$ 10,110,438
Building service equipment	117,635	31,869	85,766	83,871
Equipment	1,676,565	1,259,236	417,329	411,026
Software licenses and fees	86,209	86,209	-	-
	$ 15,197,948	$ 4,879,734	$ 10,318,214	$ 10,605,335

4. Employee benefits:

(i) The Corporation maintains an employee pre-retirement benefit plan for substantially all of its employees. The plan provides benefit payments to eligible retirees based on length of service and on career earnings from initial eligibility.

At March 31, 2009, based on an actuarial estimate, the pre-retirement benefit plan's obligations are estimated to be approximately $456,528 (2008 - $434,088) for which the Corporation has provided an accrued future employee pre-retirement benefits liability on the statement of financial position.

The amount of funding which will be provided by the WRHA for pre-retirement benefits was initially determined based on the pre-retirement liability at March 31, 2004, and was recorded as a long-term receivable on the statement of financial position.

The recoverable has been adjusted, based on direction from WRHA, to include the incremental increases in the related liability since 2007, which includes an interest component. The increase recorded in fiscal 2009 was $22,440 (2008 - $6,998) and is recorded in the statement of operations.

4. Employee benefits (continued):

In addition, during 2007, the WRHA approved partial funding of the incremental increases in the future employee pre-retirement benefits liability for fiscal 2005 and 2006 of $469. This amount also included an interest component, and was received in fiscal 2009.

The future employee pre-retirement benefits recoverable from WRHA at March 31, 2009 aggregates $455,741 (2008 - $433,301) and has no specified terms of repayment.

Prior to 2004, Manitoba Health funded 100 percent of actual pre-retirement benefits paid over and above the operating grant provided to the Corporation. Beginning April 1, 2005, the WRHA established a policy of providing additional funding for approximately 70 percent of actual pre-retirement benefits paid. Actual additional funding provided by the WRHA for 2009 was 65.1 percent (2008 - 64.25 percent) of actual pre-retirement benefits paid. The shortfall for 2009 of $15,898 (2008 - $19,242) was paid from funding received for operations.

(ii) The cost of the Corporation's vacation benefits is accrued when the benefits are earned by the employees and is included in accrued liabilities on the statement of financial position. The vacation benefits liability at March 31, 2009 is $364,173 (2008 - $349,958).

The funding received in each subsequent fiscal year from the Winnipeg Regional Health Authority includes the employee benefits recoverable of $288,336 as included on the statement of financial position. The employee benefits recoverable from Winnipeg Regional Health Authority are maintained at the value of the vacation benefits liability at March 31, 2004.

5. Residents' funds in trust:

Residents' funds in trust represents monies held in trust for the residents in the name of the Corporation and generally do not exceed $400 per resident.

6. Bank indebtedness:

At March 31, 2009, the Corporation had an authorized line of credit of $200,000 which was used to finance a portion of the Corporation's contribution towards the 38 bed addition. The line of credit bears interest at the bank's prime rate less 0.25 percent per annum. Interest is payable monthly in arrears and the principal is payable on demand. Les Amis de Valade Inc., a corporation with the same Member of the Corporation, has also provided a guarantee as security for this loan.

The Corporation has an additional $100,000 authorized line of credit available with no outstanding borrowings.

7. Bank loan:

The bank loan is held by La Caisse Populaire de Saint-Boniface Limitée, is repayable on demand, is supported by a borrowing resolution of the Board of Directors together with borrowing approval from the WRHA, and bears interest at the Caisse Populaire's prime lending rate minus 0.50 percent. The loan is being repaid at $1,740 monthly, plus interest.

8. Advances from Winnipeg Regional Health Authority:

During the fiscal year the Corporation received funding advances from the Winnipeg Regional Health Authority in the amounts of $44,831 and $50,562 for funding commitments relating to the 2007/08 and 2008/09 fiscal years. These advances are unsecured, non-interest bearing and have no fixed terms of repayment. In fiscal 2009, the advances owing at March 31, 2008 of $217,667 were offset against related receivables from the Winnipeg Regional Health Authority.

9. Deferred contributions:

(a) Expenses of future periods:

Deferred contributions related to expenses of future periods represent unspent externally restricted grants and donations for separate programs.

	2009	2008
Balance, beginning of year	$ 3,069	$ 2,712
Add amount received related to future periods	2,422	2,647
Less amount recognized as revenue in the year	(2,073)	(2,290)
	$ 3,418	$ 3,069

(b) Capital assets:

Deferred capital contributions related to capital assets represent the unamortized amount and unspent amount of donations, grants and pledges received or receivable for the purchase of capital assets. The amortization of these contributions is recorded as revenue in the statement of operations.

	2009	2008
Balance, beginning of year	$ 10,203,634	$ 10,473,175
Add contributions received	126,791	90,546
Less amounts amortized to revenue	(364,169)	(360,087)
	$ 9,966,256	$ 10,203,634

9. Deferred contributions (continued):

On February 28, 2007, the Province of Manitoba approved the consolidation of $5,200,000 of the Corporation's borrowings with its Department of Finance. The advance has been recorded as a deferred contribution.

The advance received is governed by a promissory note payable to the Province of Manitoba which bears interest at 5.1 percent and required monthly principal payments of $21,667 plus interest. At March 31, 2009, the outstanding principal balance on the note was $4,658,334 (2008' - $4,918,330). No further funding is expected to be received with respect to this obligation and no revenue or expense is recorded in connection with its extinguishment, except for the amortization of the deferred contribution.

The balance of unamortized capital contributions related to capital assets consists of the following:

	2009	2008
Unamortized capital contributions used to purchase assets	$ 9,823,742	$ 10,092,070
Unspent contributions:		
Equipment reserve	110,958	84,008
Major repairs	31,556	27,556
	$ 9,966,256	$ 10,203,634

10. Capital fund:

	2009	2008
Capital assets	$ 10,318,214	$ 10,605,335
Amount financed by:		
Deferred contributions	(9,823,742)	(10,092,070)
Bank loan	(165,173)	(186,053)
Line of credit	(173,594)	(183,608)
	$ 155,705	$ 143,604

11. Internally restricted fund:

	2009	2008
To be expended only with the approval of the Member of the Corporation	$ 481,741	$ 368,057
Other internal projects	38,603	38,082
	$ 520,344	$ 406,139

12. Related party transactions:

Foundation:

An amount of $10,000 (2008 - $10,000) was funded by Les Amis de Valade Inc., a corporation with the same Member of the Corporation. In fiscal 2009 and 2008, these amounts were used to repay bank indebtedness.

Shared and contributed services:

The Corporation and Centre Taché Centre, a corporation with the same Board of Directors and Member of the Corporation, have an agreement to share the cost of specific employee services based on the time spent on each entity. The Corporation provided services to Centre Taché Centre in the amount of $210,629 (2008 - $213,540). The Corporation purchased services from Centre Taché Centre in the amount of $238,893 (2008 - $287,382) which is included in salaries and wages.

In addition to these shared services, Centre Taché Centre contributed services to the Corporation in the amount of $70,846 (2008 - $22,920) free of charge.

These transactions are in the normal course of operations and are measured at the exchange amount which is the amount of consideration established and agreed to by the related parties.

13. Employee pension plan:

During the year, the Corporation contributed $317,041 (2008 - $295,922) on behalf of its employees. Eligible employees of the Corporation are members of the Healthcare Employees Pension Plan - Manitoba, a multi-employer defined benefit pension plan. As individual entities within the plan are not able to identify their share of the underlying assets and liabilities, the Corporation is accounting for the plan as a defined contribution plan. The cost of the plan is recognized based on the contributions required to be made during each period.

The most recent actuarial valuation of the plan as at December 31, 2007 indicated a solvency deficiency of $61,050,000 that will be funded over five years commencing calendar 2008 out of current contributions in each respective year. A change in underlying actuarial assumptions could cause a change in the actuarial value of accrued pension benefits and required service contributions. Contribution rates were increased on July 1, 2007 to 6.8 percent of pensionable earnings up to the yearly maximum pensionable earnings limit (YMPE) and 8.4 percent on earnings in excess of the YMPE. No rate changes have been issued since.

---

14. Fair value:

The fair values of accounts receivable, receivable from Winnipeg Regional Health Authority, employee benefits recoverable from Winnipeg Regional Health Authority, accounts payable, accrued liabilities, advances from Winnipeg Regional Health Authority and bank loan approximate their carrying value due to their immediate or short-term nature.

The fair value of the future employee pre-retirement benefits recoverable from the Winnipeg Regional Health Authority approximates its carrying value as the interest component is comparable to current market rates.

15. Leasehold estate:

The facility is situated on property leased from Despins Charities Inc., a corporation with the same Member of the Corporation, at a rental of $1 per annum. The sixty year lease expires June 30, 2046. The land is held as a leasehold estate registered under *The Real Property Act* in the Winnipeg Land Titles Office. At the termination of the lease, the title to the land reverts to the lessor. No economic value of this lease is reflected in the financial statements.

16. Future accounting changes:

The Canadian Institute of Chartered Accountants (CICA) issued the following accounting standards that will come into effect for the Corporation's next fiscal year. The Corporation is in the process of determining the impact that these standards will have on its financial reporting.

CICA Section 3862, Financial Instruments - Disclosures and Section 3863, Financial Instruments - Presentation were to replace the existing Section 3861, Financial Instruments - Disclosure and Presentation, effective April 1, 2009 for the corporation. These new sections revise and enhance disclosure requirements, and carry forward, unchanged, existing presentation requirements. These new sections place increased emphasis on disclosures about the nature and extent of risks arising from financial instruments and how the entity manages those risks. However, the CICA subsequently amended these sections to eliminate the requirement for not-for-profit entities to adopt these sections. Not-for-profit entities are permitted to continue to apply Section 3861 in place of Section 3862 and 3863. An entity that does so must disclose the fact.

---

16. Future accounting changes (continued):

In September 2008, a number of standards applicable to not-for-profit organizations were amended and new Section 4470, *Disclosures of Allocated Expenses by Not-for-Profit Organizations,* was issued. The new Section 4470 requires entities that make allocations of general support and fundraising costs to other functions to disclose the policies adopted for the allocation of expenses among functions, the nature of the expenses being allocated, the basis on which such allocations have been made, and the functions to which they have been allocated. In addition, the amendments to the not-for-profit organization standards include clarification of when revenues and expenses are to be reported on a gross basis; clarification of the treatment of internal and external restriction on net assets; and improved guidance related to application of GAAP hierarchy, capital asset standards and statement of cash flows. The Corporation will adopt these standards on April 1, 2009.

17. Comparative figures:

Certain comparative figures have been reclassified to conform with the financial statement presentation adopted in the current year.

AUDITORS' REPORT

To the Board of Directors of Fred Douglas Society Inc.

We have audited the statement of financial position of Fred Douglas Personal Care Home, a Division of Fred Douglas Society Inc., as at March 31, 2009 and the statements of operations, changes in net assets and cash flows for the year then ended. These financial statements are the responsibility of the Division's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of the Division as at March 31, 2009 and the results of its operations and its cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

Our audit was made for the purpose of forming an opinion on the basic financial statements taken as a whole. The current year's supplementary information included in the schedule is presented for purposes of additional analysis and is not a required part of the basic financial statements. Such supplementary information has been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, is fairly stated, in all material respects, in relation to the basic financial statements taken as a whole.

See accompanying notes to financial statements.

General:

Fred Douglas Personal Care Home, a Division of Fred Douglas Society Inc. (the Division) operates a 136-bed personal care home and 90-space adult day program in Winnipeg, Manitoba. Fred Douglas Society Inc. is an outreach ministry of the United Church of Canada.

The information contained in these financial statements is the property of Fred Douglas Society Inc. and may not be combined, consolidated or in any way modified without the explicit written authorization of the Chief Executive Officer of Fred Douglas Society Inc.

1. Significant accounting policies:

(a) Basis of presentation:

These financial statements include only the assets, liabilities, operations and net assets of the Division. These financial statements have been prepared solely for the purposes of management. As these financial statements have not been prepared for general purposes, readers may require further information. Non-consolidated financial statements of Fred Douglas Society Inc. have been prepared for distribution to the Board of Directors.

(b) Revenue recognition:

The Division follows the deferral method of accounting for contributions, which includes government funding.

The Division is funded primarily by the Winnipeg Regional Health Authority (WRHA) in accordance with a Service Purchase Agreement. Operating grants are recorded as revenue in the period to which they relate. The Division's Service Purchase Agreement with the WRHA will expire March 31, 2012.

Unrestricted contributions are recognized as revenue when received or receivable if the amount to be received can be reasonably estimated and collection is reasonably assured.

Externally restricted contributions are recognized as revenue in the year in which the related expenses are recognized. Contributions restricted for the purchase of capital assets are deferred and amortized into revenue on a straight-line basis at a rate corresponding with the amortization rate for the related capital assets.

Investment income includes interest income and realized and unrealized investment gains and losses.

1. Significant accounting policies (continued):

(c) Operating deficits or surpluses:

In accordance with the terms and conditions of the Service Purchase Agreement, annual operating deficits of the Division are the responsibility of Fred Douglas Society Inc. (the "Society"). Any operating surpluses of the Division are subject to review by the WRHA. The surplus the Society may retain is the greater of 50 percent of the Division's operating surplus and 2 percent of the Division's global budget as provided by the WRHA, in any fiscal year. The remaining operating surplus in any fiscal year is repayable to the WRHA.

(d) Financial instruments:

Initially, all financial assets and liabilities must be recorded on the statement of financial position at fair value. Subsequent measurement is determined by the classification of each financial asset and liability. Financial assets and liabilities held-for-trading are measured at fair value with gains and losses recognized in excess (deficiency) of revenue over expenses. Financial instruments classified as held-to-maturity, loans and receivables and other liabilities are measured at amortized cost. Available-for-sale financial instruments are measured at fair value, with unrealized gains and losses recognized directly in net asset balances.

The Division designates cash, bank indebtedness, short-term investments and investments as held-for-trading; accounts receivable, employee benefits recoverable from Winnipeg Regional Health Authority, receivable from related entities and future employee pre-retirement benefits recoverable from Winnipeg Regional Health Authority as loans and receivables; and accounts payable and accrued liabilities, payable to Winnipeg Regional Health Authority, payable to residents and long-term debt as other liabilities. The Division has neither available-for-sale nor held-to-maturity instruments.

Fair value of investments is based on period end quoted market prices. The change in the difference between the fair value and the cost of investments at the beginning and end of each year is reflected in investment income in the statement of operations.

Investments of the Division are pooled with the investments from Fred Douglas Apartments, a Division of Fred Douglas Society Inc. The income on the investments is allocated to each division in proportion to the respective amounts invested by each division throughout the year.

1. Significant accounting policies (continued):

Except for held-for-trading designated financial instruments, transaction costs that are directly attributable to the acquisition or issuance of financial assets or liabilities are accounted for as part of the respective asset or liability's carrying value at inception and amortized over the expected life of the financial instrument using the effective interest method. For held-for-trading financial assets and liabilities, transaction costs are recorded in the statement of operations as incurred.

(e) Capital assets:

Purchased capital assets are recorded at cost. Contributed capital assets are recorded at fair value at the date of contribution. Repairs and maintenance costs are charged to expense. Betterments which extend the estimated life of an asset are capitalized. When a capital asset no longer contributes to the Division's ability to provide services, its carrying amount is written down to its residual value. Amortization is provided on a straight-line basis at the following rates:

Asset	Rate
Buildings	40 years
Furniture and equipment	5 to 10 years

(f) Future employee pre-retirement benefits payable:

The cost of the Division's employee pre-retirement benefits payable is accrued as earned based on an actuarial estimation. The estimation of future pre-retirement benefits has been performed using the projected unit credit service pro-rated on service actuarial cost method.

The significant actuarial assumptions adopted in measuring the Division's future employee pre-retirement benefits payable include mortality and withdrawal rates, a discount rate of 6.7 percent (2008 – 5.5 percent), a rate of salary increase of 3.5 percent (2008 - 3.5 percent) plus an age-related merit/promotion scale with no provision for disability.

(g) Contributed services:

A substantial number of volunteers contribute a significant amount of their time each year. Because of the difficulty of determining the fair value, contributed services are not recognized in the financial statements.

1. Significant accounting policies (continued):

(h) Income taxes:

Fred Douglas Society Inc. is exempt from tax under Section 149 of the *Income Tax Act.*

(i) Use of estimates:

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the year. Actual results could differ from those estimates.

2. Future accounting changes:

The Canadian Institute of Chartered Accountants (CICA) issued the following accounting standards that will come into effect for the Division's next fiscal year. The Division is in the process of determining the impact that these standards will have on its financial reporting.

CICA Section 3862, *Financial Instruments - Disclosures* and Section 3863, *Financial Instruments - Presentation* were to replace the existing Section 3861, *Financial Instruments - Disclosure and Presentation*, effective April 1, 2009 for the Division. These new sections revise and enhance disclosure requirements, and carry forward, unchanged, existing presentation requirements. These new sections place increased emphasis on disclosures about the nature and extent of risks arising from financial instruments and how the entity manages those risks. However, the CICA subsequently amended these sections to eliminate the requirement for not-for-profit entities to adopt these sections. Not-for-profit entities are permitted to continue to apply Section 3861 in place of Section 3862 and 3863. An entity that does so must disclose the fact.

In September 2008, a number of standards applicable to not-for-profit organizations were amended and new Section 4470, *Disclosures of Allocated Expenses by Not-for-Profit Organizations,* was issued. The new Section 4470 requires entities that make allocations of general support and fundraising costs to other functions to disclose the policies adopted for the allocation of expenses among functions, the nature of the expenses being allocated, the basis on which such allocations have been made, and the functions to which they have been allocated. In addition, the amendments to the not-for-profit organization standards include clarification of when revenues and expenses are to be reported on a gross basis; clarification of the treatment of internal and external restriction on net assets; and improved guidance related to application of GAAP hierarchy, capital asset standards and statement of cash flows. The Division will adopt these standards on April 1, 2009.

3. Cash (bank indebtedness):

	2009	2008
Unrestricted:		
Bank indebtedness	$ (297,623)	$ –
Cash	–	85,779
	(297,623)	85,779
Restricted cash	43,449	111,616
	$ (254,174)	$ 197,395

Restricted cash, along with restricted investments disclosed in note 5, represents cash held for deferred contributions related to donations, expenses of future periods, equipment reserve and reserve for major repairs as well as cash held in trust for residents.

The Division has a demand revolving credit facility with a maximum limit of $500,000. The operating credit line bears interest at prime rate. The facility is secured the same as disclosed in note 8 on the demand term loans. At March 31, 2009, the Division has utilized $118,200 (2008 - nil) of their facility.

4. Accounts receivable:

	2009	2008
Accounts receivable	$ 8,458	$ 10,531
Receivable from Winnipeg Regional Health Authority:		
Pre-retirement leave	121,794	106,157
MNU contract increases	214,959	40,682
MGEU contract increases	–	276,289
Hours of care increase	182,967	–
Other	18,091	47,615
Resident charges	(77,418)	(76,765)
	$ 468,851	$ 404,509

5. Investments:

	2009		2008	
	Average effective yield	Carrying value	Average effective yield	Carrying value
Government investment certificates	4.43%	$ 239,488	–	$ –
Money market fund		62,189		145,281
Canadian bonds	–	–	3.70%	69,179
		301,677		214,460
Current portion, shown as short-term investments		110,086		214,460
		$ 191,591		$ –

The government investment certificates mature in five equal installments during fiscal years 2010 to 2014.

The allocation of investments between unrestricted and restricted is as follows:

	2009	2008
Unrestricted investments	$ 128,733	$ 54,829
Restricted investments	172,944	159,631
	$ 301,677	$ 214,460

6. Receivable from related entities:

The receivable from related entities is as follows:

	2009	2008
Fred Douglas Heritage House Inc.:		
Advances receivable, net of allowance of $78,743 (2008 - $78,743)	$ 86,461	$ 134,756
Demand debenture receivable	263,419	358,506
Fred Douglas Foundation, Inc.	14,459	21,767
Fred Douglas Apartments	9,983	14,385
Fred Douglas Residence	206,197	204,363
	580,519	733,777
Current portion of demand debenture receivable	85,000	85,000
	$ 495,519	$ 648,777

6. Receivable from related entities (continued):

Fred Douglas Heritage House Inc. is an organization controlled by Fred Douglas Society Inc.. The advances receivable from Fred Douglas Heritage House Inc. bear interest at prime rate and are repayable out of available working capital. The advances are secured by the same security as disclosed for the demand debenture receivable. Interest charged on the advances during the year was $8,141 (2008 - $12,311).

The demand debenture receivable from Fred Douglas Heritage House Inc. is due on demand, bears interest at prime rate, requires monthly principal and interest payments of $7,600 and is secured by a second mortgage on the leasehold interests of Fred Douglas Heritage House Inc.. During the year, the Division charged interest of $13,881 (2008 - $24,868) on the demand debenture receivable. The Division has waived its right to demand repayment of the advances receivable and $178,419 of the demand debenture receivable prior to April 1, 2010.

Fred Douglas Foundation, Inc. is an organization over which Fred Douglas Society Inc. exercises significant influence. Fred Douglas Apartments and Fred Douglas Residence are divisions of Fred Douglas Society Inc.. The receivable from these entities are non-interest bearing, with no fixed terms of repayment and are unsecured.

7. Capital assets:

			2009	2008
	Cost	Accumulated amortization	Net book value	Net book value
Land	$ 17,137	$ –	$ 17,137	$ 17,137
Buildings	9,535,675	5,484,226	4,051,449	4,192,952
Furniture and equipment	1,595,530	1,322,777	272,753	236,861
	$ 11,148,342	$ 6,807,003	$ 4,341,339	$ 4,446,950

8. Long-term debt:

	2009	2008
7.75% mortgage, Canada Mortgage and Housing Corporation, payable $3,095 monthly including principal and interest, secured by a mortgage against the property located at 1275 Burrows Avenue, maturing October 1, 2022	$ 313,543	$ 326,234
Royal Bank of Canada demand term loan, interest at bank prime, payable $7,600 monthly including principal and interest, maturing September 30, 2009	263,419	358,506
	576,962	684,740
Current portion of long-term debt	277,112	371,196
	$ 299,850	$ 313,544

The demand term loans are secured by a general security agreement and a second charge collateral mortgage against the property located at 1275 Burrows Avenue.

Principal due over the next five years and thereafter is as follows:

2010	$ 277,112
2011	14,775
2012	15,942
2013	17,201
2014	18,550
Thereafter	233,382

9. Deferred contributions:

(a) Donations:

Deferred contributions related to donations represent restricted funding received for specific improvement projects and enhancements to resident living.

	2009	2008
Balance, beginning of year	$ 7,516	$ 4,497
Contributions received	7,755	4,207
Amounts recognized as revenue in the year	(3,727)	(1,188)
Balance, end of year	$ 11,544	$ 7,516

(b) Expenses of future periods:

Deferred contributions related to expenses of future periods represent restricted funding received for future expenses related to insurance deductibles and claims.

	2009	2008
Balance, beginning of year	$ 9,320	$ 7,832
Contributions received	1,488	1,488
Amounts recognized as revenue in the year	(244)	–
Balance, end of year	$ 10,564	$ 9,320

(c) Capital assets:

Deferred contributions related to capital assets represent the unamortized amount of grants and other contributions received for the purchase of capital assets.

	2009	2008
Balance, beginning of year	$ 3,360,843	$ 3,528,679
Transfer from deferred contributions - equipment reserve	53,288	24,516
Contributions received	46,896	39,116
Amounts amortized to revenue in the year	(177,361)	(231,468)
Balance, end of year	$ 3,283,666	$ 3,360,843

9. Deferred contributions (continued):

(d) Equipment reserve:

Deferred contributions related to equipment reserve represent unspent contributions for the future purchase of capital assets. When the capital assets are purchased, an equivalent amount is transferred from this reserve to the deferred contributions related to capital assets.

	2009	2008
Balance, beginning of year	$ 52,031	$ 52,747
Contributions received	23,800	23,800
Transfer to deferred contributions - capital assets	(53,288)	(24,516)
Balance, end of year	$ 22,543	$ 52,031

(e) Reserve for major repairs:

Deferred contributions related to reserve for major repairs represent restricted funding received for the future purchase of equipment replacement and major repairs.

	2009	2008
Balance, beginning of year	$ 184,159	$ 240,631
Contributions received	50,784	50,784
Amounts amortized to revenue in the year	(84,010)	(107,256)
Balance, end of year	$ 150,933	$ 184,159

10. Invested in capital assets:

Invested in capital assets is calculated as follows:

	2009	2008
Capital assets	$ 4,341,339	$ 4,446,950
Deferred contributions	(3,283,666)	(3,360,843)
Long-term debt	(313,543)	(326,234)
	$ 744,130	$ 759,873

11. Related party transactions:

During the year, the Division charged nil (2008 - $10,000) as a management fee to Fred Douglas Apartments, a Division of Fred Douglas Society Inc.. During the year, the Division also charged a service fee of nil (2008 - $3,000) to Fred Douglas Heritage House Inc..

During the year, the Division charged nil (2008 - $1,694) in food service costs to Fred Douglas Residence, a Division of Fred Douglas Society Inc..

During the year, the Division received $8,377 (2008 - $1,909) in funding for improvements and resident services, and $5,995 (2008 - $8,444) in funding for capital assets from Fred Douglas Foundation, Inc..

These transactions are in the normal course of operations and are measured at the exchange amount which is the amount of consideration established and agreed to by the related parties.

12. Future employee benefits and employee benefits:

(i) The Division maintains an employee pre-retirement benefit plan for substantially all of its employees. The plan provides benefit payments to eligible retirees based on length of service and on career earnings from initial eligibility.

At March 31, 2009 based on an actuarial estimate, the pre-retirement benefit plan's obligations are estimated to be approximately $538,995 (2008 - $550,207) for which the Division has provided an accrued future employee pre-retirement benefits liability on the statement of financial position.

The amount of funding which will be provided by the WRHA for pre-retirement benefits was initially determined based on the pre-retirement liability at March 31, 2004, and was recorded as a long-term receivable on the statement of financial position. The recoverable has been adjusted, based on direction from WRHA, to include the incremental increases or decreases in the related liability for fiscal years 2007-2009, which includes an interest component. The decrease recorded in fiscal 2009 was $11,212 (2008 - increase of $75,941) and is recorded in the statement of operations.

The future employee pre-retirement benefits recoverable from WRHA at March 31, 2009 aggregates $565,977 (2008 - $577,189) and has no specified terms of repayment.

12. Future employee benefits and employee benefits (continued):

Prior to 2004, Manitoba Health funded 100 percent of actual pre-retirement benefits paid over and above the operating grant provided to the Division. Beginning April 1, 2005, the WRHA established a policy of providing additional funding for approximately 70 percent of actual pre-retirement benefits paid. Actual additional funding provided by WRHA for 2009 was 65.1 percent (2008 - 64.25 percent) of actual pre-retirement benefits paid. The shortfall for 2009 of $8,383 (2008 - $15,611) was paid from funding received for operations.

In summary, information about the Division's employee pre-retirement benefit plan is as follows:

		2009		2008
Net benefit cost expensed in statement of operations:				
Benefits paid	$	24,020	$	43,666
Future employee pre-retirement benefits		(11,212)		75,941
WRHA additional funding for pre-retirement benefits paid		15,637		28,055
WRHA funding for change in pre-retirement benefits payable		(11,212)		75,941
Future employee pre-retirement benefits payable		538,995		550,207

(ii) All eligible employees of the Division are members of the Healthcare Employees Pension Plan - Manitoba, a multi-employer defined benefit pension plan. As individual entities within the plan are not able to identify their share of the underlying assets and liabilities, the Division is accounting for the plan as a defined contribution plan. The cost of the plan is recognized based on the contributions required to be made during each period.

During the year, the Division contributed $339,894 (2008 - $312,229) on behalf of its employees. The most recent actuarial valuation of the plan as at December 31, 2007 indicated a solvency deficiency of $61,050,000 that will be funded over five years commencing calendar 2008 out of current contributions in each respective year. A change in underlying actuarial assumptions could cause a change in the actuarial value of accrued pension benefits and required service contributions. Contribution rates were increased on July 1, 2007 to 6.8 percent of pensionable earnings up to the yearly maximum pensionable earnings limit (YMPE) and 8.4 percent on earnings in excess of the YMPE. No rates changes have been issued since.

12. Future employee benefits and employee benefits (continued):

(iii) The cost of the Division's vacation benefits is accrued when the benefits are earned by the employees and is included in accounts payable and accrued liabilities on the statement of financial position. The vacation benefits liability at March 31, 2009 is $426,345 (2008 - $396,098).

The funding received in each subsequent fiscal year from the Winnipeg Regional Health Authority includes the employee benefits recoverable of $355,603 as included on the statement of financial position. The employee benefits recoverable from Winnipeg Regional Health Authority is maintained at the value of the vacation benefits liability at March 31, 2004.

13. Commitment:

On April 1, 2009, the Division entered into a service purchase agreement for transportation service for the adult day program for a three year period, with an option to extend for one additional year. The annual service costs under this agreement are approximately $100,000.

14. Fair value:

The fair value of accounts receivable, employee benefits recoverable from Winnipeg Regional Health Authority, accounts payable and accrued liabilities, payable to Winnipeg Regional Health Authority and payable to residents approximate their carrying value due to the short term nature of these instruments.

The fair value of long-term debt is approximately $562,000 (2008 – $730,000) compared to its carrying value of $576,962 (2008 - $684,740). Fair value of long-term debt has been determined using future payments of principal and interest of the actual outstanding long-term debt discounted at current interest rates available to the Division.

The fair value of the future employee pre-retirement benefits recoverable from Winnipeg Regional Health Authority approximates its carrying value as the interest component is comparable to current market rates.

The fair value of the receivable from related entities is not practical to determine due to its underlying terms and conditions.

FRED DOUGLAS PERSONAL CARE HOME

A DIVISION OF FRED DOUGLAS SOCIETY INC.

Schedule - Operating Expenses

Year ended March 31, 2009, with comparative figures for 2008

	2009	2008
Nursing services:		
Medical supplies and services	$ 41,079	$ 28,224

AUDITORS' REPORT

To the Advisory Board
Holy Family Home Inc. Revenue Fund and
Sisters Servants of Mary Immaculate Plant Fund

We have audited the statement of financial position of Holy Family Home Inc. Revenue Fund and Sisters Servants of Mary Immaculate Plant Fund as at March 31, 2009 and the statements of operations, changes in net assets and cash flow for the year then ended. These financial statements are the responsibility of the organization's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of Holy Family Home Inc. Revenue Fund and Sisters Servants of Mary Immaculate Plant Fund as at March 31, 2009 and the results of their operations, changes in net assets and cash flow for the year then ended in accordance with Canadian generally accepted accounting principles.

HOLY FAMILY HOME INC. REVENUE FUND
AND
SISTERS SERVANTS OF MARY IMMACULATE PLANT FUND
NOTES TO FINANCIAL STATEMENTS
YEAR ENDED MARCH 31, 2009

1. ACCOUNTING ENTITY

Holy Family Nursing Home was incorporated by a Special Act of the Province of Manitoba on May 6, 1963 and during the current fiscal year, the Home incorporated Holy Family Home, Inc. (HFH) as an operating name. HFH is sponsored, owned and operated by the Ukrainian Catholic Congregation of Sisters Servants of Mary Immaculate (SSMI). HFH is a not-for-profit organization and is exempt from income tax under the Income Tax Act. The purpose of HFH is to operate as a personal care home for the elderly and infirm which provides a high level of physical, spiritual and cultural care for the 276 residents of HFH within the motto of the Sisters "To Serve is to Love".

2. SIGNIFICANT ACCOUNTING POLICIES

a) Winnipeg Regional Health Authority Funding

HFH is funded by the Winnipeg Regional Health Authority (WRHA) under the provisions of the Health Services Insurance Act, the Regional Health Authority Act and a purchased services agreement for the total of its approved budgeted expenses.

HFH is funded by the WRHA under the global budget concept and any in-globe deficit is not recoverable from Manitoba Health and any in-globe surplus in excess of 2% of the net in-globe approved costs is refundable to Manitoba Health. All deficits and surpluses on out-of-globe expenses are subject to year end review and payment or reimbursement to the WRHA at year end. HFH records all amounts recoverable or repayable at year end, subject to the WRHA audit, as due from or due to WRHA and as Revenue Fund Unrestricted Fund surplus or deficit.

The WRHA performs a final review of HFH's audited financial statements to finalize the amounts of any retainable surplus or recoverable deficit, at which time any adjustments determined are booked by HFH. All adjusted retainable surplus, net of deficits are then transferred from the Revenue Fund Unrestricted Fund to the Plant Fund Unrestricted Fund owned by the SSMI. The WRHA has completed their reviews of HFH's audited financial statements up to and including March 31, 2004.

b) Purpose of Funds

The Revenue Fund accounts for the funded operations of HFH. The Plant Fund, which is owned and operated by SSMI, records the capital assets less the related debt and the equity belonging to SSMI.

The Externally Restricted Fund Balances represent unspent balances of amounts funded for future expenditures. Reserves for Major Building Repairs and the Amortization Fund are maintained as separately funded accounts and are utilized upon prior approval by the WRHA.

The Unrestricted Fund Balances represent the accumulated equity of HFH and SSMI.

c) Capital Assets

Capital assets, owned and accounted for by SSMI in the Plant Fund, are recorded at cost. All minor equipment costing less than $2,000 is charged to expense under directive by the WRHA.

Equipment is amortized over its estimated useful life on a straight-line basis over 5, 10 and 15 years.

Buildings are amortized over their estimated useful life on a straight-line basis over 50 years.

d) Deferred Capital Contributions

Contributions received for the purchase and funding of capital assets are deferred and amortized into revenue on a straight-line basis at a rate corresponding with the amortization rate for the related capital asset.

2. SIGNIFICANT ACCOUNTING POLICIES (Continued)

e) Contributed Services and Donated Materials

Contributed services and donated materials are not recognized in the financial statements.

f) Revenue Recognition

HFH follows the deferral method in accounting for contributions. Restricted contributions are recognized as revenue in the year in which related expenses are incurred. Unrestricted contributions are recognized as revenue when they are received or receivable, and when collectibility is reasonably assured.

Revenue is recognized when products and services are delivered to the customer and ultimate collection is reasonably assured at the time of performance.

3. CASH AND INVESTMENTS

	Cash	Investments	Total 2009	Total 2008
HFH Revenue fund	$ 674,674	-	674,674	922,627
SSMI Plant fund unrestricted	343,961	-	343,961	457,959
Major building repairs reserve fund	-	183,587	183,587	233,201

4. VACATION PAY AND PRE-RETIREMENT LEAVE (Continued)

		Due from WHRA - Accrued Vacation Pay and Pre-Retirement Leave	Accrued Vacation Pay and Pre-Retirement Leave Payable	Unfunded Employee Future Benefits
March 31, 2007	Vacation pay	$ 719,492	792,278	(72,786)
	Pre-retirement leave	1,012,904	1,283,218	(270,314)
		$ 1,732,396	2,075,496	(343,100)
March 31, 2008	Vacation pay	$ 719,492	837,867	(118,375)
	Pre-retirement leave	1,097,884	1,368,198	(270,314)
		$ 1,817,376	2,206,065	(388,689)
March 31, 2009	Vacation pay	$ 719,492	885,024	(165,532)
	Pre-retirement leave	1,144,361	1,414,675	(270,314)
		$ 1,863,853	2,299,699	(435,846)

a) Vacation Pay Receivable/ Payable

HFH has a receivable from the WRHA for vacation pay of $719,492 which was capped in 2003/04. Effective for the fiscal year 2004/2005, Manitoba Health has directed that healthcare facilities may no longer accrue as a receivable, the revenue equivalent to the change on the vacation pay liability. As a result of the above, the unfunded portion of the liability was $47,156 (2008 - $45,589) for the fiscal year ending March 31, 2009.

b) Pre-retirement Leave Receivable

HFH has a receivable from the WRHA for pre-retirement leave of $1,144,361 (2008 -$1,097,884) which represents the balance receivable at March 31, 2004 plus the change in the liability for the following fiscal years: 2006/07, 2007/08 and 2008/09. For the 2004/2005 and 2005/2006 fiscal years, Manitoba Health directed that healthcare facilities were not allowed to accrue as a receivable, the revenue equivalent to the change in the retirement entitlement obligation liability.

However, in 2008/2009 the WRHA provided partial pre-retirement leave funding of $160,938 in respect of fiscal years 2004/05 and 2005/06. As a receivable was not allowed to be accrued for these fiscal years, this funding has been recorded as income in the statement of operations during the current fiscal year.

c) Pre-retirement Leave Payable

HFH has a contractual commitment to pay a retirement allowance to employees if they are over age fifty-five and have ten years of service or if their period of service when added to their age exceeds eighty. HFH has recorded an accrual based upon an actuarial valuation at March 31, 2009 of $1,414,675 (2008 - $1,368,198) for those employees who qualified for the retirement allowance. For the fiscal year ending March 31, 2009, HFH paid out retirement allowances to their employees in the amount of $46,549 in which the WRHA only funded 64.25% of the payable. The unfunded portion for the fiscal year 2009/2009 was $16,641 (2008 - $19,953).

HOLY FAMILY HOME INC. REVENUE FUND
AND
SISTERS SERVANTS OF MARY IMMACULATE PLANT FUND
NOTES TO FINANCIAL STATEMENTS
YEAR ENDED MARCH 31, 2009

4. VACATION PAY AND PRE-RETIREMENT LEAVE (Continued)

d) Unfunded Employee Future Benefits

HFH has recorded the unfunded future employee benefits (which include Vacation Pay and Pre-retirement Leave) as a separate balance within its unrestricted net assets. HFH has taken the position that the unfunded future employee benefits are recoverable from the WRHA, and that the change in policy is contrary to the terms of the Service Purchase Agreement.

First, HFH's position is based on the fact that employee benefits are negotiated centrally by the Labour Relations Secretariat, and the Service Purchase Agreement explicitly states that the level of funding will be commensurate with any settlement agreed to by the Labour Relations Secretariat.

Secondly, in keeping with the terms of the Service Purchase Agreement, future employee benefits should be recognized, both as a liability and as a receivable. The corresponding responsibility for the future funding of the same benefits should be recognized by Manitoba Health to the WRHA and the WRHA to Winnipeg non-profit personal care homes (including HFH). Failure to acknowledge future funding responsibility of negotiated future employee benefits results in incorrect disclosure of HFH's financial position within the Audited Financial Statements (understated assets). HFH has taken the position that the Audited Financial Statements should properly reflect a future employee benefits receivable from Manitoba Health/WRHA equal to the future employee benefits payable.

HFH has expressed considerable concern to the WRHA regarding the impact of the policy change referred to above, and the manner in which Employee Future Benefit liabilities are to be funded and recorded in HFH's Audited Financial Statements.

9. RELATED PARTY TRANSACTIONS

Holy Family Home Inc. Revenue Fund (HFH) and Sisters Servants of Mary Immaculate Plant Fund (SSMI) are related to Sisters Servants of Mary Immaculate Special Purpose Trust Fund; Sisters Servants of Mary Immaculate (operating as Holy Family Home Building Expansion Fund); Sisters Servants of Mary Immaculate Seniors Tower Fund, Sisters Servants of Mary Immaculate (operating as Holy Family Home Ancillary Operations) and Holy Family Home Ladies Auxiliary. All transactions, except as otherwise noted, between the related parties are at cost and consist of donations, expenses paid and transfers of cash to fulfill investment of surplus funds in investment certificates and Treasury Bills held jointly for the purpose of obtaining higher yields by the related parties.

Holy Family Home Inc. Revenue Fund charged Sisters Servants of Mary Immaculate Seniors Tower Fund an administration fee of $33,600 in 2009 (2008 - $33,600). This transaction was recorded at the exchange amount, which is the amount agreed upon by both parties.

Holy Family Home Inc. Ancillary Operations owns and operates a bus for the transportation of Holy Family Home Inc. residents. It charged rent of $4,797 (2008 - $5,109) to Holy Family Home Inc. Revenue Fund to recover the operating expenses of that bus. These transactions are recorded at the exchange amount, which is the amount agreed upon by both parties.

Sisters Servants of Mary Immaculate Special Purpose Trust Fund pays the Holy Family Home Inc. Revenue Fund fees in the amount of $13,560 in 2009 (2008 - $13,560) for accounting support services. The transactions are at the exchange amount, which is the amount agreed upon by both parties.

HOLY FAMILY HOME INC. REVENUE FUND
AND
SISTERS SERVANTS OF MARY IMMACULATE PLANT FUND
NOTES TO FINANCIAL STATEMENTS
YEAR ENDED MARCH 31, 2009

11. COMMITMENTS

HFH leases office equipment under operating leases. The future annual lease commitments under these leases are as follows:

March 31, 2010	$	5,976
2011		5,400
2012		7,860
2013		786

12. USE OF ESTIMATES

The preparation of the financial statements in accordance with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting periods presented. Actual results could differ from these estimates.

13. FINANCIAL INSTRUMENTS

The organization has designated all of its financial instruments as held-for-trading which means that they are measured at fair value with gains or losses recognized in operations. Due to the short-term nature of the following financial instruments held by the organization, including cash, accounts receivable, accrued interest receivable, inventory, and accounts payable and accrued liabilities, the carrying value as presented in the financial statements are reasonable estimates of fair value. Investments are recorded at fair market value (including accrued interest). The carrying value of the loan receivable approximates fair market value. It is management's opinion that the organization is not exposed to significant interest, credit or currency risk arising from any of its financial instruments.

14. COMPARATIVE FIGURES

Certain of the comparative figures have been reclassified to reflect the financial statement presentation adopted for the current year.

AUDITOR'S REPORT

To The President, Board and Members
Hope Centre Health Care Incorporated
Winnipeg, Manitoba

I have audited the balance sheet of the Hope Centre Health Care Incorporated as at March 31, 2009 and the statement of income for the year then ended. These financial statements are the responsibility of the Board of Directors. My responsibility is to express an opinion on these financial statements based on my audit.

I conducted the audit in accordance with Canadian generally accepted auditing standards. Those standards require that I plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In my opinion, these financial statements present fairly, in all material respects, the financial position of the organization as at March 31, 2009 and the results of its operations and the changes in its financial position for the year then ended, in accordance with Canadian generally accepted accounting principles.

The accompanying notes are an integral part of these financial statements.

Hope Centre Health Care Incorporated
Notes to the Financial Statements
For the year ended March 31, 2009

1. Purpose of the Organization

Hope Centre Health Care Inc. is committed to the provision of a high standard of holistic health care that is motivated by a practical Christian concern for all people. They recognize each person/client as a unique individual created in the image of God and worthy of a competent standard of care, rendered with respect, dignity and compassion.

Hope Centre Health Care Inc. is committed to working with individuals, families and groups within their surrounding community in order to promote physical, emotional and spiritual health.

2. Significant Accounting Policies

a) Basis of Accounting

The accrual basis of accounting is being used.

b) Inventories

Inventories are insignificant, thus all inventory is charged to operations in the current year of operations.

c) Property, Pland and Equipment

Capital assets are recorded at cost and are amortized over their estimated useful lives based on the following rates and methods:

Building	5%	Straight- line basis
Furniture and fixtures	20%	Straight- line basis
Equipment	30%	Straight- line basis

d) Manitoba Health funding

Manitoba Health provides funding to the organization based on their assessment of the organization's annual operating budgets and on approved capital expenditures. Periodically, Manitoba Health reviews actual operating results and processes adjustments to amounts previously provided. The organization accounts for these adjustments as a credit or charge to accumulated surplus.

e) Income Tax

The corporation is a not-for-profit organization and thus is exempt under the provisions of the Canada Revenue Agency.

Hope Centre Health Care Incorporated
Notes to the Financial Statements (Con't)
For the year ended March 31, 2009

3. Property Plant & Equipment

Capital assets are comprised of the following:

	Cost	Accumulated Amortization	Net Book Value 2009	2008
Land	$ 32,000	$ -	$ 32,000	$ 32,000
Building	73,213	64,249	8,964	12,625
Furniture and fixtures	50,898	50,898	-	-
Equipment	32,283	29,635	2,648	-
	$ 188,394	$ 144,781	$ 43,613	$ 44,625

4. Non-Pension Pre-retirement Leave Benefit

An actuarial report called the 'Mercer Valuation Report' has been issued. The report indicated that Hope Centre Health Care Inc. has an unrecorded actuarial valuation liability in the amount of $72,843 (2008 - $62,244).

5. Economic Dependence

The organization is dependent on support from Manitoba Health to maintain operational funding. These financial statements are prepared on the basis that this support will continue.

6. Statement of Cash Flows

The Statement of Cash Flows has not been prepared, as the required information is readily apparent ffrom the other financial statements presented and the Notes to the Financial Statements.

7. Prior Year's Financial Statements

The Budget has been included in this year's financial statements. The prior years financial statements have been rearranged to correspond with the current year's presentation.

Auditors' Report

To the Members of
Klinic Incorporated

We have audited the statement of financial position of Klinic Incorporated as at March 31, 2009 and the statements of operations and changes in fund balances and cash flows for the year then ended. These financial statements are the responsibility of the organization's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of the organization as at March 31, 2009 and the results of its operations and changes in fund balances and cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

See accompanying notes to the financial statements.

1. Purpose of the organization

Klinic Incorporated (Klinic) is a Community Health Centre offering health and social services in part of the core area of Winnipeg as well as providing specialized crisis, sexual assault counselling, family abuse counselling services, public education and training for the Province of Manitoba.

Klinic Incorporated is an incorporated not-for-profit organization under the Income Tax Act and is a registered charity.

2. Summary of significant accounting policies

The organization follows accounting principles generally accepted in Canada in preparing its financial statements. The significant accounting policies used are as follows:

a) Fund accounting

The Operating Fund reports all revenues and expenses related to program delivery and administrative activities. The Operating Fund reports the assets, liabilities, revenues and expenses related to the organization's activities including computer equipment.

The Capital Asset Fund reports the assets, liabilities, revenues and expenses related to the organization's capital assets, excluding computer equipment, and the building at 870 Portage Avenue.

The Wilson House Fund reports the assets, liabilities, revenues and expenses related to the organization's building at 545 Broadway, known as The Wilson House.

The Donation Fund reports assets, liabilities, receipts and disbursements related to all donations. The Donation Fund is used to support existing programs.

b) Revenue recognition

Klinic Incorporated follows the deferral method of accounting for contributions.

Unrestricted contributions are recognized as revenue of the appropriate Fund when received or receivable if the amount to be received can be reasonably estimated and collection is reasonably assured.

Restricted contributions related to the programs are recognized as revenue in the year in which the related expenses are incurred.

Training fees and fundraising revenue is recognized as revenue in the appropriate fund when the event is held.

2. Summary of significant accounting policies - continued

c) Capital assets

Purchased property and equipment are recorded in the appropriate fund at cost. Contributed capital assets are recorded at fair value at the date of contribution.

d) Amortization

Rates and bases of amortization applied to write off the cost less estimated salvage value of capital assets over their estimated lives are as follows:

Operating Fund		
Computer equipment	3 years	straight-line
Wilson House Fund		
Building	20 years	straight-line
Capital Fund		
Building	20 years	straight-line
Furniture and equipment	5 years	straight line

e) External projects

External projects are sponsored by the organization and directed by third party organizations. Klinic provides administrative services to these projects including receipt of funding, disbursement of expenditures and financial reporting. Funding committed for the current fiscal year but received subsequent to the year-end is recorded as funding receivable for external projects. Funding received but not fully disbursed is included in funding held in trust - external.

f) Accounting estimates

The preparation of the financial statements in accordance with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the dates of the financial statements and the reported amounts of revenues and expenses during the reporting periods. These estimates are reviewed periodically and are reported in earnings in the period in which they become known. Actual results could differ from these estimates.

g) Financial instruments

The organization's financial instruments consist of cash, receivables, payables and accruals and deferred revenue.

The fair value of the organization's financial assets and liabilities approximate their carrying value. It is management's opinion that the organization is not exposed to significant interest, currency or credit risk arising from these financial instruments.

3. Cash

Klinic has available an operating line of credit with an authorized limit of $25,000 (2008 - $25,000) bearing interest at prime. The line of credit was not in use at March 31, 2009 (2008 - $NIL).

4. Cash held in trust - external projects

Funding held in trust for external projects is as follows:

	2009	2008
Manitoba Association of Family Violence Workers	$ 3,895	$ 9,021
Manitoba Public Health Association	15,998	15,966
Mothers Support Circle	434	434
Downtown Parent Coalition	57,131	59,038
Manitoba Network for Suicide Prevention	7,147	9,154
Klinic Institute	-	2,269
Trauma Forum	3,890	5,852
Pregnancy Prevention Media Campaign	1,857	1,857
Male Childhood Abuse Workshop	852	852
Wellness Committee	3,037	(6,375)
GLBTT	296	3,021
Manitoba Harm Reduction	(137)	(137)
Healthy Living	-	17,880
West Central Community Guide	4,466	4,186
West Central Women's Resource Centre	7,209	(20,640)
	$ 106,075	$ 102,378

5. Receivables

	2009	2008
Winnipeg Regional Health Authority	$ 438,935	$ 431,164
Other	439,659	548,839
	$ 878,594	$ 980,003

6. Interfund balances

The interfund balances are non interest bearing and have no terms of repayment.

7. Capital assets

2009

	Cost	Accumulated Amortization	Net Book Value
Operating Fund			
Computer equipment	$ 116,175	$ 116,175	$ -
Capital Asset Fund

	$ 4,310,642	$ 3,092,841	**$ 1,217,801**

2008

	Cost	Accumulated Amortization	Net Book Value
Operating Fund			
Computer equipment	$ 116,175	$ 116,175	$ -
Capital Asset Fund			
Building	2,401,770	2,248,525	153,245
Furniture and equipment	278,616	263,291	15,325
	2,680,386	2,511,816	168,570
Wilson House Fund			
Land	160,500	-	160,500
Building	1,353,581	270,757	1,082,824
	1,514,081	270,757	1,243,324
	$ 4,310,642	$ 2,898,748	$ 1,411,894

8. Deferred revenue

The deferred revenue reported in the Operating Fund represents restricted funding and unspent resources received in the current year and externally restricted that are related to the subsequent year.

Changes in the deferred revenue balances for the Operating Fund are as follows:

	2009	2008 (Note 14)
Beginning balance	$ 150,964	$ 177,810
Less: amounts recognized as revenue during the year	(36,188)	(65,022)
Add: amounts received related to next year	67,246	38,176
	$ 182,022	$ 150,964

Changes in the deferred revenue balances for the Capital Asset Fund are as follows:

	2009	2008
Beginning balance	$ 165,606	$ 291,875
Less: amounts recognized as revenue during the year	(126,258)	(126,269)
Add: amounts received related to next year	-	-
	$ 39,348	$ 165,606

Changes in the deferred revenue balances for the Wilson House Fund are as follows:

	2009	2008
Beginning balance	$ 1,154,241	$ 1,048,182
Less: amounts recognized as revenue during the year	(72,140)	(67,687)
Add: contributions	-	173,746
	$ 1,082,101	$ 1,154,241

Deferred revenue reported in the Capital Asset Fund and Wilson House Fund includes the unamortized portion of funds to acquire and renovate the organization's premises. Deferred revenue is amortized on the statement of operations.

9. Pre-retirement leave benefits

The organization has a contractual commitment for the pre-retirement benefits for the members of the pension plan based on years of service before retirement. During the year ended March 31, 2006 the organization was instructed by the Winnipeg Regional Health Authority to record the full obligation. The Winnipeg Regional Health Authority calculated and advised the organization of the amount of the obligation. Pre-retirement leave benefits are considered an out-of globe funding item, of which the Winnipeg Regional Health Authority has instructed the organization to set up a receivable for the percentage of the change in the pre-retirement leave obligation that belongs to Winnipeg Regional Health Authority programs. The change in the accrued pre-retirement leave benefits are recorded as an expense in the current year. Actual expenditures for pre-retirement payouts are recorded in operations.

Change in obligation	2009	2008
Opening balance	$ 415,126	$ 369,286
Increase in obligation	5,300	45,840
Ending balance	$ 420,426	$ 415,126
Pre-retirement leave		
Current year recovery	$ 15,911	$ 29,044
Increase in obligation	(5,300)	(45,840)
	$ 10,611	$ (16,796)

10. Prior period adjustments

a) Purchase of land

The opening surplus has been adjusted to reflect donation revenue received to purchase the land of Wilson House. Donations received to purchase non depreciable capital assets are to applied to increase net assets. The net assets and deferred contributions have been adjusted to reflect the proper accounting for this transaction.

b) Interfund loan

In 2002, the Operating Fund transferred funds to the Wilson House Fund to purchase property. The transaction was incorrectly recorded as a transfer of surplus funds and, as a result, the loan to Wilson House Fund was recorded as an increase in net assets of the Wilson House Fund. The intent had been to transfer the funds as a loan and should not have been recorded as an increase to net assets. During the year, Wilson House repaid the interfund loan to the Operating Fund.

10. Prior period adjustments - continued

c) Revenue overstated

In 2004, contributions received to purchase depreciable capital assets were recorded as revenue of the Wilson House Fund. The contribution should have been recorded as deferred contributions and amortized into income at the same rate as the capital assets are currently being depreciated. As a result, net assets have been overstated by the amount received in 2004 less the amortization that should have been recorded since 2004. The correction of $142,633 reflects the adjustment made to decrease net assets and increase deferred contributions.

11. Pension

Effective June 1, 2003, Klinic adopted a defined benefit pension plan under a participation agreement with Healthcare Employees Pension Plan - Manitoba (the "Plan"). As part of the agreement, Klinic's liability for pension benefits during the term of its participation in the Plan is limited to the contributions made to the Plan as required from time to time. As a result, contributions to the Plan are expensed as incurred and no liability or asset is recognized for any potential Plan funding shortfall or excess. During the year, $375,375 (2008 - $ 332,683) was expensed for the purpose of the Plan.

Prior to June 1, 2003 Klinic had a defined contribution pension plan.

Pension contributions are included in employee benefits expense of the applicable programs.

12. Economic dependence

The volume of financial activity undertaken by Klinic Incorporated with its main funding bodies is of sufficient magnitude that the discontinuance of their funding would endanger the ability of the organization to continue as a going concern.

13. Cash balances

	2009	2008
Operating Fund		
Cash and short-term investments	$ 1,059,652	$ 828,150
Cash in trust - external projects	106,075	102,378
	1,165,727	930,528
Donation Fund	244,515	31,872
	$ 1,410,242	$ 962,400

14. Comparative figures

Certain balances of the preceding period have been reclassified to conform with the current year's financial statement presentation.

AUDITORS' REPORT

To the Board of Directors of
LHC PERSONAL CARE HOME INC.:

We have audited the statement of financial position of **LHC PERSONAL CARE HOME INC.** as at March 31, 2009 and the statements of operations, net assets and cash flows for the year then ended. These financial statements are the responsibility of the organization's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of the organization as at March 31, 2009 and the results of its operations and its cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

The accompanying notes are an integral part of these financial statements.

1. ENTITY DEFINITION

LHC Personal Care Home Inc. is a not-for-profit organization, incorporated under the laws of the Province of Manitoba. The organization is principally involved in providing licensed personal care services to 116 residents. As the entity is a not-for-profit organization it is exempt from income taxes under the Income Tax Act.

2. ACCOUNTING POLICIES

These financial statements have been prepared in accordance with Canadian generally accepted accounting principles which require management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of income and expenses during the reporting period. Actual results may differ from those estimates. The significant accounting policies used in these financial statements are as follows:

Financial Instruments

All financial assets and liabilities are required to initially be recognized at fair value. In addition, it is required that financial assets be classified as either "Held for trading", "Available for sale", "Held to maturity" or "Loans and receivables". Financial liabilities are to be classified as either "Held for trading" or "Other". After initial recognition, measurement of financial assets or liabilities is dependant on their classification. Financial assets or liabilities classified as "Held to maturity", "Loans and receivables" or "Other" are measured at amortized cost. Financial assets or liabilities classified as "Held for trading" are measured at fair value with gains or losses recognized in excess of revenue over expenditures. Financial assets classified as "Available for sale" are measured at fair value with gains or losses recognized in net assets.

The organization's financial instruments consist of cash, accounts receivable, accounts payable and accrued liabilities, advances from (to) a related party and demand loan payable. The organization has classified cash as "Held for trading", accounts receivable and advances from a related party as "Loans and receivables", accounts payable and accrued liabilities, advances to a related party and demand loan payable as "Other". The fair value of cash, accounts receivable, accounts payable and accrued liabilities, advances from (to) a related party and demand loan payable approximate their carrying value. The classification of the financial assets and liabilities did not affect the organization's financial statements at the time of adoption. As such, the opening net assets of the organization have not been adjusted for the changes in the accounting policy and, as provided for under the transitional provisions, the financial statements for prior periods have not been restated.

Transaction costs for financial instruments are expensed in the period incurred and recognized in excess of revenue over expenditures.

It is management's opinion that the organization is not exposed to significant interest, currency or credit risks arising from these financial instruments.

Capital Assets

Purchased capital assets are recorded at cost. Contributed capital assets are recorded at fair value at the date of contribution. Repairs and maintenance costs are charged to expenditures. Betterments which extend the estimated useful life of an asset are capitalized. When a capital asset no longer contributes to the organization's ability to provide services, its carrying amount is written down to its residual value.

Capital assets are amortized on a straight-line basis using the following annual rates:

Buildings	- 2.5%
Furniture, fixtures and equipment	- 10%
Land improvements	- 10%

The accompanying notes are an integral part of these financial statements.

Revenue Recognition
The organization follows the deferral method of accounting for contributions which include donations and government grants.

The the Health Insurance Act and regulations hereto, the organization is funded primarily by the Winnipeg Regional Health Authority ("WRHA") in accordance with budget arrangements established by the Province of Manitoba. Operating grants are recorded as revenue in the period to which they relate. Grants approved but not received at the end of an accounting period are accrued. Where a portion of a grant is related to a future period, it is deferred and recognized in that subsequent period. These financial statements reflect arrangements approved by the WRHA with respect to the year ended March 31, 2009.

With respect to actual operating results, certain adjustments to funding will be made by the WRHA after completion of their review of the organization's accounts. Any adjustments will be reflected in the year the final statement of recommended costs is received from the WRHA.

a) Deficits - The WRHA shall not be responsible for past or future deficits of the organization in providing the services and debt service charges for any debt incurred resulting from operating deficits unless the parties otherwise mutually agree.

   The WRHA shall not be responsible for the costs incurred by the organization other than those set forth in the service purchase agreement.

b) Surpluses - The organization may unconditionally retain the greater of 50% of its insured services surplus in any fiscal year and 2% of the global budget allocation indicated in its funding letter from the WRHA for such fiscal year. Any surplus beyond the foregoing levels shall be remitted to the WRHA on demand.

Unrestricted contributions are recognized as revenue when received or receivable if the amount to be received can be reasonably estimated and collection is reasonably assured.

Externally restricted contributions are recognized as revenue in the year in which the related expenditures are recognized. Contributions restricted for the purchase of capital assets are deferred and amortized into revenue on a straight-line basis, at a rate corresponding with the amortization rate for the related capital assets.

Contributed Services
A substantial number of volunteers contribute a significant amount of their time each year. Because of the difficulty of determining the fair value, contributed services are not recognized in the financial statements.

Employee Future Benefits
Pre-retirement entitlement, pension and other employee future benefit costs are determined using the projected benefit method prorated on years of service and based on best estimate assumptions.

The accompanying notes are an integral part of these financial statements.

3. ACCOUNTS RECEIVABLE

		2009	2008
Receivable from residents	$	**1,742**	6,082
Accrued interest		**55**	2,046
Other		**7,129**	6,419
	$	**8,926**	14,547

4. DUE FROM WINNIPEG REGIONAL HEALTH AUTHORITY

		2009	2008
Bridge funding	$	**(444,740)**	(304,655)
Capital interest		**(2,041)**	(322)
Dialysis transportation		**804**	699
Flu immunization costs		**876**	1,077
Leap year residential charges		**5,261**	5,261
Louis Riel day accrual			9,980
MNU LTD funding			6,102
MNU contract		**171,561**	32,489
Median adjustment		**389,141**	299,563
Non-union wage increase		**14,316**	
Pre-retirement payout		**7,695**	7,695
Residential charges		**(145,046)**	(46,285)
Staffing increase hours of care		**99,239**	34,297
WRHA pre-retirement liability funding			30,126
	$	**97,066**	76,027

5. CURRENT AND FUTURE EMPLOYEE BENEFITS RECOVERABLE FROM WHRA

Employee retirement obligations are accrued as incurred based on an actuarial estimation while vacation benefits are accrued as earned by the employees.

Due to the nature of the benefits, the retirement benefits recoverable and payable are classified as long-term whereas the vacation benefits recoverable and payable are classified as current.

The amount of funding which will be provided by Manitoba Health, through the WRHA, for pre-retirement entitlement obligations are capped at the amount owing as at March 31, 2004, adjusted for allocations from the WRHA in 2005. Commencing in 2007, the WRHA has agreed to fund the change in accrued pre-retirement liability for the WRHA funded positions. The Province of Manitoba has guaranteed to the WRHA, and through it to the organization, the outstanding receivable as at March 31, 2004, which will be paid when required. Any change in the liability amount will be reflected as a current year expenditure on the statement of operations. The amount of the receivable is being recorded on a non-discounted basis. This accounting policy is consistent with that advocated and followed by Manitoba Health, a related party to WRHA (and the organization). The fair value of the receivable on a discounted basis would be significantly less than the carrying value and the difference could be materially influenced by the effective discount rate utilized.

The accompanying notes are an integral part of these financial statements.

6. CAPITAL ASSETS

	2009		2008	
	Cost	Accumulated Amortization	Cost	Accumulated Amortization
Land	$ 189,282		189,282	
Buildings	12,324,767	2,770,799	12,324,767	2,462,607
Furniture, fixtures and equipment	1,065,238	942,769	1,059,768	836,791
Land improvements	17,289	7,051	17,289	5,322
	13,596,576	3,720,619	13,591,106	3,304,720
Cost less accumulated amortization	$ 9,875,957		10,286,386	

Amortization of capital assets for the year ended March 31, 2009 is $415,899 (2008 - $415,514).

7. BANK INDEBTEDNESS

The organization has a revolving line of credit with a maximum limit of $200,000. The loan is secured by a general security agreement on all of the organization's assets. Interest on advances is paid monthly at bank prime plus 1%, with repayment due on demand. At March 31, 2009 the organization had $62,446 available for its use.

8. RELATED PARTY TRANSACTIONS

Lions Club of Winnipeg Senior Citizens Home ("Lions Manor") is the sponsor of the project. The capital assets, long-term debt and deferred contributions related to capital assets were transferred from the sponsor at cost. The sponsor has an integral role in LHC Personal Care Home Inc. operations by providing support for administration, maintenance, dietary and other services.

The following table summarizes the organization's related party transactions:

	2009	2008
Administration	$ 134,885	149,010
Finance	145,079	168,728
Maintenance	78,055	67,383
	358,019	385,121
Dietary	756,594	517,011
	$ 1,114,613	902,132

The transactions are in the normal course of operations and are recorded at the exchange amount.

At the end of the year, the amount due from a related party is as follows:

	2009	2008
Lions Manor	$ 12,383	6,212

The balances are non-interest bearing, due on demand and are unsecured.

The accompanying notes are an integral part of these financial statements.

9. DEMAND LOAN PAYABLE

		2009	2008
Line of Credit - Royal Bank of Canada, repayable in monthly principal payment of $4,580 and monthly interest payments prime minus 0.8%. The line of credit is repayable on demand and is secured by a borrowing resolution and a letter of comfort from Manitoba Health	$	**105,637**	160,597

10. COMMITMENTS AND CONTINGENCIES

The nature of the health care industry is such that there may be litigation pending or in prospect at any time. As at March 31, 2009, no litigation is in process. With respect to potential claims at March 31, 2009, management believes the organization has valid defences and appropriate insurance coverage in place. In the event any claims are successful, management believes that such claims are not expected to have a material effect on the organization's financial position.

The accompanying notes are an integral part of these financial statements.

11. DEFERRED CONTRIBUTIONS

Capital assets

Deferred capital contributions related to capital assets represent the unamortized amount of donations and grants received for the purchase of capital assets. The amortization of capital contributions is recorded as revenue in the statements of operations at rates which match the amortization of the related capital asset purchased with the donation, grant or approved borrowing.

	2009	2008
Balance, beginning of year	$ 9,059,577	9,405,719
Contributions - Winnipeg Regional Health Authority	54,960	54,960
Transfers from equipment funding	5,470	14,412
Less amounts amortized to revenue	(415,899)	(415,514)
Balance, end of year	$ 8,704,108	9,059,577

Unspent major repairs funding

Unspent major repairs funding represents the unspent amount of funding received for building and building service repairs. Major repairs funding is not recorded as revenue in the statement of operations.

	2009	2008
Balance, beginning of year	$ 36,048	28,368
Contributions - Winnipeg Regional Health Authority	7,680	7,680
Balance, end of year	$ 43,728	36,048

Unspent equipment funding

Unspent equipment funding represents the unspent amount of funding received for the replacement of equipment. Equipment funding is not recorded as revenue in the statement of operations.

	2009	2008
Balance, beginning of year	$ 81,026	75,138
Contributions - Winnipeg Regional Health Authority	20,300	20,300
Purchases	(5,470)	(14,412)
Balance, end of year	$ 95,856	81,026
Total deferred contributions balance	$ 8,843,692	9,176,651

The accompanying notes are an integral part of these financial statements.

12. PENSION PLAN

Substantially all of the employees of the organization are members of the Healthcare Employees Pension Plan (successor to the Manitoba Health Organization, Inc. Plan) (the"Plan") which is a multi-employer defined benefit pension plan available to all eligible employees of the participating members of the Plan. Plan members will receive benefits based on the length of service and on the average of annualized earnings during the best five years of the last ten year prior to retirement, termination or death, that provides the highest earnings.

Pension assets consist of investment grade securities. Market and credit risk on these securities are managed by the Plan by placing plan assets in trust and through the Plan investment policy.

Pension expense is based on Plan management's best estimates, in consultation with its actuaries, of the amount, combined with the contribution by employees, required to provide a high level of assurance that benefits will be fully represented by fund assets at retirement, as provided by the Plan. The funding objective is for employer contributions to the Plan to remain a constant percentage of employees' contributions.

Variances between actuarial funding estimates and actual experience may be material and any differences are generally to be funded by the participating members. The most recent actuarial valuation of the Plan as at December 31, 2005 indicates the Plan is in a deficit, however it is anticipated that recently implemented increases in contribution rates will correct this deficiency within the allowed timeframe. Contributions to the Plan made during the year by the organization on behalf of its employees amounted to $217,540 (2008 - $194,879) and are included in the statement of operations.

13. CAPITAL DISCLOSURE

The organization manages its capital to ensure that it will be able to continue as a going concern while still maintaining the necessary services to fulfill its mission. The organization monitors its net assets to ensure it maintains appropriate financial resources to allow for sustainability in its operations.

The organization is not subject to externally imposed capital requirements and the organization's overall strategy with respect to capital risk management remains unchanged from the year ended March 31, 2008.

The accompanying notes are an integral part of these financial statements.

To the Directors of Luther Home Corporation:

Management is responsible for the preparation and presentation of the accompanying financial statements, including responsibility for significant accounting judgments and estimates in accordance with Canadian generally accepted accounting principles. This responsibility includes selecting appropriate accounting principles and methods, and making decisions affecting the measurement of transactions in which objective judgment is required.

In discharging its responsibilities for the integrity and fairness of the financial statements, management designs and maintains the necessary accounting systems and related internal controls to provide reasonable assurance that transactions are authorized, assets are safeguarded and financial records are properly maintained to provide reliable information for the preparation of financial statements.

The Board of Directors is composed primarily of Directors who are neither management nor employees of the Organization. The Board is responsible for overseeing management in the performance of its financial reporting responsibilities, and for approving the financial information included in the annual report. The Board fulfils these responsibilities by reviewing the financial information prepared by management and discussing relevant matters with management and external auditors. The Board is also responsible for recommending the appointment of the Organization's external auditors.

Meyers Norris Penny LLP, an independent firm of Chartered Accountants, is appointed by the Directors to audit the financial statements and report directly to them; their report follows. The external auditors have full and free access to, and meet periodically and separately with, both the Board and management to discuss their audit findings.

May 13, 2009

Chief Executive Officer

Finance Manager

Auditors' Report

To the Directors of Luther Home Corporation:

We have audited the statement of financial position of Luther Home Corporation as at March 31, 2009 and the statements of operations, changes in net assets, cash flows and the related schedules for the year then ended. These financial statements are the responsibility of the Organization's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of the Organization as at March 31, 2009 and the results of its operations for the year then ended in accordance with Canadian generally accepted accounting principles, except for the specifically identified items disclosed in Note 2 that are required as a result of the operating agreements with Canada Mortgage and Housing Corporation and Manitoba Housing and Renewal Corporation.

Cash resources, end of year	1,016,112	1,302,974

The accompanying notes are an integral part of these financial statements

1. Incorporation and operations

Luther Home Corporation (the "Organization") was incorporated on May 25, 1968 as a non- profit organization without share capital. The mission of the Organization is to minister with love and compassion to the physical, mental, spiritual and social needs of persons requiring care within their facility and surrounding community.

The Organization consists of four properties: 1081 Andrews Street, 1080 Powers Street, 1084 Powers Street and 364 Leila Avenue.

The property at 1081 Andrews Street is a long term care facility.
The property at 1080 Powers Street is a subsidized senior housing project.
The property at 1084 Powers Street is a subsidized senior housing project.
The property at 364 Leila Avenue is a group home for mentally challenged individuals.

2. Significant accounting policies

These financial statements have been prepared in accordance with Canadian generally accepted accounting principles, except as explained below in order to comply with the operating agreement with the Manitoba Housing and Renewal Corporation (MHRC) and Canada Mortgage and Housing Corporation (CMHC).

The specific policies that differ from Canadian generally accepted accounting principles include the following:

i) amortization for the building, furniture and equipment at 1080 Powers Street is calculated at a rate equal to the annual principal reduction of the mortgage from MHRC. No amortization is charged on other capital assets. Donated capital assets are not amortized.

ii) amortization for the building, furniture and equipment at 1084 Powers Street is calculated at a rate equal to the annual principal reduction of the mortgage from CMHC. No amortization is charged on other capital assets. Donated capital assets are not amortized.

Revenue recognition

The Organization uses the deferral method of accounting for contributions. Restricted contributions are recognized as revenue in the year in which the related expenses are incurred. Unrestricted contributions are recognized as revenue when received or receivable if the amount to be received can be reasonably estimated and collection is reasonably assured.

Measurement uncertainty (use of estimates)

The preparation of the financial statements in conformity with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period.

Accounts receivable are stated after management's evaluation of collectibility and an appropriate allowance provided for uncollectible accounts. Amortization is based on the estimated useful lives of capital assets.

These estimates and assumptions are reviewed periodically and, as adjustments become necessary they are reported in operations in the periods in which they become known.

2. **Significant accounting policies (*continued from previous page*)**

Long-lived assets

Long-lived assets consist of capital assets with finite useful lives. Long-lived assets held for use are measured and amortized as described in the applicable accounting policies.

The Organization performs impairment testing on long-lived assets held for use whenever changes in circumstances indicate that the carrying value of an asset, or group of assets, may not be recoverable. Impairment is measured as the amount by which the asset's carrying value exceeds its fair value. Any impairment is included in operations for the year.

Capital assets

Capital assets are recorded at cost less capital grants and accumulated amortization. Amortization is recorded at rates intended to amortize the value of the capital assets over their estimated useful lives. The annual rates are as follows:

1081 Andrews Street	
Building	straight-line over 20 and 50 years
Automotive	straight-line over 8 years
Computer and system software	straight-line over 4 years
Furniture, equipment, improvements	straight-line over 10 and 20 years

In the year of acquisition, amortization is taken at one-half of the above rates.

364 Leila Avenue	
Building	straight-line over 40 years
Furniture and fixtures	straight-line over 10 years

In the year of acquisition, amortization is taken at one-half of the above rates.

1080 Powers Street
Amortization is provided on the building, furniture and equipment purchased from loans by MHRC at a rate equal to the annual principal reduction of the mortgage. No amortization is charged on other capital assets; however, a replacement reserve is maintained to provide for future asset replacement. Donated capital assets are not amortized.

1084 Powers Street
Amortization is provided on the building, furniture and equipment purchased from loans by Canada Mortgage and Housing Corporation (CMHC) at a rate equal to the annual principal reduction of the mortgage. No amortization is charged on other capital assets; however a replacement reserve is maintained to provide for future asset replacement. Donated capital assets are not amortized.

Equipment	
Real time locating system - computer	straight-line at a rate of 25% per year
Real time locating system	straight-line at a rate of 10% per year

In the year of acquisition, amortization is taken at one-half of the above rates.

2. Significant accounting policies (*continued from previous page*)

Income taxes

The Organization is a registered non-profit organization, and as such, it is exempt from income taxes under Section 149 of the Income Tax Act.

Replacement reserve

In accordance with the guidelines established by MHRC, Winnipeg Regional Health Authority (WRHA) and CMHC, the Organization has established reserves for future expenditures.

Deferred contributions

Capital asset deferred contributions represent the unamortized portion of restricted contributions relating to the purchase of capital assets. Revenue is recognized on the same basis as the respective assets are amortized.

Inventory

Inventory held for consumption in the production process of goods to be distributed are recognized at the lower of cost and current replacement cost. Cost is determined by the first-in, first-out method.

Pre-retirement entitlement obligation

1081 Andrews Street has a contractual commitment to pay out to employees four days per year of service upon retirement if they comply with the following conditions:

i) have ten years service and have reached the age of 55; or
ii) qualify for the "eighty" rule which is calculated by adding the number of years service to the age of the employee; or
iii) retire at or after the age of 65; or
iv) terminate employment at any time due to permanent disability.

The Organization has recorded an accrual based on an actuarial valuation that includes employees who qualify at the year-end date and an estimate for the remainder of employees who have not yet met the criteria above. Funding for the pre-retirement entitlement is recoverable from the WRHA up to a pre-determined percentage.

Internally restricted net assets

The Organization has restricted donations in the Memorial Fund. These funds may be designated for specific projects to enhance the care of residents of the Organization.

Financial instruments

Held for trading:

The Organization has classified cash and marketable securities as held for trading. These instruments are initially recognized at their fair value. Fair value is approximated by the instrument's initial cost in a transaction between unrelated parties.

Held for trading financial instruments are subsequently measured at their fair value. Gains and losses arising from changes in fair value are recognized immediately in operations.

2. Significant accounting policies (*continued from previous page*)

Loans and receivables:

The Organization has classified accounts receivable and Due from WRHA as loans and receivables. These assets are initially recognized at their fair value. Fair value is approximated by the instrument's initial cost in a transaction between unrelated parties.

Loans and receivables are subsequently measured at their amortized cost. Amortized cost is the amount at which the financial asset is measured at initial recognition less any reduction for impairment or uncollectability. Gains and losses arising from changes in fair value are recognized in operations upon derecognition or impairment.

Other financial liabilities:

The Organization has classified accounts payable and accrued liabilities, accrued benefit entitlement, term loans due on demand, long term debt and due to related parties as other financial liabilities. These liabilities are initially recognized at their fair value. Fair value is approximated by the instrument's initial cost in a transaction between unrelated parties.

Other financial liabilities are subsequently measured at amortized cost. Amortized cost is the amount at which the financial liability is measured at initial recognition less repayments. Gains and losses arising from changes in fair value are recognized in operations upon derecognition or impairment.

Comprehensive income

All gains and losses, including those arising from all financial instruments, have been recognized in excess of revenues over expenses for the year. There are no items giving rise to other comprehensive income, nor is there any accumulated balance of other comprehensive income.

Recent accounting pronouncements

Financial instrument deferral of Section 3862 and 3863

In December 2006, the Canadian Institute of Chartered Accountants (CICA) issued Section 3862 Financial Instruments - Disclosures and Section 3863 Financial Instruments - Presentation to replace Section 3861 Financial Instruments - Disclosure and Presentation. The effective date for these new Sections was for interim and annual financial statements with fiscal years beginning on or after October 1, 2007, with earlier adoption permitted. However, in light of the uncertainty regarding the future direction in setting standards for not-for-profit organizations, the CICA released a decision to allow deferral of Section 3862 and 3863 for this sector. Not-for-profit organizations should continue to apply Section 3861 until interim and annual financial statements with fiscal years beginning on or after October 1, 2008.

Financial statement presentation by not-for-profit organizations

In September 2008, amendments were made to CICA Handbook Section 4400 Financial Statement Presentation by Not-for-profit Organizations. Amendments to the section included the removal of the requirement to treat net assets invested in capital assets as a separate component of net assets, and, instead, permitting such an amount to be presented as a category of internally restricted net assets. In addition, the requirement to recognize and present revenues and expenses on a gross basis when a not-for-profit organization is acting as a principal in the transaction was clarified. Finally, guidance was included to reflect that Section 1540 Cash Flow Statements and Section 1751 Interim Financial Statements are applicable to not-for-profit organizations.

2. Significant accounting policies (*continued from previous page*)

Recent accounting pronouncements (continued from previous page)

Capital assets held by not-for-profit organizations

CICA Handbook Section 4430 Capital Assets Held by Not-for-profit Organizations has been amended to provide additional guidance with respect to the appropriate use of the scope exemption for smaller entities that expense their capital assets. It was clarified that the exemption does not allow not-for-profit organizations to capitalize but not amortize their capital assets, nor does it allow different methods of accounting for various types of capital assets.

This amendment applies to interim and annual statements relating to fiscal years beginning on or after January 1, 2009. The Organization does not expect the change to this standard to have a material impact on its financial statements.

Disclosure of allocated expenses by not-for-profit organizations

In September 2008, the Canadian Institute of Chartered Accountants issued new recommendations for disclosures regarding allocated expenses by not-for-profit organizations. CICA Handbook Section 4470 Disclosure of Allocated Expenses by Not-for-profit Organizations requires disclosure by not-for-profit organizations that allocate fundraising and general support expenses to other functions of the policies adopted for the allocation of such expenses among functions, the nature of the allocated expenses, and the basis on which allocations are made. The section also requires disclosure of the amounts allocated from each of its fundraising and general support functions and the amounts and functions to which they have been allocated.

This new Section is effective for interim and annual financial statements relating to fiscal years beginning on or after January 1, 2009. The Organization does not expect this new standard to have a material impact on its financial statements.

3. Change in accounting policies

Capital disclosures

Effective April 1, 2008, the Organization adopted the Canadian Institute of Chartered Accountants' new recommendations for disclosures about capital. Section 1535 Capital Disclosures establishes standards for disclosing what an entity regards as capital and an entity's objectives, policies and processes for managing its capital. The Section also prescribes disclosure regarding whether an entity has complied with any externally imposed capital requirements, and if not, the consequences of such non-compliance.

The adoption of this new standard did not have a material impact on the Organization's financial statements.

Inventory

Effective April 1, 2008, the Organization adopted the Canadian Institute of Chartered Accountants' new recommendation for inventory under CICA 3031 Inventories. The new Section provides guidance on the measurement and disclosure of inventories. The new recommendation establishes that inventories should be measured at the lower of cost and net realizable value and provides guidance on the determination of cost. There was no material impact on the financial statements from the retrospective application of this new accounting recommendation.

4. Cash and marketable securities

Marketable securities include GICs, stated at market value, which earned interest at an average rate of 4.17% at year end. Included in restricted cash and marketable securities are amounts due to reserve and trust accounts that are subject to restrictions.

	2009	*2008*
Cash and marketable securities, restricted	393,712	408,502
Cash and marketable securities, unrestricted	622,400	894,472
	1,016,112	1,302,974

5. Due from Winnipeg Regional Health Authority (WRHA)

	2009	*2008*
Vacation entitlement	133,100	133,100
Pre-retirement asset entitlement	189,988	144,597
	323,088	277,697

The amount of funding which will be provided by the WRHA for pre-retirement and vacation entitlement obligations was originally capped at the amount owing as at March 31, 2004 and has been recorded as a receivable on the balance sheet.

For the period April 1, 2004 to March 31, 2006, the WRHA partially funded the change in the pre-retirement obligation. For the period April 1, 2006 to March 31, 2009, the WRHA fully funded the change in the pre-retirement obligation.

Confirmation has been received from the WRHA guaranteeing the payment of this receivable by the Province. Therefore, a write down of the receivable is not required.

	2,426,819	2,592,469

Principal payments on long-term debt in each of the next five years are estimated as follows:

2010	64,990
2011	70,990
2012	77,560
2013	84,760
2014	92,640

8. Subsidy surplus reserve

Under the terms of the agreement with CMHC, excess federal assistance payments may be retained in a subsidy surplus reserve up to a maximum of $500 per unit plus interest. The monies that comprise the reserve are to be deposited in a separate bank account and/or invested only in accounts or instruments insured by the Canada Deposit Insurance Corporation or as may otherwise be approved by CMHC from time to time. The funds in this account may only be used to meet the future subsidy requirements of income-tested occupants over and above the maximum federal assistance. Withdrawals are credited to interest first then principal. When the fund has attained the maximum of $500 per unit, up to 10% of the unused subsidy during a year may be transferred to other projects owned by the borrower requiring additional assistance if they are within the same municipality or area and are assisted under the same program.

9. Replacement reserve

1081 Andrews Street
Under the terms of the agreement with WRHA, the replacement reserve account is to be credited at a minimum the amount of $18,776 (2008 - $18,776) annually. The current year allocation to the reserve is $31,484 (2008 - $28,571). These funds must be held in a separate bank account and/or invested only in accounts or instruments insured by the Canada Deposit Insurance Corporation or as may otherwise be approved by WRHA from time to time. The funds in the account may require approval by the WRHA.

1080 Powers Street
Under the terms of the agreement with MHRC, the replacement reserve account is to be credited in the amount of $15,000 (2008 - $15,000) annually until it accumulates $525,000 plus interest. These funds, along with accumulated interest, must be held in a separate bank account and/or invested only in accounts or instruments insured by the Canada Deposit Insurance Corporation or as may otherwise be approved by MHRC from time to time. The funds in the account may only be used as approved by MHRC. Withdrawals are credited to interest first and then principal.

1084 Powers Street
Under the terms of the agreement with CMHC, the replacement reserve account is to be credited in the amount of $13,700 (2008 - $13,700). These funds, along with accumulated interest, must be held in a separate bank account and/or invested only in accounts or instruments insured by the Canada Deposit Insurance Corporation or as may otherwise be approved by CMHC from time to time. The funds in the account may only be used as approved by CMHC. Withdrawals are credited to interest first and then principal. This agreement expired with the repayment of the CMHC loan.

10. Federal assistance

1084 Powers Street received federal assistance through CMHC pursuant to section 56.1 of the National Housing Act to reduce mortgage interest to 2% to enable the project to provide housing to low income individuals. The amount of assistance received in the year was $36,761 (2008 - $63,019).

11. Provincial home care

1084 Powers Street received $312,382 (2008 - $291,340) from the WRHA - Home Care Division during the year as a reimbursement of staff salaries and benefits paid. Effective December 1, 2008, a service purchase agreement changed the funding model to a fixed amount, and Luther Home Corporation is able to retain surpluses, if applicable.

12. Residential support program

364 Leila Avenue received $313,868 (2008 - $275,435) from Family Services and Housing during the year for residential services.

13. Contingencies

1084 Powers Street
MHRC provided a $12,251 forgivable "RRAP" loan to finance the upgrading of room 205 for handicap needs. On November 1, 2008 the forgivable loan was fully earned and the promissory note satisfied.

1080 Powers Street
MHRC is currently reviewing $29,252 of 2004 repairs and maintenance costs that are above the $38,500 approved budget amount, Approval is pending. In 2005, 2006, 2007, 2008 and 2009 repairs and maintenance costs exceed the approved budget amounts by $11,322, $18,744, $20,804, $19,646 and $31,173 respectively. If MHRC does not approve the excess expenditures they will have to be repaid to MHRC.

14. Economic dependence

A significant portion of Luther Home's revenues are received from the WRHA, MHRC and CMHC. Of total revenue, 72% (2008 - 67%) is from these organizations.

15. Capital management

The Organization's objective when managing capital is to safeguard the entity's ability to continue as a going concern, so that it can continue to provide services and benefits for its residents.

The Organization sets the amount of capital in proportion to risk and manages the capital structure and makes adjustments to it in light of changes to economic conditions and the risk characteristics of the underlying assets, as well as with consideration of externally imposed capital requirements. In order to maintain or adjust the capital structure, the Organization may sell investments or decrease expenses.

The Organization manages the following as capital:

	2009	*2008*
Invested in capital assets	**1,342,647**	1,017,234
Restricted net assets	**(16,691)**	(39,898)
Unrestricted net assets	**917,789**	1,269,124
	2,260,436	2,286,358

The Organization monitors capital on a quarterly basis, as well as annually, including the Board's input as to the capital management approach to take, and through advice from the Organization's investment advisors. During the year, the Organization's strategy is to protect the capital through maintaining low risk investments, as well as to minimize the deficiency of revenues over expenses.

16. Comparative figures

Certain comparative figures have been reclassified to conform with current year presentation.

AUDITOR'S REPORT

TO THE DIRECTORS,
M.F.L. OCCUPATIONAL HEALTH AND SAFETY CENTRE INC.,
Winnipeg, Manitoba.

We have audited the statement of financial position of the M.F.L. OCCUPATIONAL HEALTH AND SAFETY CENTRE INC. as at MARCH 31, 2009 and the statements of operations, of changes in fund balances and of cash flows for the year then ended. These financial statements are the responsibility of the Centre's management. Our responsibility is to express an opinion on these financial statements based on our audit.

Except as noted in the following paragraph, we conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In common with many organizations, the Centre derives revenue from donations, the completeness of which is not susceptible to satisfactory audit verification. Accordingly, our verification of these revenues was limited to amounts recorded in the records of the organization and we were not able to determine whether any adjustments might be necessary to other revenues, excess of revenues over expenditures, assets and net assets.

In our opinion, except for the adjustments, if any, which we might have determined to be necessary had we been able to satisfy ourselves concerning the completeness of the donations referred to in the preceding paragraph, these financial statements present fairly, in all material respects, the financial position of M.F.L. OCCUPATIONAL HEALTH AND SAFETY CENTRE INC. as at MARCH 31, 2009 and the results of its operations and cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

SUPPLEMENTARY AUDIT REPORT

This supplementary audit report is given to satisfy the obligations of M.F.L. OCCUPATIONAL HEALTH AND SAFETY CENTRE INC. to the Winnipeg Regional Health Authority. We report as follows:

a) In our opinion the accounting procedures and systems of control used during 2008/2009 by the M.F.L. OCCUPATIONAL HEALTH AND SAFETY CENTRE INC. were adequate, having regard to the size of the Centre, to preserve and protect its assets;

b) The funds of the Centre, primarily derived from the Winnipeg Regional Health Authority, have, to the best of our knowledge and belief, been applied for the purposes of the Centre following processes and procedures authorized by its Board.

c) Our audit revealed no material irregularity or discrepancy in the administration of the Centre nor any matters that do not now have the attention of the Board.

M.F.L. OCCUPATIONAL HEALTH AND SAFETY CENTRE INC.

NOTES TO FINANCIAL STATEMENTS

FOR THE YEAR ENDED MARCH 31, 2009

1. FORM OF ORGANIZATION

M.F.L. OCCUPATIONAL HEALTH AND SAFETY CENTRE INC. was incorporated as a non-share, non-profit organization under the Cooperatives Act of Manitoba and is non-taxable pursuant to paragraph 149(1)1 of the Income Tax Act. The purpose of the organization is to assist individuals and groups in Manitoba to improve workplace health and safety.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

These financial statements have been prepared in accordance with Canadian generally accepted accounting principles for non-profit organizations, which encompass the following principles:

i) Capital Assets

Capital asset acquisitions are accounted for on the following basis:

Purchases of computers, equipment and furniture are capitalized in the year of their purchase and are amortized over their useful life on a straight line basis over the following estimated number of years:

Computers	3 years
Office furniture	10 years
Equipment	10 years

Revenues received which are designated for capital purchases are deferred in the year of receipt and recognized annually at the same rate as the amortization on the related assets.

ii) Investments

Investments are recorded at lower of cost and market value.

iii) Recognition of Revenues

The organization follows the deferral method of accounting for contributions. Restricted contributions are recognized as revenue in the year in which related expenses are incurred. Unrestricted contributions are recognized as revenue when received or receivable if the amount to be received can be reasonably estimated and collection is reasonably assured.

Revenue from Winnipeg Regional Health Authority is recognized when received or receivable; any subsequent settlement is shown as an adjustment to income in the year of adjustment.

iv) *Fund Accounting*

Revenues and expenses related to program delivery and administrative activities are reported in the Operating Fund.

The Capital Asset Fund reports the assets, liabiities, revenues, and expense related to the Centre's capital assets.

The Special Projects fund reports on revenues and expenses related to the allocation to and from the Operating Fund by the vote of the Board of Directors of internally restricted funds to be used on extraordinary projects of the Centre.

The Union Centre Building Investment fund reports on the assets, liabilities, revenues and expenses related to the Centre's investment in the Manitoba Federation of Labour Building at 275 Broadway in Winnipeg, Manitoba.

v) *Financial Instruments*

It is management's opinion that the corporation is not exposed to significant interest, currency or credit risks arising from its financial instruments.

vi) *Use of Estimates*

Accounting estimates are included in financial statements to approximate the effect of past business transactions or events, or to approximate the present status of an asset or liability. It is possible that changes in future conditions could require changes in the recognized amounts for accounting estimates. Should an adjustment become necessary, it would be reported in earnings in the period in which it became known.

11. DEFERRED CONTRIBUTIONS FOR CAPITAL ASSETS

	WRHA $	Bldg. Other $	WCB Programs $	2009 $	2008 $
Capital assets	29,663	194,235	23,949	247,847	247,847
Accumulated amortization	(28,007)	(194,235)	(23,949)	(246,191)	(245,207)
Deferred contributions for capital assets	1,656	-	-	1,656	2,640

12. CONTINGENT LIABILITY

Subsequent to the annual audit, Winnipeg Regional Health Authority, the Centre's primary funder, performs its own financial reviews to determine additional amounts owed to the Centre or recoveries due back. As these amounts are not known at the time of the audit, Winnipeg Regional Health Authority revenues to the Centre are listed on these statements on a confirmed payment basis from Winnipeg Regional Health Authority with prior year adjustments listed in the year of notification.

13. PUBLIC SECTOR DISCLOSURE ACT

In accordance with the Public Sector Disclosure Act the following compensation in excess of $50,000 during the year was paid to M.F.L. employees:

	Wages	Benefits	Travel/ Other	Total
	$	$	$	$
Executive Director	63,289	2,621	86	65,996
Occupational Health Specialist	58,068	2,621	873	61,562
Occupational Health Nurses (Two positions)	131,638	5,423	880	137,941
Rural Health & Safety	60,715	-	3,384	64,099
Finance/Office Admin	60,806	2,640	-	63,446

14. COMPARATIVE FIGURES

Certain prior year figures have been reclassified to conform with the current year presentation.

15. ECONOMIC DEPENDENCE

The Centre derives the majority of its revenues pursuant to an agreement with the Winnipeg Regional Health Authority.

16. CORRECTION OF AN ERROR IN PRIOR PERIOD FINANCIAL STATEMENTS

The prior year financial statements understated the amount repayable to the W.R.H.A. This error has been corrected in the current year's financial statements. As a result the following changes have been made to the comparative figures in these financial statements.

The Repayable to W.R.H.A. liability was understated at March 31, 2008 by $8,616. As a result the repayable to W.R.H.A. has been increased by $8,616 and the unrestricted fund balance has been reduced by $8,616 in the 2008 comparative figures.

The prior year financial statements overstated the amount repayable to the Workers Compensation Board Aboriginal Workers Outreach program. This error has been corrected in the current year's financial statements. As a result the following changes have been made to the comparative figures in these financial statements.

The deferred revenue has been reduced by $28,205 and the unrestricted fund balances has been increased by the same amount.

Auditors' Report

To the Directors of
Main Street Project, Inc.

We have audited the statement of financial position of Main Street Project, Inc. as at March 31, 2009 and the statements of operations and changes in fund balances for the year then ended. These financial statements are the responsibility of the organization's management. Our responsibility is to express an opinion on these financial statements based on our audit.

Except as explained in the following paragraphs, we conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In common with many not-for-profit organizations, the organization derives part of its revenue from the general public in the form of donations which are not susceptible of satisfactory audit verification. Accordingly, our verification of revenue from these sources was limited to the amounts recorded in the records of the organization and we were not able to determine whether any adjustments might be necessary to contributions, fundraising events and contributed material and services revenue, excess of revenues over expenses, current assets and net assets.

Note 2(d) describes the amortization policy for property and equipment and states that the building at 71 Martha Street is being amortized at a rate equal to the reduction of the mortgage principal for the year. In this respect, the financial statements are not in accordance with Canadian generally accepted accounting principles.

In our opinion, except as explained in the preceding paragraphs, these financial statements present fairly, in all material respects, the financial position of the organization as at March 31, 2009 and the results of its operations, changes in fund balances and cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

On behalf of the Board

________________ Director ________________ Director

See accompanying notes to the financial statements.

1. Nature of operations

Main Street Project, Inc. exists to assist individuals in the City of Winnipeg through periods of crisis and help them make the best possible use of rehabilitation and support services. The organization is incorporated under the Manitoba Corporations Act as a not-for-profit organization and is a registered charity under the Income Tax Act.

2. Significant accounting policies

The organization follows accounting principles generally accepted in Canada in preparing its financial statements. The significant accounting policies used are as follows:

a) Fund accounting

The organization follows the deferral method of accounting for grants, allocations and contributions.

The Operating Fund accounts for revenues and expenses related to program delivery and administrative activities.

The Capital Fund reports the assets, liabilities, revenues and expenses related to the organization's property and equipment.

The Restricted Fund accounts for assets, liabilities, revenues and expenses segregated for specialized purposes.

b) Revenue recognition

Restricted amounts are recognized as revenue in the year in which the related expenses are incurred.

Unrestricted amounts are recognized as revenue when received or receivable and collection is reasonably assured.

c) Contributed goods and services

In the normal course of business, the organization receives food supplies in carrying out its support services. Neither the value nor cost of these contributed goods and services are recognized in these financial statements.

2. Significant accounting policies (continued)

d) Property and equipment

Purchased property and equipment are recorded in the capital fund at cost less capital grants. Contributed property and equipment are recorded in the capital fund at fair value at the date of contribution. Amortization is provided on a basis designed to write off the assets over their estimated useful lives, except for the 71 Martha building, as follows:

Building - 71 Martha		annual mortgage principal reduction
Buildings - 75 and 77 Martha	40 years	straight-line
Furniture and equipment	5 years	straight-line
Vehicles	10 years	straight-line

e) Financial Instruments

The organization's financial instruments consist of cash and term deposits, receivables, funds held in trust, restricted funds, payables and accruals and long - term debt. Unless otherwise stated in these financial statements, the fair value of the these financial assets and liabilities approximates their carrying value. It is management's opinion that the organization is not exposed to significant interest, currency or credit risk arising from these financial instruments.

f) Accounting estimates

The preparation of financial statements in accordance with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amount of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements and the reported amount of revenues and expenses during the reported period. These estimates are reviewed periodically and are reported in earnings in the period in which they become known. Actual results could differ from these estimates.

3. Receivables

	2009	2008
Province of Manitoba	**$ 88,859**	$ 50,876
City of Winnipeg Police Department	**90,960**	80,675
Manitoba Family Services & Housing	**-**	67,500
National Homelessness Initiative	**16,854**	10,437
Winnipeg Regional Health Authority (wage stabilization)	**34,771**	197,016
Winnipeg Regional Health Authority (additional funding)	**12,869**	103,680
Goods and Services Tax recoverable	**5,774**	6,788
Other	**916**	6,567
	$ 251,003	$ 523,539

4. Funds held in trust

In September 2000, the Board of Directors agreed that in appropriate cases, the organization may agree to administer funds on behalf of clients. The service is only provided to clients whose life, health or well-being may be compromised if the service is refused.

5. Property and equipment

	Cost	Accumulated Amortization	2009 Net Book Value	2008 Net Book Value
Land	$ 47,410	$ -	**$ 47,410**	$ 47,410
Building - 71 Martha	554,295	144,883	**409,412**	424,274
Buildings - 75 and 77 Martha	421,563	186,134	**235,429**	242,155
Furniture and equipment	202,824	146,871	**55,953**	50,656
Vehicles	1,099	495	**604**	714
	$ 1,227,191	$ 478,383	**$ 748,808**	$ 765,209

6. Long-term debt

	2009	2008 (Note 12)
M.H.R.C. first mortgage, repayable in monthly blended payments of $5,679, with interest at a rate of 7 1/4% per annum, due April 1, 2028.	**$ 737,701**	$ 752,563
Bank loan, repayable in monthly payments of $6,440 plus interest at a rate of prime less 1%, due December 1, 2009.	**12,839**	96,559
	750,540	849,122
Less: current portion	**(28,813)**	(92,156)
	$ 721,727	$ 756,966

The mortgage is secured by a general security agreement over the building.

Principal repayments of the long-term debt obligation estimated to be required in each of the next five years are as follows:

2010	$ 28,813
2011	17,153
2012	18,419
2013	19,779
2014	21,239

7. Restricted funds

	Staff Development Fund	Insurance Reserve	Replacement Reserve	Donations Reserve	**2009 Total**	2008 Total
Balance, beginning of year	$ 18,812	$ 6,040	$ 55,834	$ 203,418	**$ 284,104**	$ 221,871
Excess of revenues over expenses	773	1,008	1,802	28,457	**32,040**	49,656
Property and equipment additions	-	-	(13,489)	-	**(13,489)**	(3,887)
Transfer from (to) Operating Fund	-	-	4,050	(12,414)	**(8,364)**	16,464
Balance, end of year	$ 19,585	$ 7,048	$ 48,197	$ 219,461	**$ 294,291**	$ 284,104

Staff Development Fund

The Staff Development Fund comprises funds that have been internally restricted by the Board of Directors to subsidize staff training and retreat costs.

Insurance Reserve

The Insurance Reserve comprises externally restricted funds designated to cover costs relating to insurance deductibles.

Replacement Reserve

The Replacement Reserve has been externally restricted for the purposes of funding future major repairs to the building.

Donations Reserve

The Donations Reserve comprises donations and related interest internally restricted by the Board of Directors. The funds in the reserve are designated for the needs of clients which are not budgeted.

8. Contingency - Winnipeg Regional Health Authority

The organization receives funding from the Winnipeg Regional Health Authority (WRHA). Pursuant to the terms of the funding agreement, WRHA is entitled to recover surpluses realized by programs it funds.

Neither the likelihood nor the amount of recovery can be foreseen. Therefore, no provision has been made in the financial statements. Any surplus recovery will be accounted for as a charge to the surplus account in the year of recovery.

9. Contingency - Statement of Claim

The organization has an ongoing legal claim with a client regarding a wrongful detainment. The amount of the contingent loss, if any, cannot be reasonably estimated at this time.

10. Economic dependence

The volume of financial activity undertaken by Main Street Project, Inc. with its main funding bodies is of sufficient magnitude that discontinuance of their funding would endanger the ability of the organization to continue as a going concern.

11. Statement of cash flows

A statement of cash flows has not been presented as management is of the opinion that it would not provide additional meaningful information.

12. Comparative figures

Certain balances of the preceding year have been reclassified to conform with the current year's financial statement presentation.

AUDITORS' REPORT

To the Board of Directors of
Manitoba Baptist Home Society Inc.

We have audited the statement of financial position of Meadowood Manor Personal Care Home as at March 31, 2009 and the statements of operations and net assets and cash flows for the year then ended. These financial statements are the responsibility of the Personal Care Home's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of the Personal Care Home operations as outlined in Note 1 – Entity Definition as at March 31, 2009 and the results of its operations and its cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

1. ENTITY DEFINITION

Meadowood Manor (the "Home") is a personal care home operated by the Manitoba Baptist Home Society Inc. (the "Corporation"). The Corporation provides care and shelter to the elderly and infirm. The Corporation is a Registered Charity under the Income Tax Act and is exempt from income taxes provided certain requirements of the Act are met.

These financial statements present the financial position and results of operations of the Personal Care Home Fund of the Manitoba Baptist Home Society Inc. As such, these financial statements do not include all of the assets, liabilities, equity, revenues, and expenses of the Manitoba Baptist Home Society Inc.

2. SIGNIFICANT ACCOUNTING POLICIES

Revenue recognition

The Home follows the deferral method of accounting for contributions which include donations and government grants.

Under the Health Insurance Act and regulations hereto, the Home is funded primarily by the Province of Manitoba in accordance with budget arrangements established by the Winnipeg Regional Health Authority ("WRHA"). Operating grants are recorded as revenue in the period to which they relate. Grants approved but not received at the end of an accounting period are accrued. Where a portion of a grant is related to a future period, it is deferred and recognized in that subsequent period. The financial statements reflect agreed arrangements approved by the WRHA with respect to the year ended March 31, 2009.

With respect to actual operating results, certain adjustments to funding will be made by the WRHA after completion of its review of the Home's accounts. Any adjustments will be reflected in the year the final statement of approved costs is received from the WRHA.

a) Deficits

The WRHA shall not be responsible for past or future deficits of the Home in providing the services and debt service charges for any debt incurred resulting from operating deficits unless the parties otherwise mutually agree.

The WRHA shall not be responsible for the costs incurred by the Home other than those set forth in the service purchase agreement.

b) Surpluses

The Home may unconditionally retain the greater of 50% of its operating surplus in any fiscal year and 2% of the global budget indicated in its funding letter from the WRHA for such fiscal year. Any surplus beyond the foregoing levels shall be remitted to the WRHA on demand.

Unrestricted contributions are recognized as revenue when received or receivable if the amount to be received can be reasonably estimated and collection is reasonably assured.

Externally restricted contributions are recognized as revenue in the year in which the related expenses are recognized. Contributions restricted for the purchase of capital assets are deferred and amortized into revenue on a straight-line basis, at a rate corresponding with the amortization rate for the related capital assets.

---

2. SIGNIFICANT ACCOUNTING POLICIES *(continued)*

Revenue recognition *(continued)*

Restricted investment income is recognized as revenue in the year in which the related expenses are recognized. Unrestricted investment income is recognized as revenue when earned.

Revenue from the residential services and marketed services is recognized when the goods are sold or the service is provided.

Inventories

Inventories are carried at the lower of cost and net realizable value cost being determined on a first-in, first-out basis.

Employee future benefits

Pension and other employee future benefit costs are determined using the projected benefit method prorated on years of service and based on best estimate assumptions.

Contributed services

A substantial number of volunteers contribute a significant amount of their time each year. Because of the difficulty of determining their fair value, contributed services are not recognized in the financial statements.

Investments

Investments are recorded at cost. If the market value becomes lower than cost and this decline in value is considered to be other than temporary, the investments are written down to market value.

Capital assets

Purchased assets with a useful life beyond one year and a cost greater than $2,000 are recorded as capital assets at cost. Contributed capital assets are recorded at fair value at the date of contribution when the fair market value exceeds $2,000. Repairs and maintenance costs are recorded as an expense when incurred. Betterments, which extend the estimated useful life of an asset, are capitalized. When a capital asset no longer contributes to ongoing operations, its carrying amount is written down to its residual value.

Capital assets are amortized on a straight-line basis using the following annual rates:

Land improvements and site services	10 years
Building	40 years
Building improvements and renovations	10 years
Building service equipment	20 years
Computer hardware and software	3 years
Furniture and equipment	10 years

2. SIGNIFICANT ACCOUNTING POLICIES *(continued)*

Financial instruments

The Home's financial instruments consist of cash, investments, accounts receivable, due from WRHA, accounts payable and accrued expenses, residential charges received in advance, amounts due to a related party, due to WRHA, accrued pre-retirement entitlement, and long-term debt. Unless otherwise noted, it is management's opinion that the Home is not exposed to significant interest, currency or credit risks arising from these financial instruments.

Use of estimates

The preparation of financial statements in accordance with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements, and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from management's best estimates as additional information becomes available in the future.

3. CHANGE IN ACCOUNTING POLICY

a) Change in accounting policy – Financial Instruments

The Home adopted the new Canadian Institute of Chartered Accountants ("CICA") accounting standard, Handbook Section 3855 – *Financial Instruments – Recognition and Measurement*, on April 1, 2007. This standard provides guidance on recognizing financial instruments and non-financial derivatives on the statement of financial position. The standard also specifies how financial instrument gains and losses are presented. Initially, all financial assets and liabilities must be recorded on the statement of financial position at fair value. Subsequent measurement is determined by the classification of each financial asset and liability. Under this standard, all financial instruments are classified as one of:

i) held for trading,
ii) loans and receivables,
iii) held-to-maturity,
iv) available-for-sale, or
v) other liabilities.

Financial assets and liabilities classified as held-for-trading are measured at fair value with gains and losses recognized in excess of revenues over expenses. Financial instruments classified as held-to-maturity, loans and receivables and other liabilities are measured at amortized cost. Available-for-sale financial instruments are measured at fair value, with unrealized gains and losses recognized directly in unrestricted net assets.

Upon adoption of this new standard, the Home designated cash as held-for-trading; investments as held-to-maturity, accounts receivable, due from WRHA as loans and receivables, residential charges received in advance, accounts payable and accrued liabilities, due to WRHA, accrued salaries payable, accrued vacation pay, due to related party and long-term debt as other liabilities. The Home has no available-for-sale instruments.

Except for held-for-trading designated financial instruments, transaction costs that are directly attributable to the acquisition or issuance of financial assets or liabilities are accounted for as part of the respective asset or liability's carrying value at inception and amortized over the expected life of the financial instrument using the effective interest method. For held-for-trading financial assets and liabilities, transaction costs are recorded in the statement of operations as incurred.

3. CHANGE IN ACCOUNTING POLICY (continued)

The implementation of the standard on April 1, 2007 had no material impact on net assets.

b) Future accounting policy changes:

On December 1, 2006, the CICA issued three new accounting standards: Handbook Section 1535 – *Capital Disclosures,* Handbook Section 3862 – *Financial Instruments – Disclosures,* and Handbook Section 3863 – *Financial Instruments – Presentation.* These new standards became effective for the Home on April 1, 2008.

Section 1535 specifies the disclosure of:

i) an entity's objectives, policies and procedures and process for managing capital,
ii) quantitative data about what the entity regards as capital,
iii) whether the entity has complied with any capital requirements, and
iv) if it has not complied, the consequences of such non-compliance.

Section 3862 and 3863 replace Handbook Section 3861 – *Financial Instruments – Disclosure and Presentation,* revising and enhancing its disclosure requirements, and carrying forward unchanged its presentation requirements. These new sections place increased emphasis on disclosures about the nature and extent of risks arising from financial instruments and how the entity manages those risks.

The Home is currently assessing the impact that these new standards will have on its financial statements for the year ended March 31, 2010.

In September 2008, the AcSB approved amendments to several of the standards in the Section 4400 series of the Handbook.

The AcSB decided not to proceed with proposed amendments to Section 4450, *Reporting Controlled and Related Entities by Not-for-Profit Organizations,* pending the outcomes of its deliberations on the future basis for setting standards for the not-for-profit sector.

4. ACCOUNTS RECEIVABLE

	2009	2008
Receivable from residents	$ 27,356	$ 26,992
Allowance for doubtful accounts	(15,637)	(15,637)
	11,719	11,355
Goods and Services Tax rebate	10,129	9,013
Other accounts receivable	-	917
	$ 21,848	$ 21,285

5. INVESTMENTS

	2009	2008
Government bonds and term deposits	$ 666,564	$ 649,208

Market value $666,564 (2008 - $647,707).

6. DUE FROM WINNIPEG REGIONAL HEALTH AUTHORITY

	2009	2008
Current-		
Due from River Park Garden Personal Care Home	$ -	$ 7,367
Long-term-		
Net year-end funding receivable (2004/2005; 2005/2006; 2006/2007; 2007/2008; 2008/2009)	103,408	185,729
Current and future employee benefits recoverable-		
Vacation entitlement receivable at March 31, 2004	228,609	228,609
Pre-retirement entitlement receivable	279,080	327,778
	$ 611,097	$ 742,116

a) Pre-retirement benefits

The Manor has undertaken an actuarial valuation as of December 31, 2008 of the accrued pre-retirement benefits. The significant actuarial assumptions adopted in measuring the accrued pre-retirement entitlements include mortality and withdrawal rates, a discount rate of 6.70% (2008 - 5.5%) and a rate of salary increase of 2.5% (2008 - 3.5%) plus age related merit / promotion scale and a factor ranging from 0 - 1.31% (2008 - 0 - 1.31%) for disability. Actual payments made during the year for the Manor's pre-retirement entitlements were $68,326 (2008 - $4,976).

6. DUE FROM WINNIPEG REGIONAL HEALTH AUTHORITY (continued)

a) Pre-retirement benefits (continued)

The amount of funding which will be provided by the WRHA for future entitlement benefits was initially determined based on the future pre-retirement benefits payable at March 31, 2004, and was recorded as amounts recoverable from the WRHA. The recoverable has been adjusted, based on direction from the WRHA, to include the incremental increases in the related liability for fiscal 2007, 2008 and 2009, which include an interest component. The future employee benefits recoverable from the WRHA of $279,080 at March 31, 2009 has no specified terms of repayment.

The fair value of the future employee benefits recoverable from the WRHA approximates its carrying value as the interest component described above is comparable to current market rates.

b) Vacation pay

Each year, the WRHA funds a portion of the vacation pay liability of the Manor, which is limited to the amount established at March 31, 2004, of $228,609. This amount is included in employee benefits recoverable from WRHA on the statement of financial position.

7. CAPITAL ASSETS

	2009		2008	
	Cost	Accumulated Amortization	Cost	Accumulated Amortization
Land	$ 150,000	$ -	$ 150,000	$ -

	$ 6,163,324	$ 3,279,158	$ 6,060,124	$ 3,013,188
Net book value	$ 2,884,166		$ 3,046,936	

8. DUE TO RELATED PARTY

	2009	2008
Meadowood Manor Foundation Inc., fully repaid	$ -	$ 25,000
Meadowood Manor Foundation Inc., fully repaid	-	25,000
	-	50,000
Current portion due	-	50,000
	$ -	$ -

9. LONG-TERM DEBT

	2009	2008
Canada Mortgage and Housing Corporation ("CMHC"), bearing interest at 10%, repayable in monthly instalments of $11,719 (P&I), secured by a first mortgage on the building, maturing in February 2028.	**$ 1,278,144**	$ 1,302,886
Toronto-Dominion Bank - $981,313 term loan, bearing interest at prime, with monthly principal payments of $8,180 amortized over ten years, secured by a Letter of Comfort from Manitoba Health for the full amount, maturing in March, 2012.	**228,753**	326,913
Toronto-Dominion Bank - $331,000 term loan, bearing interest at prime minus 0.50%, with monthly principal payments of $2,845 amortized over ten years, secured by a Letter of Comfort from Manitoba Health, maturing in March, 2012.	**109,070**	143,210
	1,615,967	1,773,009
Current portion of long-term debt	**159,202**	157,042
	$ 1,456,765	$ 1,615,967

Principal repayments required over the next four years are as follows:

2009 - 2010	**$ 159,202**
2010 - 2011	**161,583**
2011 - 2012	**98,481**
2012 - 2013	**41,452**
Thereafter	**1,155,249**
	$ 1,615,967

Under the terms of the operating agreement with CMHC, a reduction in mortgage principal is received by a contribution from CMHC. The original contribution of $183,600 is being amortized at the rate of $3,672 annually. At March 31, 2009, the unamortized contribution is $69,462 which reduces the repayable mortgage principal to $1,208,681.

The interest on long-term debt expense of $108,427 is the net expense after receiving an annual interest subsidy of $26,267 from CMHC as provided in the mortgage agreement. The subsidy reduces the effective interest rate from 10% to 8% over the term of the agreement.

10. DEFERRED CONTRIBUTIONS

Deferred contributions related to expenses of future periods

	2009	2008
Balance, beginning of year	**$ 173,624**	$ 195,565
Add contributions received during the year – WRHA	**26,704**	26,704
Less amounts amortized to revenue for major repairs	-	(4,927)
Less expenditures for equipment replacement	**(64,617)**	(43,718)
Balance, end of year	**$ 135,711**	$ 173,624

Deferred contributions related to capital assets

Deferred contributions related to capital assets represent the unamortized amount of funding received that is designated for the purchase of capital assets. The funding is amortized at the same rate as the related capital assets and amortization deferred contributions related to capital assets is recorded as revenue in the statement of operations.

	2009	2008
Balance, beginning of year	**$ 1,643,722**	$ 1,645,576
Add additional contributions received:		
Assets purchased from deferred contributions related to expenses of future periods	**135,182**	43,718
Donation	-	1,380
Transfer from Donation Fund	-	20,000
WRHA equipment grants	-	9,930
WRHA long-term debt principal funding	**153,360**	151,411
Less amounts amortized to revenue	**(238,685)**	(228,293)
Balance, end of year	**$ 1,693,579**	$ 1,643,722

11. PENSION PLAN

Substantially all of the employees of the Home are members of The Healthcare Employees Pension Plan (successor to the Manitoba Health Organization, Inc. Plan) (the "Plan") which is a multi-employer defined benefit pension plan available to all eligible employees of the participating members of the Plan. Plan members will receive benefits based on the length of service and on the average of annualized earnings during the best five years of the last ten years that provide the highest earnings, prior to retirement, termination or death.

Pension assets consist of investment-grade securities. Market and credit risk on these securities are managed by the Plan by placing plan assets in trust and through the Plan investment policy.

Pension expense is based on Plan management's best estimates in consultation with its actuaries. Contributions to the Plan made during the year by the Home on behalf of its employees amounted to $178,809 (2008 - $167,397). This amount was determined by contributing 6.8% of eligible salaries up to $43,700 and 8.4% of the portion of salaries in excess of $43,700 and matches contributions by employees. The funding objective is for employer contributions to the Plan to remain equal to employee contributions.

Variances between actuarial funding estimates and actual experience may be material and any differences are generally to be funded by the participating members. The most recent actuarial valuation of the Plan, as at December 31, 2008, indicates the Plan is fully funded.

12. COMPARATIVE FIGURES

Certain of the comparative figures have been reclassified to conform to the current year's presentation.

STEFANSON LEE ROMANIUK
CHARTERED ACCOUNTANTS

AUDITORS' REPORT

To the Board of Directors of
Middlechurch Home of Winnipeg Inc.

We have audited the non-consolidated statement of financial position of Middlechurch Home of Winnipeg Inc. as at March 31, 2009 and the non-consolidated statements of operations, changes in net assets and cash flows for the year then ended. These financial statements are the responsibility of Middlechurch Home's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these non-consolidated financial statements present fairly, in all material respects, the financial position of Middlechurch Home of Winnipeg Inc. as at March 31, 2009 and the results of its operations and its cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

MIDDLECHURCH HOME OF WINNIPEG INC.

Notes to Non-Consolidated Financial Statements
March 31, 2009

---

1. **Nature of Operations:**

Middlechurch Home of Winnipeg Inc. (Middlechurch Home) was incorporated, without share capital, under the laws of Manitoba on April 29, 1884. Middlechurch Home provides residential care services and as a registered charity, under the Income Tax Act, is exempt from income taxes.

2. **Significant accounting policies:**

a) Basis of presentation:

Middlechurch on the Red Inc.

Middlechurch Home has controlling interest in Middlechurch on the Red Inc., (MORI) by virtue of its ability to appoint three of the five members of it's Board of Directors and Middlechurch Home is the sponsor of MORI in operating a life-lease apartment complex.

MORI has not been consolidated in Middlechurch Home's financial statements. Financial statements of MORI are available upon request. A financial summary at March 31, 2009 and 2008 and for the years then ended are as follows:

	2009	2008
Financial position		
Total assets	$ 4,371,867	4,469,695
Total liabilities	$ 4,132,926	4,254,225
Total net assets	238,941	215,470
	$ 4,371,867	4,469,695
Results of operations:		
Total revenue	$ 330,510	334,220
Total expenses	297,928	291,856
Excess of revenue over expense	$ 32,582	42,364

b) Revenue recognition:

Middlechurch Home follows the deferral method of accounting for contributions, which include donations and government grants.

Middlechurch Home is funded primarily by the Province of Manitoba in accordance with budget arrangements established by the Winnipeg Regional Health Authority (WRHA). Operating grants are recorded as revenue in the period to which they relate. These financial statements reflect agreed arrangements approved with respect to the year ended March 31, 2009. Middlechurch Home's Service Purchase Agreement with the WRHA continues in effect until March 31, 2012.

Unrestricted contributions are recognized as revenue when received or receivable if the amount to be received can be reasonably estimated and collection is reasonably assured.

Externally restricted contributions are recognized as revenue in the year in which the related expenses are recognized. Contributions restricted for the purchase of capital assets are deferred and amortized into revenue at a rate corresponding with the amortization rate for the related capital asset.

Restricted investment income is recognized as revenue in the year in which the related expenses are recognized. Unrestricted investment income is recognized as revenue when earned.

Revenue from residential and other services is recognized when the services are provided or the goods are sold.

c) Inventory

Inventory, which consists mainly of medical supplies, is valued at the lower of cost, on a first-in first-out basis, and replacement cost.

d) Property and equipment

Purchased property and equipment are recorded at cost. Contributed property and equipment are recorded at fair value at the date of contribution. Repairs and maintenance costs are charged to expense. Betterments which extend the estimated life of an asset are capitalized. When property and equipment no longer contributes to Middlechurch Home's ability to provide services, its carrying amount is written-down to its residual value.

Property and equipment are amortized on a straight-line basis using the following annual rates:

Land improvements	20 years
Buildings	30, 40 and 50 years
Computer equipment and furniture and equipment	5 - 10 years

e) Operating surplus or deficit

In accordance with the terms and conditions of the Service Purchase Agreement, annual operating deficits are the responsibility of Middlechurch Home. Middlechurch Home may retain the greater of 50 percent of the operating surplus and 1 percent of the global budget as provided by the WRHA, in any fiscal year. Those surpluses that are retained by Middlechurch Home are subject to review by the WRHA. The remaining operating surplus of Middlechurch Home in any fiscal year is repayable to the WRHA. For fiscal 2009 and 2008 Middlechurch Home has received permission from the WRHA to retain all of its operating surplus.

f) Contributed services

A substantial number of volunteers contribute a significant amount of their time each year. Because of the difficulty of determining the fair value, contributed services are not recognized in the financial statements.

g) Future employee pre-retirement benefits

The cost of Middlechurch Home's future employee pre-retirement benefits are accrued as earned based on an actuarial estimation. The estimation of the future employee pre-retirement benefits has been performed using the projected unit credit service pro-rated on service actuarial cost method.

The significant actuarial assumptions adopted in measuring Middlechurch Home's future employee pre-retirement benefits payable include mortality and withdrawal rates, a discount rate of 6.7% (2008 5.5%), a rate of salary increase of 3.5% (2008 - 3.5%), plus an age-related merit/promotion scale with no provision for disability.

h) Internally restricted net assets:

Internally restricted net assets represents transactions and contributions related to donations and auxiliary activities. All expenditures require approval of the Board of Directors.

i) Use of estimates

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the year. Actual results could differ from those estimates.

3. Receivable from Winnipeg Regional Health Authority:

	2009	2008
Receivable relating to		
Employee retirement benefits	$ 172,317	104,609

	$ 18,928,441	11,996,184	6,932,257	7,336,984

7. Operating line of credit:

Middlechurch Home has a demand operating line of credit with a maximum limit of $350,000 and bears interest at bank prime rate. The security on the operating line of credit is the same as the security disclosed in note 11 on the term loans with the Royal Bank of Canada. The operating line of credit was not utilized at March 31, 2009 and 2008.

8. Accounts payable and accrued liabilities:

	2009	2008
Accounts payable and accrued liabilities	$ 260,342	333,138
Wages payable	418,189	268,109
	$ 678,531	601,247

9. Advances payable:

Middlechurch Home has received funding advances from the Winnipeg Regional Health Authority in the amount of $81,808 relating to the 2003/04 fiscal year and $129,412 relating to the 2008/09 fiscal year. These advances are unsecured, non-interest bearing and have no fixed terms of repayment.

10. Due (to) from Residents' Trust Fund:

Funds are held in trust for Home residents and the Residents' Comfort Fund. These funds are not included in these financial statements.

		2009	2008
Cash	$	47,000	40,324
Deposits		(4,079)	(1,797)
Residents' Trust funds		(45,183)	(37,596)
Due (to) from Resident's Trust Fund	$	(2,262)	931

11. Long-term debt:

		2009	2008
Canada Mortgage and Housing Corporation, mortgage payable with monthly payments of $3,360 including interest at 5.75%, maturing in 2018	$	299,368	321,977
Royal Bank of Canada term loan, with monthly principal payments of $4,215 plus interest at prime, maturing July 2008, supported by a letter of comfort from WRHA		-	16,560
Royal Bank of Canada term loan, with monthly payments of $1,625 including interest at prime less 0.50%, maturing December 2013, supported by a letter of comfort from WRHA		117,004	137,144
Royal Bank of Canada term loan, with monthly payments of $3,310 plus interest at prime less 0.50%, maturing March 2011, supported by a letter of comfort from WHRA		79,977	119,810
		496,349	595,491
Current portion		82,948	99,859
	$	413,401	495,632

Principal payments due in each of the next five years and thereafter are approximately as follows:

2010	$ 82,948
2011	45,165
2012	46,112
2013	47,683
2014	49,351
2015 and thereafter	225,090

12. Deferred contributions:

a) Expenses for future periods:

Deferred contributions related to expenses for future periods represent unspent externally restricted grants for authorized repairs and maintenance.

	2009	2008
Balance, beginning of year	$ 23,450	27,826
Additional contributions received	11,695	11,695
Less amount transferred to deferred contributions - property and equipment	(15,672)	(16,071)
	$ 19,473	23,450

b) Property and equipment

Deferred capital contributions related to property and equipment represent the unspent and unamortized amount of donations and grants received for the purchase of property and equipment. The amortization of capital contributions is recorded as revenue in the statement of operations.

	2009	2008
Balance, beginning of year	$ 5,837,138	6,167,596
Additional contributions received	85,886	142,442
Add: amount transferred from deferred contributions - expenses for future periods	15,672	16,071
Less amounts amortized to revenue	(500,914)	(488,971)
	$ 5,437,782	5,837,138

The balance of unamortized capital contributions related to property and equipment consists of the following:

	2009	2008
Unamortized capital contributions used to purchase property and equipment	$ 5,405,922	5,788,393
Unspent contributions	31,860	48,745
	$ 5,437,782	5,837,138

13. Investment in property and equipment:

Investment in property and equipment is calculated as follows:

	2009	2008
Property and equipment	$ 6,932,257	7,336,984
Amounts financed by		
Deferred contributions	(5,405,922)	(5,788,393)
Mortgage payable	(299,368)	(321,977)
	$ 1,226,967	1,226,614

14. Recoveries and other revenue:

	2009	2008
Cafeteria	$ 61,218	64,737
Hair Salon	70,806	69,046
Parking	48,096	47,992
Administrative	27,383	30,988
Community services	34,835	45,838
Shop and tavern	22,121	20,882
Miscellaneous	27,093	24,735
Vending	2,736	2,579
	$ 294,288	306,797

15. Related party transactions:

During the year, Middlechurch Home had the following transactions with Middlechurch on the Red, Inc., an organization controlled by Middlechurch Home:

	2009	2008
Revenues		
Administration fees	$ 6,000	6,000
Water charges	4,800	4,800
Insurance fees	4,245	5,999
Maintenance	8,288	7,023

Middlechurch Home exercises significant influence over The Middlechurch Home of Winnipeg Foundation Inc. (the Foundation) by virtue of its ability to appoint some of the Foundation's Board of Directors. The Foundation was established to raise funds for the use of Middlechurch Home. The Foundation is incorporated under the Canada Corporations Act and is a registered charity under the Income Tax Act. Net resources of the Foundation amount to $21,304 (2008 - $20,949) and are available, at the discretion of the Foundation's Board of Directors, to Middlechurch Home.

16. Future employee benefits and employee benefits:

i) Middlechurch Home maintains an employee pre-retirement benefit plan for substantially all of its employees. The plan provides benefit payments to eligible retirees based on length of service and on career earnings from initial eligibility.

At March 31, 2009, based on an actuarial estimate, the pre-retirement benefit plan's obligations are estimated to be approximately $735,948 (2008 - $730,762) for which Middlechurch Home has provided an accrued future employee pre-retirement benefits liability on the statement of financial position.

The amount of funding which will be provided by the WRHA for pre-retirement benefits was initially based on the pre-retirement liability at March 31, 2004, and was recorded as a long-term receivable on the statement of financial position.

The recoverable has been adjusted, based on direction from WRHA to include the incremental increases in the related liability which include an interest component. The increase recorded in fiscal 2009 was $5,186 (2008 - $8,072) and is recorded in the statement of operations.

In 2007, the WRHA approved partial funding of the incremental increases in the future employee pre-retirement benefits liability for 2005 and 2006 of $13,784. This amount was received in June 2008. The future employee pre-retirement benefits recoverable from WRHA at March 31, 2009 aggregates $712,797 (2008 - $707,611) and has no specified payment terms.

Beginning April 1, 2005, the WRHA established a policy of providing additional funding for approximately 70% of actual pre-retirement benefits paid. Actual funding provided by the WRHA for 2009 was 65.1% (2008 - 64.25%) of actual pre-retirement benefits paid. The funding shortfall for 2009 of $36,298 (2008 - $17,546) was paid from operating funds.

Additional information about Middlechurch Home's employee pre-retirement benefit plan is as follows:

		2009	2008
Net benefit cost expensed in statement of operations:			
Pre-retirement benefits paid included in salaries	$	41,481	17,546
Change in pre-retirement benefits payable included in future employee pre-retirement benefits		5,186	8,072
WRHA additional funding for pre-retirement benefits paid		67,708	31,534
WRHA funding for change in pre-retirement benefits payable		5,186	8,072
Future employee pre-retirement benefits payable		735,948	730,762

ii) All eligible employees of Middlechurch Home are members of the Healthcare employees Pension Plan - Manitoba, a multi-employer defined pension plan. As individual entities within the plan are not able to identify their share of the underlying assets and liabilities, Middlechurch Home is accounting for the plan as a defined contribution plan. During the year, Middlechurch Home contributed $499,767 (2008 - $444,197) on behalf of its employees. The most recent actuarial valuation of the plan as at December 31, 2007 indicated that the plan was fully funded. A change in the underlying actuarial assumptions could cause a change in the actuarial value of accrued pension benefits and required service contributions.

16. Future employee benefits and employee benefits, continued:

iii) The cost of Middlechurch Home's vacation benefits is accrued when the benefits are earned by employees and is reported as vacation payable on the statement of financial position. The vacation liability at March 31, 2009 is $743,388 (2008 - $657,871). The WRHA has agreed to fund the vacation payable that existed at March 31, 2004 of $487,714. This amount is reported as employee benefits recoverable on the statement of financial position.

17. Fair value of financial assets and financial liabilities:

The carrying value of the long-term receivable from Winnipeg Regional Health authority approximates its fair value as the terms and conditions of the receivable are comparable to current market terms and conditions for similar items.

The fair value of long-term debt approximates its carrying value. Fair value of the long-term debt has been determined using future payments of principal and interest of the actual outstanding long-term debt discounted at current interest rates available to Middlechurch Home.

The fair value of the future employee pre-retirement benefits recoverable from Winnipeg Regional Health authority and future employee pre-retirement benefits payable approximate their carrying value as the interest component is comparable to current market rates.

The fair value of the Middlechurch Home's other financial assets and financial liabilities approximates carrying value due to their short term to maturity.

18. Comparative figures:

The financial statements as at March 31, 2008 and for the year then ended were audited by other auditors who expressed an opinion without reservation on those financial statements in their report dated May 9, 2008. Certain comparative figures have been reclassified to conform with presentation adopted in the current year.

Auditors' Report

To the Members of
MOUNT CARMEL CLINIC:

We have audited the statement of financial position of **MOUNT CARMEL CLINIC** as at March 31, 2009 and the statements of operations, changes in net assets and cash flows for the year then ended. These financial statements are the responsibility of the Clinic's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of the Clinic as at March 31, 2009 and the results of its operations and its cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

Supplementary Information		
Interest paid	$ 14,156	$ 15,171

MOUNT CARMEL CLINIC
Summary of Significant Accounting Policies

March 31, 2009

Fund Accounting

These financial statements have been prepared by management in accordance with Canadian generally accepted accounting principles for not-for-profit organizations established by the Canadian Institute of Chartered Accountants (CICA) using the deferral method of accounting for contributions which include donations and government grants.

Revenue Recognition

The Clinic is funded primarily through the Winnipeg Regional Health Authority (WRHA) by the Province of Manitoba in accordance with budget arrangements established by WRHA. Operating grants are recorded as revenue in the period to which they relate. Grants approved but not received at the end of an accounting period are accrued. Where a portion of a grant relates to a future period, it is deferred and recognized in that subsequent period. These financial statements reflect agreed funding arrangements approved by WRHA with respect to the year ended March 31, 2009.

Unrestricted contributions are recognized as revenue when received or receivable if the amount to be received can be reasonably estimated and collection is reasonably assured.

Externally restricted contributions are recognized as revenue in the year in which the related expenses are recognized. Contributions restricted for the purchase of capital assets are deferred and amortized into revenue on a straight-line basis, at a rate corresponding with the amortization rate for the related capital assets.

Restricted investment income is recognized as revenue in the year in which the related expenses are recognized. Unrestricted investment income is recognized as revenue when earned.

Inventories

Inventories are carried at the lower of cost and net realizable value determined by the first-in, first-out method.

Employee Future Benefits

Pension and other employee future benefit costs are determined using the projected benefit method prorated on years of service and based on best estimate assumptions.

For the 2005 and 2006 fiscal years, out-of-globe funding for these costs was not provided by Manitoba Health/WRHA.

MOUNT CARMEL CLINIC
Summary of Significant Accounting Policies

March 31, 2009

Capital Assets

Purchased capital assets are recorded at cost. Contributed capital assets are recorded at fair value at the date of contribution. Capital assets funded completely by grants are recorded in the statement of financial position. Amortization is provided on a straight-line basis over the assets' estimated useful lives as indicated below:

Buildings	40 years
Furniture, fixtures and equipment	10 years
Computer equipment	5 years
Automobiles	7 years

Contributed Services

Volunteers contributed a significant number of hours to assist Mount Carmel Clinic carrying out its service delivery activities. Because of the difficulty in determining their fair value, contributed services are not recognized in the financial statements.

Financial Instruments

The Clinic utilizes various financial instruments.

All transactions related to financial instruments are recorded on a settlement date basis.

The Clinic classifies its financial instruments as follows based on the purpose for which the asset was acquired and follows the disclosed accounting policy for each category.

Assets/Liability	Category	Measurement
Cash	Held for trading	Fair value
Short-term investments	Held for trading	Fair value
Accounts receivable	Loans and receivables	Amortized cost
Vacation entitlements receivable	Loans and receivables	Amortized cost
Retirement obligations receivable	Loans and receivables	Amortized cost
Accounts payable and accruals	Other financial liabilities	Amortized cost
Related Parties	Loans and receivables	Amortized cost

- Held for trading items are carried at fair value, with changes in their fair value recognized in the statement of operations.

- Other financial liabilities are carried at amortized cost, using the effective interest method.

- Loans and receivables are carried at amortized cost, using the effective interest rate method, less any provision for impairment.

MOUNT CARMEL CLINIC
Summary of Significant Accounting Policies

March 31, 2009

New Accounting Pronouncements

Recent accounting pronouncements that have been issued but are not yet effective, and have a potential implication for the Clinic, are as follows:

Financial Statement Concepts

CICA Handbook Section 1000, Financial Statement Concepts has been amended to focus on the capitalization of costs that truly meet the definition of an asset and de-emphasizes the matching principle. The revised requirements are effective for annual and interim financial statements relating to fiscal years beginning on or after October 1, 2008. The Clinic is currently evaluating the impact of the adoption of this change on the disclosure within its financial statements.

Financial Instruments - Disclosure and Presentation

On October 15, 2008 the CICA deferred indefinitely the requirement of not-for-profit organizations to implement new standards dealing with certain financial instrument disclosures and presentation. The Clinic elected to defer application of these standards.

Financial Statements by Not-for-Profit Organizations

In September 2008, a number of standards applicable to not-for-profit organizations were amended and issued. The changes are intended to improve financial reporting by not-for-profit organizations and make not-for-profit standards consistent with those of profit-oriented enterprises when they address the same issues. These amendments which are effective for fiscal years beginning on or after January 1, 2009 will not have a significant impact on the results of operations or financial position.

In December 2008, the Accounting Standards Board (AcSB) and the Public Sector Accounting Board issued a joint Invitation to Comment, "Financial Reporting by Not-for-Profit Organizations," to invite feedback on the future of financial reporting by not-for-profit organizations. The financial reporting options under consideration by the AcSB include Internal Financial Reporting Standards, private enterprise standards and public sector standards. Until the strategy has been determined and implemented, not-for-profit organizations will continue to apply current accounting standards.

The Clinic continues to monitor the developments in this area and evaluate the implications of the potential changes in financial reporting standards.

1. Entity Definition

Mount Carmel Clinic is a multi-disciplinary community health centre committed to providing comprehensive health care to the community. Mount Carmel Clinic is incorporated under the Mount Carmel Clinic Act, enacted by the Manitoba Legislature, as a not-for-profit organization and is a registered charity under the Income Tax Act.

The Clinic considers its capital to be comprised of its Operating, Day Care, Donation and Capital Funds as well as its Net Assets Invested in Capital Assets. There have been no changes in what the Clinic considers to be its capital since the previous period.

As a not-for-profit entity, the Clinic's operations are reliant on revenues generated annually. The Clinic has accumulated unrestricted funds over its history, which are included in the Capital Fund balance in the Statement of Changes in Net Assets. A portion of the accumulated unrestricted funds is retained as working capital (current assets less current liabilities) which may be required from time to time due to timing delays in receiving its primary funding. The remaining unrestricted funds are available for the use of the Clinic at the Board's discretion.

Operating Fund

The Operating Fund records the day-to-day operations of the Clinic.

Day Care Fund

The Day Care Fund records the day-to-day operations of the Anne Ross Day Nursery.

Donation Fund

The Donation Fund records donor receipts and interest on investments and disburses the funds based on specific instructions or board approval.

Capital Fund

The Capital Fund is used to fund the Clinic's renovation projects and the purchase of equipment and furnishings.

Invested in Capital Assets

Invested in Capital Assets represents the Clinic's net assets that are not available for other purposes because they have been invested in capital assets. (See Note 11)

2. Change in Accounting Policy

Capital disclosures

On April 1, 2008 the Clinic adopted a requirement of the CICA to provide disclosure about how it manages its net assets (See Note 1).

3. Accounts Receivable

	2009	2008
Receivable from clinic services	$ 95,460	$ 239,395
Other receivables	29,795	68,026
	$ 125,255	$ 307,421

4. Due from WRHA

	2009	2008
2004/05 funding adjustment	$ -	$ 38,083
2005/06 funding adjustment	58,037	58,037
2006/07 funding adjustment	-	22,214
2007/08 funding adjustment	17,043	106,273
2008/09 funding adjustment	242,165	-
2007/08 Day Care funding	90,382	90,382
2008/09 Day Care funding	68,847	-
	$ 476,474	$ 314,989

5. Accrued Vacation Entitlements

The Clinic records a provision for accrued vacation entitlements. Prior to March 31, 2004 changes in the liability related to vacation were recoverable from Manitoba Health. At that date, Manitoba Health advised that subsequent to March 31, 2004 all funding related to past and future vacation entitlement costs would be included in in-globe funding and that the maximum liability to be recognized by Manitoba Health to facilities would be capped at March 31, 2004 levels. Accordingly, each year as vacation entitlements are paid and earned by the Clinic's employees, the related vacation entitlement receivable is collected and re-established up to this maximum amount.

An analysis of the changes in the vacation entitlements receivable from Manitoba Health is as follows:

	2009	2008
Balance, beginning of year	$ 381,653	$ 381,653
Net changes in vacation entitlements receivable	-	-
Balance, end of year	$ 381,653	$ 381,653

An analysis of the changes accrued in the vacation entitlements is as follows:

	2009	2008
Balance, beginning of year	$ 417,132	$ 396,942
Net increase in accrued vacation entitlements	57,601	20,190
Balance, end of year	$ 474,733	$ 417,132

6. Capital Assets

	2009 Cost	2009 Accumulated Amortization	2008 Cost	2008 Accumulated Amortization
Landscaping	$ 222,702	$ -	$ 222,702	$ -
Buildings	4,702,494	2,202,176	4,702,494	2,081,664
Furniture, fixtures and equipment	413,846	158,364	413,846	116,980
Computer equipment	45,622	17,070	12,695	7,922
Automobiles	66,952	47,825	66,952	38,260
	$ 5,451,616	$ 2,425,435	$ 5,418,689	$ 2,244,826
Cost less accumulated amortization		$ 3,026,181		$ 3,173,863

7. Due to WRHA

	2009	2008
Other	$ 55,647	$ 32,395

8. Deferred Revenue

	2009	2008
Operating Fund		
Day Care Subsidy Advance	$ 15,510	$ 15,510
Day Care Grant	16,188	7,549
Dental	24,721	46,000
Fetal Alcohol Program	101,377	73,998
Other	114,100	76,474
Parenting Student Program	34,371	28,583
Primary Health	73,102	45,521
FACT Coalition	43,595	84,053
Come in You're Welcome	241,927	181,672
	664,891	559,360
Donation Fund		
Sage House	26,217	20,765
Mount Carmel Foundation	123,101	84,789
Child Day Care Centre	20,437	18,226
Other	-	5,857
	169,755	129,637
	$ 834,646	$ 688,997

9. Deferred Contributions

Expenses of future periods

Deferred contributions related to expenses of future periods represent unspent externally restricted funding.

	2009	2008
Balance, beginning of year	$ 40,770	$ 23,990
Add amounts received during year	61,200	11,980
Transfer from Day Care	4,800	4,800
Balance, end of year	$ 106,770	$ 40,770

Capital Assets

Deferred capital contributions related to capital assets represent the unamortized amount of donations, grants received and funding of approved borrowings for the purchase of capital assets. The amortization of capital contributions is recorded as revenue in the statement of operations at rates which match the amortization of the related capital asset purchased with the donation, grant or approved borrowing.

	2009	2008
Balance, beginning of year	$ 2,441,969	$ 1,721,496
Additional contributions received	116,779	846,261
Less amounts amortized to revenue	(124,894)	(125,788)
Balance, end of year	$ 2,433,854	$ 2,441,969

10. Operating Line of Credit

The Clinic has an operating line of credit for $275,000 which bears interest at the bank's prime rate. The balance in the line of credit at year end was $NIL (2008 - $NIL). The Clinic's approved line of credit is secured by a general assignment of the Clinic's assets.

11. Investment in Capital Assets

A. Investment in capital assets is calculated as follows:

	2009	2008
Capital assets	$ 3,026,181	$ 3,173,863
Less amounts financed by		
Deferred contributions	2,433,854	2,441,969
Advances from other funds (net of cash on deposit)	19,496	140,438
	$ 572,831	$ 591,456

B. Change in net assets invested in capital assets is calculated as follows:

	2009	2008
Excess (deficiency) of revenues over expenditures		
Amortization of deferred contributions related to capital assets	$ 124,894	$ 125,788
Amortization of capital assets	(180,609)	(170,635)
Other items (net)	(121)	401
	$ (55,836)	$ (44,446)
Net changes in investment in capital assets		
Purchase of capital assets	$ 32,927	$ 1,064,694
Amounts funded by		
Deferred contributions	(116,779)	(846,261)
Advances to (from) other funds	121,063	(259,507)
Repayment of loan	-	145,075
	$ 37,211	$ 104,001

12. Revenue from the WRHA

	2009	2008
Revenue as per WRHA final funding document (March 16, 2009 EFT)	$ 6,268,841	$ 6,177,036
Add:		
Midwifery	31,197	29,350
Wound clinic security	23,455	20,734
Stat pay adjustment	-	1,800
Out of Globe		
Pre-retirement leave	13,569	17,237
Fax line change	-	6,927
MNU agreement	84,148	36,589
MMA Agreement	11,082	-
CUPE Agreement	87,812	-
Non Union Agreement	10,100	-
Diabetes program funding	-	14,511
Wage standardization	25,544	33,457
Skim program	1,921	2,923
	288,828	163,528
Deduct:		
Medical remuneration	(23,252)	(15,923)
Total funding approved by WRHA	6,534,417	6,324,641
Add:		
Day Care operations	68,848	133,732
Deduct:		
Day Hospital Restructuring	(24,200)	-
Reserve for major repairs	(7,000)	(7,000)
Deferred revenue - insurance deductible	(1,000)	(1,000)
	(32,200)	(8,000)
Revenue from WRHA	$ 6,571,065	$ 6,450,373

13. Commitments and Contingencies

A) The nature of the Clinic's activities is such that there is usually litigation pending or in prospect at any time. With respect to claims at March 31, 2009, management believes the Clinic has valid defences and appropriate insurance coverages in place. In the event any claims are successful, management believes that such claims are not expected to have a material effect on the Clinic's financial position.

B) On July 1, 1987, a group of health care organizations, ("subscribers"), formed Healthcare Insurance Reciprocal of Canada ("HIROC"). HIROC is registered as a Reciprocal pursuant to provincial Insurance Acts, which permit persons reciprocal contracts of indemnity insurance. HIROC facilitates the provision of liability insurance coverage to health care organizations in the provinces of Ontario, Manitoba, Saskatchewan and Newfoundland. Subscribers pay annual premiums, which are actuarially determined, and are subject to assessment for losses in excess of such premiums, of any experienced by the group of subscribers for the years in which they were a subscriber. No such assessments have been made to March 31, 2009.

The Clinic is a named insured under the WRHA policy with HIROC.

C) The Clinic leases equipment under the provisions of operating leases for a 60 month period which expire up to January 2013. Commitments to expire are as follows:

2010	$	13,507
2011		8,992
2012		4,477
2013		2,805

14. Employee Future Benefits

a) Accrued retirement entitlement

Based upon collective agreements and/or non-union policy, employees of the Clinic are entitled to a pre-retirement leave benefit if they are retiring in accordance with the provisions of the applicable Clinic Group Pension Plan. The Clinic's contractual commitment is to pay based upon the following:

Four days of salary per year of service upon retirement if the employee complies with one of the following conditions:

i. has 10 years service and has reached the age 55

ii. qualifies for the "eighty" rule which is calculated by adding the number of years of service to the age of the employee

iii. retires at or after age 65

iv. terminates employment at any time due to permanent disability

The Clinic undertook an actuarial valuation of the pre-retirement leave benefit for accounting purposes as at March 31, 2009. The significant actuarial assumptions adopted in measuring the Clinic's accrued retirement entitlements include mortality and withdrawal rates, a discount rate of 6.7% (2008 - 5.5%) and a rate of salary increase of 3.5% (2008 - 3.5%) plus age related merit/promotion scale with no provision for disability.

The amount recorded as a receivable from the Province for pre-retirement costs was initially determined based on the value of the corresponding actuarial liability for pre-retirement costs as at March 31, 2004. Subsequent to March 31, 2004, the Province has included in its ongoing annual funding to the Clinic, an amount equivalent to the change in the pre-retirement liability, which includes annual interest accretion related to the receivable. The receivable will be paid by the Province when required.

Commencing in 2006/07, the Winnipeg Regional Health Authority assumed responsibility for funding the annual increase in the obligation each year. This amount will also be paid when required and the WRHA holds funding to meet this obligation.

	2009	2008
Employee future benefits recoverable from		
Manitoba Health	$ 387,859	$ 387,859
Winnipeg Regional Health Authority	85,954	38,954
	$ 473,813	$ 426,813

14. Employee Future Benefits (continued)

a) Accrued retirement entitlement (continued)

An analysis of the changes in the employee benefits payable is as follows:

	2009	2008
Balance, beginning of year	$ 547,847	$ 520,639
Net increase in pre-retirement entitlements	43,947	27,208
Balance, end of year	$ 591,794	$ 547,847

b) Pension plan

Substantially all of the employees of the Clinic are members of the Healthcare Employees Pension Plan (a successor to the Manitoba Health Organization Inc. Plan) (the "Plan") which is a multi-employer defined benefit pension plan available to all eligible employees of the participating members of the Plan. Plan members will receive benefits based on the length of service and on the average of annualized earnings during the best five years of the last eleven years prior to retirement, termination or death, that provides the highest earnings.

Pension assets consist of investment grade securities. Market and credit risk on these securities are managed by the Plan by placing plan assets in trust and through the Plan investment policy.

Pension expense is based on Plan management's best estimates, in consultation with its actuaries, of the amount, together with the 6.80% of salary, 8.40% for salaries greater than $44,900, contributed by employees, required to provide a high level of assurance that benefits will be fully represented by fund assets at retirement, as provided by the Plan. The funding objective is for employer contributions to the Plan to remain a constant percentage of employees' contributions.

Variances between actuarial funding estimates and actual experience may be material and any differences are generally to be funded by the participating members. The most recent actuarial valuation of the plan as at December 31, 2007 indicates that the Plan is in deficit; however, it is anticipated that recently implemented increases in contribution rates will correct this deficiency within the allowed timeframe. Contributions to the Plan made during the year by the Clinic on behalf of its employees amounted to $277,318 (2008 - $263,010) and are included in the statement of operations.

15. Economic Dependence

The volume of financial activity undertaken by the Clinic with its main funding bodies is of sufficient magnitude that the discontinuance of that funding would endanger the ability of the Clinic to continue as a going concern.

16. Financial Risk Management

The Clinic is exposed to different types of risk in the normal course of operations, including credit risk and market risk. The Clinic's objective in risk management is to optimize the risk return trade-off, within set limits, by applying integrated risk management and control strategies, policies and procedures throughout the Clinic's activities.

Credit risk

Credit risk is the risk that one party to a financial instrument fails to discharge an obligation and causes financial loss to another party. Financial instruments which potentially subject the Clinic to credit risk consist principally of accounts receivable.

The Clinic's maximum exposure to credit risk without taking account of any collateral or other credit enhancements is as follows:

	2009	2008
Accounts receivable	$ 125,255	$ 307,421
Due from WRHA	476,474	314,989
Vacation entitlements receivable	381,653	381,653
Retirement obligations receivable	473,813	426,813
	$ 1,457,195	$ 1,430,876

Accounts receivable: The Clinic is not exposed to significant credit risk as the receivable is spread among a broad client base and payment in full is typically collected when it is due. The Clinic establishes an allowance for doubtful accounts that represents its estimate of potential credit losses. The allowance for doubtful accounts is based on management's estimates and assumptions regarding current market conditions, customer analysis and historical payment trends. These factors are considered when determining whether past due accounts are allowed for or written off.

Due from WRHA, vacation entitlements receivable and retirement obligations receivable: The Clinic is not exposed to significant credit risk as these receivables are from the Province of Manitoba and the Regional Health Authority.

Market Risk

Market risk is the risk the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: interest rate risk, foreign exchange risk and other price risk.

Interest rate risk is the risk that the value of a financial instrument will fluctuate due to changes in market interest rates. The Clinic is not exposed to significant interest rate risk. Its cash is held in short-term or variable rate products.

16. Financial Risk Management (continued)

The Clinic is not exposed to significant foreign currency risk as it does not have any financial instruments denominated in foreign currency and the number of transactions in foreign currency are minimal and the Clinic is not exposed to other price risk.

Fair Value

The carrying values of cash, short-term investments, accounts receivable, amounts due from (to) WRHA, vacation entitlements receivable and retirement obligations receivable, amounts due from the Mount Carmel Clinic Foundation and accounts payable and accrued liabilities approximate their fair value due to the relatively short periods to maturity of these items or because they are receivable or payable on demand.

Auditors' Report

To the Directors of
Nine Circles Community Health Centre Inc.

We have audited the statement of financial position of Nine Circles Community Health Centre Inc. as at March 31, 2009 and the statements of financial activities and changes in fund balances for the year then ended. These financial statements are the responsibility of the Organization's management. Our responsibility is to express an opinion on these financial statements based on our audit.

Except as explained in the following paragraph, we conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In common with many charitable organizations, Nine Circles Community Health Centre Inc. derives part of its revenues from the general public in the form of contributions and fundraising the completeness of which is not susceptible of satisfactory audit verification. Accordingly, our verification of these revenues was limited to the amounts recorded in the records of the Organization and we were not able to determine whether any adjustments might be necessary to contributions and fundraising, excess of revenues over expenses, current assets and changes in fund balances.

In our opinion, except as explained above and the effect of adjustments, if any, which we might have determined to be necessary had we been able to satisfy ourselves concerning the completeness of those revenues referred to in the preceding paragraph, these financial statements present fairly, in all material respects, the financial position of the Organization as at March 31, 2009 and the results of its operations, the changes in its fund balances and cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

CHARTERED ACCOUNTANTS

1. Nature of operations

Nine Circles Community Health Centre Inc. is a local community health centre operating programs and performing services designed to meet specific community needs.

The Organization was formed in 1991, is an incorporated not-for-profit entity and is a registered charity under the Income Tax Act.

2. Significant accounting policies

The Organization follows accounting principles generally accepted in Canada in preparing its financial statements. The significant accounting policies used are as follows:

a) Fund accounting

Revenues and expenses related to program delivery and administrative activities are reported in the Operating Fund.

The Capital Fund reports the revenues and expenses related to the Organization's capital assets.

The Ed Mousseau Fund reports the revenues and expenses related to funding contributed by Ed Mousseau to be used for special purposes.

b) Revenue recognition

The Organization follows the deferral method of accounting for contributions.

Restricted contributions are recognized as revenue in the year in which the related expenses are incurred. Unrestricted contributions are recognized as revenue of the appropriate fund when received or receivable if the amount to be received can be reasonably estimated and collection is reasonably assured.

c) Capital assets

Purchased capital assets are recorded at cost. Amortization is provided at rates designed to write off the assets over their estimated useful lives as follows:

Equipment	5 years	straight-line
Computer equipment	4 years	straight-line
Computer software	4 years	straight-line
Leaseholds	2.5 - 8 years	straight-line
Equipment under capital lease	10 years	straight-line

Amortization expense is reported in the Capital Fund.

2. Significant accounting policies (cont.)

d) Investments

Short-term investments are classified as held-to-maturity financial assets. The short-term investments are comprised of a non-redeemable Guaranteed Investment Certificate and are recorded at amortized cost.

Long-term investments are classified as held-for-trading financial assets. The long-term investments are comprised of money market funds and are recorded at market value based on bid prices at year end. Changes in fair value are the result of interest income and are recognized in the statement of financial activities when earned.

e) Accounting estimates

The preparation of financial statements in accordance with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amount of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements and the reported amount of revenues and expenses during the reported period. These estimates are reviewed periodically and are reported in earnings in the period in which they become known. Actual results could differ from these estimates.

f) Financial instruments

The Organization's financial instruments consist of cash and short-term investments, receivables, long-term investments, payables and accruals, funds held in trust and pre-retirement leave. The fair values of cash, receivables, payables and accruals, funds held in trust and pre-retirement leave approximate their carrying values. It is management's opinion that the Organization is not exposed to significant interest, currency or credit risk arising from these financial instruments.

3. Cash and short-term investments

Cash and short-term investments consist of:

	2009	2008
Cash	**$ 918,631**	$ 688,294
Cash held in trust	**14,653**	11,366
Assiniboine Credit Union GIC, bearing interest at 2.75%, maturing and renewed annually on March 18th	**465,597**	387,031
	$1,398,881	$1,086,691

4. Capital assets

	Cost	Accumulated Amortization	2009 Net Book Value	2008 Net Book Value
Equipment	$ 52,077	$ 48,864	$ 3,213	$ 6,352
Computer equipment	72,594	61,130	11,464	16,337
Computer software	34,311	34,311	-	-
Leaseholds	86,970	78,367	8,603	24,417
Equipment under capital lease	67,482	1,125	66,357	-
	$ 313,434	$ 223,797	$ 89,637	$ 47,106

5. Funds held in trust

The Organization administers funds on behalf of the PHA Caucus of Manitoba.

6. Deferred contributions

Deferred contributions represent restricted funding and unspent resources externally restricted for the Operating Fund which relate to the subsequent year.

The changes for the year in the deferred contributions balance are as follows:

	2009	2008
Beginning balance	$ 467,581	$ 313,259
Grant revenue recognized during the year	(427,496)	(271,658)
Contributions received during the year	762,134	425,980
Ending balance	$ 802,219	$ 467,581

7. Obligation under capital lease

	2009	2008
Obligation under capital lease	$ 81,756	$ -
Less: amount representing interest at 8.63%	15,899	-
	65,857	-
Less: current portion of obligation	15,696	-
	$ 50,161	$ -

Approximate future minimum lease payments in the next five years are as follows:

2010	$ 15,696
2011	15,696
2012	15,696
2013	15,696
2014	15,696
	$ 78,480

8. Deferred contributions related to capital assets

Deferred contributions related to capital assets of $18,434 (2008 - $48,077) represent grants and donations for equipment, computer equipment, computer software and leasehold improvements. Deferred contributions are amortized in the capital fund on the statement of financial activities.

9. Restricted contributions

Restricted contributions relate to funding received from Ed Mousseau to be used towards the capital costs of building housing for those living with HIV/AIDS.

10. Pre-retirement leave benefits

The Organization has a contractual commitment for the pre-retirement benefits for the members of the pension plan based on years of service before retirement. During the year ended March 31, 2006 the organization was instructed by WRHA to record the full obligation. The Winnipeg Regional Health Authority calculated and advised the organization of the amount of the obligation. Pre retirement leave benefits are considered an out-of-globe funding item, of which the Winnipeg Regional Health Authority has instructed the organization to set up a receivable for the percentage of the change in the pre-retirement leave obligation that belongs to Winnipeg Regional Health Authority programs. The change in the accrued pre-retirement leave benefits are recorded as an expense in the current year. During the year the obligation (decreased) increased by ($6,820) (2008 - $14,785).

A portion of the pre-retirement benefits for the current year of ($5,034) (2008 - $11,933) were (repayable to) funded by Winnipeg Regional Health Authority during the year.

11. Commitment

The Organization has entered into a lease agreement for its premises expiring on June 30, 2014 with an aggregate minimum annual rental of $238,255.

The Organization also leases various office equipment.

The minimum lease payments for the next five years is as follows:

2010	$	229,971
2011		239,866
2012		239,152
2013		238,255
2014		238,255

12. Future liability

As of March 31, 2009, the Organization's staff had not ratified their collective union agreement which is retroactive to April 1, 2008. Management estimates that the liability approximates $27,000. A portion of the liability will be funded by the Winnipeg Regional Health Authority.

13. Economic dependence

The volume of financial activity undertaken by Nine Circles Community Health Centre Inc. with its main funding bodies is of sufficient magnitude that the discontinuance of their funding would endanger the ability of the Organization to continue as a going concern.

14. Statement of cash flows

This statement has not been presented as management does not believe it provides additional meaningful information

Nine Circles Community Health Centre Inc.

AUDITORS' REPORT

To the Members of Nor' West Co-op Community Health Centre, Inc.

We have audited the statement of financial position of Nor' West Co-op Community Health Centre, Inc. as at March 31, 2009 and the statements of revenues and expenditures and changes in net assets for the year then ended. These financial statements are the responsibility of the co-operative's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of the co-operative as at March 31, 2009 and the results of its operations and its cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

1. PURPOSE OF ORGANIZATION

Nor' West Co-op Community Health Centre Inc. (the "co-operative") works in partnership with the community to promote health and well being in its geographic neighbourhoods and identified populations. The co-operative was incorporated November 23, 1972 without share capital, presently operated under the provisions of the Co-operatives Act, Manitoba, and is a registered charity under the Income Tax Act. The co-operative is to be carried on without monetary gain to its members and any profits are to be used in promoting its objectives.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Measurement uncertainty

The preparation of financial statements in conformity with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amount of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the period. Actual results could differ from these estimates.

Fund accounting

The Health Centre fund reports the assets, liabilities, revenues and expenses related to the Co-operative's primary care, health promotion, counselling and foot care outreach programs.

The Early Learning & Child Care Centre fund reports the assets, liabilities, revenues and expenses related to the Co-operative's daycare centre.

Donated services

A large number of members donate significant amounts of their time to the organization. No amount has been reflected in the financial statement for donated services since an objective basis is not available to measure the value of such services.

Donations in kind

Donated materials and services are recognized in the financial statements only when a fair value can be reasonably estimated and when the materials and services would be purchased in the normal course of operations if not donated.

Vacation entitlement

These employee benefits are recorded in accordance with the policy determined by the Winnipeg Regional Health Authority. This policy is to record the amount of the accrued liability for these costs on the Statement of Financial Position, and any change in the accrual on the Statement of Operations. The receivable on the Statement of Financial Position is to be capped at the balance as at March 31, 2004.

(continues)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES *(continued)*

Internally restricted surplus

In fiscal 1998, the co-operative's board of directors internally restricted resources amounting to $63,500. In fiscal 2001, the co-operative's board of directors internally restricted an additional $40,000. These amounts are to be used for purchasing a building for an additional Health Centre. These internally restricted amounts are not available for other purposes without approval of the board of directors.

Surplus subject to audit

On an annual basis, the co-operative estimates and records adjustments to its surplus accounts for potential funding adjustments as a result of the Winnipeg Regional Health Authority's periodic audits of the co-operative's expenditures.

Capital assets

Capital assets are stated at cost less accumulated amortization. Capital assets are amortized over their estimated useful lives at the following rates and methods:

Computer hardware	3 years	straight-line method
Computer software	3 years	straight-line method
Furniture, fixtures, and equipment	5 years	straight-line method
Leasehold improvements	5 years	straight-line method

Sales revenue recognition

The organization follows the deferral method of accounting for contributions. Restricted contributions and grants are recognized as revenue in the year in which the related expenses are incurred. Unrestricted contributions are recognized as revenue when received or receivable, if the amount to be received can be reasonably estimated and collection is reasonably assured.

3. FINANCIAL INSTRUMENTS

The organization's financial instruments consist of cash and short term deposits, accounts receivable and accounts payable and accrued liabilities. Unless otherwise noted, it is management's opinion that the company is not exposed to significant interest, currency or credit risks arising from these financial instruments. The fair value of these financial instruments approximate their carrying values, unless otherwise noted.

Credit risk

The organization provides credit to its clients in the normal course of its operations. It maintains provisions for doubtful accounts on a continuing basis and adjusts bad debts to income. The organization does not normally require a guarantor for its trade accounts receivable.

To minimize credit risk, the organization maintains accounts receivable with several clients, none of whom pose a significant risk individually.

4. ACCOUNTS RECEIVABLE

	Cost	Accumulated amortization	**2009 Net book value**	2008 Net book value
Computer hardware	$ 46,065	$ 41,076	$ **4,989**	$ 8,315
Computer software	16,646	16,646	**-**	-
Furniture, fixtures, and equipment	72,019	55,082	**16,937**	28,104
Leasehold improvements	20,698	6,209	**14,489**	18,628
	$ 155,428	$ 119,013	$ **36,415**	$ 55,047

6. ACCOUNTS PAYABLE AND ACCRUED LIABILITIES

	2009	2008
Health Centre		
Winnipeg Regional Housing Authority	$ **41,383**	$ 12,822
Trade payables	**50,148**	51,020
Accrued audit fees	**6,865**	6,631
Salaries	**76,657**	61,610
Other	**3,933**	20,101
	178,986	152,184

(continues)

6. ACCOUNTS PAYABLE AND ACCRUED LIABILITIES *(continued)*

Early Learning Child Care Centre		
Accrued audit fees	**1,898**	1,920
Subsidy advances	**8,680**	8,680
Salaries	**(199)**	841
Other	**4,593**	3,300
	14,972	14,741
Grand total	**$ 193,958**	$ 166,925

The repayable subsidy advance is provided by the Province of Manitoba and is available for use as an operating line of credit.

7. DEFERRED REVENUE

Deferred revenue relates to restricted operating funding for various programs received in the current period that is related to the subsequent period. The changes in the deferred contributions balance are as follows:

	2009	2008
Beginning balance	**$ 50,248**	$ 84,294
Less: amounts recognized as revenue in the year	**(29,514)**	(174,342)
Add: amounts received related to the following year	**29,009**	140,295
	$ 49,743	$ 50,247

8. DEFERRED CONTRIBUTIONS

Contributions and grants directly related to the purchase of capital assets are deferred upon receipt. They are being recognized as revenue on the same basis as the amortization on the related capital assets. The changes for the year in the deferred contributions balance reported in the Health Centre are as follows:

	2009	2008
Beginning balance	**$ 54,365**	$ 39,154
Contributions	**-**	30,677
Amounts recognized as revenue	**(17,952)**	(15,466)
	$ 36,413	$ 54,365

9. PRE-RETIREMENT LEAVE BENEFIT OBLIGATION

Based on the continuance of funding bodies' policies to reimburse facilities for pre-retirement leave, the co-operative has agreed to provide pre-retirement leave for all unionized employees as provided within the Collective Agreement. These benefits are based on years of employment for full-time employees and on a pro-rata basis for part-time employees. In order to receive pre-retirement benefits, a qualifying employee must apply for early retirement.

For 2008-2009, the Winnipeg Regional Housing Authority agreed to provide pre-retirement funding of 65.1% of benefits paid by the co-operative. Employee applications for early retirement during the year amounted to $23,556 (2008 - $19,627)

During 2009, the benefit obligation earned by employees as at March 31, 2009 was actuarially determined to be $106,856. This has been reported as a liability on the Statement of Financial Position.

10. NET ASSETS

	2009	2008
Membership - Health	$ 1,976	$ 1,966
Membership - Daycare	170	170
Invested in capital assets	2	683
Internally restricted	103,500	103,500
Restricted - FAS	73,864	68,530
Restricted - Family Violence	106,769	79,996
Restricted - Community Development	(5,309)	(5,309)
Restricted - Immigrant Women's Council	122,466	92,551
Restricted - Women's Place	(20,813)	56,481
Restricted - surplus subject to WRHA audit	77,408	98,361
Unrestricted - Health	283,889	244,713
Unrestricted - Daycare	39,726	48,981
	$ 783,648	$ 790,623

11. PRIOR PERIOD ADJUSTMENT

As a result of additional information acquired during the 2009 year end, it has become apparent that vacation entitlement receivable and wages and benefits expense were misstated at March 31, 2008. Accordingly, the comparative figures have been adjusted and the net assets at the beginning of 2009 reflects a retroactive decrease of $86,475 (2008 - $62,524).

12. PENSION PLAN

The co-operative has a defined contribution pension plan. During the year, the co-operative made actual cash contributions of $140,477 (2008 - $118,388). The pension contributions are included in employee benefits of the applicable programs in the Statement of Revenues and Expenditures.

13. LEASE COMMITMENTS

The co-operative leases premises and a photocopy machine under operating lease agreements that expire in 2010. Future minimum lease payments as at year end are as follows:

2010	$ 106,740

14. ECONOMIC DEPENDENCE

The co-operative is economically dependent on funding from the Winnipeg Regional Health Authority and Province of Manitoba. If funding from either of these entities were discontinued, it would affect the co-operative's ability to continue operations.

15. STATEMENT OF CASH FLOW

A statement of cash flow has been omitted as it would not provide additional meaningful information not readily determinable from other financial information provided.

16. COMPARATIVE FIGURES

The prior year comparative figures were audited by another firm of chartered accountants. Some of the comparative figures have been reclassified to conform to the current year's presentation.

Auditors' Report

To the Board of Directors of
ODD FELLOWS AND REBEKAHS PERSONAL CARE HOMES INC. GOLDEN LINKS LODGE

We have audited the statement of financial position of **ODD FELLOWS AND REBEKAHS PERSONAL CARE HOMES INC. GOLDEN LINKS LODGE** as at March 31, 2009 and the statements of operations, changes in net assets and cash flows for the year then ended. These financial statements are the responsibility of the organization's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of the organization as at March 31, 2009 and the results of its operations and its cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

ODD FELLOWS AND REBEKAHS PERSONAL CARE HOMES INC.
GOLDEN LINKS LODGE
Summary of Significant Accounting Policies

March 31, 2009

Financial Reporting

The financial statements only include the assets, liabilities, equity and operations of the Golden Links Lodge. The financial data of the Odd Fellows And Rebekahs Personal Care Home Inc. are excluded since they are not required in assessing the financial operations of the Lodge.

Basis of Accounting

These financial statements were prepared using the accrual basis of accounting. The accrual basis recognizes revenues as they become available and measurable; expenditures are recognized as they are incurred and measurable as a result of receipts of goods or services and the creation of a legal obligation to pay.

Revenue Recognition

The organization follows the deferral method of accounting for contributions that includes donations and government grants. Restricted contributions are recognized as revenue in the year in which the related expenses are incurred. Unrestricted contributions, which include residential changes, are recognized as revenue when received or receivable if the amount to be received can be reasonably estimated and collection is reasonably assured.

The organization records on an annual basis, an estimate of the amount that may be recoverable from, or payable to Winnipeg Regional Health Authority ("WRHA") relating to its excess of revenues or expenses in accordance with WHRA funding guidelines. WHRA funding adjustments are subject to WHRA audits. The differences, if any, from the initial estimates are reflected as an adjustment in the current year's operating income.

Contributed Services

In the normal course of business, the organization receives volunteer assistance in carrying out its service delivery activities. Volunteer services are not recognized in the financial statements.

Capital Assets

Purchased capital assets are recorded at cost. Amortization based on the estimated useful life of the asset is calculated as follows:

Land improvements	10 years, straight-line basis
Buildings	50 years, straight-line basis
Equipment	10 years, straight-line basis

Inventory

Supplies on hand are stated at the lower of cost and replacement cost. Cost is generally determined on the first-in, first-out basis.

Financial Instruments

The organization's financial instruments consist of cash, accounts receivable, short-term investments, accounts payable and accrued liabilities, and amounts due to (from) Winnipeg Regional Health Authority. Unless otherwise noted, it is management's opinion that the organization is not exposed to significant interest, currency or credit risks arising from these financial instruments. The fair value of these financial instruments approximate their carrying values, unless otherwise noted.

The organization classifies its financial instruments into one of the following categories based on the purpose for which the asset was acquired. The organization's accounting policy for each category is as follows:

Loans and Receivables - These assets are non-derivative financial assets resulting from the delivery of cash or other assets by a lender to a borrower in return for a promise to repay on a specified date or dates, or on demand. They arise principally through the provision of goods and services (accounts receivable), but also incorporate other types of contractual monetary assets. They are initially recognized at fair value and subsequently carried at amortized cost, using the effective interest rate method, less any provision for impairment. The organization has classified accounts receivable, employee benefits recoverable, due from WRHA and deferred benefit entitlements in this category.

Held-for-trading - This category is comprised of certain investments in equity and debt instruments. The organization has classified all cash, bank indebtedness and investments in this category. They are carried on the statement of financial position at the fair value with changes in fair value recognized in the statement of operations. Transaction costs related to instruments classified as held-for-trading are expensed as incurred.

Other Financial Liabilities - Other financial liabilities includes all financial liabilities other than those classified as held-for-trading and comprises accounts payable. These liabilities are initially recognized at fair value and subsequently carried at amortized cost using the effective interest rate method. Transaction costs related to other financial liabilities are expensed as incurred. The organization has classified accounts payable, accrued liabilities, due to WRHA, accrued vacation entitlements, advances from WRHA and pre-retirement entitlement in this category.

Employee Benefits

The organization records a provision for employee benefits comprised of accrued vacation. A further provision for future employee pre-retirement benefits, being an actuarial estimate of the organization's obligation to make a cash payment to certain qualifying employees based on years of service upon retirement has also been recorded. Funding for portions of these obligations remains outstanding as disclosed in Note 4.

The cost of the organization's employee pre-retirement benefits is accrued as earned based on an actuarial estimation.

The estimation of the future pre-retirement benefits has been performed using the projected unit credit service pro-rated on service actuarial cost method. The significant actuarial assumptions adopted in measuring the organization's future employee benefits payable include mortality and withdrawal rates, a discount rate of 6.7% (5.5% in 2008), a rate of salary increase of 3.5% (3.5% in 2008) plus an age-related merit/promotion scale with no provision for disability.

Use of Estimates

The preparation of financial statements in accordance with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenditures during the reporting period. Actual results could differ from management's best estimates as additional information becomes available in the future.

New Accounting Pronouncements

Recent accounting pronouncements that have been issued but are not yet effective, and have a potential implication for the organization, are as follows:

Financial Statement Concepts - CICA Handbook Section 1000, Financial Statement Concepts has been amended to focus on the capitalization of costs that truly meet the definition of an asset and de-emphasizes the matching principle.

Financial Instruments - Disclosure and Presentation - On October 15, 2008 the CICA deferred indefinitely the requirement of not-for-profit organizations to implement new standards dealing with certain financial instrument, disclosures and presentation. The organization has elected to defer application of these standards.

New Accounting Pronouncements (continued)

Financial Statements by Not-for-Profit Organizations - Section 4400 has been amended for the treatment of net assets invested in capital assets and for the presentation revenues and expenses. The new standard is effective for interim and annual financial statements relating to fiscal years beginning on or after January 1, 2009. The organization is currently assessing the impact of the new standard.

Disclosure of Allocated Expenses by Not for Profit Organizations - Section 4470 establishes disclosure standards for not for profit organizations that choose to classify their expenses by function and allocate expenses from one function to another. The changes are effective for interim and annual financial statements beginning on or after January 1, 2009. The organization is currently assessing the impact of the new standard.

1. Nature and Purpose of Organization

The Odd Fellows and Rebekahs Care Homes Inc. Golden Links Lodge is a non-profit organization operating as a long-term care facility. The organization is a registered charity under the Income Tax Act and is therefore exempted from income taxes.

2. Short-term Investments

	2009	2008
Manitoba Builder Bonds, 4.25%, matures June 15, 2008	$ -	$ 200,000
Steinbach Credit Union, 3.8%, matures Nov 18, 2009	105,229	105,229
Steinbach Credit Union, 3.6%, matures Sept 17, 2009	133,937	-
Steinbach Credit Union, regular savings, 2.5%	78,621	-
CIBC GIC Investment, 2.25%, matures October 5, 2009	106,928	103,350
	$ 424,715	$ 408,579

3. Change in Accounting Policy

Capital Disclosures

On April 1, 2008 the organization adopted a requirement of the CICA to provide disclosure about how it manages its unrestricted net assets (see Note 14).

The adoption of these new standards had no material impact on the organization's consolidated statement of operations.

4. Future Employee Benefits Recoverable

Employee pre-retirement benefits are accrued as incurred as determined by actuarial valuation. The latest actuarial valuation of the pre-retirement value as of March 31, 2009 reports an obligation of $346,755 ($345,170 in 2008). Vacation benefits are accrued as employees earn the benefits.

Due to the nature of the benefits, the pre-retirement benefits recoverable and payable are classified as long-term, whereas the vacation benefits recoverable and payable are classified as current.

The organization has been notified by the WRHA that the incremental pre-retirement liability for fiscal 2009 of $1,585 ($20,491 in 2008) will be funded together with a portion of the incremental pre-retirement benefits liability for fiscal 2005 and 2006, which netted to zero for the organization.

The amount of funding which will be provided by Manitoba Health, through the WRHA, for pre-retirement entitlement obligations has been capped at the amount owing at March 31, 2004, adjusted for allocations from the WHRA in 2005, and has been recorded as a receivable on the statement of financial position. The Province of Manitoba has guaranteed to the WRHA, and through it to Golden Links Lodge, this outstanding receivable which will be paid when required. Any liability in excess of the adjusted March 31, 2004 amount is reflected as a current year expense on the statement of operations following the "excess of revenue over expenditures before other items" balance.

5. Capital Assets

			2009	2008
	Cost	Accumulated Amortization	Net Book Value	Net Book Value
Land improvements	$ 217,027	$ 217,027	$ -	$ 1,194
Buildings	3,397,938	1,614,616	1,783,322	1,862,097
Building addition				
Special Needs Unit	388,858	140,421	248,437	348,750
Equipment	887,930	823,239	64,691	(11,382)
Equipment				
Special Needs Unit	31,771	31,771	-	-
	$ 4,923,524	$ 2,827,074	$ 2,096,450	$ 2,200,659

6. Due (from) to Winnipeg Regional Health Authority Inc.

Any operating surplus related to Out of Globe funding arrangements or operating surpluses greater than 2% of budget related to In Globe funding arrangements for the year is repayable to the WRHA. Those surpluses that are retained by the organization are subject to review by the WRHA.

Conversely, any operating deficit related to Out of Globe funding arrangements is receivable from the WRHA and is subject to review by the WRHA. At that time, WRHA submits their final cost approvals that indicate the portion of the deficit that will be paid to the organization. In 1992, the Province of Manitoba implemented a no deficit recovery policy that stipulates that WRHA will not fund deficits related to In Globe funding arrangements. Any unapproved costs not paid by WRHA are absorbed by the organization.

Differences that may occur on final settlement of approved costs are charged directly to net assets or operations. Prior years surplus and deficit, settlement for which has not yet been adjusted is as follows:

	2009	2008
2005 fiscal year end	$ -	$ 153,650
2006 fiscal year end	-	9,415
2007 fiscal year end	(44,747)	(44,747)
2008 fiscal year end	(50,715)	(160,041)
2009 fiscal year end	(155,846)	-
Balance, end of year	$ (251,308)	(41,723)

7. Bank Indebtedness

The organization does not currently operate on a revolving line of credit.

8. Winnipeg Regional Health Authority Operating Income

	2009	2008
Budgeted Items	$ 3,272,878	$ 3,058,416
Current adjustments - Out of Globe	253,084	209,968
Balance, end of year	$ 3,525,962	$ 3,268,384

9. Contingencies

On July 1, 1987, a group of health care organizations, ("subscribers"), formed Healthcare Insurance Reciprocal of Canada ("HIROC"). HIROC is registered as a Reciprocal pursuant to provincial Insurance Acts, which permit persons reciprocal contracts of indemnity insurance. HIROC facilitates the provision of liability insurance coverage to health care organizations in the provinces of Ontario, Manitoba, Saskatchewan and Newfoundland. Subscribers pay annual premiums, which are actuarially determined, and are subject to assessment for losses in excess of such premiums, of any experienced by the group of subscribers for the years in which they were a subscriber. No such assessments have been made to March 31, 2009.

10. Land Lease

The land used by the organization is owned by the Grand Lodge of Manitoba, I.O.O.F. The organization has leased the land for a term of 50 years from March 1, 1980 without any leasing cost other than maintaining the property.

11. Pension Plans

During the year, the organization contributed $218,193 ($186,648 in 2008) on behalf of its employees.

Eligible employees of the organization are members of the Healthcare Employees Pension Plan (a successor to the Manitoba Health Organization Inc. Plan) (the "Plan") that is a multi-employer defined benefit pension plan. Plan members will receive benefits based on the length of service and on the average of annualized earnings during the best five years of the last ten years prior to retirement, termination or death, that provides the highest earnings.

Pension assets consist of investment grade securities. Market and credit risk on these securities are managed by the Plan by placing plan assets in trust and through the Plan investment policy.

The most recent actuarial valuation of the plan as at December 31, 2007 indicated a solvency deficiency of $61,050,000. The plan deficiency will be funded over five years commencing in 2008 out of the current contributions in each respective year. A change in the underlying actuarial assumptions could cause a change in the actuarial value of accrued pension benefits and required service contributions. Contribution rates were increased on July 1, 2007 to 6.8% of pensionable earnings up to the yearly maximum pensionable earnings limit ("YMPE") and 8.4% on earnings in excess of the YMPE.

12. Comparative Figures

Certain of the comparative figures have been reclassified to conform with the current year's presentation.

13. Disclaimer

The information contained in this report is the property of Odd Fellows and Rebekahs Personal Care Homes Inc. Golden Links Lodge, and may not be combined, consolidated or in any way modified without the written authorization of the Odd Fellows and Rebekahs Personal Care Homes Inc. Golden Links Lodge.

14. Capital Management

The organization considers its capital to comprise its unrestricted net assets and net invested in capital assets balances. There have been no changes to what the organization considers to be its capital since the previous period.

The organization manages its capital to ensure it retains sufficient resources to enable it to meet its obligations for resident care. The determination of this amount is based on historical expense requirements relative to funding commitments.

Management's Responsibility

To the Members of Park Manor Personal Care Home Inc.:

Management is responsible for the preparation and presentation of the accompanying financial statements, including responsibility for significant accounting judgments and estimates in accordance with Canadian generally accepted accounting principles. This responsibility includes selecting appropriate accounting principles and methods, and making decisions affecting the measurement of transactions in which objective judgment is required.

In discharging its responsibilities for the integrity and fairness of the financial statements, management designs and maintains the necessary accounting systems and related internal controls to provide reasonable assurance that transactions are authorized, assets are safeguarded and financial records are properly maintained to provide reliable information for the preparation of financial statements.

The Board of Directors are composed primarily of Directors who are neither management nor employees of the Organization. The Board is responsible for overseeing management in the performance of its financial reporting responsibilities, and for approving the financial information included in the annual report. The Board fulfils these responsibilities by reviewing the financial information prepared by management and discussing relevant matters with management and external auditors. The Board is also responsible for recommending the appointment of the Organization's external auditors.

Meyers Norris Penny LLP, an independent firm of Chartered Accountants, is appointed by the members to audit the financial statements and report directly to them; their report follows. The external auditors have full and free access to, and meet periodically and separately with, both the Board and management to discuss their audit findings.

May 8, 2009

Charles L. Toop

Chief Executive Officer/Chief Financial Officer

Auditors' Report

To the Board of Directors of Park Manor Personal Care Home Inc.:

We have audited the statement of financial position of Park Manor Personal Care Home Inc. as at March 31, 2009 and the statements of operations and changes in net assets including the supporting schedule for the year then ended. These financial statements are the responsibility of the Organization's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of the Organization as at March 31, 2009 and the results of its operations for the year then ended in accordance with Canadian generally accepted accounting principles.

Meyers Norris Penny LLP

Statement of Changes in Net Assets

For the year ended March 31, 2009

	Operating Fund *(Note 9)*	Adult Day Program *(Note 9)*	Invested in capital assets	2009 Total	2008 Total
Net assets, beginning of year	351,851	16,698	41,740	**410,289**	395,221
Excess (deficiency) of revenues over expenses	(39,314)	3,112	(19,528)	**(55,730)**	15,068
Net assets, end of year	312,537	19,810	22,212	**354,559**	410,289

The accompanying notes are an integral part of these financial statements

1. Purpose of the organization

Park Manor Personal Care Home, Inc. is a privately operated non-profit corporation which provides personal care for senior citizens. It is incorporated without share capital under the Corporations Act of Manitoba.

The Organization is a not for profit organization under the Income Tax Act (the "Act") and as such, is exempt from income taxes. In order to maintain its status as such, the Organization must meet certain requirements within the Act. In the opinion of the management, these requirements have been met.

2. Significant accounting policies

The financial statements have been prepared in accordance with Canadian generally accepted accounting principles and the presentation required by Manitoba Health/Winnipeg Regional Health Authority, and include the following significant accounting policies:

Capital Assets

Capital assets are recorded at cost. Amortization is recorded in the capital funds using the straight-line basis, at rates intended to amortize the value of capital assets over their estimated useful lives. The annual rates are as follows:

	Rate
Buildings	20 years
Computer equipment	5 years
Equipment	10 years

Revenue recognition

The Organization uses the deferral method of accounting for contributions and reports on a fund accounting basis. Restricted contributions are deferred and matched with the related expense as incurred. Unrestricted contributions are recorded in the operating fund as received or receivable if the amount can be reasonably estimated and collection is reasonably assured.

Measurement uncertainty (use of estimates)

The preparation of financial statements in conformity with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period.

Accounts receivable are stated after management's evaluation of collectibility and an appropriate allowance provided for uncollectible accounts.

These estimates and assumptions are reviewed periodically and, as adjustments become necessary they are reported in earnings in the periods in which they become known.

Transfer to capital fund

Equipment of a capital nature with an individual value over $2,000 is transferred to the Capital Fund in order to comply with Manitoba Health/Winnipeg Regional Health Authority policy.

Long-lived assets

Long-lived assets consist of buildings, computer equipment and equipment with finite useful lives. Long-lived assets held for use are measured and amortized as described in the applicable accounting policies.

The Organization performs impairment testing on long-lived assets held for use whenever events or changes in circumstances indicate that the carrying value of an asset, or group of assets, may not be recoverable. Impairment losses are recognized when undiscounted future cash flows from its use and disposal are less than the assets' value. Any impairment is included in earnings for the year.

2. Significant accounting policies *(Continued from previous page)*

Financial Instruments

Available-for-sale:

The Organization has classified short-term investments as available for sale. These instruments are initially recognized at their fair value which is approximated by the instrument's cost in a transaction between unrelated parties. Available for sale instruments are subsequently measured at their fair value. Net gains and losses arising from changes in fair value which include interest, realized and unrealized gains and losses are recognized immediately in the fund balances.

Loans and receivables:

The Organization has classified accounts receivable as loans and receivables. These assets are initially recognized at their fair value which is approximated by the instrument's initial cost in a transaction between unrelated parties. Loans and receivables are subsequently measured at their amortized cost. Amortized cost is the amount at which the financial asset is measured at initial recognition less repayments and any reduction for impairment or uncollectability. Gains and losses arising from changes in fair value are recognized in the fund balances upon impairment.

Other financial liabilities:

The Organization has classified accounts payable and term loans due on demand as other financial liabilities. These liabilities are initially recognized at their fair value which is approximated by the instrument's initial cost in a transaction between unrelated parties. Other financial liabilities are subsequently measured at amortized cost. Amortized cost is the amount at which the financial liability is measured at initial recognition less repayments. Net gains and losses arising from changes in fair value are recognized in the fund balances upon derecognition.

2. Significant accounting policies *(Continued from previous page)*

Recent accounting pronouncements

Financial statement presentation by not-for-profit organizations

In September 2008, amendments were made to CICA Handbook Section 4400 Financial Statement Presentation by not-for-profit Organizations. Amendments to the section included removal of the requirement to treat net assets invested in capital assets as a separate component of net assets permitting such an amount to be presented as a category of internally restricted net assets. In addition, the requirement to recognize and present revenues and expenses on a gross basis when a not-for-profit organization is acting as a principal in the transaction was clarified. Finally, guidance was included to reflect that Section 1540 Cash Flow Statements and Section 1751 Interim Financial Statements are applicable to not-for-profit organizations.

These amendments apply to interim and annual financial statements relating to fiscal years beginning on or after January 1, 2009. The Organization does not expect the changes to the standard to have an impact on its financial statements.

Capital assets held by not-for-profit organizations

CICA Handbook Section 4430 Capital Assets Held by Not-for-profit Organizations has been amended to provide additional guidance with respect to the appropriate use of the scope exemption for smaller entities that expense their capital assets. It was clarified that the exemption does not allow NFPOs to capitalize but not amortize their capital assets, nor does it allow different methods of accounting for various types of capital assets.

This amendment applies to interim and annual financial statements relating to fiscal years beginning on or after January 1, 2009. The Organization does not expect the change to this standard to have an impact on its financial statements.

Disclosure of allocated expenses by not-for-profit organizations

In September 2008, the Canadian Institute of Chartered Accountants issued new recommendations for disclosures regarding allocated expenses by not-for-profit organizations. CICA Handbook Section 4470 Disclosure of Allocated Expenses by Not-for-profit Organizations requires disclosure by not-for-profit organizations that allocate fundraising and general support expenses to other functions of the policies adopted for the allocation of such expenses among functions, the nature of the allocated expenses, and the basis on which allocations are made. The section also requires disclosure of the amounts allocated from each of its fundraising and general support functions and the amounts and functions to which they have been allocated.

This new section is effective for interim and annual financial statements relating to fiscal years beginning on or after January 1, 2009. The Organization does not expect this new standard to have a material impact on its financial statements.

3. Cash

Cash earned interest at 0.25% (2008 - 3.31%) at year-end. The Organization has an available line of operating credit to a maximum of $75,000. The operating line has interest charged monthly at the bank's prime rate and is secured by an overdraft lending agreement in the amount of $75,000 and the specific assignment of accounts receivable from Manitoba Health.

	2009	*2008*
Unrestricted cash on deposit	**554,808**	754,251
Restricted cash on deposit	**66,791**	79,918

	3,991,850	78,286	21,421	**4,048,715**	**2,342,073**	**1,706,642**	1,774,146

7. Long-term debt

	2009	*2008*
First mortgage payable in monthly instalments of $3,341 including interest at 5.88%, secured by land and building, due July 2017.	**264,381**	288,365
Term loan payable in monthly instalments of $8,800 plus interest at prime less 0.5%, secured by borrowing resolution, pledge of government funding and letter of comfort from Manitoba Health, due September 2009.	**45,129**	150,729
Term loan payable in monthly instalments of $3,920 plus interest at prime less 1.0%, secured by borrowing resolution, pledge of government funding and letter of comfort from Manitoba Health, due July 2012.	**109,610**	156,650
	419,120	595,744
Less: current portion	**118,000**	175,000
	301,120	420,744

Principal repayments on long-term debt in each of the next five years are estimated as follows:

2010	118,000
2011	74,000
2012	44,000
2013	30,000
2014	32,000

8. Deferred contributions

Deferred contributions represent the unamortized portion of restricted contributions relating to the purchase of capital assets or self-funding of insurance deductibles. Capital asset deferred contributions are recognized as revenue on the same basis as respective assets are amortized. Insurance deductible deferred contributions are recognized as revenue on the same basis as respective expenditures are made.

Changes for the year in the deferred contribution balance are as follows:

	Capital Fund	*Operating Fund*	*2009*	*2008*
Balance, beginning of year	1,203,572	3,178	**1,206,750**	1,030,329
Contributions received during the year				
Donations	32,203	-	**32,203**	101,141
Winnipeg Regional Health Authority				
- Principal repayment	176,616	-	**176,616**	175,275
- Equipment replacement	17,500	-	**17,500**	17,500
- Major repairs	4,296	-	**4,296**	4,296
- Safety and security - lump sum funding	13,370	-	**13,370**	-
- Insurance deductible	-	1,008	**1,008**	1,008
Recognized as revenue during the year	(126,262)	(1,355)	**(127,617)**	(122,799)
Balance, end of year	1,321,295	2,831	**1,324,126**	1,206,750

9. Restricted net assets

Internally restricted net assets are comprised of:

	2009	*2008*
Special purpose reserve:		
Balance, beginning of year	**1,490,088**	1,542,903
Trust contributions	**40,803**	1,796
Private grants and donations	**30,646**	63,908
Current year change in unrealized loss, adoption of new accounting policy	**-**	(59,492)
Current year change in unrealized gains on available-for-sale assets (Note 4)	**47,881**	39,011
Net change in other income (expenses)	**66,917**	(98,038)
Balance, end of year	**1,676,335**	1,490,088

These net assets are restricted in the fact that they are not part of the general operations of the personal care home. The use of such assets is at the discretion of the board of directors.

10. Unrestricted net assets

Unrestricted net assets are comprised of:

	2009	*2008*
Personal care operations	312,537	351,851
Adult Day Program	19,810	16,698
	332,347	368,549

11. Financial instruments

Fair value of financial instruments

The carrying amount of cash, accounts receivable and accounts payable and accruals approximate their fair value due to the short-term maturities of these items. The fair value of the Organization's investments are based on quoted market prices.

Credit concentration

Financial instruments that potentially subject the Organization to concentrations of credit risk consist of primarily of accounts receivable. Of the $1,321,588 (2008 - $1,091,499) of receivables, $1,207,113 (2008 - $997,309) is due from the Manitoba Health/Winnipeg Regional Health Authority.

12. Major Customer

A significant portion of the personal care home's operating fund are received from the Winnipeg Regional Health Authority. The percentage of total revenues from the Winnipeg Regional Health Authority for the current year is 68.6% (2008 - 70.0%).

13. Year end adjustment - revenues

The year end adjustment in the revenues section of the Statement of Operations and Changes in Net assets represents the difference between the funding budget and actual for residential charges received from residents. This amount is guaranteed by Winnipeg Regional Health Authority.

14. Pre-retirement leave/vacation pay

Under guidelines produced by the Winnipeg Regional Health Authority (WRHA), funding owed to the Organization related to vacation pay liability is recognized as accounts receivable in the amount of $232,434 as at March 31, 2004.

Under guidelines produced by WRHA, funding owed to the Organization related to pre-retirement future benefits is as follows:

	Future Liability	Accounts Receivable
2004-05	$319,838	$303,367
2005-06	$373,074	$328,650
2006-07	$413,647	$369,223
2007-08	$389,789	$345,365
2008-09	$436,072	$366,365

15. Capital management

The Organization's objective when managing capital is to safeguard the entity's ability to continue as a going concern, so that it can continue to provide services and benefits for its residents.

The Organization sets the amount of capital in proportion to risk and manages the capital structure and makes adjustments to it in light of changes to economic conditions and the risk characteristics of the underlying assets, as well as with consideration of externally imposed capital requirements. In order to maintain or adjust the capital structure, the Organization may sell investments or decrease expenses.

The Organization manages the following as capital:

	2009	*2008*
Short-term investments	**1,789,091**	1,575,664
Net assets	**354,559**	410,289
	2,143,650	1,985,953

The Organization monitors capital on a quarterly basis, as well as annually, including the Board's input as to the capital management approach to take, and through advice from the Organization's investment advisors. During the year, the Organization's strategy is to protect the capital through maintaining low risk investments, as well as to minimize the excess of expenses over revenues.

16. Statement of cash flows

A statement of change in cash flows has not been prepared because information about financing and investing activities and their effects on cash resources are readily apparent from the other financial information.

17. Comparative figures

Certain of the prior year's comparative figures have been reclassified to conform with the current year's financial statement presentation.

Auditors' Report

To the Directors of
PEMBINA PLACE MENNONITE PERSONAL CARE HOME INC.

We have audited the statement of financial position of the **PEMBINA PLACE MENNONITE PERSONAL CARE HOME INC.** as at March 31, 2009 and the statements of operations, changes in net assets and cash flows for the year then ended. These financial statements are the responsibility of the Home's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of the Home as at March 31, 2009 and the results of its operations and its cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

PEMBINA PLACE MENNONITE PERSONAL CARE HOME INC.
Summary of Significant Accounting Policies

March 31, 2009

Revenue Recognition

The Home follows the deferral method of accounting for contributions which include donations and government grants.

Under the Health Insurance Act and regulations hereto, the Home is funded primarily by the Province of Manitoba in accordance with budget arrangements established by Winnipeg Regional Health Authority ("WRHA"). Operating grants are recorded as revenue in the period to which they relate. Grants approved but not received at the end of an accounting period are accrued. Where a portion of a grant is related to a future period, it is deferred and recognized in that subsequent period.

With respect to actual operating results, certain adjustments to funding will be made by the WRHA after completion of their review of the Home's accounts as follows:

a) Deficits - The WRHA shall not be responsible for past or future deficits of the Home in providing the services and debt service charges for any debt incurred resulting from operating deficits unless the parties otherwise mutually agree.

   The WRHA shall not be responsible for the costs incurred by the Home other than those set forth in the service purchase agreement.

b) Surpluses - The Home may unconditionally retain the greater of 50% of its operating surplus in any fiscal year and 2% of the global budget indicated in its funding letter from the WRHA for such fiscal year. Any surplus beyond the foregoing levels shall be remitted to the WRHA on demand.

Any adjustments will be reflected in the year the final statement of recommended costs is received from WRHA.

Unrestricted contributions are recognized as revenue when received or receivable if the amount to be received can be reasonably estimated and collection is reasonably assured.

Externally restricted contributions are recognized as revenue in the year in which the related expenses are recognized. Contributions restricted for the purchase of capital assets are deferred and amortized into revenue on a straight-line basis, at a rate corresponding with the amortization rate for the related capital assets.

Revenue from the residential services and marketed services is recognized when the goods are sold or the service is provided.

PEMBINA PLACE MENNONITE PERSONAL CARE HOME INC.
Summary of Significant Accounting Policies

March 31, 2009

Contributed Services

A substantial number of volunteers contribute a significant amount of their time each year. Because of the difficulty of determining the fair value, contributed services are not recognized in the financial statements.

Capital Assets

Purchased capital assets are recorded at cost. Contributed capital assets are recorded at fair value at the date of contribution. Repairs and maintenance costs are charged to expense. Betterments which extend the estimated useful life of an asset are capitalized. When a capital asset no longer contributes to the Home's ability to provide services, its carrying amount is written down to its residual value.

Capital assets are amortized based on long-term debt repayment funding.

Inventories

Inventories of supplies are carried at the lower of cost and net realizable value determined on a first-in, first-out basis.

Employee Future Benefits

Pre-retirement entitlement, pension and other employee future benefit costs are determined using the projected benefit method prorated on years of service and based on best estimated assumptions. Commencing with the 2004-2005 fiscal year, out of globe funding for these costs is not provided by Manitoba Health/ WRHA.

Financial Instruments

The Home utilizes various financial instruments. Unless otherwise noted, it is management's opinion that the Home is not exposed to significant interest, currency or credit risks arising from these financial instruments and the carrying amounts approximate fair values.

All transactions related to financial instruments are recorded on a settlement date basis.

The Home classifies its financial instruments as follows based on the purpose for which the asset was acquired and follows the disclosed accounting policy for each category.

Financial Instruments (continued)

Assets/Liability	Category	Measurement
Cash/bank indebtedness	Held for trading	Fair value
Accounts receivable	Loans and receivables	Amortized cost
Accounts payable	Other financial liabilities	Amortized cost
Related party payable	Other financial liabilities	Amortized cost

- Held for trading items are carried at fair value, with changes in their fair value recognized in the statement of operations.
- Other financial liabilities are carried at amortized cost, using the effective interest method.
- Loans and receivables are carried at amortized cost, using the effective interest rate method, less any provision for impairment.

Transaction costs are expensed as incurred.

Restricted Cash

Restricted cash balances represent cash segregated for use for replacement reserves in accordance with the CMHC operating agreement.

Use of Estimates

The preparation of financial statements in conformity with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the period. Actual amounts could differ from those estimates.

New Accounting Pronouncements

Recent accounting pronouncements that have been issued but are not yet effective, and have a potential implication for the Home, are as follows:

Financial Statement Concepts

CICA Handbook Section 1000, Financial Statement Concepts has been amended to focus on the capitalization of costs that truly meet the definition of an asset and de-emphasizes the matching principle.

The revised requirements are effective for annual and interim financial statements relating to fiscal years beginning on or after October 1, 2008. The Home is currently evaluating the impact of the adoption of this change on the disclosure within its financial statements.

Financial Instruments - Disclosure and Presentation

On October 15, 2008 the CICA deferred indefinitely the requirement of not-for-profit organizations to implement new standards dealing with certain financial instrument, disclosures and presentation. The Home has elected to defer application of these standards.

Financial Statements by Not-for-Profit Organizations

In September 2008, a number of standards applicable to not-for-profit organizations were amended and issued. The changes are intended to improve financial reporting by not-for-profit organizations and make not-for-profit standards consistent with those of profit-oriented enterprises when they address the same issues. These amendments which are effective for fiscal years beginning on or after January 1, 2009 will not have a significant impact on the results of operations or financial position.

The Home continues to monitor the developments in this area and evaluate the implications of the potential changes in financial reporting standards.

1. Purpose of the Organization

Pembina Place Mennonite Personal Care Home Inc. provides a 57 bed personal care service at 285 Pembina Highway, Winnipeg, Manitoba. The Home is a Mennonite organization that demonstrates Christian love by compassionately offering a continuum of wellness, housing and personal care services for older adults.

2. Change in Accounting Policy

Capital Disclosures

On April 1, 2008 the Home adopted a requirement of the CICA to provide disclosure about how it manages its unrestricted net assets (See Note 12).

The adoption of these new standards had no material impact on the Home's statement of financial position and operations.

3. Accounts Receivable

	2009	2008
Receivable from residents	$ 7,677	$ 7,299
GST rebate receivable	5,014	15,684
Other	11,237	12,491
	$ 23,928	$ 35,474

4. Accrued Vacation Entitlements

The Home records a provision for accrued vacation entitlements. Prior to March 31, 2004 changes in the liability related to vacation were recoverable from Manitoba Health. At that date, Manitoba Health advised that subsequent to March 31, 2004 all funding related to past and future vacation entitlement costs would be included in in-globe funding and that the maximum liability to be recognized by Manitoba Health to facilities would be capped at March 31, 2004 levels. Accordingly, each year as vacation entitlements are paid and earned by the Home's employees, the related vacation entitlement receivable is collected and re-established up to this maximum amount.

An analysis of the changes in the vacation entitlements receivable from Manitoba Health is as follows:

	2009	2008
Balance, beginning of year	$ 121,948	$ 121,948
Net changes in vacation entitlements receivable	-	-
Balance, end of year	$ 121,948	$ 121,948

An analysis of the changes in the accrued vacation entitlements is as follows:

	2009	2008
Balance, beginning of year	$ 141,925	$ 127,567
Net increase (decrease) in accrued vacation entitlements	19,780	14,358
Balance, end of year	$ 161,705	$ 141,925

5. Capital Assets

	2009		2008	
	Cost	Accumulated Amortization	Cost	Accumulated Amortization
Leasehold improvements	$ 2,479,172	$ 2,012,148	$ 2,477,195	$ 1,787,991
Furniture, fixtures and equipment	394,469	305,532	393,568	272,169
	$ 2,873,641	$ 2,317,680	$ 2,870,763	$ 2,060,160
Cost less accumulated amortization		$ 555,961		$ 810,603

Amortization of capital assets for the year ended March 31, 2009 is $257,520 (2008 - $257,520).

6. Bank Overdraft

The organization has a demand credit facility with the Royal Bank, amounting to $50,000 ($50,000 in 2008), available for operating needs. The overdraft facility bears interest at the bank's prime rate, calculated and payable monthly.

7. Accounts Payable

	2009	2008
Trade accounts payable	$ **40,932**	$ 39,855
Due to Manitoba Housing Authority	**-**	4,416
Salaries and employee benefits payable	**94,416**	98,341
Winnipeg Regional Health Authority	**45,473**	91,966
Due to related parties	**112,898**	116,136
	$ **293,719**	$ 350,714

8. Deferred Contributions

Capital Assets

Deferred capital contributions related to capital assets represent the unamortized amount and unspent amount of grants received for the purchase of capital assets. The amortization of capital contributions is recorded as revenue in the statement of operations at rates which match the amortization of the related capital assets purchased with grants.

Changes in the deferred contribution balance are as follows:

	2009	2008
Balance, beginning of year	$ **730,510**	$ 988,510
Additional contributions received		
Winnipeg Regional Health Authority	**257,520**	257,520
Less amounts amortized to revenue	**(257,520)**	(257,520)
Contributions applied to debt assumed by Province	**(257,099)**	(258,000)
Balance, end of year	$ **473,411**	$ 730,510

8. Deferred Contributions (continued)

Unspent Equipment Funding

Unspent equipment funding related to equipment replacement represent the unspent amount of funding received for the purchase of equipment. Equipment funding is not recorded as revenue in the statement of operations.

	2009	2008
Balance, beginning of year	**$ 111,599**	$ 98,294
Additional contributions received		
Winnipeg Regional Health Authority	**9,975**	9,975
Interest received	**1,847**	3,330
Equipment purchases	**(901)**	-
Balance, end of year	**122,520**	111,599
Total deferred contributions	**$ 595,931**	$ 842,109

The long-term debt that has been incorporated in deferred contributions includes the following:

Royal Bank Revolving Loan, bearing interest at 1.03%, due April 1, 2009	$473,411

9. Employee Future Benefits

a) Accrued retirement obligation

Based upon collective agreements and/or non-union policy, employees of the Home are entitled to a pre-retirement leave benefit if they are retiring in accordance with the provisions of the applicable Home Group Pension Plan. The Home's contractual commitment is to pay based upon the following:

Four days (pro-rated) of salary per year of service upon retirement if the employee complies with one of the following conditions:

i. has 10 years service and has reached the age 55

ii. qualifies for the "eighty" rule which is calculated by adding the number of years of service to the age of the employee

iii. retires at or after age 65

iv. terminates employment at any time due to permanent disability

The Home undertook an actuarial valuation of the pre-retirement leave benefit for accounting purposes as at March 31, 2009. The significant actuarial assumptions adopted in measuring the Home's accrued retirement entitlements include mortality and withdrawal rates, a discount rate of 6.7% (2008 - 5.5%) and a rate of salary increase of 3.5% (2008 - 3.5%) plus age related merit/promotion scale with no provision for disability.

The amount recorded as a receivable from the Province for pre-retirement costs was initially determined based on the value of the corresponding actuarial liability for pre-retirement costs as at March 31, 2004. Subsequent to March 31, 2004, the Province has included in its ongoing annual funding to the Home, an amount equivalent to the change in the pre-retirement liability, which includes annual interest accretion related to the receivable. The receivable will be paid by the Province when required.

Commencing in 2006/07, the Winnipeg Regional Health Authority assumed responsibility for funding the annual increase in the obligation each year. This amount will also be paid when required and the WRHA holds funding to meet this obligation.

	2009	2008
Employee future benefits recoverable from		
Manitoba Health	$ 83,241	$ 83,241
Winnipeg Regional Health Authority	77,124	62,585
	$ 160,365	$ 145,826

9. **Employee Future Benefits** (continued)

a) Accrued retirement obligation (continued)

An analysis of the changes in the employee benefits payable is as follows:

	2009	2008
Balance, beginning of year	$ 144,876	$ 118,866
Net increase (decrease) in pre-retirement entitlements	14,539	26,010
Balance, end of year	$ 159,415	$ 144,876

b) Pension plan

Substantially all of the employees of the Home are members of the Healthcare Employees Pension Plan (a successor to the Manitoba Health Organization Inc. Plan) (the "Plan") which is a multi-employer defined benefit pension plan available to all eligible employees of the participating members of the Plan. Plan members will receive benefits based on the length of service and on the average of annualized earnings during the best five years of the last ten years prior to retirement, termination or death, that provides the highest earnings.

Pension assets consist of investment grade securities. Market and credit risk on these securities are managed by the Plan by placing Plan assets in trust and through the Plan investment policy.

Pension expense is based on Plan management's best estimates, in consultation with its actuaries, of the amount, together with the contribution by employees, required to provide a high level of assurance that benefits will be fully represented by fund assets at retirement, as provided by the Plan. The funding objective is for employer contributions to the Plan to remain a constant percentage of employees' contributions.

Variances between actuarial funding estimates and actual experience may be material and any differences are generally to be funded by the participating members. The most recent actuarial valuation of the Plan as at December 31, 2007 indicates the Plan is in a deficit; however, it is anticipated that recently implemented increases in contribution rates will correct this deficiency within the allowed timeframe. Contributions to the Plan made during the year by the Home on behalf of its employees amounted to $117,371 (2008 - $113,551) and are included in the statement of operations.

10. Related Party Transactions

During the year the Home had the following transactions with related organizations:

Management fee charges	$ 71,458
Shared building operations expenses	362,933

Accounts payable includes $112,898 (2008 - $116,136) payable to related parties.

These transactions are in the normal course of operations and are measured at the exchange amount, which is the amount of consideration established and agreed to by the related parties.

The Manitoba Housing Authority owns the Manitoba Deaf Centre building located at 285 Pembina Highway, Winnipeg, Manitoba. Pembina Place Mennonite Personal Care Home Inc. has been allotted 31% of building operation expenses for the year ended March 31, 2009.

11. Funding of Future Employee Benefits

Effective April 1, 2004 Manitoba Health directed all health care facilities (including non-profit personal care homes) to discontinue establishing a receivable from Manitoba Health for the funding of future employee benefits given that the responsibility for payment of same would be transferred to the WRHA. Contrary to the long-standing practice prior to April 1, 2004, the WRHA has since directed all health care facilities to record the future employee benefits liability, but not the corresponding receivable. As explained in Note , commencing in 2007, the WRHA has agreed to fund the change in accrued pre-retirement liability for the WRHA funded portions; however, they did not agree to fund changes in accrued vacation pay.

The Home has taken the position that Unfunded Future Employee Benefits (which include Pre-retirement Leave and Vacation Accrual) should be recoverable from the WRHA.

The Home's position is based on the fact that employee benefits are negotiated centrally by the Labour Relations Secretariat, and the Service Purchase Agreement explicitly states that the level of funding will be commensurate with any settlement agreed to by the Labour Relations Secretariat.

Based on this understanding, the corresponding responsibility for the future funding of the these benefits should be recognized by Manitoba Health to the WRHA and the WRHA to Winnipeg non-profit personal care homes (including Pembina Place Mennonite Personal Care Home Inc.).

The Home has expressed considerable concern to the WRHA regarding the impact of the policy change referred to above, and the manner in which Employee Future Benefit liabilities are to be funded and recorded in the Home's Audited Financial Statements.

12. Capital Management

The Home considers its capital to comprise its Net Assets balance. There have been no changes to what the organization considers to be its capital since the previous period.

The Home manages its capital to ensure it retains sufficient resources to enable it to meet its obligations for resident care. The determination of this amount is based on historical expense requirements relative to funding commitments.

AUDITORS' REPORT

To the Member of St. Amant Inc.

We have audited the statement of financial position of St. Amant Inc. as at March 31, 2009 and the statements of operations and changes in fund balances and cash flows for the year then ended. These financial statements are the responsibility of the Organization's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of the Organization as at March 31, 2009 and the results of its operations and its cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

Cash, beginning of year	818,128	1,518,548
Cash, end of year	$ 2,146,851	$ 818,128

See accompanying notes to financial statements.

General:

St. Amant Inc. (the Organization) was incorporated in 1960 as a corporation without share capital. The Organization is a residential and resource facility dedicated to providing comprehensive care, leadership and promoting excellence in services for Manitobans with developmental disabilities.

1. Significant accounting policies:

(a) Revenue recognition:

The Organization is funded primarily by the Province of Manitoba in accordance with budget arrangements established by the Winnipeg Regional Health Authority (WRHA) and Manitoba Family Services and Housing (Family Services). Operating grants are recorded as revenue in the period to which they relate. These financial statements reflect agreed arrangements approved with respect to the year ended March 31, 2009. The Organization's Service Purchase Agreement (SPA) with the WRHA continues in effect until March 31, 2012 and the SPA with Family Services continued in effect until March 31, 2009.

The Organization follows the deferral method for contributions on a fund accounting basis as follows:

Restricted contributions are recognized as revenue of the appropriate fund in the year in which the related expenses are incurred. Contributions restricted for the purchase of capital assets are deferred and amortized into revenue at a rate corresponding with the amortization rate for the related capital assets. Unrestricted contributions are recognized as revenue of the appropriate fund when received. Investment income is recognized in the Operating Fund in the year in which it is earned.

The funds used by the Organization are:

(i) Operating Fund:

Unrestricted:

The Operating Fund - unrestricted includes transactions related to the government funded operations of the main residential program, developmental day program and community residences.

1. Significant accounting policies (continued):

Internally restricted:

The Operating Fund - internally restricted consists of funds restricted as approved by the Board of Directors.

(ii) Capital Fund:

The Capital Fund includes transactions related to the capital assets used for operations of the Organization.

(b) Financial instruments:

Initially, all financial assets and liabilities must be recorded on the statement of financial position at fair value. Subsequent measurement is determined by the classification of each financial asset and liability. Under this standard, all financial instruments are classified as one of the following five categories: (a) held-for-trading; (b) loans and receivables; (c) held-to-maturity; (d) available-for-sale; or (e) other liabilities. Financial assets and liabilities held-for-trading are measured at fair value with gains and losses recognized in excess (deficiency) of revenue over expenses. Financial instruments classified as held-to-maturity, loans and receivables and other liabilities are measured at amortized cost. Available-for-sale financial instruments are measured at fair value, with unrealized gains and losses recognized directly in fund balances.

The Organization designated cash and funds held in trust for residents as held-for-trading; accounts receivable, vacation pay recoverable from Winnipeg Regional Health Authority, due from St. Amant Foundation Inc. and future employee pre-retirement benefits recoverable from Winnipeg Regional Health Authority as loans and receivables; and accounts payable and accrued liabilities, employee vacation payable, funds held in trust for residents, advances and long-term debt as other liabilities. The Organization does not have held-to-maturity or available-for-sale financial instruments.

Except for held-for-trading designated financial instruments, transaction costs that are directly attributable to the acquisition or issuance of financial assets or liabilities are accounted for as part of the respective asset or liability's carrying value at inception and amortized over the expected life of the financial instrument using the effective interest rate method. For held-for-trading financial assets and liabilities, transaction costs are recorded in the statement of operations as incurred.

(c) Inventories:

Inventories are valued at the lower of cost and net realizable value.

1. **Significant accounting policies (continued):**

(d) Capital assets:

Capital expenditures are recorded at cost as capital assets in the Capital Fund. Contributed capital assets are recorded at fair value at the date of contribution.

Land is stated at its appraised value as at January 13, 1972. Acquisitions subsequent to 1972 are stated at cost.

Amortization on capital assets is charged to the Capital Fund and recorded on a straight-line basis to amortize the cost of capital assets over their estimated useful lives.

Capital assets are amortized over the following periods:

Asset	Period
Land improvements	20 years
Buildings	10 - 40 years
Furniture and equipment, building service equipment	5 - 20 years
Automotive	5 years
Software	5 years

(e) Mortgage payable:

Mortgage payable to Canada Mortgage and Housing Corporation (note 4), for which a portion is forgivable over the period of repayment, is recorded at the repayable amounts.

(f) Deferred contributions:

(i) Related to expenses of future years:

Grants received toward specified expenditures are taken into revenue as the related expenditures are incurred.

(ii) Related to capital assets:

Grants received towards the cost of capital expenditures are deferred and amortized on a straight-line basis over the estimated useful life of the assets purchased.

1. Significant accounting policies (continued):

(g) Debt retirement:

The principal portion of annual debt retirement costs is recorded in the Capital Fund as a reduction of long-term debt. The interest portion of annual debt retirement is recorded in the Capital Fund as an expense.

(h) Income taxes:

The Organization is exempt from income taxes under Section 149(1) of the *Income Tax Act*.

(i) Volunteers:

A large number of volunteers donate significant amounts of time in the Organization's activities. No amount is reflected in the statements for donated services since no objective basis is available to measure the value of such services.

(j) Future employee pre-retirement benefits:

Future pre-retirement benefits are accrued as earned based on an actuarial estimation. The estimation of the future pre-retirement benefits has been performed using the projected unit credit service pro-rated on service actuarial cost method. The significant actuarial assumptions adopted in measuring the Organization's accrued future pre-retirement benefit includes mortality and withdrawal rates, a discount rate of 6.70 percent (2008 - 5.50 percent) and a rate of salary increase of 3.50 percent (2008 - 3.50 percent) plus an age related merit/promotion scale with no provision for disability.

(k) Use of estimates:

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the year. Actual results could differ from those estimates.

2. Capital assets:

			2009	2008
	Cost or appraised value	Accumulated amortization	Net book value	Net book value
440 River Road:				
Land	$ 212,888	$ –	$ 212,888	$ 212,888

Province of Manitoba promissory note, due on demand, unsecured, interest at 4.6%, payable $41,666 monthly, principal payments plus interest, maturing in March 2012	1,500,008	2,000,000
National Bank of Canada, promissory note, due on demand, interest at bank prime, payable $7,500 monthly, principal payments, maturing in March 2013	352,500	442,500
National Bank of Canada, promissory note, due on demand, interest at bank prime, payable $8,333 monthly, principal payments, maturing in March 2013	246,667	491,667
	7,020,594	7,391,288
Current portion (including demand loans)	5,358,665	5,575,602
	$ 1,661,929	$ 1,815,686

The long-term debt with National Bank of Canada is secured by certain land and buildings owned by the Organization and for certain loans, letters of comfort from Manitoba Health.

The repayment of the Province of Manitoba promissory note, both principal and interest, has been guaranteed for the term of the note by the Province of Manitoba. Principal and interest payments for fiscal 2008 and 2009 have been funded directly by the Province of Manitoba. These financial statements do not reflect the related funding for and interest paid on the promissory note for fiscal 2008 and 2009.

4. Long-term debt (continued):

For Manitoba Health approved borrowings, the Government of Manitoba may elect to retire this debt at anytime as it so chooses.

Principal repayments over the next five years and thereafter, based on current repayment terms, are approximately as follows:

2010	$ 5,358,665
2011	126,503
2012	131,845
2013	139,209
2014 and thereafter	1,264,372
	$ 7,020,594

5. Deferred contributions:

(i) Expenses of future periods:

Deferred contributions related to expenses of future periods represent unspent externally restricted grants and donations.

	2009	2008
Balance, beginning of year	$ 1,268,325	$ 1,601,628
Additional contributions received	4,686,625	4,428,950
Less amounts transferred to deferred contributions - capital assets	–	(573,465)
Less amounts recognized as revenue	(4,577,134)	(4,188,788)
	$ 1,377,816	$ 1,268,325

ST. AMANT INC.

Notes to Financial Statements (continued)

Year ended March 31, 2009

5. Deferred contributions (continued):

(ii) Capital assets:

Deferred capital contributions related to capital assets represent the unamortized amount and unspent amount of donations and grants received for the purchase of capital assets. The amortization of capital contributions is recorded as revenue in the statement of operations.

	2009	2008
Balance, beginning of year	$ 6,046,686	$ 4,989,041
Additional contributions received	515,900	980,450
Add amount transferred from deferred contributions - expenses of future periods	–	573,465
Less amounts amortized to revenue	(567,767)	(496,270)
	$ 5,994,819	$ 6,046,686

	Grants	Accumulated amortization	2009 Net book value	2008 Net book value
Land improvements	$ 368,095	$ 63,486	$ 304,609	$ 251,980
Buildings	5,018,437	1,588,852	3,429,585	3,727,782
Buildings service equipment	1,886,195	673,251	1,212,944	1,030,743
Furniture and equipment	3,274,909	2,227,228	1,047,681	1,036,181
	$ 10,547,636	$ 4,552,817	$ 5,994,819	$ 6,046,686

6. Related party transactions and balance:

The Organization made payments on loans held by the St. Amant Foundation Inc., a corporation with the same Member as the Organization, of nil (2008 - $17,284), of which nil (2008 - $7,500) was principal. The Organization pays rent on eight community residences to St. Amant Foundation Inc. for $80,903 (2008 - $80,903). The Organization charged St. Amant Foundation Inc. $130,067 (2008 - $20,000) for costs related to the parking lot including $90,000 (2008 - nil) which has been recorded in deferred contribution related to capital assets.

6. Related party transactions and balance (continued):

During fiscal 2009, St. Amant Foundation Inc. transferred a capital asset, parking lot improvements, at its net book value of $398,927 to the Organization.

St. Amant Foundation Inc. has provided funds towards the Organization's operations in the following amounts:

	2009	2008
Community residences program:		
Vehicles	$ –	$ 15,000
Other	–	2,513
	–	17,513
Client services programs:		
Aboriginal Culture and Initiative Outreach	10,221	42,323
Community support	227	834
ABA Program	4,626	–
River Road Place	48,158	–
St. Amant School	6,303	–
Community Residence Program	21,226	–
Daycare	9,190	6,444
Resident care program	–	2,500
	99,951	52,101
Education and training:		
St. Amant Inc. conference	7,498	18,590
Research program	–	70,000
Other equipment and supplies	16,176	–
Capital projects:		
River Road Place	69,600	61,115
River Road Child Care	6,554	–
School and developmental services	26,124	15,049
Grounds enhancement	–	20,235
Development services renovations	–	107,151
Deck 1 (west)	–	3,000
Software	–	11,000
Common area renovations	–	172,893
Community residential program	–	28,860
	102,278	419,303
	$ 225,903	$ 577,507

Of these contributions, $102,278 (2008 - $419,303) have been recorded in deferred contributions related to capital assets.

6. Related party transactions (continued):

The receivable from St. Amant Foundation Inc. of $608,798 (2008 - $801,789) is non-interest bearing, has no specified terms of repayment and is unsecured.

These transactions are in the normal course of operations and are measured at the exchange amount which is the amount of consideration established and agreed to by the related parties.

7. Inter-program recoveries:

The Organization records inter-program recoveries of $ 2,128,516 (2008 - $1,545,612) to offset the costs associated with the corporately managed shared expenses of the various programs. These amounts are recorded as other expenses in the related programs.

8. Employee benefits recoverable and payable:

(i) The Organization maintains an employee pre-retirement benefit plan primarily for the WRHA funded employees. The plan provides benefit payments to eligible retirees based on length of service and on career earnings from initial eligibility.

At March 31, 2009, based on an actuarial estimate, the pre-retirement benefit plan's obligations are estimated to be approximately $1,822,010 (2008 - $1,932,109) for which the Organization has provided an accrued future employee pre-retirement benefits liability on the statement of financial position.

The amount of funding which will be provided by the Winnipeg Regional Health Authority (WRHA) for pre-retirement benefits was initially determined based on the pre-retirement liability at March 31, 2004, and was recorded as a long-term receivable on the statement of financial position.

The recoverable has been adjusted, based on direction from WRHA, to include the incremental change in the related liability since fiscal 2007, which includes an interest component. The decrease recorded in fiscal 2009 was $110,099 (2008 - $172,033) and is recorded in the statement of operations.

In addition, during 2007, the WRHA approved partial funding of the incremental increases in the future employee pre-retirement benefits liability for fiscal 2005 and 2006 of $162,531. This amount also included an interest component and was received in fiscal 2009.

8. Employee benefits recoverable and payable (continued):

The future employee pre-retirement benefits recoverable from WRHA at March 31, 2009 aggregates $1,543,522 (2008 - $1,653,621) and has no specified terms of repayment.

Additional, information about the Organization's employee pre-retirement benefit plan is as follows:

	2009	2008
Net benefit cost expensed in statement of operations:		
Pre-retirement benefits paid included in salaries	$ 218,106	$ 237,849
Change in pre-retirement benefits payable included in future employee pre-retirement benefits	(110,099)	(172,033)

Prior to 2004, Manitoba Health funded 100 percent of actual pre-retirement benefits paid over and above the operating grant provided to the Organization. Beginning April 1, 2005, the WRHA established a policy of providing additional funding for approximately 70 percent of actual pre-retirement benefits paid. Actual funding provided by WRHA for 2009 was 65.1 percent (2008 – 64.25 percent) of actual pre-retirement benefits paid. The shortfall for 2009 of $76,119 (2008 - $85,031) was paid from funding received for operations.

(ii) Certain eligible employees of the Organization are members of Healthcare Employees Pension Plan - Manitoba, a multi-employer defined pension plan. As individual entities within the plan are not able to identify their share of the underlying assets and liabilities, the Organization is accounting for the plan as a defined contribution plan. The cost of the plan is recognized based on the contributions required to be made during each period. During the year, the Organization contributed $1,920,781 (2008 - $1,745,544) on behalf of its employees.

The most recent actuarial valuation of the plan as at December 31, 2007 indicated a solvency deficiency of $61,050,000 that will be funded over five years commencing calendar 2008 out of current contributions in each respective year. A change in underlying actuarial assumptions could cause a change in the actuarial value of accrued pension benefits and required service contributions. Contribution rates were increased on July 1, 2007 to 6.8 percent of pensionable earnings up to the yearly maximum pensionable earnings limit (YMPE) and 8.4 percent on earnings in excess of the YMPE. No rates changes have been issued since.

8. Employee benefits recoverable and payable (continued):

(iii) The cost of the Organization's vacation benefits is accrued when the benefits are earned by the employees and is reported as employee vacation payable on the statement of financial position. The vacation liability at March 31, 2009 is $2,436,083 (2008 - $2,136,892). The funding received in each subsequent fiscal year from the WRHA includes the vacation payable recoverable from the WRHA of $1,461,198 as included on the statement of financial position. The vacation pay recoverable from the WRHA is maintained at the employee vacation payable at March 31, 2004.

9. Future accounting changes:

The Canadian Institute of Chartered Accountants (CICA) issued the following accounting standards that will come into effect for the Organization's next fiscal year. The Organization is in the process of determining the impact that these standards will have on its financial reporting.

On April 1, 2009, the Organization will adopt CICA Section 3862, *Financial Instruments - Disclosures* and Section 3863, *Financial Instruments - Presentation* were to replace the existing Section 3861, *Financial Instruments - Disclosure and Presentation*, effective April 1, 2009 for the Organization. These new sections revise and enhance disclosure requirements, and carry forward, unchanged, existing presentation requirements. These new sections place increased emphasis on disclosures about the nature and extent of risks arising from financial instruments and how the entity manages those risks. However, the CICA subsequently amended these sections to eliminate the requirement for not-for-profit entities to adopt these sections. Not-for-profit entities are permitted to continue to apply Section 3861 in place of Section 3862 and 3863. An entity that does so much disclose this fact.

In September 2008, a number of standards applicable to not-for-profit organizations were amended and new Section 4470, *Disclosures of Allocated Expenses by Not-for-Profit Organizations,* was issued. The new Section 4470 requires entities that make allocations of general support and fundraising costs to other functions to disclose the policies adopted for the allocation of expenses among functions, the nature of the expenses being allocated, the basis on which such allocations have been made, and the functions to which they have been allocated. In addition, the amendments to the not-for-profit organization standards include clarification of when revenues and expenses are to be reported on a gross basis; clarification of the treatment of internal and external restriction on net assets; and improved guidance related to application of GAAP hierarchy, capital asset standards and statement of cash flows. The Organization will adopt these standards on April 1, 2009.

10. Fair value:

The fair value of the following items is not determinable due to the underlying terms and conditions: due from St. Amant Foundation Inc., advances, loans payable to CMHC and Province of Manitoba promissory note.

The fair value of the future employee pre-retirement benefits recoverable from Winnipeg Regional Health Authority approximates its carrying value as the interest component is comparable to current market rates.

The fair value of loans payable to National Bank of Canada is approximately $5,136,000 (2008 - $4,963,000) as compared to their carrying value of $5,107,565 (2008 - $4,932,227). Fair value has been determined using future payments of principal and interest discounted at current rates.

The fair value of the remaining financial assets and liabilities approximates their carrying values due to their short term nature.

11. Comparative figures:

Certain comparative figures have been reclassified to conform with the financial statement presentation adopted in the current year.

AUDITORS' REPORT

To the Board of Directors of
St. Joseph's Residence Inc.

We have audited the statement of financial position of St. Joseph's Residence Inc. as at March 31, 2009 and the statements of operations, changes in net assets and cash flows for the year then ended. These financial statements are the responsibility of the Residence's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of the Residence as at March 31, 2009 and the results of its operations and its cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

1. NATURE OF ORGANIZATION

St. Joseph's Residence Inc. is a not-for-profit corporation, which operates a personal care home. Effective February 13, 2003, the sponsorship of the Residence was transferred from the Sisters of the Order of St. Benedict to the Catholic Health Corporation of Manitoba (CHCM). The Residence is a registered charity under the Income Tax Act and accordingly is exempt from taxes.

2. CHANGES IN ACCOUNTING POLICIES

On April 1, 2008, the Residence adopted CICA 1535, Capital disclosures. This standard requires the disclosure of information related to the objectives, policies and processes for managing capital.

3. SIGNIFICANT ACCOUNTING POLICIES

The Residence has elected to use the exemption provided by the Canadian Institute of Chartered Accountants (CICA) permitting not-for-profit organizations not to apply Sections 3862 and 3863 of the CICA Handbook which would otherwise have applied to the financial statements of the Residence for the year ended March 31, 2009. The Residence applies the requirements of Section 3861 of the CICA Handbook.

The financial statements have been prepared in accordance with Canadian generally accepted accounting principles and include the following significant accounting policies:

a) *Revenue recognition*

The Residence follows the deferral method of accounting for contributions which include donations and government grants.

Under the Health Insurance Act and regulations thereto, the Residence is funded primarily by the Province of Manitoba in accordance with budget arrangements established by WRHA. Operating grants are recorded as revenue in the period to which they relate.

Unrestricted contributions are recognized as revenue when received or receivable if the amount to be received can be reasonably estimated and collection is reasonably assured.

Externally restricted contributions are recognized as revenue in the year in which the related expenses are recognized. Contributions restricted for the purchase of capital assets are deferred and amortized into revenue on a straight-line basis, at a rate corresponding with the amortization rate for the related capital assets.

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

b) Capital assets

Purchased capital assets are recorded at cost. Contributed capital assets are recorded at fair value at the date of contribution.

Capital assets are depreciated on a straight-line basis over the following estimated useful lives:

Building	50 years
Parking lot	20 years
Furniture and equipment	5, 10 years
Building service equipment	20 Years

c) Vacation pay

The Residence records the accrued vacation pay entitlement liability. The related revenue and expense is recorded in the statement of operations for the current year.

d) Retirement entitlement obligation

The Residence has a contractual commitment to pay out to employees four days salary per year of service upon retirement if they comply with the following conditions:

i) have ten years service and have reached the age of 55 or

ii) qualify for the "eighty" rule which is calculated by adding the number of years of service to the age of the employee.

The Residence has recorded an accrual based on an actuarial valuation that includes employees who qualify at the year-end balance sheet date and an estimate for the remainder of employees who have not yet met the criteria above. The related revenue and expense is recorded in the statement of operations for the current year.

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

e) *Financial instruments*

Financial assets and financial liabilities are initially recognized at fair value and their subsequent measurement is dependent on their classification as described below. Their classification depends on the purpose, for which the financial instruments were acquired or issued, their characteristics and the Residence's designation of such instruments.

Classification

Cash	Held for trading
Certificates of deposit	Held for trading
Accounts receivable	Loans and receivables
Amounts due from WRHA/Manitoba Health	Loans and receivables
Accounts payable and accrued liabilities	Other liabilities
Accrued vacation pay	Other liabilities
Long term debt	Other liabilities

Held for trading
Held for trading financial assets are financial assets typically acquired for resale prior to maturity or that are designated as held for trading. They are measured at fair value at the balance sheet date. Fair value fluctuations including interest earned, interest accrued, gains and losses realized on disposal and unrealized gains and losses are included in investment income.

Loans and receivables
Loans and receivables are accounted for at amortized cost using the effective interest method.

Other liabilities
Other liabilities are recorded at amortized cost using the effective interest method and include all financial liabilities, other than derivative instruments.

Effective interest method
The Residence uses the effective interest method to recognize interest income or expense which includes transaction costs or fees, premiums or discounts earned or incurred for financial instruments.

f) *Provision for operating surplus settlement with WRHA*

The Residence records the full amount of its operating surplus as calculated in accordance with the WRHA guidelines as a provision for settlement with WRHA. The actual amount of the settlement is determined after a review of the details by Manitoba Health and negotiation with the Residence. Any difference is recorded subsequently in the statement of operations in the year of settlement.

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

g) *Contributed services*

Contributed services are recorded at their estimated fair value if the amount can be reasonably estimated.

h) *Inventory*

Inventories of supplies are valued at the lower of cost and net realizable value with the cost being determined on an average basis.

i) *Fair value*

The carrying value of the Residence's financial assets and liabilities reflect their fair values, unless otherwise disclosed.

j) *Future accounting changes*

In November 2008, the Canadian Institute of Chartered Accountants issued amendments to Section 1540, Cash flow statements, Section 1751, Interim financial statements, Section 4400, Financial statement presentation by not-for-profit organizations, Section 4430, Capital assets held by not-for-profit organizations, Section 4460, Disclosure of related party transactions by not-for-profit organizations and issued Section 4470, Disclosure of allocated expenses by not-for-profit organizations. These new standards are effective for fiscal years beginning on or after January 1, 2009, specifically April 1, 2009 for the Residence.

Sections 1540 and 1751 have been amended to include not-for-profit organizations within their scope.

Section 4400 has been amended in order to eliminate the requirement to treat net assets invested in capital assets as a separate component of net assets and, instead, permit a not-for-profit organization to present such an amount as a category of internally restricted net assets when it chooses to do so. It also clarifies that revenues and expenses must be recognized and presented on a gross basis when a not-for profit organization is acting as a principal in transactions.

Section 4470 establishes disclosure standards for a not-for-profit organization that classifies its expenses by function and allocates its expenses to a number of functions to which the expenses relate.

The Residence does not expect that the adoption of these new standards will have a material impact on its financial statements.

4. CAPITAL ASSETS

	2009		2008	
	Cost	Accumulated Depreciation	Cost	Accumulated Depreciation
Land	$ 193,965	$ -	$ 193,965	$ -
Building	2,994,317	1,480,859	2,978,068	1,365,221
Parking lot	86,781	25,564	86,781	19,831
Furniture and equipment	1,507,433	1,153,208	1,311,793	1,101,427
Building service equipment	314,772	62,954	314,772	47,216
	5,097,248	2,722,858	4,885,559	2,533,695
Net Book Value		$ 2,374,683		$ 2,351,684

Depreciation expense during the year totalled $188,890 (2008 - $106,314) including $5,139 (2008 - $3,280) recorded in the ancillary operations.

5. ACCRUED PRE-RETIREMENT LEAVE

The Residence undertook an actuarial valuation of the accrued pre-retirement leave in accordance with accounting policy (Note 3(d)). The significant actuarial assumptions adopted in measuring the Residence's accrued pre-retirement leave include mortality and withdrawal rates, a discount rate of 6.70% (2008 – 5.50%) and a rate of salary increase of 3.5% plus age related merit/promotion scale with no adjustment for disability. Actual payments made during the year for the Residence's pre-retirement leave were $38,133 (2008 - $38,710).

6. LONG-TERM DEBT

	2009	2008
Mortgage, payable to Canada Mortgage and Housing Corporation, repayable in blended monthly instalments of $11,017, interest rate of 4.17% per annum, due May 1, 2015	$ 718,438	$ 818,735
Term loan, payable to Toronto Dominion Bank, repayable in monthly principal payments of $2,705, plus interest at prime minus 0.75% per annum, due October 31, 2014	176,817	209,277
Term loan, payable to Toronto Dominion Bank, repayable in monthly principal payments of $2,945, plus interest at prime minus 0.75% per annum, due August 31, 2018	297,441	332,781
Total long-term debt	1,192,696	1,360,793
Current portion	172,378	168,168
	$ 1,020,318	$ 1,192,625

6. LONG-TERM DEBT (continued)

The mortgage with the Canada Mortgage and Housing Corporation is secured by a security agreement covering all land, buildings, furniture and equipment and assignment of all residential charges. The term loans are secured by a Letter of Comfort from Manitoba Health.

The principal repayments in each of the next five years are as follows:

Mortgage:	2010	$	104,578
	2011		108,969
	2012		113,536
	2013		118,297
	2014		123,260
Term loans:	2010	$	67,800
	2011		67,800
	2012		67,800
	2013		67,800
	2014		67,800

7. CANADA MORTGAGE AND HOUSING PAYMENTS

The Residence has received federal assistance through Canada Mortgage and Housing Corporation pursuant to Section 56.1 of the National Housing Act to reduce mortgage interest expense to 1.5% to enable the project to provide housing to low income individuals. The amount of assistance received in 2009 was $35,946 (2008 - $35,946).

8. RELATED ENTITIES

a) The Residence is dependent on the Winnipeg Regional Health Authority for the majority of the funding of its operations.

b) During the current year, St. Joseph's Residence Inc. charged $4,680 (2008 - $4,680) to the Friends of St. Joseph's Residence Inc., a related party, for accounting and administration services.

Friends of St. Joseph's Residence Inc. made donations to St. Joseph's Residence Inc. totalling $58,469 (2008 - $60,084).

At March 31, 2009 St. Joseph's Residence Inc. had a receivable from Friends of St. Joseph's Residence Inc. in the amount of $60,417 (2008 - $59,972).

9. INTEREST RATE AND CREDIT RISK

a) *Interest rate risk*

Interest rate risk refers to the adverse consequences of interest rate changes in the Residence's cash flows, financial position and income. This risk arises from differences in the timing and amount of cash flows related to the Residence's assets. The value of the Residence's assets is affected by short-term changes in nominal interest rate and equity markets.

The term to maturity of the fixed income investments of the Residence are all before the end of the 2012 calendar year with coupon rates ranging between 0.80% and 4.71% (2008 – 3.20% and 5.10%). The fair market value of these fixed income securities as at March 31, 2009 is $705,205 (2008 – $756,780).

b) *Credit Risk*

Credit risk arises when a counterparty does not fully honour its financial or contractual obligations. The Residence has established credit and investment policies to mitigate this risk.

Credit risk is increased where a significant portion of the investment portfolio is invested in securities which have similar characteristics or which are expected to follow similar variations relating to economic or political conditions. The risk of excess concentration is mitigated by an investment policy established by the Board of Directors, which sets out various investment policies.

The majority of the current year's accounts receivable balance consists of related party amounts and the remainder are resident receivables, which is consistent with the prior year, and are regarded as low credit risk balances.

10. DEFERRED CONTRIBUTIONS – EXPENSES OF FUTURE PERIODS

Deferred contributions related to expense of future periods represent the unspent amount of donations and grants received for expenditures other than the purchase of capital assets. Amortization is recorded as revenue in the statement of operations and matched with the related expenses.

	2009	2008
Balance, beginning of year	$ 86,240	$ 67,048
Additional contributions	20,676	80,195
Distribution for expenses	(79,194)	(61,003)
Balance, end of year	$ 27,772	$ 86,240

11. DEFERRED CONTRIBUTIONS – CAPITAL ASSETS

Deferred contributions related to capital assets represent the unamortized amount and unspent amount of donations and funding received for the purchase of capital assets. The amortization of capital contributions is recorded as revenue in the statement of operations. Changes in the deferred contributions balance are as follows:

	2009				2008
	Purchased Capital Assets	Future Capital Assets	Contributed Surplus	Total	Total
Balance beginning of year	$ 301,382	$ 157,336	$ 270,259	$ 728,977	$ 611,034
Additional contributions received	289,002	17,500	-	306,502	56,776
Debt repayment	168,097	-	-	168,097	149,169
Amortization	(153,644)	-	(9,319)	(162,963)	(88,002)
Balance, end of year	$ 604,837	$ 174,836	$ 260,940	$ 1,040,613	$ 728,977

12. DEFERRED CONTRIBUTIONS – MAJOR REPAIRS

Deferred contributions related to major repairs represent the unamortized amount and unspent funding received for major repairs. Amounts are recorded as revenue when applicable expenses are incurred. Changes in the deferred contributions balance are as follows:

	2009	2008
Balance, beginning of year	$ 46,188	$ 34,188
Additional contributions	12,000	12,000
Balance, end of year	$ 58,188	$ 46,188

13. INVESTED IN CAPITAL ASSETS

Invested in capital assets is calculated as follows:

	2009	2008
Capital assets	$ 2,374,683	$ 2,351,684
Cash – Future Capital Assets	174,836	157,336
Amounts financed by		
Deferred contributions	(1,040,613)	(728,977)
Mortgage payables	(718,438)	(818,735)
Term loans	(474,258)	(542,058)
	$ 316,210	$ 419,250

13. INVESTED IN CAPITAL ASSETS (continued)

Change in net assets invested in capital assets is calculated as follows:

	2009	2008
Depreciation of capital assets included in operations	$ (188,890)	$ (106,314)
Amortization of deferred contributions related to capital assets included in operations	162,963	88,002
	$ (25,927)	$ (18,312)

Net change in invested in capital assets is as follows:

	2009	2008
Purchase of capital assets	$ 211,889	$ 345,448
Increase in deferred contributions	(457,009)	(189,917)
Increase in term loans	-	(168,513)
Repayment of term loan	67,800	53,075
Mortgage repayments	100,297	96,093
	$ (77,113)	$ 136,186

14. PENSION PLAN

Substantially all of the employees of the Residence are members of the Healthcare Employees Pension Plan – Manitoba. The Residence's liability under the pension plan is limited to the contributions required during the year under the respective agreements.

Employer contributions made to the plan during the year by the Residence amounted to $259,650 (2008 - $229,302).

15. CAPITAL MANAGEMENT

The objective of the Board of Directors of the Residence, when managing capital, is to safeguard the ability to continue as a going concern. The Board of Directors sets the amount of capital in proportion to risk. The Board of Directors manages the capital structure and makes adjustments to it in the light of changes in economic conditions and the risk characteristics of the underlying assets.

16. COMPARATIVE FIGURES

Certain figures, previously reported for 2008, have been reclassified to conform with the basis of presentation adopted in the current year.

Auditors' Report

To the Members of
Sexuality Education Resource Centre Manitoba, Inc.

We have audited the statement of financial position of Sexuality Education Resource Centre Manitoba, Inc. as at March 31, 2009, and the statement of operations and statement of changes in fund balances for the year then ended. These financial statements are the responsibility of the organization's management. Our responsibility is to express an opinion on these financial statements based on our audit.

Except as explained in the following paragraph, we conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free from material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant accounting estimates made by management, as well as evaluating the overall financial statement presentation.

In common with many charitable organizations, the organization derives revenue from the general public in the form of donations, memberships, sales of promotional materials, honoraria and fundraising projects, the completeness of which is not susceptible of satisfactory audit verification. Accordingly, our verification of these revenues was limited to amounts recorded in the records of the organization and we were not able to determine whether any adjustments might be necessary to these revenues, excess of revenues over expenditures, assets and surplus.

In our opinion, except for the effect of adjustments, if any, which we might have determined to be necessary had we been able to satisfy ourselves concerning the completeness of the revenues referred to in the preceding paragraph, these financial statements present fairly, in all material respects, the financial position of the organization as at March 31, 2009, and the results of its operations, changes in fund balances and cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

Commitments (Note 7)

On behalf of the Board

Kristen Willis, CA Director

Anna Ling Director

See accompanying notes to the financial statements.

1. Purpose of the organization

Sexuality Education Resource Centre Manitoba, Inc. is committed to promoting universal access to comprehensive, reliable information and services by fostering awareness, understanding and support through education on sexuality and related health issues.

The organization is an incorporated not-for-profit entity and is a registered charity under the Income Tax Act.

2. Summary of significant accounting policies

The organization follows accounting principles generally accepted in Canada in preparing it's financial statements. The significant accounting policies used are as follows:

Revenue recognition

Sexuality Education Resource Centre Manitoba, Inc. follows the deferral method of accounting for revenue.

Restricted contributions are recognized as revenue of the appropriate fund in the year in which the related expenses are incurred. Unrestricted contributions are recognized as revenue of the appropriate fund when received or receivable if the amount to be received can be reasonably estimated and collection is reasonably assured.

Fund accounting

Revenue and expenses related to program delivery and administration activities are reported in the Operating Fund.

The Relocation Reserve is available to fund future purchases for the anticipated relocation.

Property and equipment

Property and equipment are recorded at cost. Amortization is provided on the declining balance basis at annual rates estimated to write off the assets over their estimated useful lives as follows:

Furniture and equipment	20%
Computers	20%

Accounting estimates

The preparation of financial statements in accordance with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amount of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements and the reported amount of revenues and expenses during the reported period. These estimates are reviewed periodically and are reported in earnings in the period in which they become known. Actual results could differ from these estimates.

2. Summary of significant accounting policies - continued

Financial instruments

The organization's financial instruments consist of cash and short term deposits, receivables, payables and accruals and deferred revenue.

The fair value of the agency's financial assets and liabilities approximate their carrying value. It is management's opinion that the agency is not exposed to significant interest, currency or credit risk arising from these financial instruments.

3. Equipment

	Cost	Accumulated Amortization	2009 Net Book Value	2008 Net Book Value
Winnipeg				
Computers	$ 82,921	$ 48,343	$ **34,578**	$ 19,096

Klinic	**1,610**	1,610
Nine Circles	**467**	10,000
Winnipeg Foundation	**7,726**	7,726
Foundation for Sexual Health	**1,100**	1,100
Planned Parenthood Federation of Canada	**3,000**	3,000
	$ **147,748**	$ 180,380

6. Deferred contributions related to property and equipment

Deferred contributions related to property and equipment represent grants and contributions for computers. Deferred contributions are amortized on the statement of operations. Amortization was provided in the current year for $6,152 (2008 - $5,009).

7. Lease commitments

The organization leases office space located at 555 Broadway Avenue. The organization has a five year lease which expires August 31, 2009 and which obligates the organization to make monthly rental payments of $3,690 plus GST until the lease expires.

The organization has a five year lease for the Brandon office which expires December 1, 2009 and which obligates the organization to make annual rental payments totaling $14,400.

The organization has signed a new lease to occupy office space at 226 Osborne Street North. The lease is for fifteen years and expires August 31, 2024. For the period commencing September 1, 2009 until August 31, 2010, the annual rental lease payments will be $36,800 with annual increases of $1.00 per square foot.

The Winnipeg Regional Health Authority has committed to subsidize a portion of the lease starting in year 2 of the lease term in the amount of approximately $4,000 per year, to be increased by 2% annually.

8. Pre-retirement leave benefits

The organization has a contractual commitment for the pre-retirement benefits for the members of the pension plan based on years of service before retirement. During the year ended March 31, 2006 the organization was instructed by the Winnipeg Regional Health Authority to record the full obligation. The Winnipeg Regional Health Authority calculated and advised the organization of the amount of the obligation. Pre-retirement leave benefits are considered an out-of globe funding item, of which the Winnipeg Regional Health Authority has instructed the organization to set up a receivable for the pre-retirement leave obligation that belongs to Winnipeg Regional Health Authority programs. The change in the accrued pre-retirement leave benefits are recorded as an expense in the current year.

Change in obligation	2009	2008
Opening balance	$ 65,717	$ 60,802
Increase in obligation	3,918	4,915
	$ 69,635	$ 65,717
Pre-retirement leave		
Current year recovery	$ 3,918	$ 3,512
Current year expense	(3,918)	(3,512)
	$ -	$ -

9. Statement of cash flows

The statement of cash flows has not been presented as management does not believe that it provides additional meaningful information.

10. Economic dependence

The organization is economically dependent upon receiving grants from various funding bodies.

11. Comparative figures

Certain balances of the preceding period have been reclassified to conform with the current year's financial statement presentation.

Auditors' Report

To the Board of Directors of
THE CONVALESCENT HOME OF WINNIPEG:

We have audited the statement of financial position of **THE CONVALESCENT HOME OF WINNIPEG** as at March 31, 2009 and the statements of operations, changes in net assets and cash flows for the year then ended. These financial statements are the responsibility of the Personal Care Home's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of the Personal Care Home's operations as outlined in Note 1 of these financial statements, as at March 31, 2009 and the results of its operations and its cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

Our examination did not include a review of the the 2009 budget figures and consequently, we do not express an opinion on these figures.

The accompanying summary of significant accounting policies and notes are an integral part of these financial statements.

Revenue Recognition

The Home follows the deferral method of accounting for contributions which include donations and government grants.

Under the Health Insurance Act and regulations thereto, the Home is funded primarily through the Winnipeg Regional Health Authority ("WRHA") by the Province of Manitoba in accordance with budget arrangements established by WRHA. Operating grants are recorded as revenue in the period to which they relate. Grants approved but not received at the end of an accounting period are accrued. Where a portion of a grant relates to a future period, it is deferred and recognized in that subsequent period. These financial statements reflect agreed arrangements approved by the WRHA with respect to the year ended March 31, 2009.

With respect to actual operating results, certain adjustments to funding will be made by the WRHA after completion of their review of the Home's accounts as follows:

a) Deficits - The WRHA shall not be responsible for past or future deficits of the Home in providing the services and debt service charges for any debt incurred resulting from operating deficits unless the parties otherwise mutually agree.

   The WRHA shall not be responsible for the costs incurred by the Home other than those set forth in the service purchase agreement dated April 30, 2002.

b) Surpluses - The Home may unconditionally retain the greater of 50% of its operating surplus in any fiscal year and 2% of the global budget indicated in its funding letter from the WRHA for such fiscal year. Any surplus beyond the foregoing levels shall be remitted to the WRHA on demand.

Unrestricted contributions are recognized as revenue when received or receivable if the amount to be received can be reasonably estimated and collection is reasonably assured.

Externally restricted contributions are recognized as revenue in the year in which the related expenditures are recognized. Contributions restricted for the purchase of capital assets are deferred and amortized into revenue on a straight-line basis, at a rate corresponding with the amortization rate for the related capital assets.

Restricted investment income is recognized as revenue in the year in which the related expenditures are recognized. Unrestricted investment income is recognized as revenue when earned.

Revenue from residential and other services is recognized when the goods are sold or the service is provided.

Major Repairs Fund and Equipment Replacement Fund

The Home has established Funds to provide for major repairs and replacements of equipment. The amounts to be appropriated for these purposes each year are approved by the WRHA.

Capital Assets

Purchased capital assets are recorded at cost. Contributed capital assets are recorded at fair value at the date of contribution. Repairs and maintenance costs are charged to expense. Betterments which extend the estimated useful life of an asset are capitalized. When a capital asset no longer contributes to the Home's ability to provide services, its carrying amount is written down to its residual value.

Capital assets are amortized on a straight-line basis using the following annual rates:

Building	2%
Computer equipment	33%
Computer software	33%
Furniture and equipment	20%

Employee Future Benefits

Pension and other employee future benefit costs are determined using the projected benefit method prorated on years of service and based on best estimate assumptions.

Contributed Services

A substantial number of volunteers contribute a significant amount of their time each year. Because of the difficulty of determining the fair value, contributed services are not recognized in the financial statements.

Financial Instruments

The Home utilizes various financial instruments. Unless otherwise noted, it is management's opinion that the Home is not exposed to significant interest, currency or credit risks arising from these financial instruments and the carrying amounts approximate fair values.

All transactions related to financial instruments are recorded on a trade date basis.

Financial Instruments (continued)

The Home classifies its financial instruments into one of the following categories based on the purpose for which the asset was acquired. The Home's accounting policy for each category is as follows:

Held-for-trading

This category is comprised of investments, restricted cash and deposits and bank indebtedness. They are carried in the balance sheet at fair value with changes in fair value recognized in the income statement. Transaction costs related to instruments classified as held-for-trading are expensed as incurred.

Loans and Receivables

These assets are non-derivative financial assets resulting from the delivery of cash or other assets by a lender to a borrower in return for a promise to repay on a specified date or dates, or on demand. They arise principally through the provision of goods and services to customers, but also incorporate other types of contractual monetary assets comprised of accounts receivable and loans receivable. They are initially recognized at fair value and subsequently carried at amortized cost, using the effective interest rate method, less any provision or impairment. Transaction costs related to loans and receivables are are expensed as incurred.

Other Financial Liabilities

Other financial liabilities includes all financial liabilities other than those classified as held-for-trading and comprises accounts receivable, accounts payable and long-term debt. These liabilities are initially recognized at fair value and subsequently carried at amortized cost using the effective interest rate method. Transaction costs related to other financial liabilities are expensed as incurred.

Use of Estimates

The preparation of financial statements in accordance with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from management's best estimates as additional information becomes available in the future.

New Accounting Pronouncements

Recent accounting pronouncements that have been issued but are not yet effective, and have a potential implication for the Home, are as follows:

Financial Statement Concepts

CICA Handbook Section 1000, Financial Statement Concepts has been amended to focus on the capitalization of costs that truly meet the definition of an asset and de-emphasizes the matching principle.

The revised requirements are effective for annual and interim financial statements relating to fiscal years beginning on or after October 1, 2008. The Home is currently evaluating the impact of the adoption of this change on the disclosure within its financial statements.

Financial Instruments - Disclosure and Presentation

On October 15, 2008 the CICA deferred indefinitely the requirement of not-for-profit organizations to implement new standards dealing with certain financial instrument, disclosures and presentation. The Home has elected to defer application of these standards.

Financial Statements by Not-for-Profit Organizations

In September 2008, a number of standards applicable to not-for-profit organizations were amended and issued. The changes are intended to improve financial reporting by not-for-profit organizations and make not-for-profit standards consistent with those of profit-oriented enterprises when they address the same issues. These amendments which are effective for fiscal years beginning on or after January 1, 2009 will not have a significant impact on the results of operations or financial position.

New Accounting Pronouncements (continued)

In December 2008, the AcSB and the Public Sector Accounting Board issued a joint Invitation to Comment, "Financial Reporting by Not-for-Profit Organizations," to invite feedback on the future of financial reporting by not-for-profit organizations. The financial reporting options under consideration by the AcSB include IFRSs, private enterprise organizations will continue to apply current accounting standards.

The Home continues to monitor the developments in this area and evaluate the implications of the potential changes in financial reporting standards.

1. Entity Definition

The Home is incorporated under the laws of Manitoba and its principal activities include personal care of individuals who require long-term care.

These financial statements present the financial position and results of operations of the Personal Care Home. As such, these financial statements do not include the assets, liabilities, equity, revenues and expenses of The Convalescent Home of Winnipeg - Benefit Fund.

2. Change in Accounting Policy

Capital disclosures

On April 1, 2008 the Home adopted a requirement of the CICA to provide disclosure about how it manages its unrestricted net assets (see Note 14).

The adoption of these new standards had no material impact on the organization's consolidated statement of operations.

3. Accounts Receivable

	2009	2008
Winnipeg Regional Health Authority		
Pre-retirement leave	$ 39,744	$ 39,744
Companion services	3,650	3,650
Gastric feed	17,581	17,581
Loan funding variance	4,335	4,335
Other	-	15,042
MNU and MNU related salary increases	-	21,756
2007/2008 wage accruals	74,249	72,272
2008/2009 wage accruals	88,588	-
	228,147	174,380
Residential charges payable	(169,443)	(171,826)
Net receivable from WRHA	58,704	2,554
Receivable from residents	40,799	17,801
Accrued interest	1,500	1,500
G.S.T. receivable	23,621	16,056
Benefit Fund receivable	3,150	10,955
Parking Fund receivable	1,575	1,775
	$ 129,349	$ 50,641

4. Accrued Vacation Entitlements

The Home records a provision for accrued vacation entitlements. Prior to March 31, 2004 changes in the liability related to vacation were recoverable from Manitoba Health. At that date, Manitoba Health advised that subsequent to March 31, 2004 all funding related to past and future vacation entitlement costs would be included in in-globe funding and that the maximum liability to be recognized by Manitoba Health to facilities would be capped at March 31, 2004 levels. Accordingly, each year as vacation entitlements are paid and earned by the Home's employees, the related vacation entitlement receivable is collected and re-established up to this maximum amount.

An analysis of the changes in the vacation entitlements receivable from Manitoba Health is as follows:

	2009	2008
Balance, beginning of year	$ 171,526	$ 171,526
Net changes in vacation entitlements receivable	-	-
Balance, end of year	$ 171,526	$ 171,526

An analysis of the changes accrued in the vacation entitlements is as follows:

Balance, beginning of year	$ 204,678	$ 191,079
Net increase in accrued vacation entitlements	12,140	13,599
Balance, end of year	$ 216,818	$ 204,678

5. Restricted Cash and Deposits

	2009	2008
Reserve for insurance deductible	$ 8,034	$ 6,254
Reserve for equipment replacement	38,568 ✓	137,572
Reserve for major repair	81,338 ✓	76,457
Residents' Trust Fund	15,734 ✓	20,869
	$ 143,674	$ 241,152

6. Capital Assets

	2009		2008	
	Cost	Accumulated Amortization	Cost	Accumulated Amortization
Land	$ 16,269	$ -	$ 16,269	$ -
Building	1,871,834	830,927	1,584,527	796,842
Computer equipment	142,084	136,621	136,621	133,034
Computer software	55,313	55,313	55,313	55,313
Furniture - sun room	81,056	30,015	24,344	24,344
Furniture and equipment	829,660	660,096	794,332	639,205
	$ 2,996,216	$ 1,712,972	$ 2,611,406	$ 1,648,738
Cost less accumulated amortization		$ 1,283,244		$ 962,668

7. Accounts Payable and Accrued Charges

	2009	2008
Accounts payable - trade	$ 84,439	$ 115,623
Accrued property taxes	7,695	7,328
Accrued audit fees	12,000	9,240
Accrued salaries	233,298	194,695
	$ 337,432	$ 326,886

8. Long-term Debt

	2009	2008
Loan payable		
CIBC - construction, payable in monthly instalments of $2,260 plus interest at bank prime, secured by investments held by the Home	$ 168,037	$ 195,157
Current portion of long-term debt	27,120	27,120
	$ 140,917	$ 168,037

Principal repayments required over the next five years are as follows:

2010	$ 27,120
2011	27,120
2012	27,120
2013	27,120
2014	27,120

9. Deferred Contributions

Capital Assets

Deferred capital contributions related to capital assets represent the unamortized amount of funds received for the purchase of capital assets. The amortization of capital contributions is recorded as revenue in the statement of operations.

	2009	2008
Balance, beginning of year	$ 365,130	$ 407,257
Contributions received		
WRHA	15,720	41,648
The Convalescent Home of Winnipeg - Benefit Fund	269,102	-
Transfer from unspent equipment reserve	123,804	-
Contributions spent on capital debt	-	(14,256)
Less amounts amortized to revenue	(64,233)	(69,519)
Balance, end of year	$ 709,523	$ 365,130

9. Deferred Contributions (continued)

Expenses of future periods

Deferred contributions related to expenses of future periods represent unspent externally restricted grants for equipment replacement, major repairs and insurance deductibles.

	2009	2008
Reserve for basic equipment		
Balance, beginning of year	$ 147,672	$ 132,972
Additions	14,700	14,700
Purchase of capital assets	(123,804)	-
Balance, end of year	38,568	147,672
Reserve for major repairs		
Balance, beginning of year	77,812	73,972
Additions	3,840	3,840
Balance, end of year	81,652	77,812
Reserve for insurance deductible		
Balance, beginning of year	7,052	6,048
Additions	1,008	1,004
Balance, end of year	8,060	7,052
Total expenses of future periods	$ 128,280	$ 232,536

10. Investment in Capital Assets

A. Investment in capital assets is calculated as follows:

	2009	2008
Capital assets	$ 1,283,244	$ 962,668
Amounts financed by		
Deferred contributions	(709,523)	(365,130)
Construction loan payable	(168,037)	(195,157)
	$ 405,684	$ 402,381

B. Change in net assets invested in capital assets is calculated as follows:

	2009	2008
Excess of revenues over expenditures		
Amortization of deferred contributions related to capital assets	$ 64,233	$ 69,519
Amortization of capital assets	(64,233)	(69,519)
	$ -	$ -
Net changes in investment in capital assets		
Purchase of capital assets	$ 384,809	$ 78,431
Repayment of construction loan	27,120	27,129
Amounts funded by		
WRHA capital asset funding	(15,720)	-
Transfer from Equipment Reserve	(123,804)	-
Benefit Fund	(269,102)	-
	$ 3,303	$ 105,560

11. Employee Future Benefits

a) Accrued retirement entitlement

Based upon collective agreements and/or non-union policy, employees of the Home are entitled to a pre-retirement leave benefit if they are retiring in accordance with the provisions of the applicable Home Group Pension Plan. The Home's contractual commitment is to pay based upon the following:

Four days (pro-rated) of salary per year of service upon retirement if the employee complies with one of the following conditions:

i. has 10 years service and has reached the age 55

ii. qualifies for the "eighty" rule which is calculated by adding the number of years of service to the age of the employee

iii. retires at or after age 65

iv. terminates employment at any time due to permanent disability

The Home undertook an actuarial valuation of the pre-retirement leave benefit for accounting purposes as at March 31, 2009. The significant actuarial assumptions adopted in measuring the Home's accrued retirement entitlements include mortality and withdrawal rates, a discount rate of 6.7% (2008 - 5.5%) and a rate of salary increase of 3.5% (2008 - 3.5%) plus age related merit/promotion scale with no provision for disability.

The amount recorded as a receivable from the Province for pre-retirement costs was initially determined based on the value of the corresponding actuarial liability for pre-retirement costs as at March 31, 2004. Subsequent to March 31, 2004, the Province has included in its ongoing annual funding to the Home, an amount equivalent to the change in the pre-retirement liability, which includes annual interest accretion related to the receivable. The receivable will be paid by the Province when required.

11. **Employee Future Benefits** (continued)

a) Accrued retirement entitlement (continued)

Commencing in 2006/07, the WRHA assumed responsibility for funding the annual increase in the obligation each year. This amount will also be paid when required and the WRHA holds funding to meet this obligation.

	2009	2008
Employee future benefits recoverable from		
Manitoba Health	$ **235,519**	$ 235,519
Winnipeg Regional Health Authority	**40,743**	40,743
	$ **276,262**	$ 276,262

An analysis of the changes in the employee benefits payable is as follows:

	2009	2008
Balance, beginning of year	$ **205,579**	$ 196,072
Net increase (decrease) in pre-retirement entitlements	**(521)**	9,507
Balance, end of year	$ **205,058**	$ 205,579

b) Pension plan

Substantially all of the employees of the Home are members of the Healthcare Employees Pension Plan (successor to the Manitoba Health Organization, Inc. Plan (the "Plan")) which is a multi-employer defined benefit pension plan available to all eligible employees of the participating members of the Plan. Plan members will receive benefits based on the length of service and on the average of annualized earnings during the best five years of the last ten years prior to retirement, termination or death, that provides the highest earnings.

Pension assets consist of investment grade securities. Market and credit risk on these securities are managed by the Plan by placing plan assets in trust and through the Plan investment policy.

11. Employee Future Benefits (continued)

Pension expense is based on Plan management's best estimates, in consultation with its actuaries, of the amount, combined with the contribution by employees, required to provide a high level of assurance that benefits will be fully represented by fund assets at retirement, as provided by the Plan. The funding objective is for employer contributions to the Plan to remain a constant percentage of employees' contributions.

Variances between actuarial funding estimates and actual experience may be material and any differences are generally to be funded by the participating members. The most recent actuarial valuation of the Plan as at December 31, 2007 indicates the plan is in a deficit; however, it is anticipated that recently implemented increases in contribution rates will correct this deficiency within the allowed timeframe. Contributions to the plan made during the year by the Home on behalf of its employees amounted to $154,031 (2008 - $141,780) and are included in the statement of operations.

12. Restricted Net Assets

All of the net assets for the Reserve for Equipment Replacement, Reserve for Major Repairs and Reserve for Insurance Deductible reserve are subject to externally imposed restrictions.

13. Insurance

a) The nature of the Home's activities is such that there is usually litigation pending or in prospect at any time. With respect to potential claims at March 31, 2009, management believes the Home has valid defences and appropriate insurance coverage in place. In the event any claims are successful, management believes that such claims are not expected to have a material effect on the Home's financial position.

b) On July 1, 1987, a group of health care organizations, ("subscribers"), formed Healthcare Insurance Reciprocal of Canada ("HIROC"). HIROC is registered as a Reciprocal pursuant to provincial Insurance Acts, which permit reciprocal contracts of indemnity insurance. HIROC facilitates the provision of liability insurance coverage to health care organizations in the provinces of Ontario, Manitoba, Saskatchewan and Newfoundland. Subscribers pay annual premiums, which are actuarially determined, and are subject to assessment for losses in excess of such premiums, of any experienced by the group of subscribers for the years in which they were a subscriber. No such assessments have been made to March 31, 2009.

The Home is a named insured under the WRHA policy with HIROC.

14. Capital Management

The Home considers its capital to comprise its Unrestricted Net Assets and net invested in capital assets balances. There have been no changes to what the Home considers to be its capital since the previous period.

The Home manages its capital to ensure it retains sufficient resources to enable it to meet its obligations for Resident care. The determination of this amount is based on historical expense requirements relative to funding commitments.

AUDITORS' REPORT

To the Governing Council of The Salvation Army in Canada

We have audited the statement of financial position of The Salvation Army Golden West Centennial Lodge as at March 31, 2009 and the statements of operations, changes in net assets and cash flows for the year then ended. These financial statements are the responsibility of the Lodge's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of the Lodge as at March 31, 2009 and the results of its operations and its cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

Our audit was made for the purpose of forming an opinion on the basic financial statements taken as a whole. The current year's supplementary information included in the schedule is presented for purposes of additional analysis and is not a required part of the basic financial statements. Such supplementary information has been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, is fairly stated, in all material respects, in relation to the basic financial statements taken as a whole.

See accompanying notes to financial statements.

The Salvation Army Golden West Centennial Lodge is owned and operated by The Governing Council of The Salvation Army in Canada pursuant to the Province of Manitoba Acts and Regulations governing supervisory and personal care homes. It is governed by the Board of Management of Golden West Centennial Lodge.

The Lodge is a not-for-profit organization under the Income Tax Act and accordingly is exempt from income taxes under Section 149.

1. CONTINUITY OF OPERATIONS

These financial statements have been prepared on a going concern basis in accordance with Canadian generally accepted accounting principles. The going concern basis of presentation assumes that the Lodge will continue in operation for the foreseeable future and be able to realize its assets and discharge its liabilities and commitments in the normal course of business.

There is doubt about the appropriateness of the use of the going concern assumption as at March 31, 2009. At March 31, 2009, the Lodge's current liabilities exceed its current assets by $1,268,153 (2008 - $1,442,767). The Lodge also has a net asset deficiency of $493,357 (2008 - $338,225) at March 31, 2009, mainly as a result of losses from operations in the current year and fiscal years prior to fiscal 2007.

The ability of the Lodge to continue as a going concern, to realize the carrying value of its assets and to discharge its liabilities when due is dependent on the continued support of the Winnipeg Regional Health Authority and the Lodge achieving a break-even or surplus position in future years.

The financial statements do not reflect adjustments that would be necessary if the going concern assumption was not appropriate. If the going concern basis was not appropriate for these financial statements, then adjustments would be necessary in the carrying value of assets and liabilities, the reported revenues and expenses, and the statement of financial position classifications used.

2. ACCOUNTING POLICIES

The financial statements of the Lodge have been prepared in accordance with Canadian generally accepted accounting principles and include the following significant accounting policies:

a) Revenue recognition

The Lodge follows the deferral method of accounting for contributions which include donations and government grants.

The Lodge is funded primarily by the Province of Manitoba in accordance with budget arrangements established by the Winnipeg Regional Health Authority. Operating grants are recorded as revenue in the period to which they relate. Grants approved but not received at the end of a period are accrued. Where a portion of a grant relates to a future period, it is deferred and recognized in that subsequent period.

Unrestricted contributions are recognized as revenue when received or receivable if the amount to be received can be reasonably estimated and collection is reasonably assured.

Externally restricted contributions are recognized as revenue in the year in which the related expenses are recognized. Contributions restricted for the purchase of capital assets are deferred and amortized into revenue on a straight-line basis, at a rate corresponding with the amortization rate for the related capital assets.

b) *Capital assets*

Purchased capital assets are recorded at cost. Contributed capital assets are recorded at fair value at the date of contribution. Repairs and maintenance costs are charged to expense. Betterments which extend the estimated useful life of an asset are capitalized. When a capital asset no longer contributes to the Lodge's ability to provide services, its carrying amount is written down to its residual value.

Capital assets are amortized on a straight-line basis over the following estimated useful lives:

Buildings	50 years
Building expansion	30 years
Major equipment	10 years
Nursing station	10 years
Roof expansion	10 years
Office furniture and equipment	5 - 10 years
Computer hardware and software	3 years

c) *Vacation pay*

The Lodge records the accrued vacation pay entitlement liability in the statement of financial position. Any change in the liability is recorded in the statement of operations.

d) *Contributed services*

Contributed services are recorded at their estimated fair value, except for volunteers. A substantial number of volunteers contribute a significant amount of their time each year. Because of the difficulty of determining the fair value, volunteer services are not recognized in the financial statements.

e) *Pre-retirement benefit obligation*

The Lodge has a contractual commitment to pay out to employees four days salary per year of service upon retirement if they comply with any of the following conditions:

i) have ten years service and have reached the age of 55; or
ii) qualify for the "eighty" rule which is calculated by adding the number of years service to the age of the employee; or
iii) retire at or after the age 65; or
iv) terminate employment at any time due to permanent disability.

The Lodge has recorded an accrual based on an actuarial valuation that includes employees who qualify at the year-end balance sheet date and an estimate for the remainder of employees who have not yet met the criteria above. Funding for the pre-retirement entitlement is partially recoverable from the Winnipeg Regional Health Authority (Note 9).

f) *Due from Winnipeg Regional Health Authority – employee future benefits*

The Lodge records a provision for future employee benefits including accrued vacation payable and accrued pre-retirement benefits. For certain employees, funding for future employee benefits is recoverable from the Winnipeg Regional Health Authority (WRHA) as a component of salary costs in the period in which the expenditures are made.

Vacation entitlements and pre-retirement entitlements that will be funded by the WRHA have been recorded on the statement of financial position as recoverable from the WRHA.

g) *Internally restricted net assets*

Internally restricted net assets represent funds which have been received through donations and have been internally restricted by the Lodge's Board of Management. These funds can only be utilized with the prior approval of the Board of Management.

h) *Use of estimates*

The preparation of the financial statements in conformity with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

2. ACCOUNTING POLICIES (continued)

i) *Financial instruments*

Financial assets and liabilities held-for-trading are measured at fair value with gains and losses recognized in excess of revenue over expenses. Financial instruments classified as held-to-maturity, loans and receivables and other liabilities are measured at amortized cost. Available-for-sale financial instruments are measured at fair value, with unrealized gains and losses recognized directly in net assets.

The Lodge designated cash and cash held for restricted purposes as held-for-trading, accounts receivable, employee benefits and future employee benefits recoverable from Winnipeg Regional Health Authority, deferred grant receivable and Trust assets – Residents as loans and receivables; and accounts payable and accrued liabilities, advances from and amounts due to Winnipeg Regional Health Authority, accrued vacation payable, demand loans payable and long-term debt as other liabilities and trust liability - residents. The Lodge has neither available-for-sale or held-to-maturity instruments.

For held-for-trading financial assets, transaction costs are recorded in the statement of operations as incurred.

j) *Future accounting changes*

The Canadian Institute of Chartered Accountants (CICA) issued the following accounting standards that will come into effect for the Lodge's next fiscal year. The Lodge is in the process of determining the impact that these standards will have on its financial reporting.

On April 1, 2009, the Lodge will adopt CICA Section 3862, Financial Instruments - Disclosures and Section 3863, Financial Instruments - Presentation replacing the existing Section 3861, Financial Instruments - Disclosure and Presentation. These new sections revise and enhance disclosure requirements, and carry forward, unchanged, existing presentation requirements. These new sections place increased emphasis on disclosures about the nature and extent of risks arising from financial instruments and how the entity manages those risks. However, the CICA subsequently amended these sections to eliminate the requirement for not-for-profit entities to adopt these sections. Not-for-profit entities are permitted to continue to apply Section 3861 in place of Section 3862 and 3863. An entity that does so must disclose the fact.

In September 2008, a number of standards applicable to not-for-profit organizations were amended and new Section 4470, Disclosures of Allocated Expenses by Not-for-Profit Organizations, was issued. The new Section 4470 requires entities that make allocations of general support and fundraising costs to other functions to disclose the policies adopted for the allocation of expenses among functions, the nature of the expenses being allocated, the basis on which such allocations have been made, and the functions to which they have been allocated. In addition, the amendments to the not-for-profit organization standards include clarification of when revenues and expenses are to be reported on a gross basis; clarification of the treatment of internal and external restriction on net assets; and improved guidance related to application of GAAP hierarchy, capital asset standards and statement of cash flows. The Lodge will adopt these standards on April 1, 2009.

3. FINANCIAL INSTRUMENTS

a) *Interest rate risk*

Interest rate risk is the risk to the Lodge's earnings that arises from fluctuations in interest rates and the degree of volatility of these rates. The Lodge does not use derivative instruments to reduce the risk.

b) Credit risk

Credit risk arises from the potential that a counterparty will fail to perform its obligations. However, most of the Lodge's accounts receivables are amounts due from government funding authorities, which minimizes credit risk.

c) Fair value

The fair value of accounts receivable and accounts payable and accrued liabilities approximate their carrying value due to their short-term maturity.

The fair values of deferred grant receivable and long-term debt approximates their carrying values as their interest rates are comparable to market values.

4. CASH

	2009	2008
Cash	$ 93,930	$ 150,658
Funds on deposit with Salvation Army Headquarters	71,712	68,183
	$ 165,642	$ 218,841

5. CASH HELD FOR RESTRICTED PURPOSES

	2009	2008
CAPITAL		
Funds on deposit with Salvation Army Headquarters	$ 122,240	$ 30,909
OTHER		
Internally restricted net assets (Note 2(g))	69,367	92,120
	$ 191,607	$ 123,029

Funds on deposit with Salvation Army Headquarters represent funds which have been bequeathed to the Lodge. Such funds can only be utilized for capital purposes with the prior approval of the Territorial Finance Council and Property Board.

6. CAPITAL ASSETS

	2009			2008
	Cost	Accumulated Amortization	Net Book Value	Net Book Value
Land	$ 55,159	$ -	$ 55,159	$ 55,159
Buildings	998,208	777,859	220,349	240,313
Building expansion	5,744,613	3,159,601	2,585,012	2,776,499
Major equipment	242,556	78,317	164,239	89,920
Nurse call system	165,264	5,510	159,754	163,889
Roof expansion	220,032	101,670	118,362	140,365
Office furniture and equipment	244,210	203,288	40,922	65,696
Computer hardware and software	21,425	11,733	9,692	4,040
	$ 7,691,467	$ 4,337,978	$ 3,353,489	$ 3,535,881

Title to the Lodge's land and buildings is held by the Governing Council of the Salvation Army, which owns and operates the Lodge.

7. DEFERRED GRANT RECEIVABLE

The Province of Manitoba has arranged for the Lodge to receive a grant of $86,350 to be amortized at 6 7/8% interest annually for 50 years (maturing 2020). The annual payment is $6,060 including principal and interest.

8. CURRENT LIABILITIES

a) Accounts payable and accrued liabilities consist of:

	2009	2008
Accounts payable	$ 77,668	$ 86,100
Accrued salaries and benefits	366,078	313,434
Accrued interest	2,149	2,364
	$ 445,895	$ 401,898

b) Advances from and amounts due to Winnipeg Regional Health Authority:

During the fiscal year, the Lodge received advances from the Winnipeg Regional Health Authority in the amount of $167,390 ($221,700) for funding commitments relating to wage settlements for the 2008/09 fiscal year. These advances are included in amounts due to the WRHA and are unsecured and non-interest bearing. In subsequent years, the advances owing to the WRHA, are offset by the WRHA against funds paid for current funding commitments.

9. EMPLOYEE BENEFITS

a) Pre-retirement benefits

The Lodge has undertaken an actuarial valuation as of March 31, 2009 of the accrued pre-retirement entitlements. The significant actuarial assumptions adopted in measuring the Authority's accrued pre-retirement entitlements include mortality and withdrawal rates, a discount rate of 6.70% (2008 –5.50%) and a rate of salary increase of 3.5% (2008 – 3.5%) plus age related merit/promotion scale and a factor ranging from 0 – 1.31% (2008 – 0 – 1.31%) for disability. Actual payments made during the year for the Lodge's pre-retirement entitlements were $12,406 (2008 - $22,908).

The amount of funding which will be provided by the WRHA for future retirement benefits was initially determined based on the future pre-retirement benefits payable at March 31, 2004, and was recorded as amounts recoverable from the WRHA. The recoverable has been adjusted, based on direction from the WRHA, to include the incremental increases in the related liability for fiscal 2007, 2008 and 2009, which include an interest component. The future employee pre-retirement benefits recoverable from WRHA of $319,761 at March 31, 2009 has no specified terms of repayment.

The fair value of the future employee benefits recoverable from WRHA approximates its carrying value as the interest component described above is comparable to current market rates.

d) Vacation pay

Each year, the WRHA funds a portion of the vacation pay liability of the Lodge, which is limited to the amount established at March 31, 2004 of $271,682. This amount is included in employee benefits recoverable from WRHA on the statement of financial position.

10. DEFERRED CONTRIBUTIONS

Deferred contributions related to capital assets and major repairs represent the unamortized amount of donations and funding received for the purchase of capital assets and repairs. These contributions were received primarily from Manitoba Health, the Winnipeg Regional Health Authority and the Salvation Army.

The amortization of capital contributions is recorded as revenue in the statement of operations. Changes in the deferred contributions balance are as follows:

	2009			2008
	Purchased Capital Assets	Future Capital Purchases and Major Repairs	Total	Total
Balance, beginning of year	$ 2,062,483	$ 128,822	$ 2,191,305	$ 1,924,187
Additional contributions received				
Mortgage / loan payments (Note 11)	342,333		342,333	340,935
Capital assets and major repairs	-	177,992	177,992	199,425
Interest earned restricted funds	-	1,290	1,290	2,709
	$ 2,404,816	$ 308,104	$ 2,712,920	$ 2,467,256
Transfers as a result of capital asset purchases	105,725	(105,725)	-	-
Major repairs	-	(444)	(444)	(2,308)
Amortization	(279,617)	-	(279,617)	(273,643)
Additional loan payments	-	(5,400)	(5,400)	-
Balance, end of year	$ 2,230,924	$ 196,535	$ 2,427,459	$ 2,191,305

11. LONG-TERM DEBT

	2009	2008
Bank demand instalment loan, interest at prime less 1/2%, repayable $24,700 monthly, plus interest, secured by letter of comfort from Manitoba Health, maturing April, 2011	**$ 618,500**	$ 914,900
Canada Mortgage and Housing Corporation, Mortgage payable, interest at 6 7/8%, repayable $3,966 monthly, including principal and interest, maturing 2020	**373,931**	395,384
Bank demand instalment loan, interest at prime less 1/2%, repayable $2,040 monthly, plus interest, secured by letter of comfort from Manitoba Health, maturing 2011	**61,383**	85,863
	1,053,814	1,396,147
Current portion	**702,835**	1,022,215
	$ 350,979	$ 373,932

Principal and interest payments are funded by the Province of Manitoba via the WRHA.

Principal payments expected in the next five years are as follows:

2010	343,831
2011	345,438
2012	64,399
2013	28,113
2014	30,079

During the year, interest expense relating to the debt funded amounted to $57,826 (2008 - $91,980).

12. INVESTED IN CAPITAL ASSETS

a) Investment in capital assets is calculated as follows:

	2009	2008
Capital assets	$ 3,353,489	$ 3,535,881
Amounts financed by:		
Deferred contributions - purchased capital assets	(2,231,368)	(2,062,483)
Long-term debt	(1,053,814)	(1,396,147)
Balance, end of year	$ 68,307	$ 77,251

b) Change in net assets invested in capital assets is calculated as follows:

	2009	2008
Deficiency of revenue over expenses		
Amortization of deferred contributions related to capital assets	$ 279,617	$ 273,643
Amortization of capital assets	(288,117)	(282,143)
Deficiency of revenue over expenses	$ (8,500	$ (8,500)
Purchase of capital assets (net)	$ 105,725	$ 203,252
Amounts funded by increase in deferred contributions	(105,725)	(203,252)
Net change in invested in capital assets	$ (8,500)	$ (8,500)

13. FUND TRANSFERS

The Board of Management approved the transfer of funds to internally restricted net assets from the unrestricted net deficiency to cover the cost of accumulated expenditures that related to the projects for which internal restrictions were established.

14. PENSION PLAN

Substantially all of the employees of the Lodge are members of the Healthcare Employees Pension Plan (the "Plan"), which is a multi-employer defined benefit pension plan available to all eligible employees of the participating facilities. Plan members will receive benefits based on the length of services and on the average of annualized earnings calculated on the best five of the eleven consecutive years prior to retirement, termination, or death, that provide the highest earnings. The costs of the benefit plan are not allocated to the individual facilities. As a result, individual participating facilities are not able to identify their share of the underlying assets and liabilities and accordingly, the plan is accounted for as a defined contribution plan.

Variances between actuarial funding estimates and actual experience may be material and any differences are generally to be funded by the participating members. The most recent actuarial valuation of the Plan as at December 31, 2007 reported the Plan had a solvency deficiency. The deficiency will be funded by special payments out of current contributions. Contributions to the Plan made during the year by the Lodge on behalf of its employees amounted to $276,670 (2008 - $253,011) and are included in employee benefits expense in the statement of operations.

15. RELATED PARTY TRANSACTIONS

During the year, the Lodge had the following transactions and balances with The Salvation Army:

	2009	2008
Red Shield Appeal funding designated for supervision	$ **60,000**	$ 25,000
Territorial Headquarters supervision expense	**50,000**	24,996

16. COMPARATIVE FIGURES

Certain of the prior year's figures have been reclassified to conform to the new presentation adopted in the current year

Auditors' Report

To the Board of Directors of
THE SHARON HOME, INC.

We have audited the statement of financial position of **THE SHARON HOME, INC.** as at March 31, 2009 and the statements of operations, changes in net assets and cash flows for the year then ended. These financial statements are the responsibility of the Home's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of the Home as at March 31, 2009, and the results of its operations and cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

The accompanying summary of significant policies and notes are an integral part of these financial statements.

THE SHARON HOME, INC.
Summary of Significant Accounting Policies

March 31, 2009

Basis of Accounting

These financial statements were prepared using the accrual basis of accounting. The accrual basis recognizes revenues as they become available and measurable; expenditures are recognized as they are incurred and measurable as a result of receipts of goods or services and the creation of a legal obligation to pay.

Revenue Recognition

The Sharon Home, Inc. (the "Home") follows the deferral method of accounting for contributions which include donations and government grants.

Under the Health Services Insurance Act and regulation thereto, the Home is funded primarily by the Winnipeg Regional Health Authority ("WRHA") in accordance with service purchase agreements. These financial statements reflect agreed arrangements approved by the WRHA with respect to the year ended March 31, 2009.

With respect to actual operating results, certain adjustments to funding will be made by the WRHA after completion of their review of the Home's accounts. Any adjustments will be reflected in the year the final statement of recommended costs is received from the WRHA.

Funding from the WRHA is recognized as revenue based on the funding approved for the fiscal year and in the year in which the related expenses are recognized. Funding approved but not received at the end of an accounting period is accrued. The Home records on an annual basis, an estimate of the amount that may be recoverable from, or payable to, the WRHA relating to its annual excess (deficiency) of revenue over expenses in accordance with the WRHA funding guidelines. The Home is entitled to retain any excess arising from the excess of revenue over expenses for activities funded by WRHA for each fiscal year up to a maximum of 2% of net in-globe costs. Any amount in excess of the maximum is returned to the WRHA. Any deficiency will normally be the responsibility of the Home. After the WRHA reviews the financial statements and makes final approvals, the differences, if any, from the initial estimate are reflected as an adjustment of the prior year's fund balances in the current year's net income.

Received contributions restricted for the purchase of capital assets are deferred and amortized into revenue on a straight-line basis, at a rate corresponding with the amortization rate for the related capital assets.

THE SHARON HOME, INC.
Summary of Significant Accounting Policies

March 31, 2009

Capital Assets

Purchased capital assets are recorded at cost. Contributed capital assets are recorded at fair value at the date of contribution. Assets acquired under capital lease are amortized over the estimated life of the assets or over the lease term, as appropriate. Repairs and maintenance costs are charged to expense. Betterments which extend the estimated useful life of an asset are capitalized. When a capital asset no longer contributes to the Home's ability to provide services, its carrying amount is written down to its residual value. Interest on the bank indebtedness (interim construction loan) to finance the construction project is capitalized to property under development.

Capital assets are amortized on a straight-line basis using the following annual rates:

Buildings	10 to 50 years
Equipment	3 to 10 years

Financial Instruments

The Home utilizes various financial instruments. Unless otherwise noted, it is management's opinion that the Home is not exposed to significant interest, currency or credit risks arising from these financial instruments and the carrying amounts approximate fair values.

All transactions related to financial instruments are recorded on a settlement date basis.

The Home classifies its financial instruments as follows based on the purpose for which the asset was acquired and follows the disclosed accounting policy for each category.

Assets/Liability	Category	Measurement
Cash and Investments	Held for trading	Fair value
Accounts receivable	Loans and receivables	Amortized cost
Vacation entitlements receivable	Loans and receivables	Amortized cost
Loan receivable	Loans and receivables	Amortized cost
Pre-retirement obligations receivable	Loans and receivables	Amortized cost
Bank indebtedness	Other financial liabilities	Amortized cost
Demand bank loans	Other financial liabilities	Amortized cost
Accounts payable and related party payable	Other financial liabilities	Amortized cost
Accrued vacation entitlements	Other financial liabilities	Amortized cost
Mortgages payable	Other financial liabilities	Amortized cost

Financial Instruments
(continued)

Note payable	Other financial liabilities	Amortized cost
Accrued pre-retirement obligations	Other financial liabilities	Amortized cost
Due from WRHA	Loans and receivables	Amortized cost
Due to WRHA	Other financial liabilities	Amortized cost

Held-for-trading

Held for trading items are carried at fair value, with changes in their fair value recognized in the statement of operations.

Loans and receivables

Loans and receivables are carried at amortized cost, using the effective interest rate method, less any provision for impairment.

Other financial liabilities

Other financial liabilities are carried at amortized cost, using the effective interest method.

Transaction costs are expensed as incurred.

New Accounting Pronouncements

Recent accounting pronouncements that have been issued but are not yet effective, and have a potential implication for the Home, are as follows:

Financial Statement Concepts

The Canadian Institute of Chartered Accountants ("CICA") Handbook Section 1000, Financial Statement Concepts has been amended to focus on the capitalization of costs that truly meet the definition of an asset and de-emphasizes the matching principle.

The revised requirements are effective for annual and interim financial statements relating to fiscal years beginning on or after October 1, 2008. The Home is currently evaluating the impact of the adoption of this change on the disclosure within its financial statements.

Financial Instruments - Disclosure and Presentation

On October 15, 2008 the CICA deferred indefinitely the requirement of not-for-profit organizations to implement new standards dealing with certain financial instrument, disclosures and presentation. The Home has elected to defer application of these standards.

New Accounting Pronouncements (continued)

Financial Statements by Not-for-Profit Organizations

In September 2008, a number of standards applicable to not-for-profit organizations were amended and issued. The changes are intended to improve financial reporting by not-for-profit organizations and make not-for-profit standards consistent with those of profit-oriented enterprises when they address the same issues. These amendments which are effective for fiscal years beginning on or after January 1, 2009 will not have a significant impact on the results of operations or financial position.

The Home continues to monitor the developments in this area and evaluate the implications of the potential changes in financial reporting standards.

Use of Estimates

The preparation of financial statements in accordance with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from these estimates.

1. Entity Definition

The Sharon Home, Inc. was incorporated under the laws of Canada on March 23, 1914. The mission of the Home is to enhance the quality of life of the elderly in the community. All programs and services offered to individuals in the Home and community are developed to meet the unique requirements of the individual and the family, and are directed by the values, principles and traditions of Judaism. The Home is a registered charity under the Canada Income Tax Act and, accordingly, is exempt from income taxes, provided certain requirements of the Canada Income Tax Act are met.

2. Changes in Accounting Policies

Capital Disclosures

On April 1, 2008 the Home adopted a requirement of the CICA to provide disclosure about how it manages its unrestricted net assets (see Note 20).

The adoption of these new standards had no material impact on the Home's statement of operations.

3. Economic Dependence

The Home is economically dependent on funding from WRHA. If this funding were discontinued, it would affect the Home's ability to continue operations.

4. Accounts Receivable

	2009	2008
Receivable from residents	**$ 37,209**	$ 26,886
GST rebate receivable	**16,785**	133,604
The Sharon Home Fund Inc. (related party)	**283,131**	2,715,881
Other	**59,040**	18,630
	$ 396,165	$ 2,895,001

5. Due from (to) WRHA

	2009	2008
2003/2004 funding adjustment	**$ 6,479**	$ 6,479
2004/2005 funding adjustment	**(164,054)**	(164,054)
2005/2006 funding adjustment	**151,593**	151,593
2006/2007 funding adjustment	**(48,838)**	(48,838)
2007/2008 funding adjustment	**28,127**	128,901
2008/2009 funding adjustment	**(218,654)**	-
	$ (245,347)	$ 74,081

The Home is subject to periodic review by WRHA. Operating surpluses or deficiencies may be repayable or recoverable as determined by WRHA. The Home records a liability or receivable based on an estimate with respect to the outcome of future year-end reviews. The reviews of the 2003/2004, 2004/2005, 2005/2006, 2006/2007 and 2007/2008 fiscal years, as well as the current year, are not completed at this time; however the Home has adjusted the amounts reflected as due to (from) the WRHA for these years to reflect its current estimate of possible settlement based on the outcome of the completed reviews for earlier years.

6. Loan Receivable

The loan is non-interest bearing with no fixed terms of repayment and is collateralized by life insurance policies on a former employee.

7. Capital Assets

	2009		2008	
	Cost	Accumulated Amortization	Cost	Accumulated Amortization
Kanee Centre				
Land	$ 558,008	$ -	$ 558,008	$ -
Buildings	12,301,262	8,593,775	12,301,262	8,016,922
Equipment	-	-	2,610,007	2,449,996
Simkin Centre				
Land	786,418	-	786,418	-
Building	39,843,598	2,458,924	10,335,648	1,835,952
Equipment	5,723,915	3,595,710	1,510,307	812,648
Land held for future development	1,315,158	-	1,315,158	-
	$ 60,528,359	$ 14,648,409	$ 29,416,808	$ 13,115,518
Cost less accumulated amortization		$ 45,879,950		$ 16,301,290

During the fiscal year ending March 31, 2009, the operations of the Kanee Centre have been transferred to the Simkin Centre. The property of the Kanee Centre and related mortgages will be transferred to WHRA. The net effect of this transition cannot be determined at this time.

8. Vacation Entitlements Receivable

The Home records a provision for accrued vacation entitlements. Prior to March 31, 2004 changes in the liability related to vacation were recoverable from Manitoba Health. At that date, Manitoba Health advised that subsequent to March 31, 2004 all funding related to past and future vacation entitlement costs would be included in in-globe funding and that the maximum liability to be recognized by Manitoba Health to facilities would be capped at March 31, 2004 levels. Accordingly, each year as vacation entitlements are paid and earned by the Home's employees, the related vacation entitlement receivable is collected and re-established up to this maximum amount.

An analysis of the changes in the vacation entitlements receivable from Manitoba Health is as follows:

	2009	2008
Balance, beginning of year	**$ 603,753**	$ 603,753
Net changes in vacation entitlements receivable	**-**	-
Balance, end of year	**$ 603,753**	$ 603,753

An analysis of the changes in accrued vacation entitlements is as follows:

Balance, beginning of year	**$ 663,116**	$ 644,858
Net (decrease) increase in accrued vacation entitlements	**(2,416)**	18,258
Balance, end of year	**$ 660,700**	$ 663,116

9. Bank Indebtedness

	2009	2008
Credit facility agreement	**$ 1,000,000**	$ 1,000,000
Interim construction costs agreement	**-**	19,927,531
Sponsor contribution loan	**1,162,126**	-
	$ 2,162,126	$ 20,927,531

The credit facility agreement is with the Royal Bank up to a maximum of $1,000,000, bears interest at the bank prime rate or the Flex Financing (Bankers Acceptance) rate. The credit facility is collateralized by a hypothecation of title covering the 11.27 acres of land held for future development. The interest on this loan is being funded by The Sharon Home Fund Inc.

The sponsor contribution loan bears interest at prime plus 1% payable upon receipt of contributions from the capital campaign.

10. Demand Bank Loans

	2009	2008
Demand loan #1 - Manitoba Health	$ -	$ 58,830
Phase II renovations	88,663	128,023
Construction demand loan	4,200,800	-
	$ 4,289,463	$ 186,853

The Phase II renovations loan bears interest at prime rate minus 0.75% repayable in equal monthly payments of $3,280 plus interest.

The construction demand loan bears interest at prime repayable in equal monthly payments of $17,800 plus interest.

11. Accounts Payable

	2009	2008
Trade accounts payable	$ 382,261	$ 2,292,823
Accrued liabilities	193,630	178,480
Salaries and employee benefits payable	366,924	313,903
Holdback payable	-	1,132,152
	$ 942,815	$ 3,917,358

12. Mortgages Payable

	2009	2008
Mortgage payable Province of Manitoba - with interest at 5.20%, requiring monthly principal payments of $91,875, secured by the related property at the Simkin Centre, maturing in 2029.	$ 21,866,250	$ -
Mortgage payable Canada Mortgage and Housing Corporation - with interest at 6.875%, requiring monthly principal and interest payments of $3,333, secured by the related property at the Kanee Centre, maturing in 2019.	304,870	323,731
Mortgage payable Canada Mortgage and Housing Corporation - with interest at 7.875%, requiring monthly principal and interest payments of $3,806, secured by the related property at the Kanee Centre, maturing in 2020.	347,681	365,847
Mortgage payable Canada Mortgage and Housing Corporation - with interest at 7.75%, requiring monthly principal and interest payments of $1,218, secured by the related property at the Kanee Centre, maturing in 2021.	119,663	125,017
Mortgage payable Canada Mortgage and Housing Corporation - with interest at 7.625%, requiring monthly principal and interest payments of $1,096, secured by the related property at the Kanee Centre, maturing in 2022.	112,064	116,692
	22,750,528	931,287
Current portion of mortgages payable	1,151,422	45,300
	$ 21,599,106	$ 885,987

12. **Mortgages Payable** (continued)

The mortgages are secured by the related property at the Kanee Centre and Simkin Centre.

Principal repayments required over the next five years are as follows:

2010	$ 1,151,422
2011	1,155,237
2012	1,159,292
2013	1,163,661
2014	1,168,367
Subsequent years	16,952,549
	$ 22,750,528

13. **Note Payable**

	2009	2008
Province of Manitoba - with interest at 6.125%, requiring monthly principal payments of $59,896 plus interest, maturing March 31, 2017.	**$ 5,750,000**	$ 6,468,750
Current portion of note payable	**718,750**	718,750
	$ 5,031,250	$ 5,750,000

The note payable is secured by the related property at the Kanee Centre and Simkin Centre.

Minimum principal repayments required under the terms of the note payable are as follows:

2010	$ 718,750
2011	718,750
2012	718,750
2013	718,750
2014	718,750
Subsequent years	2,156,250
	$ 5,750,000

14. Deferred Contributions

Deferred contributions represent the unamortized and unspent amount of grants and funding received for the purchase of capital assets, equipment and major repairs. Changes in the deferred contribution balance reported are as follows:

	2009	2008
Balance, beginning of year	**$ 10,216,832**	$ 8,326,776
Contributions	**2,184,708**	2,521,083
Less amounts amortized to revenue	**(634,915)**	(631,027)
Balance, end of year	**$ 11,766,625**	$ 10,216,832

The balances as at March 31, 2009 and 2008 consist of the following:

	2009	2008
Deferred contributions relating to capital assets	**$ 11,592,699**	$ 10,076,633
Unspent funding for equipment	**165,274**	130,274
Unspent funding for major repairs	**8,652**	9,925
Balance, end of year	**$ 11,766,625**	$ 10,216,832

15. Contingencies

On July 1, 1987, a group of health care organizations ("subscribers"), including the Home, formed Healthcare Insurance Reciprocal of Canada ("HIROC"). HIROC is registered as a reciprocal insurer pursuant to provincial Insurance Acts, which permit reciprocal contracts of indemnity insurance. HIROC is a pooling of the public liability insurance risks of its members. All members of the pool pay annual premiums which are actuarially determined. All members are subject to re-assessment for losses, if any, in excess of such premiums, experienced by the pool of subscribers for the years in which they were a subscriber and these losses could be material. HIROC purchases reinsurance to reduce the likelihood of re-assessment. No such re-assessments have been made to March 31, 2009.

The Home is a named insured under the WRHA policy with HIROC.

16. Employee Future Benefits

Accrued pre-retirement obligations

Based upon collective agreements and/or non-union policy, employees of the Home are entitled to a pre-retirement leave benefit if they are retiring in accordance with the provisions of the applicable Home Group Pension Plan. The Home's contractual commitment is to pay based upon the following:

Four days (pro-rated) of salary per year of service upon retirement if the employee complies with one of the following conditions:

i. has 10 years service and has reached the age 55

ii. qualifies for the "eighty" rule which is calculated by adding the number of years of service to the age of the employee

iii. retires at or after age 65

iv. terminates employment at any time due to permanent disability

The Home undertook an actuarial valuation of the pre-retirement leave benefit for accounting purposes as at March 31, 2009. The significant actuarial assumptions adopted in measuring the Home's accrued retirement entitlements include mortality and withdrawal rates, a discount rate of 6.7% (2008 - 5.5%) and a rate of salary increase of 3.5% (2008 - 3.5%) plus age related merit/promotion scale with no provision for disability.

The amount recorded as a receivable from the Province for pre-retirement costs was initially determined based on the value of the corresponding actuarial liability for pre-retirement costs as at March 31, 2004. Subsequent to March 31, 2004, the Province has included in its ongoing annual funding to WRHA, an amount equivalent to the change in the pre-retirement liability, which includes annual interest accretion related to the receivable. The receivable will be paid by the Province when required.

16. **Employee Future Benefits** (continued)

Commencing in 2006/07, the Winnipeg Regional Health Authority assumed responsibility for funding the annual increase in the obligation each year. This amount will also be paid when required and the WRHA holds funding to meet this obligation.

	2009	2008
Employee future benefits recoverable from		
Manitoba Health	$ 967,427	$ 967,427
Winnipeg Regional Health Authority	190,683	193,140
	$ 1,158,110	$ 1,160,567

An analysis of the changes in the accrued pre-retirement obligation payable is as follows:

	2009	2008
Balance, beginning of the year	$ 1,048,968	$ 1,020,204
Net (decrease) increase in pre-retirement entitlements	(2,457)	28,764
Balance, end of year	$ 1,046,511	$ 1,048,968

Pension Plan

Substantially all of the employees of the Home are members of the Healthcare Employees Pension Plan (a successor to the Manitoba Health Organization Inc. Plan) (the "Plan") which is a multi-employer defined benefit pension plan available to all eligible employees of the participating members of the Plan. Plan members will receive benefits based on the length of service and on the average of annualized earnings during the best five years of the last ten years prior to retirement, termination or death, that provides the highest earnings.

Pension assets consist of investment grade securities. Market and credit risk on these securities are managed by the Plan by placing plan assets in trust and through the Plan investment policy.

Pension expense is based on Plan management's best estimates, in consultation with its actuaries, of the amount, together with the contributions by employees, required to provide a high level of assurance that benefits will be fully represented by fund assets at retirement, as provided by the Plan. The funding objective is for employer contributions to the Plan to remain a constant percentage of employees' contributions.

Variances between actuarial funding estimates and actual experience may be material and any differences are generally to be funded by the participating members. The most recent actuarial valuation of the Plan as at December 31, 2007 indicates the plan is in a deficit; however, it is anticipated that recently implemented increases in contribution rates will correct this deficiency within the allowed timeframe. Contributions to the Plan made during the year by the Home on behalf of its employees amounted to $509,533 (2008 - $514,850) and are included in the statement of operations.

17. Related Entity

The Sharon Home, Inc. controls The Sharon Home Fund Inc. (the "Fund") by virtue of the fact that the majority of the board members are common to each board. The Fund is incorporated under the Corporations Act and is a registered charity under the Canada Income Tax Act.

The Fund was established to support and foster the operations of the The Sharon Home, Inc. The Fund supports projects, not supported by other funding sources, for the care, maintenance and protection of aged men and women.

The net assets and results of the operations are not included in the financial statements of the Home. Separate financial statements of the Fund are available upon request. Financial summaries of the Fund as at March 31, 2009 and 2008 and for the years then ended are as follows:

	2009	2008
Financial position		
Total assets	**$ 2,005,176**	$ 4,318,283
Total liabilities	**$ 312,931**	$ 2,715,907
Total fund balances	**1,692,245**	1,602,376
Balance, end of year	**$ 2,005,176**	$ 4,318,283

	2009	2008
Results of operations		
Total revenue	**$ 1,099,385**	$ 1,330,851

Excess of revenue over expenses before the following	**975,610**	1,307,544
Contributions to The Sharon Home, Inc.	**(885,741)**	(1,210,067)
Excess of revenue over expenses	**$ 89,869**	$ 97,477
Cash flows		
Cash provided by operating activities	**$ (2,310,267)**	$ 1,104,676
Cash used in investing activities	**(28,218)**	(41,816)
Increase (decrease) in cash	**$ (2,338,485)**	$ 1,062,860

17. Related Entity (continued)

During the fiscal year 2009 the Home charged the Fund on a cost recovery basis $123,775 (2008 - $21,181) for administrative and special program expenditures. During the fiscal year 2009, the Fund contributed $60,083 (2008 - $77,584) to the Home to fund the interest and carrying charges on the land held for future developments These transactions are in the normal course of operations and are measured at the exchange amount, which is the amount of consideration established and agreed to by the related parties.

As at March 31, 2009, included in accounts receivable is an amount of $283,131 (2008 - $2,715,881) receivable from the Fund, of which $91,883 (2008 - $2,640,645) is funding receivable from the Fund representing contributions received by the Fund under the Simkin Centre Phase II capital campaign. The contributions are recorded as deferred contributions (Note 14).

18. Resident Trust Funds

Included in the cash and accounts payable are funds held in trust for the Home's residents totalling $19,651 (2008 - $30,324).

19. Restricted Cash

Cash in the amount of $173,926 (2008 - $140,199) is restricted for capital asset purchases.

20. Capital Management

The Home considers its capital to comprise its Net Assets balance. There have been no changes to what the Home considers to be its capital since the previous period.

The Home manages its capital to ensure it retains sufficient resources to enable it to meet its obligations for resident care. The determination of this amount is based on historical expense requirements relative to funding commitments.

THE SHARON HOME, INC.
Schedule of Adult Day Program

For the year ended March 31	2009	2008

Management's Responsibility

To the Members of West Park Manor Personal Care Home Inc.:

Management is responsible for the preparation and presentation of the accompanying financial statements, including responsibility for significant accounting judgments and estimates in accordance with Canadian generally accepted accounting principles. This responsibility includes selecting appropriate accounting principles and methods, and making decisions affecting the measurement of transactions in which objective judgment is required.

In discharging its responsibilities for the integrity and fairness of the financial statements, management designs and maintains the necessary accounting systems and related internal controls to provide reasonable assurance that transactions are authorized, assets are safeguarded and financial records are properly maintained to provide reliable information for the preparation of financial statements.

The Board of Directors is composed primarily of Directors who are neither management nor employees of the Organization. The Board is responsible for overseeing management in the performance of its financial reporting responsibilities, and for approving the financial information included in the annual report. The Board fulfils these responsibilities by reviewing the financial information prepared by management and discussing relevant matters with management and external auditors. The Board is also responsible for recommending the appointment of the Organization's external auditors.

Meyers Norris Penny LLP, an independent firm of Chartered Accountants, is appointed by the members to audit the financial statements and report directly to them; their report follows. The external auditors have full and free access to, and meet periodically and separately with, both the Board and management to discuss their audit findings.

Executive Director

Assistant Executive Director

Auditors' Report

To the Board of Directors of West Park Manor Personal Care Home Inc.:

We have audited the statement of financial position of West Park Manor Personal Care Home Inc. as at March 31, 2009 and the statements of operations and changes in unrestricted net assets for the year then ended. These financial statements are the responsibility of the Organization's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of the Organization as at March 31, 2009 and the results of its operations for the year then ended in accordance with Canadian generally accepted accounting principles.

Net assets, end of year	248,849	152,811	**401,660**	454,795

The accompanying notes are an integral part of these financial statements

1. Purpose of the Organization

West Park Manor Personal Care Home, Inc. is a privately operated non-profit corporation which provides personal care for senior citizens. It is incorporated without share capital under the Corporations Act of Manitoba.

The Organization is a not for profit organization under the Income Tax Act (the "Act") and as such, is exempt from income taxes. In order to maintain its status as such, the Organization must meet certain requirements within the Act. In the opinion of the management, these requirements have been met.

2. Accounting policies

The financial statements have been prepared in accordance with Canadian generally accepted accounting principles with the guidelines produced by Manitoba Health and/or Winnipeg Regional Health Authority, and include the following significant accounting policies:

Capital assets

Capital assets are recorded at cost. Other than buildings, amortization is recorded in the capital fund using the straight-line basis, at rates intended to amortize the value of capital assets over their estimated useful life. The annual rates are as follows:

	Rate
Buildings	30 %
Equipment	20 %
Call system and fire alarm	6.25 %

Amortization on buildings is based on the annual principal reduction of associated debt, which is intended to amortize the value of the capital asset over their estimated useful life.

Reserve funds

In accordance with guidelines established by Manitoba Health and/or Winnipeg Regional Health Authority, the Organization has established reserves for future expenditures as approved by Manitoba Health and/or Winnipeg Regional Health Authority (see Note 10).

Deferred contributions

Deferred contributions represent the unamortized portion of restricted contributions relating to the purchase of capital assets or self-funding of insurance deductibles. Capital asset deferred contributions are recognized as revenue on the same basis as respective assets are amortized. Insurance deductible deferred contributions are recognized as revenue on the same basis as respective expenditures are made.

Revenue recognition

The Organization uses the deferral method of accounting for contributions and reports on a fund accounting basis. Restricted contributions are deferred and matched with the related expenses as incurred. Unrestricted contributions are recorded in the operating fund as received or receivable if the amount can be reasonably estimated and collection is reasonably assured.

Measurement uncertainty (use of estimates)

The preparation of financial statements in conformity with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period.

The Organization estimates the net book value of capital assets based upon the amortization period and the estimated useful lives of the capital assets. Accounts receivable are stated after evaluation as to their collectibility and an appropriate allowance provided for uncollectible accounts.

These estimates and assumptions are reviewed periodically and, as adjustments become necessary, they are reported in earnings in the periods in which they become unknown.

2. **Accounting policies** *(Continued from previous page)*

Transfer to capital fund

Equipment of a capital nature with an individual value over $2,000 is transferred to the Capital Fund in order to comply with Manitoba Health and/or Winnipeg Regional Health Authority policy.

Long-lived assets

Long-lived assets consists of buildings, computer equipment and equipment with finite useful lives. Long-lived assets held for use are measured and amortized as described in the applicable accounting policies.

The Organization performs impairment testing on long-lived assets held for use whenever events or changes in circumstances indicate that the carrying value of an asset, or group of assets, may not be recoverable. Impairment losses are recognized when undiscounted future cash flows from its use and disposal are less than the assets' value. Any impairment is included in earnings for the year.

Financial Instruments

Fair Value of financial instruments

The carrying amount of cash, accounts receivable and accounts payable and accruals approximate their fair value due to the short-term maturities of these items. The fair value of the Organization's investments are based on quoted market prices.

Classification of financial instruments

The Organization has classified short-term investments as available for sale. These instruments are initially recognized at their fair value which is approximated by the instrument's cost in a transaction between unrelated parties. Available for sale instruments are subsequently measured at their fair value. Net gains and losses arising from changes in fair value which include interest, realized and unrealized gains and losses are recognized immediately in the fund balances.

The Organization has classified accounts receivable as loans and receivables. These assets are initially recognized at their fair value which is approximated by the instrument's initial cost in a transaction between unrelated parties. Loans and receivables are subsequently measured at their amortized cost. Amortized cost is the amount at which the financial asset is measured at initial recognition less repayments and any reduction for impairment or uncollectability. Gains and losses arising from changes in fair value are recognized in the fund balances upon impairment.

The Organization has classified accounts payable and long term debt as other financial liabilities. These liabilities are initially recognized at their fair value which is approximated by the instrument's initial cost in a transaction between unrelated parties. Other financial liabilities are subsequently measured at amortized cost. Amortized cost is the amount at which the financial liability is measured at initial recognition less repayments. Net gains and losses arising from changes in fair value are recognized in the fund balances upon derecognition.

The accompanying notes are an integral part of these financial statements

2. **Accounting policies** *(Continued from previous page)*

Recent accounting pronouncements

Financial statement presentation by not-for-profit organzations

In September 2008, amendments were made to CICA Handbook Section 4400 Financial Statement Presentation by Not-for-profit Organizations. Amendments to the section included removal of the requirement to treat net assets invested in capital assets as a separate component of net assets, and, instead, permitting such an amount to be presented as a category of internally restricted net assets. In addition, the requirement to recognize and present revenues and expenses on a gross basis when a not-for-profit organization is acting as a principal in the transaction was clarified. Finally, guidance was included to reflect that Section 1540 Cash Flow Statements and Section 1751 Interim Financial Statements are applicable to not-for-profit organizations.

These amendments apply to interim and annual financial statements relating to fiscal years beginning on or after January 1, 2009. The Organization does not expect the changes to the standard to have a material impact on its financial statements.

Capital asset held by not-for-profit organizations

CICA Handbook Section 4430 Capital Assets Held by Not-for-profit Organizations has been amended to provide additional guidance with respect to the appropriate use of the scope exemption for smaller entities that expense their capital assets. It was clarified that the exemption does not allow NFPOs to capitalize but not amortize their capital assets, nor does it allow different methods of accounting for various types of capital assets.

This amendment applies to interim and annual financial statements relating to fiscal years beginning on or after January 1, 2009. The Organization does not expect the change to this standard to have a material impact on its financial statements.

Disclosure of allocated expenses by not-fot-profit organizations

In September 2008, the Canadian Institute of Chartered Accountants issued new recommendations for disclosures regarding allocated expenses by not-for-profit organizations. CICA Handbook Section 4470 Disclosure of Allocated Expenses by Not-for-profit Organizations requires disclosure by not-for-profit organizations that allocate fundraising and general support expenses to other functions of the policies adopted for the allocation of such expenses among functions, the nature of the allocated expenses, and the basis on which allocations are made. The section also requires disclosure of the amounts allocated from each of its fundraising and general support functions and the amounts and functions to which they have been allocated.

This new Section is effective for interim and annual financial statements relating to fiscal years beginning on or after January 1, 2009. The Organization does not expect this new standard to have a material impact on its financial statements.

7. Deferred charges - future employee benefits

Under guidelines produced by Manitoba Health and/or Winnipeg Regional Health Authority, funding owed to the Organization related to pre-retirement leave benefit and vacation pay liability is recognized as an out of global budget accounts receivable for March 31, 2004 and prior years. Funding for employee future benefits incurred subsequent to March 31, 2004 fiscal years are included in the Organization's global funding and is not recorded as a receivable, as Manitoba Health and/or Winnipeg Regional Health Authority had directed all health care facilities to record the future employee benefits but not the corresponding receivable. For the March 31, 2009 fiscal year the Organization incurred an employee future benefit long term liability increase of $55,672 (2008 - decrease of $26,017) and a future employee benefit long term receivable increase (2008 - decrease) was recorded for the same amount as directed by Manitoba Health and the WRHA as an offset to revenue and expense respectively.

The accompanying notes are an integral part of these financial statements

8. Term loans due on demand

	2009	*2008*
First mortgage payable in monthly instalments of $8,289 including interest at 7.75%, secured by land and buildings having a net book value of $587,000 (2008 - $643,000), due August 1, 2023.	**868,282**	900,188
Bank loan bearing interest at prime minus 0.50%, payable in monthly instalments of $3,550 plus interest, secured with a general security agreement, due August 31, 2009.	**113,600**	156,200
Bank loan bearing interest at prime minus 0.50%, payable in monthly instalments of $2,535 plus interest, secured with a general security agreement, due August 31, 2009.	**139,390**	169,810
Bank loan bearing interest at prime minus 0.50%, payable in montly instalments of $2,119 plus interest, secured with a general security agreement, due August 31, 2009.	**127,060**	152,488
Bank loan bearing interest at prime minus 0.50%, payable in montly instalments of $1,485 plus interest, secured with a general security agreement, due December 20, 2009.	**170,273**	-
	1,418,605	**1,378,686**
Less: current portion	**585,986**	131,000
	832,619	1,247,686

Principal repayments on terms in each of the next five years are estimated as follows:

2009	585,986
2010	38,427
2011	41,405
2012	44,614
2013	48,072

The accompanying notes are an integral part of these financial statements.

9. Deferred contributions

Changes for the year in the deferred contributions balance are as follows:

	Capital	*Insurance*	*2009*	*2008*
Balance, beginning of year	427,546	10,541	**438,087**	365,166
Contributions received during the year				
Winnipeg Regional Health Authority				
- Principal repayment	129,405	-	**129,405**	127,070
- Equipment replacement	26,250	-	**26,250**	26,250
- Major repairs	7,944	-	**7,944**	7,944
- Insurance deductible	-	2,016	**2,016**	2,016
Recognized as revenue during the year	(93,723)	-	**(93,723)**	(90,359)
Balance, end of year	497,422	12,557	**509,979**	438,087

10. Restricted net assets

Internally restricted net assets are comprised of:

Non-operating income reserve	*2009*	*2008*
Balance, beginning of year	**601,708**	526,131
Interest	**63,323**	109,834
Payments/expenditures	**(126)**	(100)
Contribution to Capital Fund	**(43,435)**	(34,157)
Balance, end of year	**621,470**	601,708
Reserve for major repairs		
Balance, beginning of year	**28,233**	28,233
Expenditures	-	-
Balance, end of year	**28,233**	28,233
	649,703	629,941

These net assets are restriced in the fact that they are not part of the general operations of the personal care home. The use of such assets is at the discrection of the board of directors.

The accompanying notes are an integral part of these financial statements.

11. Financial instruments

The Organization as part of its operations carries a number of financial instruments. It is management's opinion that the Organization is not exposed to significant interest, currency or credit risks arising from these financial instruments except as otherwise disclosed.

Credit concentration

Financial instruments that potentially subject the Personal Care Home to concentrations of credit risk consist primarily of trade accounts receivable as described in Note 5. Of the $1,068,125 (2008 - $847,361) of receivables, $999,252 (2008 - $680,786) is due from the Manitoba Health/Winnipeg Regional Health Authority.

12. Economic dependence

A significant portion of the Organization's operating funds are provided by Manitoba Health and/or Winnipeg Regional Health Authority and its ability to continue viable operations is dependent upon maintaining this funding.

13. Statement of cash flows

A statement of change in cash flows has not been prepared because the information about operating, financing and investing activities and their effects on cash resources are readily apparent from the other financial information.

14. Year end adjustment

The year end adjustment in the revenues section of the Statement of Operations represents the difference in the funding budget and the actual for residential charges received from residents. The amount is set up as a payable to Winnipeg Regional Health Authority (WRHA) and represents a decrease to WRHA revenue.

15. Capital management

The Organization's objective when managing capital is to safeguard the entity's ability to continue as a going concern, so that it can continue to provide services and benefits to its residents.

The Organization sets the amount of capital in proportion to risk and manages the capital structure and makes adjustments to it in light of changes to economic conditions and the risk characteristics of the underlying assets, as well as with consideration of externally imposed capital requirements. In order to maintain or adjust the capital structure, the Organization may sell investments or decrease expenses.

The Organization manages the following as capital:

	2009	*2008*
Short-term investments	**2,022,296**	1,663,525
Net assets	**401,660**	454,795
	2,423,956	2,118,320

The Organization monitors capital on a quarterly basis, as well as annually, including the Board's input as to the capital management approach to take, and through advice from the Organizations's investment advisors. During the year, the Organization's strategy is to protect the capital through maintaining low risk investments, as well as to minimize the excess of revenues over expenses.

The accompanying notes are an integral part of these financial statements

16. Comparative figures

Certain of the prior year's comparative figures have been reclassified to conform with the current year's financial statement presentation.

The accompanying notes are an integral part of these financial statements

Auditors' Report

To the Directors of
Women's Health Clinic Inc.

We have audited the statement of financial position of Women's Health Clinic Inc. as at March 31, 2009 and the statements of financial activities, changes in fund balances and cash flows for the year then ended. These financial statements are the responsibility of the Organization's management. Our responsibility is to express an opinion on these financial statements based on our audit.

Except as explained in the following paragraphs, we conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In common with many charitable organizations, Women's Health Clinic Inc. derives part of its revenues from the general public in the form of contributions and fundraising the completeness of which is not susceptible of satisfactory audit verification. Accordingly, our verification of these revenues was limited to the amounts recorded in the records of the Organization and we were not able to determine whether any adjustments might be necessary to contributions and fundraising, excess of revenues over expenses, current assets and changes in fund balances.

In our opinion, except as explained above and the effect of adjustments, if any, which we might have determined to be necessary had we been able to satisfy ourselves concerning the completeness of those revenues referred to in the preceding paragraph, these financial statements present fairly, in all material respects, the financial position of the Organization as at March 31, 2009 and the results of its operations, the changes in its fund balances and cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

CHARTERED ACCOUNTANTS

1. Nature of operations

Women's Health Clinic Inc. is a Community Health Centre based on principles of feminism, equity and diversity. The Organization works towards promoting the health and well-being of women. The approach to health is to facilitate empowerment, choice and action.

The Organization was formed in 1981, is an incorporated not-for-profit entity and is a registered charity under the Income Tax Act.

2. Significant accounting policies

The Organization follows accounting principles generally accepted in Canada in preparing its financial statements. The significant accounting policies used are as follows:

a) Fund accounting

Revenues and expenses related to program delivery and administrative activities are reported in the Operating Fund.

The Donation Fund reports all donations and fundraising activities. The resources of this fund are disbursed subject to the Board of Directors' approval or relevant restrictions.

The Capital Fund reports the assets and liabilities, revenues and expenses related to the Organization's capital assets.

b) Revenue recognition

Women's Health Clinic Inc. follows the deferral method of accounting for contributions.

Restricted contributions are recognized as revenue of the appropriate fund in the year in which the related expenses are incurred. Unrestricted contributions are recognized as revenue of the appropriate fund when received or receivable if the amount to be received can be reasonably estimated and collection is reasonably assured.

c) Inventories

Inventories are valued at the lower of cost and net realizable value with cost being determined on a first-in, first-out basis.

d) Capital assets

Purchased capital assets are recorded in the Capital Fund at cost. Contributed capital assets are recorded in the Capital Fund at the fair value at the date of contribution.

2. Significant accounting policies (cont.)

e) Amortization

Amortization is provided at rates designed to write off the assets over their estimated useful lives as follows:

Building and improvements	25 years	straight-line
Computers	5 years	straight-line
Furniture and fixtures	10 years	straight-line
Security system	10 years	straight-line
Medical equipment	5 years	straight-line

Amortization expense is reported in the Capital Fund.

f) Accounting estimates

The preparation of financial statements in accordance with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amount of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements and the reported amount of revenues and expenses during the reported period. These estimates are reviewed periodically and are reported in earnings in the period in which they become known. Actual results could differ from these estimates.

g) Financial instruments

The Organization's financial instruments consist of cash, receivables, payables and accruals, funds held in trust, demand loans, and pre-retirement leave. The fair values of cash, receivables, payables and accruals, funds held in trust, demand loans, and pre-retirement leave approximate their carrying values. It is management's opinion that the Organization is not exposed to significant interest, currency or credit risk arising from these financial instruments.

3. Cash

The Organization has a line of credit in the amount of $25,000 which is not being used at March 31, 2009 nor at March 31, 2008.

4. Capital assets

	Cost	Accumulated Amortization	2009 Net Book Value	2008 Net Book Value
Land	$ 130,000	$ -	**$ 130,000**	$ 130,000
Building and improvements	901,483	193,326	**708,157**	735,113
Computers	61,077	28,391	**32,686**	36,862
Furniture and fixtures	50,358	33,860	**16,498**	15,802
Security system	45,591	20,728	**24,863**	29,422
Medical equipment	18,781	6,859	**11,922**	7,217
	$ 1,207,290	$ 283,164	**$ 924,126**	$ 954,416

5. Deferred contributions

Deferred contributions represent restricted funding and unspent resources externally restricted for the Operating Fund which relate to the subsequent year.

	2009	2008
Health Canada	**$ 4,846**	$ 16,406
United Way of Winnipeg	**6,674**	6,678
Province of Manitoba	**8,546**	-
University of Alberta	**-**	4,255
Winnipeg Regional Health Authority	**361,487**	289,525
Healthy Child Manitoba	**10,126**	10,126
The Winnipeg Foundation	**12,140**	3,184
CWHN	**1,500**	1,500
Healthy Baby	**5,888**	40
	$ 411,207	$ 331,714

6. Deferred contributions related to capital assets

Deferred contributions related to capital assets of $273,318 (2008 - $290,470) represent grants and donations for building, computers, furniture and fixtures and medical equipment. Deferred contributions are amortized on the statement of financial activities.

7. Demand loans

	2009	2008
Mortgage, payable to Assiniboine Credit Union, interest at prime rate plus 1/4%, repayable in blended monthly installments of $4,960, due on demand	$ 550,722	$ 584,551
Loan, payable to Assiniboine Credit Union, interest at prime rate plus 1/4%, repayable in blended monthly installments of $200, due on demand	2,345	4,579
	$ 553,067	$ 589,130

The Organization's land and building are pledged as security for the debt.

Principal repayments of the demand loan obligation estimated to be required in each of the next five years are as follows:

2010	$ 30,896
2011	30,355
2012	32,041
2013	33,933
2014	35,937
	$ 163,162

8. Change in non-cash operating assets and liabilities

	2009	2008
Receivables and due from Winnipeg Regional Health Authority	$ (109,945)	$ (70,820)
Inventories	(2,387)	(9,632)
Prepaids	(3,602)	(2,333)
Payables and accruals	181,352	64,906
Funds held in trust	166	(5,216)
Deferred revenue and deferred contributions	80,462	150,448
	$ 146,046	$ 127,353

9. Economic dependence

The volume of financial activity undertaken by Women's Health Clinic Inc. with its main funding bodies is of sufficient magnitude that the discontinuance of their funding would endanger the ability of the Organization to continue as a going concern.

10. Endowment fund

In 2002 the Organization established an Endowment Fund to be held in perpetuity at The Winnipeg Foundation. Interest revenue earned by this fund is available to the Women's Health Clinic annually to support general operations. As of March 31, 2009, the Organization's contributions to the Endowment Fund totalled $74,112 (2008 - $60,153). The market value of the Endowment Fund at March 31, 2009 is $99,286 (2008 - $100,894).

11. Pre-retirement leave benefits

The Organization has a contractual commitment for the pre-retirement benefits for the members of the pension plan based on years of service before retirement. During the year ended March 31, 2006 the Organization was instructed by WRHA to record the full obligation. The Winnipeg Regional Health Authority calculated and advised the Organization of the amount of the obligation. Pre-retirement leave benefits are considered an out-of-globe funding item, of which the Winnipeg Regional Health Authority has instructed the Organization to set up a receivable for the percentage of the change in the pre-retirement leave obligation that belongs to Winnipeg Regional Health Authority programs. The change in the accrued pre-retirement leave benefits are recorded as an expense in the current year. During the year the obligation increased by $14,216 (2008 - $22,453).

A portion of the pre-retirement benefits for the current year of $14,216 (2008 - $22,453) were funded by Winnipeg Regional Health Authority during the year.

AUDITORS' REPORT

To the Board of Directors of
Rehabilitation Centre For Children, Inc.

We have audited the statement of financial position of the Rehabilitation Centre For Children, Inc. as at March 31, 2009 and the statements of operations, changes in net assets and cash flows for the year then ended. These financial statements are the responsibility of the Centre's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of the Centre as at March 31, 2009 and the results of its operations and its cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

1. NATURE AND OBJECTIVES OF THE CENTRE

The Rehabilitation Centre for Children, Inc. (the "Centre") was incorporated by Articles of Incorporation under the Corporations Act of Manitoba on March 2, 1981 without authorized share capital, and is a registered charity under the Income Tax Act.

The mission of the Rehabilitation Centre for Children, Inc. is to support children with special needs in Manitoba and surrounding areas in reaching their goals and participating in their communities. Together, with families and our partners, we provide a centre of excellence for children's rehabilitation, which includes direct service, education, research, and innovative technologies that are developed and delivered in an integrated, service system.

2. CHANGES IN ACCOUNTING POLICIES

Capital disclosures

On April 1, 2008, the Centre adopted CICA 1535, Capital disclosures. This standard requires the disclosure of information related to the objectives, policies and processes for managing capital. The required disclosures are in Note 12.

Inventories

The Centre adopted the recommendations of CICA Handbook Section 3031 on inventories which provides guidance on the determination of cost of inventories and its subsequent recognition as an expense, and includes additional disclosure requirements. The new Section also requires to account for the reversal of write-downs previously recognized when there is a subsequent increase in the value of inventories. This accounting policy, which was adopted as of April 1, 2008, was applied retroactively. However, the comparative financial statements have not been restated as there was no impact.

3. SIGNIFICANT ACCOUNTING POLICIES

The Centre has elected to use the exemption provided by the Canadian Institute of Chartered Accountants (CICA) permitting not for profit organizations not to apply Sections 3862 and 3863 of the CICA Handbook which would otherwise have applied to the financial statements of the Centre for the year ended March 31, 2009. The Centre applies the requirements of Section 3861 of the CICA Handbook.

These financial statements have been prepared in accordance with Canadian generally accepted accounting principles and include the following significant accounting policies:

a) Revenue

i) Funding from Winnipeg Regional Health Authority (WRHA)

The Centre is funded during the year by the Winnipeg Regional Health Authority (WRHA) for programs outlined in the WRHA/RCC Service Purchase Agreement. The Centre is entitled to retain surpluses up to a maximum of 2% of the WRHA global funding.

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

a) Revenue (continued)

ii) Other Funding Sources

The Centre receives funding from other sources including Children's Rehabilitation Foundation Inc., Province of Manitoba Family Services, Manitoba Health and school divisions for specified programs.

b) Inventory

Inventory is valued at the lower of cost or replacement cost. Cost is determined on the first in, first out basis.

c) Capital assets

Equipment acquired before April 1, 1981 is recorded at a nominal value. Additions to equipment subsequent to April 1, 1981 are recorded at cost. Contributed capital assets are recorded at fair value at the date of contribution and recorded as restricted donations. Repairs and maintenance costs are charged to expense.

Capital assets are amortized on a straight-line basis over the following estimated useful lives:

Building and building service equipment	20 years
Equipment and furniture	5 - 25 years
Information systems	5 – 10 years

d) Accounts Receivable – employee future benefits

The Centre records a provision for future employee benefits including accrued vacation entitlements, accrued overtime and accrued retirement entitlement obligations. For certain employees, funding for the future employee benefits is recoverable from the Winnipeg Regional Health Authority (WRHA) as a component of salary costs in the period in which the expenditures are made. Accordingly, for those employees funded by the WRHA, the cost of the estimated accrued vacation pay, overtime and retirement entitlement obligations at year-end is deferred to enable an appropriate matching of expenses with income secured in subsequent years.

e) Revenue recognition

The Centre follows the deferral method of accounting for contributions which includes donations and government grants. Operating grants are recorded as revenue in the period to which they relate. Grants approved but not received at the end of a period are accrued. Where a portion of a grant is related to a future period, it is deferred and recognized in that subsequent period.

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

e) Revenue recognition (continued)

Unrestricted contributions are recognized as revenue when received or receivable if the amount to be received can be reasonably estimated and collection is reasonably assured.

Externally restricted contributions are recognized as revenue in the year in which the related expenses are recognized. Contributions restricted for the purchase of capital assets are deferred and amortized into revenue at the same rate as the corresponding capital asset.

f) Financial instruments

Financial assets and financial liabilities are initially recognized at fair value and their subsequent measurement is dependent on their classification as described below. Their classification depends on the purpose, for which the financial instruments were acquired or issued, their characteristics and the Health Centre's designation of such instruments.

Classification	
Cash	Held for trading
Accounts receivable	Loans and receivables
Amounts due from WRHA/Manitoba Health	Loans and receivables
Accounts payable and accrued charges	Other liabilities
Accrued vacation entitlements	Other liabilities

The fair value of cash, accounts receivable, amounts due from WRHA, accounts payable, and accrued vacation pay is approximately equal to their carrying values.

Held for trading

Held for trading financial assets are financial assets typically acquired for resale prior to maturity or that are designated as held for trading. They are measured at fair value at the balance sheet date. Fair value fluctuations including interest earned and interest accrued are included in interest income.

Loans and receivables

Loans and receivables are accounted for at amortized cost using the effective interest method.

Other liabilities

Other liabilities are recorded at amortized cost using the effective interest method and include all financial liabilities, other than derivative instruments.

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

f) Financial instruments (continued)

Effective interest method
The Centre uses the effective interest method to recognize interest income or expense which includes transaction costs or fees, premiums or discounts earned or incurred for financial instruments.

Credit risk
Credit risk arises from the potential that a counterparty will fail to perform its obligations. In addition, the Centre is exposed to credit risk from its customers. However, the Centre has a large number of customers which minimizes the concentration of credit risk.

g) Use of estimates

The preparation of financial statements in conformity with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. The significant estimates include allowance for doubtful accounts, accrued employee future benefit obligation and the useful life of capital assets. Actual results could differ from these estimates.

h) Future accounting changes

In November 2008, the CICA issued amendments to Section 1540, Cash flow statements, Section 1751, Interim financial statements, Section 4400, Financial statement presentation by not-for-profit organizations, and issued Section 4470, Disclosure of allocated expenses by not-for-profit organizations. These new standards are effective for fiscal years beginning on or after January 1, 2009, specifically April 1, 2009 for the Organization.

Sections 1540 and 1751 have been amended to include not-for-profit organizations within their scope.

Section 4400 has been amended in order to eliminate the requirement to treat net assets invested in capital assets as a separate component of net assets and, instead, permit a not-for-profit organization to present such an amount as a category of internally restricted net assets when it chooses to do so. It also clarifies that revenues and expenses must be recognized and presented on a gross basis when a not-for profit organization is acting as a principal in transactions.

Section 4470 establishes disclosure standards for a not-for-profit organization that classifies its expenses by function and allocates its expenses to a number of functions to which the expenses relate.

The Centre does not expect that the adoption of these new standards will have a material impact on its financial statements

4. ACCOUNTS RECEIVABLE

	2009	2008
Patient services	$ 88,380	$ 133,550
School divisions	193,971	139,688
Manitoba Health Patient services	93,925	29,994
Winnipeg Regional Health Authority Operations	80,784	75,250
Due from Children's Rehabilitation Foundation Inc. (Note 9 b))	79,419	51,880
GST Rebate	9,792	14,528
Other	4,352	442
	$ 550,623	$ 445,332

5. CAPITAL ASSETS

	2009			2008
	Cost	Accumulated Amortization	Net Book Value	Net Book Value
Building and building service equipment	$ 198,026	$ 198,026	$ -	$ -
Equipment and furniture	543,564	363,953	179,611	193,541
Information systems	248,390	169,417	78,973	111,266
	$ 989,980	$ 731,396	$ 258,584	$ 304,807

6. ACCRUED EMPLOYEE FUTURE BENEFITS

The Centre undertook an actuarial valuation of the accrued pre-retirement leave in accordance with accounting policy (Note 3(d)). The significant actuarial assumptions adopted in measuring the Centre's accrued pre-retirement leave include mortality and withdrawal rates, a discount rate of 6.70% (2008 – 5.50%) and a rate of salary increase of 3.5% plus age related merit/promotion scale with no adjustment for disability. Actual payments made during the year for the Centre's pre-retirement leave were $22,794 (2008 - $13,077).

7. DEFERRED CONTRIBUTIONS RELATED TO CAPITAL ASSETS

Deferred contributions related to capital assets represent the unamortized amount and unspent amount of donations and funding received for the purchase of capital assets. The amortization of capital contributions is recorded in the statement of operations. Changes in the deferred contributions are as follows:

	2009	2008
Balance, beginning of year	$ 225,513	$ 208,683
Add: contributions	22,600	69,068
Less: amounts amortized to revenue	(59,409)	(52,238)
	$ 188,704	$ 225,513

8. PENSION PLAN

Substantially all of the employees of the Centre are members of the Healthcare Employees Pension Plan (the "Plan"), which is a multi-employer defined benefit pension plan available to all eligible employees of the participating facilities. Plan members will receive benefits based on the length of services and on the average of annualized earnings calculated on the best five of the eleven consecutive years prior to retirement, termination or death, that provide the highest earnings. The costs of the benefit plan are not allocated to the individual facilities. As a result, individual participating facilities are not able to identify their share of the underlying assets and liabilities and accordingly, the plan is accounted for as a defined contribution plan.

The Centre's liability under the pension plan is limited to the contributions required during the year under the respective agreements. Contributions to the Plan made during the year by the Centre on behalf of its employees amounted to $262,545 (2008 - $240,615) and are included in the statement of operations.

9. ECONOMIC DEPENDENCE AND RELATED ENTITIES

a) The Province of Manitoba and the WRHA provide a significant amount of the operating funding of the Centre. The statement of operations and Note 4 provide details of the transactions between the Centre and these entities.

b) The Children's Rehabilitation Foundation Inc. (the "Foundation"), in part supports the activities of the Rehabilitation Centre for Children, Inc. A member of the Centre's Board of Directors sits as a Director on the Foundation's 15 member Board. The Foundation is incorporated under the Corporations Act of Manitoba and is a registered charity under the Income Tax Act. The Foundation may, at its discretion, fund specific projects of the Centre but such funding is for restricted purposes and is not available for general operating activities. The Foundation is not controlled by the Centre and therefore the financial statements of the Foundation have not been consolidated in these statements. During the year, the Foundation donated a total of $537,186 to the Centre in the form of cash and capital donations (2008 - $356,412).

10. INVESTMENT IN CAPITAL ASSETS

a) Investment in capital assets is calculated as follows:

	2009	2008
Restricted cash	$ 25,588	$ 10,361
Capital assets	258,584	304,807
Amounts financed by deferred contributions	(188,704)	(225,513)
	$ 95,468	$ 89,655

b) Change in net assets invested in capital assets is calculated as follows:

	2009	2008
Excess of revenue over expenses (expenses over revenue)		
Amortization of deferred contributions related to capital assets	$ 59,409	$ 52,238
Amortization of capital assets	(56,509)	(61,753)
	2,900	(9,515)
Net change in investment in capital assets		
Restricted cash	15,227	(3,485)
Purchase of capital assets	10,286	106,990
Deferred contributions	(22,600)	(69,068)
	2,913	34,437
	$ 5,813	$ 24,922

11. RESTRICTED NET ASSETS

Per the Centre's agreement with the Province of Manitoba Department of Family Services and Housing, surpluses generated through the Provincial Outreach Therapy for Children program are restricted to the future provision of outreach therapy services. In addition, funds received for the Children's Therapy, School Therapy and the Prosthetics and Orthotics Initiatives are restricted for use for these programs.

Of the $635,856 of Unrestricted net assets, $72,861 was generated in fiscal years 2008 and 2009 and is still subject to audit by the WRHA. The remaining $562,995 is available for use in supporting the Centre's current and future programs.

12. CAPITAL MANAGEMENT

The objective of the Board of Directors of the Rehabilitation Centre for Children, Inc., when managing capital, is to safeguard the ability to continue as a going concern. The Board of Directors sets the amount of capital in proportion to risk. The Board of Directors manages the capital structure and makes adjustments to it in the light of changes in economic conditions and the risk characteristics of the underlying assets.

Management Report

The accompanying financial statements are the responsibility of the management of the Special Operating Agencies Financing Authority and have been prepared in accordance with Canadian generally accepted accounting principles. In management's opinion, the financial statements have been properly prepared within reasonable limits of materiality, incorporating management's best judgement regarding all necessary estimates and all other data available up to July 17, 2009.

Management maintains internal controls to properly safeguard the Financing Authority's assets and to provide reasonable assurance that the books and records from which the financial statements are derived accurately reflect all transactions and that established policies and procedures are followed.

The responsibility of the Auditor General is to express an independent opinion on whether the financial statements of the Financing Authority are fairly presented in accordance with Canadian generally accepted accounting principles. The Auditors' Report outlines the scope of the audit examination and provides the audit opinion.

On behalf of Management,

G. Lynn Cowley

Lynn Cowley
Chairperson
Special Operating Agencies Financing Authority

July 17, 2009

OFFICE OF THE
AUDITOR GENERAL
MANITOBA

AUDITORS' REPORT

To the Legislative Assembly of Manitoba
To the Member of the Special Operating Agencies Financing Authority

We have audited the combined balance sheet of the Special Operating Agencies Financing Authority at March 31, 2009, and the combined statements of income, comprehensive income and retained earnings and cash flows for the year then ended. These financial statements are the responsibility of the Authority's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these combined financial statements present fairly, in all material respects, the financial position of the Authority as at March 31, 2009, and results of its operations and cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

Working capital advances	(8,516)	(7,055)
	$ 30,500	$ 30,954

See accompanying notes to the financial statements.

1. Nature of organization

The Special Operating Agencies Financing Authority (the "Financing Authority") is a body corporate established effective April 1, 1992 under ***The Special Operating Agencies Financing Authority Act.*** Under the direction of the Minister of Finance, the Financing Authority consists of the Chairperson as its sole member and receives staff support from the Department of Finance.

The Financing Authority provides a mechanism for funding Special Operating Agencies (SOAs) that operate outside the Consolidated Fund. It functions as a non-operating holding company, with the mandate to hold and acquire assets required for and resulting from SOA operations. It finances SOAs through contributed equity, repayable loans, and working capital advances. This financial framework enables SOAs to operate in a business-like manner within government policy expectations.

SOAs are designated by regulation under the Act and operate under a charter approved by the Lieutenant Governor in Council. A management agreement between the Financing Authority and the Minister responsible for each SOA assigns responsibility to the agency to manage and account for SOA-related assets and operations on behalf of the Financing Authority. SOAs remain accountable to their Minister for the results they achieve with the authority and resources granted.

The Financing Authority is economically dependent on the Province of Manitoba. Currently, the Financing Authority derives most of its revenue and all of its capital financing requirements from the Province.

SOAs in operation during the fiscal year ended March 31, 2009 were as follows:

Civil Legal Services, Department of Justice
Companies Office, Department of Finance
Crown Lands and Property Agency, Department of Infrastructure and Transportation
Fleet Vehicles Agency, Department of Infrastructure and Transportation
Food Development Centre, Department of Agriculture, Food and Rural Initiatives
Green Manitoba Eco Solutions, Department of Science, Technology, Energy and Mines
Industrial Technology Centre, Department of Science, Technology, Energy and Mines
Manitoba Education, Research and Learning Information Networks (MERLIN), Department of Science, Technology, Energy and Mines
Manitoba Securities Commission, Department of Finance
Manitoba Text Book Bureau, Department of Education, Citizenship and Youth
Materials Distribution Agency, Department of Infrastructure and Transportation
Office of the Fire Commissioner, Department of Labour and Immigration
Organization and Staff Development, Civil Service Commission
Pineland Forest Nursery, Department of Conservation
The Property Registry, Department of Finance
The Public Trustee, Department of Justice
Vital Statistics Agency, Department of Finance.

Effective April 1, 2009, Fleet Vehicles Agency and the Mechanical Equipment Services Branch of the Department of Infrastructure and Transportation were amalgamated into a new Special Operating Agency named Vehicle and Equipment Management Agency. Accordingly, Fleet Vehicles Agency effectively ceased operations at the close of business on March 31, 2009, and has since been dissolved.

2. Change in Accounting Policies

Effective April 1, 2008, the Financing Authority adopted the following new handbook sections issued by the Canadian Institute of Chartered Accountants (CICA):

Section 1535 Capital Disclosures

Section 1535 establishes standards for disclosing information about an entity's capital and how it is managed. These standards require an entity to disclose its objectives, policies and processes for managing capital, a summary of quantitative data about what it manages as capital and whether it complied with any externally imposed capital requirements to which it is subject and, if not, the consequences of such non-compliance.

Section 3862 Financial Instruments – Disclosures

Section 3862 modifies the disclosure requirements for financial instruments that were included in Section 3861, *Financial Instruments – Disclosure and Presentation*. The new standards require an entity to provide disclosures in its financial statements that enable users to evaluate the significance of financial instruments on its financial position and performance, the nature and extent of the risks to which it is exposed during the period and at the balance sheet date, and how those risks are managed.

Section 3863 Financial Instruments – Presentation

Section 3863 carries forward the presentation requirements of Section 3861, *Financial Instruments – Disclosure and Presentation*, unchanged.

The above noted new standards have no impact on the recognition, measurement or presentation of financial instruments in the Financing Authority's yearend financial statements.

Section 3031 Inventories

Section 3031 *Inventories* replaces Section 3030 *Inventories*. It provides more guidance on the measurement and disclosure requirements for inventories. The adoption of Section 3031 did not have an impact on the recognition, measurement or presentation of inventory in the Financing Authority's yearend financial statements.

3. Significant Accounting Policies

a. General

The financial statements of the Financing Authority are presented in accordance with Canadian generally accepted accounting principles.

b. Basis of reporting

The financial statements of the Financing Authority reflect the financial position and operating results of SOAs currently governed by management agreements with the Financing Authority. These statements are presented on a combined basis. Therefore, inter-agency balances and transactions have not been eliminated.

3. Significant Accounting Policies (continued)

The following policies apply to the Financing Authority, as well as to all agencies combined herein.

c. Use of estimates

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingencies at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates.

d. Inventories

Inventories are valued at the lower of cost and net realizable value.

e. Amortization of capital assets

Vehicles, fire engines	30%, declining balance
Vehicles (signed lease agreement)	straight line over term of lease
Equipment and furniture	6 2/3% - 20%, straight line 20% - 30%, declining balance
Computer equipment and software	10% - 20%, straight line 20%, declining balance
Rental equipment (Materials Distribution Agency)	2, 3, or 5 years, straight line
Buildings	15 - 40 years, straight line 10%, declining balance
Practical training site (Office of the Fire Commissioner)	20 years, straight line
Leasehold improvements	5 - 10 years, straight line
Other assets	5 - 10 years, straight line

f. Intangible assets

Intangible assets are recorded at cost and amortized over their estimated useful lives as follows:

System development costs	15 years, straight line

g. Administrative expenses paid by the Province of Manitoba

The Treasury Board Secretariat / Finance contribution covers salaries and benefits and certain operating expenses, paid by the Province of Manitoba on behalf of the Financing Authority.

h. Capital disclosures

The Financing Authority's capital consists of contributed equity, retained earnings provided from operations and special purpose reserve funds allocated from retained earnings.

3. Significant Accounting Policies (continued)

The Financing Authority's capital management policy is to maintain sufficient capital to meet its objectives through its retained earnings by managing transfers of surplus funds to the Province of Manitoba; meet short-term capital needs with working capital advances from the Province of Manitoba; and meet long-term capital needs through long-term debt with the Province of Manitoba. There were no changes in the Financing Authority's approach to capital management during the period.

The Financing Authority is not subject to externally imposed capital requirements.

4. Financial Instruments and Financial Risk Management

Financial assets and liabilities are initially recorded at fair value. Measurement in subsequent periods depends on the financial instrument's classification. Financial instruments are classified into one of the following five categories: held for trading; available for sale; held to maturity; loans and receivables; and other financial liabilities. All financial instruments classified as held for trading or available for sale are subsequently measured at fair value with any change in fair value recorded in net earnings and other comprehensive income, respectively. All other financial instruments are subsequently measured at amortized cost.

The financial assets and liabilities of the Financing Authority are classified and measured as follows:

Financial Asset/Liability	Category	Subsequent Measurement
Cash, term deposits, and customer deposits	Held for trading	Fair value
Accounts receivable	Loans and receivables	Amortized cost
Long-term investments	Held for trading	Fair value
Working capital advances	Held for trading	Fair value
Accounts payable	Other financial liabilities	Amortized cost
Long term debt	Other financial liabilities	Amortized cost

Amortized cost is determined using the effective interest rate method.

Gains and losses on financial instruments subsequently measured at amortized cost are recognized in the combined statement of income, comprehensive income and retained earnings in the period the gain or loss occurs. Changes in fair value on financial instruments classified as held for trading are recognized in the combined statement of income, comprehensive income and retained earnings for the current period. Changes in fair value on financial instruments classified as available for sale would be recorded in other comprehensive income until realized, at which time they recorded in the combined statement of income, comprehensive income and retained earnings.

4. Financial Instruments and Financial Risk Management (continued)

Fair value of financial instruments

The fair values of accounts receivable, accounts payable and accrued liabilities approximate their carrying values due to their short-term maturity.

The fair value of the long-term debt is determined using the present value of future cash flows under current financing agreements, based on the Financing Authority's current estimated borrowing rate for loans with similar terms and conditions. The fair value of this long-term debt is $33,035 as at March 31, 2009 (2008 - $23,931).

Financial risk management - overview

The Financing Authority has exposure to the following risks from its use of financial instruments: credit risk; liquidity risk; market risk; interest risk; and foreign currency risk.

Credit risk

Credit risk is the risk that one party to a financial instrument fails to discharge an obligation and causes financial loss to another party. Financial instruments which potentially subject the Financing Authority to credit risk consist principally of cash and term deposits and accounts receivable.

The maximum exposure of the Financing Authority to credit risk at March 31, 2009 is:

Cash and term deposits	$ 39,016
Customer deposits	1,452
Accounts receivable	14,154
Long-term investments	5,469
	$ 60,091

Cash and term deposits, and long-term investments: The Financing Authority is not exposed to significant credit risk as these deposits are primarily held by the Minister of Finance.

Customer deposits: The Financing Authority is not exposed to significant credit risk as the cash is held by a Chartered Bank.

Accounts receivable: The Financing Authority is not exposed to significant credit risk as the majority of its accounts receivable are with related entities with the balance due from a large client base, and payment in full is typically collected when it is due. The Financing Authority establishes an allowance for doubtful accounts that represents its estimate of potential credit losses. The allowance for doubtful accounts is based on management's estimates and assumptions regarding current market conditions, customer analysis and historical payment trends. These factors are considered when determining whether past due accounts are allowed for or written off.

4. Financial Instruments and Financial Risk Management (continued)

The change in the allowance for doubtful accounts during the year was as follows:

Balance, beginning of the year	$ 280
Provision for receivable impairment	96
Amounts written off	(85)
Balance, end of the year	$ 291

Liquidity risk

Liquidity risk is the risk that the Financing Authority will not be able to meet its financial obligations as they come due.

The Financing Authority manages liquidity risk by maintaining adequate cash balances and by review from the Province of Manitoba to ensure adequate funding will be received to meet the obligations.

Market risk

Market risk is the risk that changes in market prices, such as interest rates and foreign exchange rates, will affect the Financing Authority's income or the fair values of its financial instruments. The significant market risks the Financing Authority is exposed to are interest rate risk and foreign currency risk.

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The interest rate exposure relates to funds on deposit and long term debt.

The interest rate risk on funds on deposit is considered to be low because of their short-term nature.

The Financing Authority manages its interest rate risk on long-term debt through the exclusive use of fixed rate terms for its long-term debt. A change of 100 basis points in the interest rates would have increased or decreased its fair value by $1,212 (2008 - $796).

Foreign currency risk

Foreign currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Financing Authority is not exposed to significant foreign currency risk as it does not have any financial instruments denominated in foreign currency.

5. Accounts receivable

	2009	2008
Trade	$13,174	$13,476
Insurance agency rebate	495	455
Other	485	186
	$14,154	$14,117

The trade receivables are mostly due from the Province of Manitoba.

The insurance agency rebate is for discounts receivable by the Fleet Vehicles Agency from the Manitoba Public Insurance Corporation based on favourable claims experience for the Province's vehicle fleet in the previous insurance year.

6. Long-term investments

The Province of Manitoba accepted responsibility for the vacation entitlements earned by the employees of the Special Operating Agency's prior to their designation as SOA's and the severance pay benefits accumulated to March 31, 1998 for certain of the Agency's employees. Accordingly, the Agency's recorded a receivable of $5,469 from the Province of Manitoba for these accumulated benefits. Effective March 31, 2009 the Province of Manitoba paid the receivable balances related to the funding for these liabilities and has placed the amount of $5,469 into an interest bearing trust accounts to be held on the Agency's behalf until the cash is required to discharge the related liabilities.

7. Restricted short-term deposits

The Manitoba Securities Commission maintains separate short-term deposits with the Province of Manitoba to fund expenses which may arise with respect to the Reserve Fund (Note 16b).

8. Capital assets

	Cost	Accumulated Amortization	2009 Net Book Value	2008 Net Book Value
Vehicles, fire engines	$108,577	$48,455	$60,122	$48,070
Equipment and furniture	18,618	10,623	7,995	7,317
Rental equipment	7,220	5,774	1,446	1,300
Computer equipment and software	6,513	4,698	1,815	1,899
Buildings	17,252	6,278	10,974	9,898
Practical training site	2,346	1,187	1,159	1,244
Leasehold improvements	2,506	1,924	582	664
Other assets	2,778	1,552	1,226	852
	$165,810	$80,491	$85,319	$71,244

9. Intangible assets

	Cost	Accumulated Amortization	2009 Net Book Value	2008 Net Book Value
System development costs	$59	$ -	$59	$ -

10. Working capital advances

The Minister of Finance, with Lieutenant-Governor-in-Council approval by Orders in Council 747/1992, 242/1994, 152/1995, 151/1996, 136/1997, 168/1998, 129/2000, 185/2005, and 134/2006, has arranged for working capital advances to be available to the Financing Authority. The aggregate of the outstanding advances is not to exceed $25,070 (2008 - $25,070) at any one time. As at March 31, 2009, $16,554 (2008 - $18,015) of these advances was unused and available.

11. Capital lease obligations

	2009	2008
Polaris Leasing Ltd., capital lease due November 1, 2013, interest at 7.318% per year with annual principal and interest payments of $43 for the first 4 years and a final payment of $79 in 2014	$ 199	$ -
Current portion of capital lease obligations	28	-
	$ 171	$ -

Capital lease obligations are secured by equipment under lease.

The future minimum lease payments for the next five years are as follows:

2010	$ 28
2011	30
2012	32
2013	35
2014	74

12. Long-term debt - Province of Manitoba

		2009	2008
6.425%	repayable in semi-annual instalments of $146 principal and interest, maturing in 2009	-	278
3.625%	repayable in semi-annual instalments of $149 principal and interest, maturing in 2009	-	291
3.500%	repayable in semi-annual instalments of $259 principal and interest, maturing in 2009	-	504
5.250%	repayable in semi-annual instalments of $159 principal and interest, maturing in 2010	155	454
5.625%	repayable in semi-annual instalments of $134 principal and interest, maturing in 2010	131	381
4.125%	repayable in semi-annual instalments of $56 principal and interest, maturing in 2010	55	161

12. Long-term debt - Province of Manitoba (continued)

4.000%	repayable in semi-annual instalments of $ 167 principal and interest, maturing in 2010	324	636
4.375%	repayable in semi-annual instalments of $438 principal and interest, maturing in 2010	849	1,662
5.125%	repayable in semi-annual instalments of $123 principal and interest, maturing in 2011	350	568
4.750%	repayable in semi-annual instalments of $ 227 principal and interest, maturing in 2011	857	1,256
4.750%	repayable in semi-annual instalments of $ 451 principal and interest, maturing in 2011	1,701	2,494
4.875%	repayable in semi-annual instalments of $ 137 principal and interest, maturing in 2012	636	870
4.750%	repayable in semi-annual instalments of $ 102 principal and interest, maturing in 2012	476	652
4.625%	repayable in semi-annual instalments of $ 475 principal and interest, maturing in 2012	2,634	3,435
4.750%	repayable in semi-annual instalments of $ 137 principal and interest, maturing in 2013	871	1,095
5.000%	repayable in semi-annual instalments of $ 142 principal and interest, maturing in 2013	900	1,129
4.000%	repayable in semi-annual instalments of $ 345 principal and interest, maturing in 2013	2,528	3,100
4.050%	repayable in semi-annual instalments of $ 140 principal and interest, maturing in 2014	1,143	1,370
3.875%	repayable in semi-annual instalments of $ 355 principal and interest, maturing in 2014	2,907	-
4.875%	repayable in semi-annual instalments of $ 148 principal and interest, maturing in 2015	1,519	1,732
4.125%	repayable in semi-annual instalments of $ 117 principal and interest, maturing in 2016	1,321	1,495

12. Long-term debt - Province of Manitoba (continued)

4.875%	repayable in semi-annual instalments of $ 237 principal and interest, maturing in 2024	4,885	-
5.000%	repayable in semi-annual instalments of $ 334 principal and interest, maturing in 2024	7,000	-
5.800%	repayable in annual instalments of $ 18 principal and interest, maturing in 2017	160	177
5.000%	repayable in monthly instalments of $ 6 principal and interest, maturing in 2024	1,086	-
		32,488	23,740
	Amount due within one year	7,231	7,131
		$ 25,257	$ 16,609

Principal repayments in each of the next five years are as follows:

2010	$7,231
2011	5,854
2012	4,383
2013	3,093
2014	1,747

Unused loan authority of $4,900 was available for Fleet Vehicles Agency as of March 31, 2008. An additional $23,350 of loan authority availability was approved for the three agencies (listed in the following table) during June 2008 in The Loan Act, 2008.

	The Loan Act, 2008
Fleet Vehicles Agency	$ 18,900
The Property Registry	4,000
Companies Office	450
Total incremental loan authority	$ 23,350

Of the $28,250 in available loan authority, $15,200 was drawn down at various times during the 2008/09 year, leaving $13,050 of loan authority availability unutilized as of March 31, 2009.

13. Deferred capital contributions

Deferred capital contributions represent the unamortized amount of contributions received by the Food Development Centre from the Federal Government and the Province of Manitoba for the purchase of equipment and construction of a building. These amounts will be taken into income to match the amortization of the equipment and building.

14. Severance liability

Effective April 1, 1998 or the date of their creation, whichever is later; SOAs began recording accumulated severance pay benefits for their employees. The amount of their severance pay obligations is based on actuarial calculations. The periodic actuarial valuations of these liabilities may determine that adjustments are needed to the actuarial calculations when actual experience is different from that expected and/or because of changes in actuarial assumptions used. The resulting actuarial gains or losses are amortized over the expected average remaining service life of the related employee group.

An actuarial report was completed for the severance pay liability as of March 31, 2005. The report provides a formula to update the liability on an annual basis. The special operating agencies' actuarially determined net liability for accounting purposes as at March 31, 2009 was $5,693 (2008 - $5,379). Commencing in the 2006 fiscal year the actuarial loss of $367 is being amortized over the 15 year expected average remaining service life of the employee group.

Significant long-term actuarial assumptions used in the March 31, 2005 valuation, and in the determination of the March 31, 2009 present value of the accrued severance benefit obligation were:

Annual rate of return	
inflation component	2.50%
real rate of return	4.00%
	6.50%
Assumed salary increase rates	
annual productivity increase	0.75%
annual general salary increase	3.25%
	4.00%

15. Equity

	2009	2008
Contributed equity		
Fleet Vehicles Agency	$ 4,284	$ 4,284
Green Manitoba Eco Solutions	9	9
Industrial Technology Centre	62	62
Manitoba Text Book Bureau	550	550
Materials Distribution Agency	1,297	1,297
Office of the Fire Commissioner	11,279	11,279
Pineland Forest Nursery	356	356
	$17,837	$17,837

15. Equity (continued)

Retained earnings

Civil Legal Services	$ 732	$ 534
Companies Office	3,733	3,218
Crown Lands and Property Agency	(1,992)	(1,172)
Fleet Vehicles Agency	20,256	17,697
Food Development Centre	379	513
Green Manitoba Eco Solutions	55	(50)
Industrial Technology Centre	508	422
MERLIN	423	292
Manitoba Securities Commission	7,716	6,098
Manitoba Text Book Bureau	194	191
Materials Distribution Agency	2,839	2,671
Office of the Fire Commissioner	1,487	1,335
Organization and Staff Development	606	778
Pineland Forest Nursery	(193)	(199)
The Property Registry	12,667	12,761
The Public Trustee	1,574	1,516
Vital Statistics Agency	1,528	1,763
Financing Authority	18	11
	$52,530	$48,379

16. Reserve funds

a) The Public Trustee

The Public Trustee has allocated a reserve out of retained earnings to provide for short-term fluctuations in revenue due to changes in revenue patterns or extraordinary expenses. The balance of the reserve at March 31, 2009 is $500 (2008 - $500).

b) Manitoba Securities Commission

The Manitoba Securities Commission has allocated a reserve out of retained earnings to provide for extraordinary regulatory expenses and changes in market activity affecting revenue. The balance of the reserve at March 31, 2009 is $750 (2008 - $750).

c) Office of the Fire Commissioner

The Office of the Fire Commissioner received approval from Treasury Board in Fiscal 2004/05 to establish a special reserve fund for water bomber fire suppression activities. This fund is capped at an amount of $200 and will be utilized to cover the costs associated with water bomber deployment for non-forest fire incidents occurring on Rural Municipality property. As at March 31, 2009, the agency has allocated a total of $200 (2008 - $200) to this fund from its retained earnings account.

The agency has also established a special reserve fund for replacing and training a rescue dog. As at March 31, 2009, the balance of this reserve fund is $40 (2008 - $33).

17. Commitments

Commitments for SOAs with building lease agreements at March 31, 2009 total $11,646 (2008 - $12,950).

Other commitments entered into by SOAs are as follows:

Crown Lands And Property Agency	Vehicle and equipment leases	$ 19
Office of the Fire Commissioner	Vehicle leases	642
Pineland Forest Nursery	Vehicle leases	16
The Property Registry	Equipment lease agreements	445
Vital Statistics Agency	Electronic records system	723
		$ 1,845

Estimated minimum lease payments for each of the next five years are as follows:

2010	$2,352
2011	2,341
2012	2,333
2013	2,313
2014	1,751

18. Contingencies

The Manitoba Securities Commission has been named as defendant in one statement of claim, and The Property Registry has been named in five lawsuits. In addition, a potential claim has been filed against Organization and Staff Development for breach of an agreement. At the time of preparation of these financial statements, the outcomes of these claims were undeterminable. The cost of a future settlement, if any, will be reflected as an expense in the year of resolution.

19. Pension benefits

Employees of SOAs are eligible for pension benefits in accordance with the provisions of the Civil Service Superannuation Act (CSSA), administered by the Civil Service Superannuation Board (CSSB). The CSSA established a defined benefit plan to provide benefits to employees of the Manitoba Civil Service and to participating agencies of the Government, including the special operating agencies, through the Civil Service Superannuation Fund.

Prior to April 1, 2001, only the Industrial Technology Centre and the Food Development Centre matched their employee's current contributions to the CSSB and had no additional liability under the CSSA.

Effective March 31, 2001, pursuant to an agreement with the Province of Manitoba, the remaining SOAs transferred to the Province the pension liability for their employees. Commencing April 1, 2001, these SOAs were required to pay to the Province an amount equal to their employees' current pension contributions. The amount paid for 2009 was $2,039 (2008 - $2,001). Under this agreement, these SOAs have no further pension liability.

20. Estates and trusts under administration

The Public Trustee has statutory responsibility for administering clients' estates and trusts. The client assets under administration at March 31, 2009 total approximately $203,000 (2008 - $192,000). The trust activities of The Public Trustee are reported in separate audited financial statements for Estates and Trusts under Administration.

21. Public sector compensation

No employee of the Financing Authority received compensation of $50.0 or more during the year ended March 31, 2009.

Compensation information for each SOA is disclosed in the notes to their audited financial statements.

MAGNUS & BUFFIE

CHARTERED ACCOUNTANTS

AUDITORS' REPORT

To the Special Operating Agencies Financing Authority

We have audited the balance sheet of Civil Legal Services, an Agency of the Special Operating Agencies Financing Authority, Province of Manitoba as at March 31, 2009 and the statements of income, comprehensive income and retained earnings and cash flow for the year then ended. These financial statements are the responsibility of the Agency's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of the Agency as at March 31, 2009 and the results of its operations and cash flow for the year then ended in accordance with Canadian generally accepted accounting principles.

NOTES TO FINANCIAL STATEMENTS
(in thousands)
MARCH 31, 2009

1. NATURE OF ORGANIZATION

The role of Civil Legal Services (the "Agency") flows from the constitutional and statutory responsibilities of the Minister of Justice as the Chief Legal Advisor to government and the guardian of the public interest. Acting pursuant to government policy, the Agency is responsible for providing a full range of high quality legal services, on a cost recovery basis, to its clients, namely the Province of Manitoba, the province's agencies, boards and commissions and some Crown organizations.

Effective April 1, 1995, the Agency was designated as a Special Operating Agency pursuant to The Special Operating Agencies Financing Authority Act, Cap. s185, C.C.S.M. and operates under a charter approved by the Lieutenant Governor in Council.

The Agency is financed through the Special Operating Agencies Financing Authority (SOAFA). The Financing Authority has the mandate to hold and acquire assets required for and resulting from Agency operations. It finances the Agency through repayable loans and working capital advances. The financial framework provides increased management authority which, coupled with more rigorous planning and reporting requirements afforded by Special Operating status, assists the Agency to sustain the provision of high quality legal services to its clients.

A Management Agreement between the Financing Authority and the Minister of Justice assigns responsibility to the Agency to manage and account for the Agency related assets and operations on behalf of the Financing Authority.

The Agency continues to be part of Manitoba Justice under the general direction of the Deputy Minister and Minister.

The Agency remains bound by relevant legislation and regulations. It is also bound by administrative policy except where specific exemptions have been provided for in its charter in order to meet business objectives.

The Agency is economically dependent on the Province of Manitoba because it derives most of its revenue from the Province and all of its financing requirements through the Financing Authority.

2. CHANGE IN ACCOUNTING POLICIES

Effective April 1, 2008, the Agency adopted the following new handbook sections issued by the Canadian Institute of Chartered Accountants (CICA):

Section 1535 Capital Disclosures

Section 1535 establishes standards for disclosing information about an entity's capital and how it is managed. These standards require an entity to disclose its objectives, policies and processes for managing capital, a summary of quantitative data about what it manages as capital and whether it complied with any externally imposed capital requirements to which it is subject and, if not, the consequences of such non-compliance. (See disclosure in Note 3)

Section 3862 Financial Instruments - Disclosures

Section 3862 modifies the disclosure requirements for financial instruments that were included in Section 3861, Financial Instruments – Disclosure and Presentation. The new standards require an entity to provide disclosures in its financial statements that enable users to evaluate the significance of financial instruments on its financial position and performance, the nature and extent of the risks to which it is exposed during the period and at the balance sheet date, and how those risks are managed. (See disclosure in Note 11)

2. CHANGE IN ACCOUNTING POLICIES (continued)

Section 3863 Financial Instruments - Presentation

Section 3863 carries forward the presentation requirements of Section 3861, Financial Instruments – Disclosure and Presentation, unchanged.

The above noted new standards have no impact on the recognition, measurement or presentation of financial instruments in the Agency's year end financial statements.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Reporting: The financial statements have been prepared in accordance with Canadian generally accepted accounting principles. The significant accounting policies are summarized as follows:

Capital Assets: Capital assets are recorded at cost and are amortized over their estimated useful lives as follows:

Computer Equipment and Software	20% straight line (10% in year of acquisition)
Furniture and Fixtures	20% straight line (10% in year of acquisition)
Leasehold Improvements	20% straight line (10% in year of acquisition)

Revenue recognition

The percentage of completion method of accounting is used, whereby revenue is recognized proportionately with the degree of completion of the legal services provided.

Capital disclosures

The Agency's capital management policy is to maintain sufficient capital to meet its objectives through its retained earnings by managing transfers of surplus funds to the Province of Manitoba; meet short-term capital needs with working capital advances from the Province of Manitoba; and meet long-term capital needs through long-term debt with the Province of Manitoba. There were no changes in the Agency's approach to capital management during the period. The Agency's capital consists of retained earnings.

The Agency is not subject to externally imposed capital requirements.

Use of estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Financial instruments - recognition and measurement

Financial assets and liabilities are initially recorded at fair value. Measurement in subsequent periods depends on the financial instrument's classification. Financial instruments are classified into one of the following five categories: held for trading; available for sale; held to maturity; loans and receivables; and other financial liabilities. All financial instruments classified as held for trading or available for sale are subsequently measured at fair value with any change in fair value recorded in net earnings and other comprehensive income, respectively. All other financial instruments are subsequently measured at amortized cost.

The Agency has designated its financial instruments as follows:

Cash and short term deposits and long term investments are classified as financial assets held for trading and are measured at fair value with gains and losses recognized in net earnings. Due to the relatively short period to maturity of these financial assets, the carrying values approximate their fair values.

Accounts receivable are classified as loans and receivables. These financial assets are recorded at their amortized cost using the effective interest rate method.

Accounts payable and accrued liabilities and vacation payable are classified as other financial liabilities. These financial liabilities are recorded at their amortized cost using the effective interest rate method.

Gains and losses on financial instruments subsequently measured at amortized cost are recognized in the statement of earnings and retained earnings in the period the gain or loss occurs. Changes in fair value on financial instruments classified as held for trading are recognized in the statement of earnings and retained earnings for the current period. Changes in fair value on financial instruments classified as available for sale would be recorded in other comprehensive income until realized, at which time they recorded in the statement of earnings and retained earnings.

Fair value of financial instruments

The fair values of accounts receivable and accounts payable and accrued liabilities approximate their carrying values due to their short-term maturity.

4. FINANCING ARRANGEMENTS

The Special Operating Agencies Financing Authority has provided the Agency with an authorized line of working capital of $500 of which $nil was used at March 31, 2009.

5. LONG TERM INVESTMENTS

The Province of Manitoba accepted responsibility for the vacation entitlements earned by the employees of the Agency prior to its designation as SOA, and the severance pay benefits accumulated to March 31, 1998 for certain of the Agency's employees. Accordingly, the Agency recorded a receivable of $379 from the Province of Manitoba for these accumulated benefits. Effective March 31, 2009 the Province of Manitoba paid the receivable balances related to the funding for these liabilities and has placed the amount of $379 into a trust account bearing interest at 0.75% and maturing on March 30, 2010 to be held on the Agency's behalf until the cash is required to discharge the related liabilities. However, this is only likely to happen on the dissolution of the Agency. As such, this amount has been classified as a long term asset.

6. RECEIVABLE FROM PROVINCE OF MANITOBA

The receivable from the Province of Manitoba is for vacation entitlements earned by the employees of the Agency prior to creation of the Special Operating Agency and severance pay benefits prior to April 1, 1998. The balance is comprised of:

	2009	2008
Vacation Entitlements	$ -	$ 140
Severance Pay Benefits	-	239
	$ -	$ 379

The balance was paid by the Province of Manitoba on March 31, 2009. (See Note 5)

7. CAPITAL ASSETS

	Cost	Accumulated Amortization	Net Book Value 2009	Net Book Value 2008
Computer Equipment and Software	$ 140	$ 114	$ 26	$ 30
Furniture and Fixtures	259	217	42	36
Leasehold Improvements	64	54	10	-
	$ 463	$ 385	$ 78	$ 66

8. SEVERANCE LIABILITY

Effective April 1, 1998, the Agency began recording accumulated severance pay benefits for its employees. The amount of severance pay obligations is based on actuarial calculations. The periodic actuarial valuations of these liabilities may determine that adjustments are needed to the actuarial calculations when actual experience is different from that expected and/or because of changes in actuarial assumptions used. The resulting actuarial gains or losses are amortized over the expected average remaining service life of the related employee group.

An actuarial report was completed for the severance pay liability as of March 31, 2005. The report provides a formula to update the liability on an annual basis. In accordance with the formula, the Agency's actuarially determined net liability for accounting purposes as at March 31, 2009 was $649 (2008 - $583). Commencing in the 2006 fiscal year the actuarial loss of $87 is being amortized over the 15 year expected average remaining service life of the employee group.

Significant long-term actuarial assumptions used in the March 31, 2005 valuation, and in the determination of the March 31, 2009 present value of the accrued severance benefit obligation were:

Annual rate of return	
inflation compontent	2.50%
real rate of return	4.00%
	6.50%
Assumed salary increase rates	
annual productivity increase	0.75%
annual general salary increase	3.25%
	4.00%

9 PENSION BENEFITS

Employees of the Agency are eligible for pension benefits in accordance with the provisions of the Civil Service Superannuation Act (CSSA), administered by the Civil Service Superannuation Board (CSSB). The CSSA established a defined benefit plan to provide benefits to employees of the Manitoba Civil Service and to participating agencies of the Government, including the Agency, through the Civil Service Superannuation Fund.

Effective March 31, 2001, pursuant to an agreement with the Province of Manitoba, the Agency transferred to the Province the pension liability for its employees.

Commencing April 1, 2001, the Agency was required to pay to the Province an amount equal to its employees' current pension contributions. The amount paid for 2009 was $224 (2008 - $205). Under this agreement the Agency has no further pension liability.

10 LEASE COMMITMENTS

The Agency has not entered into a lease agreement with the Province of Manitoba for rental facilities at 405 Broadway. Occupancy charges for the year ending March 31, 2010 are estimated to be $240.

11. FINANCIAL INSTRUMENTS - RISK MANAGEMENT

In the normal course of operations the Agency is exposed to various financial risks. The financial risk management objectives and policies are as follows:

Credit risk

Credit risk is the risk that one party to a financial instrument fails to discharge an obligation and causes financial loss to another party. Financial instruments which potentially subject the Agency to credit risk consist principally of cash and short term deposits, accounts receivable and long term investments.

The maximum exposure of the Agency to credit risk at March 31, 2009 is:

Cash and short term deposits	$	827
Accounts receivable		656
Long term investments		379
	$	1,862

Cash and short term deposits and long term investments: The Agency is not exposed to significant credit risk as the cash and term deposits are primarily held by the Minister of Finance.

Accounts receivable: The Agency is not exposed to significant credit risk as the nature of the accounts receivable is with related entities and consists of a large client base and payment in full is typically collected when it is due. The Agency establishes an allowance for doubtful accounts that represents its estimate of potential credit losses. The allowance for doubtful accounts is based on management's estimates and assumptions regarding current market conditions, customer analysis and historical payment trends. These factors are considered when determining whether past due accounts are allowed for or written off. The balance in the allowance for doubtful accounts at March 31, 2009 was $nil (2008 - $nil)

11. FINANCIAL INSTRUMENTS - RISK MANAGEMENT (continued)

Liquidity risk

Liquidity risk is the risk that the Agency will not be able to meet its financial obligations as they come due.

The Agency manages liquidity risk by maintaining adequate cash balances and by review from the Province of Manitoba to ensure adequate funding will be received to meet the obligations.

Market risk

Market risk is the risk that changes in market prices, such as interest rates and foreign exchange rates, will affect the Agency's income or the fair values of its financial instruments. The significant market risk the Agency is exposed to is interest rate risk.

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The interest rate exposure relates to short term deposits.

The interest rate risk on short term deposits is considered to be low because of their short-term nature.

MAGNUS & BUFFIE
CHARTERED ACCOUNTANTS

AUDITORS' REPORT

To the Special Operating Agencies Financing Authority

We have audited the balance sheet of the Companies Office, an Agency of the Special Operating Agencies Financing Authority, Province of Manitoba as at March 31, 2009 and the statements of income, comprehensive income and retained earnings and cash flow for the year then ended. These financial statements are the responsibility of the Agency's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of the Agency as at March 31, 2009 and the results of its operations and cash flow for the year then ended in accordance with Canadian generally accepted accounting principles.

NOTES TO FINANCIAL STATEMENTS
(in thousands)
MARCH 31, 2009

1. NATURE OF ORGANIZATION

Effective April 1, 1996, the Lieutenant Governor in Council designated the Companies Office (the "Agency") as a special operating agency under The Special Operating Agencies Financing Authority Act (C.C.S.M. cS185) by Order in Council. Another Order also gave approval to the Special Operating Agencies Financing Authority (SOAFA) and the Minister of Consumer and Corporate Affairs, being the Minister responsible for the Agency (at that time), to enter into a management agreement with respect to the Agency. The management agreement assigns responsibility to the Agency to manage and account for the Agency related assets and operations on behalf of SOAFA. SOAFA has the mandate to hold and acquire assets required for and resulting from Agency operations. This financial framework enables the Agency to operate in a business like manner according to public policy expectations.

The Agency is part of Manitoba Consumer and Corporate Affairs Division in the Department of Finance under the general direction of the Minister of Finance, the Deputy Minister, Senior Assistant Deputy Minister and Assistant Deputy Minister who is also Chairperson of the Companies Office Advisory Board.

The Agency remains bound by relevant legislation and regulation. It is also bound by administrative policy except where specific exemptions have been provided for in its charter in order to meet business objectives.

2. CHANGE IN ACCOUNTING POLICIES

Effective April 1, 2008, the Agency adopted the following new handbook sections issued by the Canadian Institute of Chartered Accountants (CICA):

Section 1535 Capital Disclosures

Section 1535 establishes standards for disclosing information about an entity's capital and how it is managed. These standards require an entity to disclose its objectives, policies and processes for managing capital, a summary of quantitative data about what it manages as capital and whether it compiled with any externally imposed capital requirements to which it is subject and, if not, the consequences of such non-compliance. (See disclosure in Note 3)

Section 3862 Financial Instruments - Disclosures

Section 3862 modifies the disclosure requirements for financial instruments that were included in Section 3861, Financial Instruments – Disclosure and Presentation. The new standards require an entity to provide disclosures in its financial statements that enable users to evaluate the significance of financial instruments on its financial position and performance, the nature and extent of the risks to which it is exposed during the period and at the balance sheet date, and how those risks are managed. (See disclosure in Note 13)

Section 3863 Financial Instruments - Presentation

Section 3863 carries forward the presentation requirements of Section 3861, Financial Instruments – Disclosure and Presentation, unchanged.

The above noted new standards have no impact on the recognition, measurement or presentation of financial instruments in the Agency's year end financial statements.

NOTES TO FINANCIAL STATEMENTS
(in thousands)
MARCH 31, 2009

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Reporting:

The financial statements have been prepared in accordance with Canadian generally accepted accounting principles (GAAP).

Capital Assets

Capital assets are recorded at cost and amortized over their estimated useful lives as follows:

Computer Equipment and Software	20% straight line (10% in year of acquisition)
Office Equipment	20% straight line (10% in year of acquisition)
Furniture and Fixtures	20% straight line (10% in year of acquisition)
Leasehold Improvements	20% straight line (10% in year of acquisition)

Intangible Assets

Intangible assets are recorded at cost and amortized over their estimated useful lives as follows:

System Development	15 year straight line

Revenue Recognition

Revenue is recognized when the service is substantially complete.

Deferred Development Costs

Deferred development costs relate to direct labour and direct external costs incurred on the development of a new systems software. In the event management determines that the project is no longer viable or economically feasible, all deferred costs relating to the project will be expensed. If management determines that expected future net cash flows from the project do not exceed the unamortized deferred costs relating to the project, the excess amount will be expensed. Management assesses the feasibility and expected cash flows relating to deferred development costs on an annual basis.

Amortization of deferred development costs will commence in the period when the new systems software commences commercial use.

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Capital disclosures

The Agency's capital consists of retained earnings. The Agency's capital management policy is to maintain sufficient capital to meet its objectives through its retained earnings by managing transfers of surplus funds to the Province of Manitoba; meet short-term capital needs with working capital advances from the Province of Manitoba; and meet long-term capital needs through long-term debt with the Province of Manitoba. There were no changes in the Agency's approach to capital management during the period.

The Agency is not subject to externally imposed capital requirements.

Financial Instruments - Recognition and Measurement

Financial assets and liabilities are initially recorded at fair value. Measurement in subsequent periods depends on the financial instrument's classification. Financial instruments are classified into one of the following five categories: held for trading; available for sale; held to maturity; loans and receivables; and other financial liabilities. All financial instruments classified as held for trading or available for sale are subsequently measured at fair value with any change in fair value recorded in net earnings and other comprehensive income, respectively. All other financial instruments are subsequently measured at amortized cost.

The Agency has designated its financial instruments as follows:

Cash and short term deposits and long term investment are classified as financial assets held for trading and are measured at fair value with gains and losses recognized in net earnings. Due to the relatively short period to maturity of these financial assets, the carrying values approximate their fair values.

Accounts receivable are classified as loans and receivables. These financial assets are recorded at their amortized cost using the effective interest rate and method.

Accounts payable and accrued and accrued vacation entitlements are classified as other financial liabilities. These financial liabilities are recorded at their amortized cost using the effective interest rate method.

Gains and losses on financial instruments subsequently measured at amortized cost are recognized in the statement of earnings and retained earnings in the period the gain or loss occurs. Changes in fair value on financial instruments classified as held for trading are recognized in the statement of earnings and retained earnings for the current period. Changes in fair value on financial instruments classified as available for sale would be recorded in other comprehensive income until realized, at which time they are recorded in the statement of earnings and retained earnings.

Fair Value of Financial Instruments

The fair value of accounts receivable, accounts payable and accrued and accrued vacation entitlements approximates their carrying values due to their short-term maturity.

4. FINANCING ARRANGEMENTS

Working capital advances and long-term financing for significant capital purchases are provided to the Agency through the Special Operating Agencies Financing Authority. The Financing Authority has approved a $100 limit in working capital advances. The Agency did not access working capital advances during the year.

5. ACCOUNTS RECEIVABLE

	2009	2008
Trade	$ 28	$ 76
Accrued Revenue	147	123
	$ 175	$ 199

6. LONG TERM INVESTMENT

The Province of Manitoba accepted responsibility for the vacation entitlements earned by the employees of the Agency prior to its designation as SOA, and the severance pay benefits accumulated to March 31, 1998 for certain of the Agency's employees. Accordingly, the Agency recorded a receivable of $218 from the Province of Manitoba for these accumulated benefits. Effective March 31, 2009 the Province of Manitoba paid the receivable balances related to the funding for these liabilities and has placed the amount of $218 into a trust account bearing interest at 0.75% and maturing on March 30, 2010 to be held on the Agency's behalf until the cash is required to discharge the related liabilities. However, this is only likely to happen on the dissolution of the Agency. As such, this amount has been classified as a long term asset.

7. RECEIVABLE FROM PROVINCE OF MANITOBA

The receivable from the Province of Manitoba is for vacation entitlements earned by the employees of the Agency prior to creation of the Special Operating Agency and severance pay benefits prior to April 1, 1998. The balance is comprised of:

	2009	2008
Vacation Entitlements	$ -	$ 92
Severance Pay Benefits	-	126
	$ -	$ 218

The receivable was paid by the Province of Manitoba on March 31, 2009.

8. CAPITAL ASSETS

	Cost	Accumulated Amortization	Net Book Value 2009	Net Book Value 2008
Computer Equipment and Software	$ 103	$ 67	$ 36	$ 21
Office Equipment	16	16	-	-
Furniture and Fixtures	132	108	24	17
Leasehold Improvements	40	32	8	15
	$ 291	$ 223	$ 68	$ 53

Amortization charges for the year amounted to $24 (2008 - $27) of which $5 (2008 - $6) was expensed in Manitoba Business Links and $4 (2008 - $4) was expensed in Notaries on the schedule of operating expenses.

9. DEFERRED DEVELOPMENT COSTS

	Cost	Accumulated Amortization	Net Book Value 2009	Net Book Value 2008
New system development	$ 59	-	$ 59	-

During the year, development costs were capitalized in the amount of $59 (2009 - $nil).

10. SEVERANCE PAY LIABILITY

Effective April 1, 1998, the Agency began recording accumulated severance pay benefits for its employees. The amount of severance pay obligations is based on actuarial calculations. The periodic actuarial valuations of these liabilities may determine that adjustments are needed to the actuarial calculations when actual experience is different from that expected and/or because of changes in actuarial assumptions used. The resulting actuarial gains or losses are amortized over the expected average remaining service life of the related employee group.

An actuarial report was completed for the severance pay liability as of March 31, 2005. The report provides a formula to update the liability on an annual basis. In accordance with the formula, the Agency's actuarially determined net liability for accounting purposes as at March 31, 2009 was $244 (2008 - $218). Commencing in the 2006 fiscal year the actuarial loss of $42 is being amortized over the 15 year expected average remaining service life of the employee group.

Significant long-term actuarial assumptions used in the March 31, 2005 valuation, and in the determination of the March 31, 2009 present value of the accrued severance benefit obligation were:

Annual rate of return	
inflation component	2.50%
real rate of return	4.00%
	6.50%
Assumed salary increase rates	
annual productivity increase	0.75%
annual general salary increase	3.25%
	4.00%

11. PENSION BENEFITS

Employees of the Agency are eligible for pension benefits in accordance with the provisions of the Civil Service Superannuation Act (CSSA), administered by the Civil Service Superannuation Board (CSSB). The CSSA established a defined benefit plan to provide benefits to employees of the Manitoba Civil Service and to participating agencies of the Government, including the Agency, through the Civil Service Superannuation Fund (CSSF).

Effective March 31, 2001, pursuant to an agreement with the Province of Manitoba, the Agency transferred to the Province the pension liability for its employees. Commencing April 1, 2001, the Agency was required to pay to the Province an amount equal to its employees' current pension contributions.

The amount paid for 2009 was $78 (2008 - $76). Under this agreement, the Agency has no further pension liability.

12. LEASE COMMITMENTS

The Agency has not entered into a lease agreement with the Province of Manitoba for rental facilities at 405 Broadway. Occupancy charges for the year ending March 31, 2010 are estimated to be $144 (2009 - $140).

13. FINANCIAL INSTRUMENTS - RISK MANAGEMENT

In the normal course of operations the Agency is exposed to various financial risks. The financial risk management objectives and policies are as follows:

Credit risk

Credit risk is the risk that one party to a financial instrument fails to discharge an obligation and causes financial loss to another party. Financial instruments which potentially subject the Agency to credit risk consist principally of cash and short term deposits, accounts receivable and long term investment.

The maximum exposure of the Agency to credit risk at March 31, 2009 is:

Cash and short term deposits	$	3,880
Accounts receivable		175
Long term investment		218
	$	4,273

Cash and short term deposits and long term investment: The Agency is not exposed to significant credit risk as the cash and term deposits are primarily held by the Minister of Finance.

Accounts receivable: The Agency is not exposed to significant credit risk as the nature of the accounts receivable is with related entities and consists of a large client base and payment in full is typically collected when it is due. The Agency establishes an allowance for doubtful accounts that represents its estimate of potential credit losses. The allowance for doubtful accounts is based on management's estimates and assumptions regarding current market conditions, customer analysis and historical payment trends. These factors are considered when determining whether past due accounts are allowed for or written off. The balance in the allowance for doubtful accounts at March 31, 2009 was $nil (2008 - $nil)

Liquidity risk

Liquidity risk is the risk that the Agency will not be able to meet its financial obligations as they come due.

The Agency manages liquidity risk by maintaining adequate cash balances and by review from the Province of Manitoba to ensure adequate funding will be received to meet the obligations.

Market risk

Market risk is the risk that changes in market prices, such as interest rates and foreign exchange rates, will affect the Agency's income or the fair values of its financial instruments. The significant market risks the Agency is exposed to are interest rate risk.

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The interest rate exposure relates to funds on deposit.

The interest rate risk on short term deposits are considered to be low because of their short-term nature.

AUDITORS' REPORT

To the Special Operating Agencies Financing Authority

We have audited the balance sheet of Crown Lands and Property Agency, An Agency of the Special Operating Agencies Financing Authority Province of Manitoba, as at March 31, 2009 and the statements of loss and deficit and cash flows for the year then ended. These financial statements are the responsibility of the Agency's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of the Agency as at March 31, 2009 and the results of its operations and its cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

1. NATURE OF ORGANIZATION

Effective April 1, 2006, Crown Lands and Property Agency (the "Agency") was designated as a Special Operating Agency by regulation under The Special Operating Agencies Financing Authority Act made by the Lieutenant Governor in Council.

The Agency has full authority for all Crown land sales, leases and permits, as well as land appraisal, acquisition, expropriation and other services for the provincial government. The Agency's mission is to provide quality Crown land information and services to the public and government departments that are open, fair and transparent.

The newly designated Agency consolidates the services previously provided by the Lands Acquisition Branch, Lands Branch, Agricultural Crown Land Management and Parks Districts Records departments.

The Agency is financed through the Special Operating Agencies Financing Authority (SOAFA). The Financing Authority has the mandate to hold and acquire assets required for and resulting from Agency operations. It finances the Agency through repayable loans and working capital advances. The financial framework enables the Agency to operate in a business-like manner according to public policy expectations.

A Management Agreement between the Financing Authority and the Minister of Transportation and Government Services assigns responsibility to the Agency to manage and account for the Agency related assets and operations on behalf of the Financing Authority.

The Agency forms part of the Supply and Services Division of Manitoba Infrastructure and Transportation under the general direction of the Chief Operating Officer and the Assistant Deputy Minister of the Supply and Services Division, and ultimately the policy direction of the Associate Deputy Minister and Minister.

The Agency remains bound by relevant legislation and regulations.

The Agency is economically dependent upon the Province of Manitoba, as it derives a significant portion of its revenue from the Province. The transactions with the Province of Manitoba are recorded at the exchange amount, which is the amount agreed upon by both parties.

2. CHANGE IN ACCOUNTING POLICY

Effective April 1, 2008, the Agency adopted the following new handbook sections issued by the Canadian Institute of Chartered Accountants (CICA):

Section 1535 Capital Disclosures

Section 1535 establishes standards for disclosing information about an entity's capital and how it is managed. These standards require an entity to disclose its objectives, policies and processes for managing capital, a summary of quantitative data about what it manages as capital and whether it complied with any externally imposed capital requirements to which it is subject and, if not, the consequences of such non-compliance.

Section 3862 Financial Instruments – Disclosures

Section 3862 modifies the disclosure requirements for financial instruments that were included in Section 3861, Financial Instruments – Disclosure and Presentation. The new standards require an entity to provide disclosures in its financial statements that enable users to evaluate the significance of financial instruments on its financial position and performance, the nature and extent of the risks to which it is exposed during the period and at the balance sheet date, and how those risks are managed.

Section 3863 Financial Instruments – Presentation

Section 3863 carries forward the presentation requirements of Section 3861, Financial Instruments – Disclosure and Presentation, unchanged.

The above noted new standards have no impact on the recognition, measurement or presentation of financial instruments in the Agency's year end financial statements.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of reporting

The financial statements of the Agency have been prepared in accordance with Canadian generally accepted accounting principles.

Use of estimates

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingencies at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates.

CROWN LANDS AND PROPERTY AGENCY

(An Agency of the Special Operating Agencies Financing Authority Province of Manitoba)

Notes to Financial Statements

(In Thousands)

Year Ended March 31, 2009

---

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES *(continued)*

Capital disclosure

The Agency's capital consists of working capital advances from the Province of Manitoba and deficit.

The Agency's capital management policy is to manage its capital to meet its objectives, to meet short-term capital needs with working capital advances from the Province of Manitoba; and meet long-term capital needs through long-term debt with the Province of Manitoba. There were no changes in the Agency's approach to capital management during the period.

The Agency is not subject to externally imposed capital requirements.

Work in progress

Land Acquisition Branch- all costs incurred for a project are initially charged to work in progress and matched to billings using the percentage of completion method.

Capital assets

Equipment transferred to the Agency on April 1, 2006 assumed a cost equal to its net book value at March 31, 2006.

Capital assets are stated at cost less accumulated amortization. Capital assets are amortized over their estimated useful lives at the following rates and methods:

Equipment	5 years	straight-line method
Computer equipment	5 years	straight-line method
Computer software	5 years	straight-line method
Furniture and fixtures	5 years	straight-line method

Revenue recognition

Land Acquisition Branch: the percentage of completion method of accounting is used, whereby revenue is recognized proportionately with the degree of contracted work completed.

Other branch areas: appropriation funding in Manitoba Agriculture, Food and Rural Affairs (MAFRI) and Manitoba Conservation is continuing in order to pay the Agency the costs it incurs for providing services to the public (on behalf of MAFRI and Manitoba Conservation). The short-term chargeback model provides for the Agency to bill for its costs but not in excess of the approved budgets for MAFRI and Manitoba Conservation. As the Agency costs are expected to exceed MAFRI and Manitoba Conservation's appropriations for the Agency's services, the Agency may not fully recover its costs of delivering the services on behalf of MAFRI and Manitoba Conservation.

4. FINANCIAL INSTRUMENTS

Financial assets and liabilities are initially recorded at fair value. Measurement in subsequent periods depends on the financial instrument's classification. Financial instruments are classified into one of the following five categories: held for trading; available for sale; held to maturity; loans and receivables; and other financial liabilities. All financial instruments classified as held for trading or available for sale are subsequently measured at fair value with any change in fair value recorded in net earnings and other comprehensive income, respectively. All other financial instruments are subsequently measured at amortized cost.

The financial assets and liabilities of the Agency are classified and measured as follows:

Financial Asset/Liability	Category	Subsequent Measurement
Cash, net of working capital advance	Held for trading	Fair value
Accounts receivable	Loans and receivables	Amortized cost
Long term investment - Province of Manitoba	Loans and receivables	Amortized cost
Assets held in trust	Loans and receivables	Amortized cost
Accounts payable and accrued liabilities	Other financial liabilities	Amortized cost
Client held funds	Other financial liabilities	Amortized cost
Severance pay liability	Other financial liabilities	Amortized cost
Trust fund liability	Other financial liabilities	Amortized cost

Amortized cost is determined using the effective interest rate method.

Gains and losses on financial instruments subsequently measured at amortized cost are recognized in the statement of earnings and retained earnings in the period the gain or loss occurs. Changes in fair value on financial instruments classified as held for trading are recognized in the statement of earnings and retained earnings for the current period. Changes in fair value on financial instruments classified as available for sale would be recorded in other comprehensive income until realized, at which time they recorded in the statement of earnings and retained earnings.

Fair value of financial instruments

The fair values of accounts receivable, accounts payable and accrued liabilities, assets held in trust, client held funds and trust fund liability approximate their carrying values due to their short-term maturity.

The fair value of the long term investment - Province of Manitoba and its related severance pay liability is determined using the effective interest rate method.

(continues)

4. FINANCIAL INSTRUMENTS *(continued)*

Financial risk management - overview

The Agency has exposure to the following risks from its use of financial instruments: credit risk; liquidity risk; market risk; interest risk; and foreign currency risk.

Credit risk

Credit risk is the risk that one party to a financial instrument fails to discharge an obligation and causes financial loss to another party. Financial instruments which potentially subject the Agency to credit risk consist principally of cash and term deposits and accounts receivable.

The maximum exposure of the Agency to credit risk at March 31, 2009 is:

Accounts receivable	$ 666
Long term investment - Province of Manitoba	670
	$ 1,336

Cash and funds on deposits: The Agency is not exposed to significant credit risk as the cash and term deposits are primarily held by the Minister of Finance.

Accounts receivable: The Agency is not exposed to significant credit risk as the customers are mostly government entities and payment in full is typically collected when it is due. The Agency establishes an allowance for doubtful accounts that represents its estimate of potential credit losses. The allowance for doubtful accounts is based on management's estimates and assumptions regarding current market conditions, customer analysis and historical payment trends. These factors are considered when determining whether past due accounts are allowed for or written off.

Long term investment - Province of Manitoba: The Agency is not exposed to significant credit risk as the trust account is being held on the Agency's behalf by the Province of Manitoba.

The change in the allowance for doubtful accounts during the year was as follows:

Balance, beginning of the year	$ 56
Provision for receivable impairment	2
Balance, end of the year	$ 58

Liquidity risk

Liquidity risk is the risk that the Agency will not be able to meet its financial obligations as they come due.

The Agency manages liquidity risk by maintaining adequate cash balances and by review from the Province of Manitoba to ensure adequate funding will be received to meet the obligations.

(continues)

4. FINANCIAL INSTRUMENTS *(continued)*

Market risk

Market risk is the risk that changes in market prices, such as interest rates and foreign exchange rates, will affect the Agency's income or the fair values of its financial instruments. The significant market risks the Agency is exposed to are interest rate risk and foreign currency risk.

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The interest rate exposure relates to funds on deposit and long term debt.

The interest rate risk on funds on deposit is considered to be low because of their short-term nature. The Agency has no long term debt.

Foreign currency risk

Foreign currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Agency is not exposed to significant foreign currency risk as it does not have any financial instruments denominated in foreign currency.

5. ACCOUNTS RECEIVABLE

The balance is comprised of the following amounts:

	2009	2008
Trade accounts receivable	**$ 724**	$ 994
Allowance for doubtful accounts	**(58)**	(56)
	$ 666	$ 938

6. CAPITAL ASSETS

	2009		2008	
	Cost	**Accumulated amortization**	Cost	Accumulated amortization
Equipment	**$ 52**	**$ 25**	$ 52	$ 14
Computer equipment	**192**	**88**	148	54
Computer software	**107**	**47**	93	27
Furniture and fixtures	**12**	**7**	12	5
	$ 363	**$ 167**	$ 305	$ 100
Net book value	**$ 196**		$ 205	

7. WORKING CAPITAL ADVANCE

The Agency has an authorized line of working capital from the Province of Manitoba of $4,000 of which $2,600 was used as at March 31, 2009 (2008 - $nil was used).

8. ACCOUNTS PAYABLE AND ACCRUED LIABILITIES

	2009	2008
The balance is composed of the following amounts:		
Trade accounts payable	$ **147**	$ 39
Accrued wages, vacation pay and banked time	**317**	256
Goods and services tax	**3**	5
	$ **467**	$ 300

9. SEVERANCE PAY LIABILITY

The Agency records accumulated severance pay benefits for its employees. Severance pay is determined by multiplying years of service by the weekly salary, at date of retirement provided that the employee reaches nine years of service and retires from the Agency. Severance pay for service greater than 15 years to a maximum of 35 years is increased by two weeks for every five years of service. The estimate is based upon the method of calculation set by the Province of Manitoba.

The Province has accepted responsibility for the severance benefits accumulated by the employees of Lands Branch, Agricultural Crown Land Management and Parks Districts Records departments, transferred to the Agency March 31, 2006, to March 31, 2006. Additionally, the Province has accepted responsibility for the severance benefits accumulated by the employees of Lands Acquisition Branch to March 31, 1998. That responsibility is now reflected by the payment to the Agency by the Province of $670 on March 31, 2009, with the funds held on the Agency's behalf in an interest bearing trust account until it is required to discharge the related liability.

10. DEFICIT

The Special Operating Agencies Financing Authority and the Manitoba Provincial Government entered into a Transfer Agreement respecting the transfer, from the Provincial Government to the Financing Authority, of the net assets required for the continuing operations of the Agency. As at April 1, 2006, the date of transfer, the liabilities assumed exceeded the value of the assets in the amount of $10. This amount was recorded as the deficit at April 1, 2006.

11. PUBLIC SECTOR COMPENSATION DISCLOSURE

It is a requirement of the Public Sector Compensation Disclosure Act that annual public disclosure be made of individual compensation exceeding $50 annually to any officer or employee of the Province of Manitoba. The following employees received compensation in excess of $50:

		2009	2008
Bernat, Leonard	Appraisal and Acquisition Officer	**$ 57**	$ 56
Charles, Jack	Administration Officer	**59**	-
Calder, Dean	Property Appraiser	**55**	-
Dzogan Ken	Manager, Land Acquisition Services	**60**	-
Kent, Rodney	Manager, Property Sales	**58**	54
Krakowka, Larry	Land Administrator	**59**	60
Kubasiewicz, Michal	Senior Manager	**97**	93
Le Neal, Normand	Financial Officer	**63**	62
Lucky, Rob	Property Appraiser	**57**	59
McLeod, Jerry	Property Appraiser	**-**	65
Millar, Scott	Property Appraiser	**76**	74
Wallcraft, Brian	Information Technologist	**53**	-
Penner, Mary Ann	Appraisal and Acquisition Officer	**57**	56
Pishak, Calvin	Information Technologist	**67**	64
Sheridan, Bryan	Administration Officer	**61**	59
Sonley, Judy	Appraisal and Acquisition Officer	**57**	56
Turner, Cynthia	Accounting Clerk	**-**	57

12. LEASE COMMITMENTS

The Agency's approved 2009/10 Business Plan calls for $282, to be paid in quarterly instalments during 2009/10, for the rental of the facilities located at 25 Tupper Street North, Portage La Prairie, Manitoba. There is no premise lease agreement in place. Occupancy charges for each fiscal year are established annually by the Province of Manitoba.

The Agency has entered into various leases for vehicles and office equipment. The expected payments are as follows:

2010	$ 13
2011	3
2012	3

AUDITORS' REPORT

To the Special Operating Agencies Financing Authority of Fleet Vehicles Agency

We have audited the balance sheet of Fleet Vehicles Agency, An Agency of the Special Operating Agencies Financing Authority Province of Manitoba, as at March 31, 2009 and the statements of earnings and retained earnings and cash flows for the year then ended. These financial statements are the responsibility of the Agency's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of the Agency as at March 31, 2009 and the results of its operations and its cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

The Exchange

chartered accountants LLP

Winnipeg, Manitoba
May 19, 2009

Management's Responsibility for Financial Reporting

The Fleet Vehicles Agency's (the Agency) management is responsible for preparing the financial statements and other financial information in the Annual Report. This responsibility includes maintaining the integrity and objectivity of financial data and the presentation of the Agency's financial position and results of operations and its cash flows in accordance with Canadian generally accepted accounting principles. In management's opinion, the financial statements have been properly prepared within reasonable limits of materiality, incorporating management's best judgement regarding all necessary estimates and all other data available through May 19, 2009.

Management maintains internal controls to properly safeguard the Agency's assets. These controls also provide reasonable assurance that the books and records from which financial statements are derived accurately reflect all transactions, and that established policies and procedures are followed.

The Agency's financial statements have been audited by The Exchange chartered accountants LLP, independent external auditors. The auditors' responsibility is to express an independent opinion on whether the financial statements of the Agency are presented fairly, in all material respects, in accordance with Canadian generally accepted accounting principles. The Auditors' Report outlines the scope of their audit examination and provides their audit opinion.

On behalf of the Agency's management,

Al Franchuk Chief Operating Officer	Albert Ogonoski Manager, Finance

Winnipeg, Manitoba

FLEET VEHICLES AGENCY

(An Agency of the Special Operating Agencies Financing Authority Province of Manitoba)

Notes to Financial Statements

(In Thousands)

Year Ended March 31, 2009

1. NATURE OF ORGANIZATION

In 1934, Fleet Vehicles was created as a branch of the Manitoba Provincial Government to provide a centralized fleet management program. It was established to achieve economies of scale and to lower overall fleet costs to government.

Effective April 1, 1992, the Fleet Vehicles branch was designated as a Special Operating Agency under The Special Operating Agencies Financing Authority Act, Cap. S185, C.C.S.M., and operates under a charter approved by the Lieutenant Governor in Council.

Effective April 1, 2003, the Radio Services Program within the Desktop, Telecommunications and Network Services Branch of the then Department of Transportation and Government Services was transferred to the Agency.

The Agency is financed through the Special Operating Agencies Financing Authority (SOAFA). SOAFA has the mandate to hold and acquire assets required for and resulting from Agency operations. It finances the Agency through repayable loans and working capital advances. This financial framework enables the Agency to operate in a business-like manner according to public policy expectations.

A 1992 Management Agreement between SOAFA and the then Minister of Government Services assigns responsibility to the Agency to manage and account for the Agency-related assets and operations on behalf of SOAFA.

Fleet Vehicles Agency continues to be part of the Department of Infrastructure and Transportation under the general direction of the Assistant Deputy Minister, Supply and Services Division, and ultimately the policy direction of the Associate Deputy Minister, the Deputy Minister, and the Minister, of Infrastructure and Transportation.

Fleet Vehicles Agency remains bound by relevant legislation and regulations. It is also bound by administrative policy except where specific exemptions have been provided in its charter in order to meet business objectives.

Fleet Vehicles Agency is economically dependent on The Government of Manitoba, as it derives most of its revenue and all of its capital financing requirements from the Province.

Effective April 1, 2009, Fleet Vehicles Agency and the Mechanical Equipment Services Branch of the Department of Infrastructure and Transportation were amalgamated into a new Special Operating Agency named Vehicle and Equipment Management Agency (VEMA). The asset and liability balances of Fleet Vehicles Agency as of March 31, 2009, have been transferred at their carrying values to the books and records of VEMA at the start of business on April 1, 2009, with the difference between total assets and total liabilities credited to contributed equity. Accordingly, Fleet Vehicles Agency effectively ceased operations at the close of business on March 31, 2009, and has since been dissolved.

2. CHANGE IN ACCOUNTING POLICIES

Effective April 1, 2008, the Agency adopted the following new handbook sections issued by the Canadian Institute of Chartered Accountants (CICA):

Section 1535, Capital Disclosures

Section 1535 establishes standards for disclosing information about an entity's capital and how it is managed. These standards require an entity to disclose its objectives, policies and processes for managing capital, a summary of quantitative data about what it manages as capital, and whether it complied with any externally imposed capital requirements to which it is subject and, if not, the consequences of such non-compliance.

Section 3862, Financial Instruments - Disclosures

Section 3862 modifies the disclosure requirements for financial instruments that were included in Section 3861, Financial Instruments - Disclosure and Presentation. The new standards require an entity to provide disclosures in its financial statements that enable users to evaluate the significance of financial instruments on its financial position and performance, the nature and extent of the risks to which it is exposed during the period and at the balance sheet date, and how those risks are managed.

Section 3863, Financial Instruments - Presentation

Section 3863 carries forward the presentation requirements of Section 3861, Financial Instruments - Disclosure and Presentation, unchanged.

The three standards listed above have no impact on the recognition, measurement or presentation of financial instruments in the Agency's financial statements for the year ended March 31, 2009.

Section 3031, Inventories

Section 3031 replaces Section 3030, Inventories. It provides more guidance on the measurement and disclosure requirements for inventories. The adoption of Section 3031 did not have an impact on the recognition, measurement or presentation of inventory in the Agency's financial statements for the year ended March 31, 2009.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of reporting

The financial statements of the Agency have been prepared in accordance with Canadian generally accepted accounting principles.

(continues)

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES *(continued)*

Use of estimates

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingencies at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates.

Cash and equivalents

Cash and cash equivalents include cash on hand and balances with banks, net of bank overdrafts and short term investments with original maturities of six months or less. Bank borrowings are considered to be financing activities.

Inventory

Inventories are valued at the lower of cost and market value. Cost is determined on a weighted average basis.

Capital assets

Rates and bases of amortization applied to write off the cost less estimated salvage value of capital assets over their estimated lives are as follows:

Vehicles	30%	declining balance method
Vehicles and equipment (signed lease agreement)		straight-line over term of lease
Office and shop equipment	20%	declining balance method
Computer software and equipment	20%	straight-line method
Leasehold improvements	10%	straight-line method

Pension benefits

Employees of Fleet Vehicles Agency are eligible for pension benefits in accordance with the provisions of the Civil Service Superannuation Act (CSSA), administered by the Civil Service Superannuation Board. The CSSA established a defined benefit plan to provide benefits to employees of the Manitoba Civil Service and to participating agencies of the provincial government, including the Agency, through the Civil Service Superannuation Fund.

Effective March 31, 2001, pursuant to an agreement with the Province of Manitoba, the Agency transferred the pension liability for its employees to the Province. Commencing April 1, 2001, the Agency was required to pay to the Province an amount equal to its employees' current pension contributions. The amount paid for the year ended March 31, 2009, was $108 (2008: $115). Under this agreement, the Agency has no further pension liability.

(continues)

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES *(continued)*

Revenue recognition

Fixed rate lease revenue is recognized on a straight-line basis over the term of the lease. Variable rate lease revenue is recognized monthly based on equipment usage. Service revenue is recognized when the services have been performed.

Capital disclosures

The Agency's capital consists of retained earnings provided by operations and contributed equity.

The Agency's capital management policy is to maintain sufficient capital in retained earnings to meet its objectives, while transferring surplus funds to the Province of Manitoba; meet short term capital needs through working capital advances from the Province of Manitoba; and meet long term capital needs through long term debt with the Province of Manitoba. There were no changes in the Agency's approach to capital management during the 2008/09 year.

The Agency is not subject to externally imposed capital requirements.

4. FINANCIAL INSTRUMENTS

Financial assets and liabilities are initially recorded at fair value. Measurement in subsequent periods depends on a financial instrument's classification.

Financial instruments are classified into one of the following five categories: held for trading; available for sale; held to maturity; loans and receivables; and other financial liabilities. All financial instruments classified as held for trading or available for sale are subsequently measured at fair value, with any change in fair value recorded in net earnings and other comprehensive income, respectively. All other financial instruments are subsequently measured at amortized cost.

The financial assets and liabilities of the Agency are classified and measured as follows:

Financial asset / liability	Category	Subsequent measurement
Cash and cash equivalents, net of working capital payable	Held for trading	Fair value
Receivables	Loans and receivables	Amortized cost
Severance pay benefits cash in trust	Loans and receivables	Amortized cost
Accounts payable and accrued liabilities	Other financial liabilities	Amortized cost
Long term debt	Other financial liabilities	Amortized cost
Severance pay liability	Other financial liabilities	Amortized cost

Amortized cost is determined using the effective interest rate method.

Gains and losses on financial instruments subsequently measured at amortized cost are recognized in the statement of earnings and retained earnings in the period the gain or loss occurs. Changes in fair value on financial instruments classified as held for trading are recognized in the statement of earnings and retained earnings for the current period. Changes in fair value on financial instruments classified as available for sale would be recorded in other comprehensive income until realized, at which time they would be recorded in the statement of earnings and retained earnings.

Fair value of financial instruments

The fair value of receivables, accounts payable and accrued liabilities approximates their carrying values due to their relatively short term maturity.

The fair value of severance pay benefits cash in trust and its related severance pay liability is determined using the effective interest rate method.

(continues)

4. FINANCIAL INSTRUMENTS *(continued)*

The fair value of the long term debt is determined using the present value of future cash flows under current financing agreements, based on the Agency's current estimated borrowing rate for loans with similar terms and conditions. The fair value of this long term debt is $31,769 as of March 31, 2009 (2008: $23,791).

Financial risk management

The Agency has exposure to the following risks from its use of financial instruments: credit risk; liquidity risk; market risk; interest risk; and foreign currency risk.

Credit risk

Credit risk is the risk that one party to a financial instrument fails to discharge an obligation and causes financial loss to another party. Financial instruments which potentially subject the Agency to credit risk consist principally of cash, cash equivalents and receivables.

The maximum exposure of the Agency to credit risk as of March 31, 2009, is:

Receivables	$ 3,658
Severance pay benefits cash in trust	270
	$ 3,928

Receivables: The Agency is not exposed to significant credit risk since the receivables are with departments, agencies and crown corporations within the Manitoba provincial government, or are with organizations within the broader public sector that are funded in part by the provincial or federal governments. An allowance for doubtful accounts was not recorded as of March 31, 2009.

Severance pay benefits cash in trust: The Agency is not exposed to significant credit risk as the cash is held in trust with the Province of Manitoba.

Liquidity risk

Liquidity risk is the risk that the Agency will not be able to meet its financial obligations as they come due.

The Agency manages liquidity risk by balancing its cash flow requirements through its available working capital payable limit and its long term debt draw downs from Loan Act Authority. Regular determinations of the Agency's working capital payable limit and long term debt requirements are reviewed by the Province of Manitoba to ensure that adequate funding is available as required to enable the Agency to meet its obligations as they come due.

Market risk

Market risk is the risk that changes in market prices, such as interest rates and foreign exchange rates, will affect the Agency's net earnings or the fair values of its financial instruments. The significant market risks the Agency is exposed to are interest rate risk and foreign currency risk.

(continues)

4. FINANCIAL INSTRUMENTS *(continued)*

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The interest rate exposure relates to cash, cash equivalents and long term debt.

The interest rate risk on cash and cash equivalents is considered to be low because of their short term nature.

The Agency manages its interest rate risk on long term debt through the exclusive use of fixed rate terms for its long term debt. A change of 100 basis points in the interest rates would have increased or decreased its fair value by $1,134 as of March 31, 2009 (2008: $787).

Foreign currency risk

Foreign currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Agency is not exposed to significant foreign currency risk as it does not have any financial instruments denominated in foreign currency.

5. RECEIVABLES

	2009	2008
Trade	**$ 1,889**	$ 1,842
Accrued trade	**1,274**	1,167
Insurance rebate receivable	**495**	455
	$ 3,658	$ 3,464

6. CAPITAL ASSETS

	2009		2008	
	Cost	**Accumulated amortization**	Cost	Accumulated amortization
Vehicles and equipment for lease	**$ 106,609**	**$ 47,021**	$ 90,631	$ 42,897
Office and shop equipment	**1,491**	**1,171**	1,414	1,095
Leasehold improvements	**707**	**570**	707	527
	$ 108,807	**$ 48,762**	$ 92,752	$ 44,519
Net book value	**$ 60,045**		$ 48,233	

7. SEVERANCE PAY LIABILITY

Effective April 1, 1998, the Agency commenced recording accumulated severance pay benefits for its employees. Severance pay is determined by multiplying years of service, to a maximum of 15 years, by the weekly salary at date of retirement, provided the employee has reached nine years of service and retires from the Agency. Effective April 2000, there is also additional severance pay for employees with 20 or more years of accumulated service. The estimate is based upon the method of calculation set by the Province of Manitoba.

The Province has accepted responsibility for the severance benefits accumulated by the Agency's employees through specific dates. That responsibility was previously reflected by a $194 receivable from the Province for the employees at the Agency as of March 31, 1998, together with a $76 receivable from the Province for the employees at Radio Services as of March 31, 2003, who are also now with the Agency. That responsibility is now reflected by the payment to the Agency by the Province of $270 on March 31, 2009, with the funds held on the Agency's behalf in an interest bearing trust account until it is required to discharge the related liability.

An actuarial valuation report was completed for the severance pay liability as of December 31, 2004. The report provides a formula to update the liability on an annual basis. In accordance with the formula, the Agency's liability is recalculated annually, with payments to retiring employees no longer with the Agency or the Province charged against the liability. The Agency's actuarially determined net liability for accounting purposes as of March 31, 2009, was $494 (2008: $462).

8. WORKING CAPITAL PAYABLE

The Agency has an authorized line of working capital advances of $4,000, $2,278 of which was used as of March 31, 2009 (2008: $3,683).

9. LONG TERM DEBT

By virtue of the Management Agreement, the Agency is responsible for the repayment of debts assumed by the Special Operating Agencies Financing Authority (SOAFA) on its behalf. SOAFA holds the debt instruments listed in this Note on behalf of Fleet Vehicles Agency.

Loan Act Authority long term debt is repayable in semi-annual instalments of principal and interest, as follows:

Interest Rate	Instalment Amount	Maturity date	**2009**	2008
6.425%	146	March 31, 2009	$ -	$ 278
3.625%	149	March 31, 2009	-	291
3.5%	259	March 31, 2009	-	504

			31,242	23,563
Amounts payable within one year			**(7,137)**	(7,113)
			$ 24,105	$ 16,450

(continues)

9. LONG TERM DEBT *(continued)*

Unused loan authority of $4,900 was available as of March 31, 2008. An additional $18,900 of loan authority availability was approved during June 2008 in The Loan Act, 2008. Of the $23,800 in available loan authority, $15,200 was drawn down at various times during the 2008/09 year, leaving $8,600 of loan authority availability as of March 31, 2009.

As of March 31, 2009, principal repayments in each of the next five years are as follows:

2010	$	7,137
2011		5,760
2012		4,289
2013		2,999
2014		1,653

10. CONTRIBUTED EQUITY

The Special Operating Agencies Financing Authority (SOAFA) and The Government of Manitoba entered into a Transfer Agreement in connection with the transfer from the Government to SOAFA of assets valued at $12,353 required for the continuing operations of Fleet Vehicles Agency as of March 31, 1992. The Agency has repaid the debt portion in the amount of $8,235 (2/3 of the value of the assets) and has recorded the balance of $4,118 (1/3 of the value of the assets) as the Government's equity in SOAFA relating to the Agency's operations.

The Agency's contributed equity was increased by $166 as of April 1, 2003, with the transfer of the net assets of Radio Services to the Agency.

11. REQUIREMENTS OF THE PUBLIC SECTOR COMPENSATION DISCLOSURE ACT

Pursuant to Section 2(1) of the Act, the following employees of Fleet Vehicles Agency received compensation, directly or indirectly, of $50 or more in the fiscal year ended March 31:

		2009	2008
Reginald Batenchuk	Automotive Equipment Mechanic	**$ 52**	$ 52
Kathryn Bernhardt	Manager, Support Services	**64**	60

AUDITORS' REPORT

To the Special Operating Agencies Financing Authority

We have audited the balance sheet of Food Development Centre, an Agency of the Special Operating Agencies Financing Authority, Province of Manitoba as at March 31, 2009 and the statements of loss and retained earnings and cash flows for the year then ended. These financial statements are the responsibility of the Centre's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of the Centre as at March 31, 2009 and the results of its operations and its cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

1. NATURE OF ORGANIZATION

Established in 1978, as part of the Manitoba Research Council, the Food Development Centre (the "Centre") serves the agri-food industry by providing a wide range of services in the food and beverage industries. The Centre offers food product development research, testing services and assistance with technology transfer to enable industry to efficiently and economically produce high quality foods.

Effective April 1, 1996, the Agency was designated as a Special Operating Agency by regulation under The Special Operating Agencies Financing Authority Act made by the Lieutenant Governor in Council.

The Agency is financed through the Special Operating Agencies Financing Authority (SOAFA). The Financing Authority has the mandate to hold and acquire assets required for and resulting from the Agency's operations. It finances the Agency through repayable loans and working capital advances. The financial framework enables the Agency to operate in a business-like manner according to public policy expectations.

A Management Agreement between the Financing Authority and the Minister of Rural Development, being the Minister responsible for the Agency at that time, assigned responsibility to the Agency to manage and account for the Agency related assets and operations on behalf of the Financing Authority.

The Agency is a part of the Department of Agriculture, Food and Rural Initiatives under the general direction of a General Manager/Chief Operating Officer, and ultimately the policy direction of the Deputy Minister and Minister.

The Centre remains bound by relevant legislation and regulations.

An advisory board with representation from the food industry, client's of the Centre, academia and government provides direction on policy and operating activities.

The Centre is economically dependent upon the Province of Manitoba, as it derives a significant portion of its revenue from the Province. The transactions with the Province of Manitoba are recorded at the exchange amount, which is the amount agreed upon by both parties.

2. CHANGE IN ACCOUNTING POLICIES

Effective April 1, 2008, the Centre adopted the following new handbook sections issued by the Canadian Institute of Chartered Accountants (CICA):

Section 1535 Capital Disclosures

Section 1535 establishes standards for disclosing information about an entity's capital and how it is managed. These standards require an entity to disclose its objectives, policies and processes for managing capital, a summary of quantitative data about what it manages as capital and whether it complied with any externally imposed capital requirements to which it is subject and, if not, the consequences of such non-compliance.

Section 3862 Financial Instruments – Disclosures

Section 3862 modifies the disclosure requirements for financial instruments that were included in Section 3861, Financial Instruments – Disclosure and Presentation. The new standards require an entity to provide disclosures in its financial statements that enable users to evaluate the significance of financial instruments on its financial position and performance, the nature and extent of the risks to which it is exposed during the period and at the balance sheet date, and how those risks are managed.

Section 3863 Financial Instruments – Presentation

Section 3863 carries forward the presentation requirements of Section 3861, Financial Instruments – Disclosure and Presentation, unchanged.

The above noted new standards have no impact on the recognition, measurement or presentation of financial instruments in the Centre's year end financial statements.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

General

These financial statements have been prepared in accordance with Canadian generally accepted accounting principles (GAAP).

Use of estimates

The preparation of financial statements in conformity with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amount of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the period. Such estimates include providing for amortization of property and equipment and goodwill. Actual results could differ from these estimates.

(continues)

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES *(continued)*

Capital disclosure

The Centre's capital consists of retained earnings provided from operations.

The Centre's capital management policy is to maintain sufficient capital to meet its objectives through its retained earnings by managing transfers of surplus funds to the Province of Manitoba; meet short-term capital needs with working capital advances from the Province of Manitoba; and meet long-term capital needs through long-term debt with the Province of Manitoba. There were no changes in the Centre's approach to capital management during the period.

The Centre is not subject to externally imposed capital requirements.

Revenue recognition

Fee for service revenue is recognized on the percentage of completion basis and when collection is reasonably assured.

Lease income is recognized as revenue according to the terms of the lease.

All grants received have been recognized as income in the current year.

Funds received from the Province of Manitoba and the Government of Canada for the construction of the new building and purchase of equipment have been treated as deferred capital contributions and will be taken into income to match the amortization of the building and equipment.

Property and equipment

Equipment assumed as part of the conversion to a Special Operating Agency, April 1, 1996 is stated at its estimated fair value as determined by the Province of Manitoba. Property and equipment are stated at cost less accumulated amortization. Property and equipment are amortized over their estimated useful lives at the following rates and methods:

Building improvements	15 years	straight-line method
Equipment - commercial and product development	15 years	straight-line method
Equipment - office	20%	declining balance method
Computer hardware and software	5 years	straight-line method

The Centre regularly reviews its property and equipment to eliminate obsolete items. Government grants are treated as deferred capital contribution and are amortized based on method used for the related asset.

Property and equipment acquired during the year but not placed into use are not amortized until they are placed into use.

(continues)

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES *(continued)*

Other Assets

Research and development costs are expended as incurred.

Unearned revenue

Unearned revenue represents cash received for projects that were started but not completed by year end.

4. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT

Financial assets and liabilities are initially recorded at fair value. Measurement in subsequent periods depends on the financial instrument's classification. Financial instruments are classified into one of the following five categories: held for trading; available for sale; held to maturity; loans and receivables; and other financial liabilities. All financial instruments classified as held for trading or available for sale are subsequently measured at fair value with any change in fair value recorded in net earnings and other comprehensive income, respectively. All other financial instruments are subsequently measured at amortized cost.

The financial assets and liabilities of the Centre are classified and measured as follows:

Financial Asset/Liability	Category	Subsequent Measurement
Cash and short-term deposits	Held for trading	Fair value
Accounts receivable	Loans and receivables	Amortized cost
Due from Food Safety Initiative	Loans and receivables	Amortized cost
Severance pay benefits cash in trust	Loans and receivables	Amortized cost
Accounts payable	Other financial liabilities	Amortized cost
Accrued liabilities	Other financial liabilities	Amortized cost
Due to Functional Food Cluster	Other financial liabilities	Amortized cost
Long term debt	Other financial liabilities	Amortized cost
Severance liability	Other financial liabilities	Amortized cost

Amortized cost is determined using the effective interest rate method.

Gains and losses on financial instruments subsequently measured at amortized cost are recognized in the statement of earnings and retained earnings in the period the gain or loss occurs. Changes in fair value on financial instruments classified as held for trading are recognized in the statement of earnings and retained earnings for the current period. Changes in fair value on financial instruments classified as available for sale would be recorded in other comprehensive income until realized, at which time they recorded in the statement of earnings and retained earnings.

Fair value of financial instruments

The fair values of accounts receivable, due from Food Safety Initiative, accounts payable and accrued liabilities and due to Functional Food Cluster approximate their carrying values due to their short-term maturity.

(continues)

4. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT *(continued)*

The fair value of severance pay benefits cash in trust and its related severance pay liability is determined using the effective interest rate method.

The fair value of the long-term debt is determined using the present value of future cash flows under current financing agreements, based on the Centre's current estimated borrowing rate for loans with similar terms and conditions. The fair value of this long-term debt is $171 as at March 31, 2009 (2008 - $188).

Financial risk management - overview

The Centre has exposure to the following risks from its use of financial instruments: credit risk; liquidity risk; market risk; interest risk; and foreign currency risk.

Credit risk

Credit risk is the risk that one party to a financial instrument fails to discharge an obligation and causes financial loss to another party. Financial instruments which potentially subject the Centre to credit risk consist principally of cash and term deposits and accounts receivable.

The maximum exposure of the Centre to credit risk at March 31, 2009 is:

Cash and short-term deposits	$ 895
Accounts receivable	172
Due from Food Safety Initiative	306
	$ 1,373

Cash and short-term deposits: The Centre is not exposed to significant credit risk as the cash and term deposits are primarily held by the Minister of Finance.

Accounts receivable: The Centre is not exposed to significant credit risk as the customers are mostly government entities and payment in full is typically collected when it is due. The Centre establishes an allowance for doubtful accounts that represents its estimate of potential credit losses. The allowance for doubtful accounts is based on management's estimates and assumptions regarding current market conditions, customer analysis and historical payment trends. These factors are considered when determining whether past due accounts are allowed for or written off.

Due from Food Safety Initiative: The Centre is not exposed to significant credit risk as the receivable is from a program that is within the Province of Manitoba and funded by the Government of Canada.

The change in the allowance for doubtful accounts during the year was as follows:

Balance, beginning of the year	$ 100
Provision for receivable impairment	60
Amounts written off	(79)
Balance, end of the year	$ 81

(continues)

4. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT *(continued)*

Liquidity risk

Liquidity risk is the risk that the Centre will not be able to meet its financial obligations as they come due.

The Centre manages liquidity risk by maintaining adequate cash balances and by review from the Province of Manitoba to ensure adequate funding will be received to meet the obligations.

Market risk

Market risk is the risk that changes in market prices, such as interest rates and foreign exchange rates, will affect the Centre's income or the fair values of its financial instruments. The significant market risks the Centre is exposed to are interest rate risk and foreign currency risk.

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The interest rate exposure relates to funds on deposit and long term debt.

The interest rate risk on funds on deposit is considered to be low because of their short-term nature.

The Centre manages its interest rate risk on long-term debt through the exclusive use of fixed rate terms for its long-term debt. A change of 100 basis points in the interest rates would have increased or decreased its fair value by $7 (2008 - $8).

Foreign currency risk

Foreign currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Centre is not exposed to significant foreign currency risk as it does not have any financial instruments denominated in foreign currency.

5. ACCOUNTS RECEIVABLE

The accounts receivable balance is comprised of the following amounts:

	2009	2008
Trade accounts receivable	**$ 193**	$ 498
Allowance for doubtful accounts	**(81)**	(100)
Note receivable from tenant	**60**	-
	$ 172	$ 398

Included in the allowance for doubtful accounts is the allowance for the note receivable from tenant, which had central government authorization for the allowance to be recorded.

6. PROPERTY AND EQUIPMENT

	2009		2008	
	Cost	**Accumulated amortization**	Cost	Accumulated amortization
Equipment - commercial and product development	**$ 5,858**	**$ 1,086**	$ 5,045	$ 837
Computer hardware and software	**96**	**89**	96	84
Equipment - office	**369**	**345**	369	317
Building improvements	**6,608**	**1,726**	6,547	1,288
Commercial and training expansion	**96**	**-**	-	-
	$ 13,027	**$ 3,246**	$ 12,057	$ 2,526
Net book value	**$ 9,781**		$ 9,531	

The Centre has received $72 from the insurance company for replacing the hot water lines that had failed in October 2005. The proceeds has been applied against the building improvements.

7. SEVERANCE RECEIVABLE FROM PROVINCE OF MANITOBA

The Province of Manitoba accepted responsibility for the vacation entitlements earned by the employees of the Centre prior to its designation as SOA, and the severance pay benefits accumulated to March 31, 1998 for certain Centre's employees. Accordingly, the Centre recorded a receivable of $41 from the Province of Manitoba for these accumulated benefits. Effective March 31, 2009, the Province of Manitoba had agreed to pay the receivable balances related to the funding for these liabilities and has placed the amount of $41 into an interest bearing trust account to be held on the Centre's behalf until the cash is required to discharge the related liabilities.

8. WORKING CAPITAL PAYABLE

The Centre has an authorized line of working capital from the Province of Manitoba of $1,000 of which $NIL was used as at March 31, 2009 (2008 - $NIL was used).

9. ACCOUNTS PAYABLE AND ACCRUED LIABILITIES

	2009	2008
Trade	**$ 221**	$ 649
Interest	**118**	128
Sales tax	**25**	21
	$ 364	$ 798

10. ACCRUED VACATION PAY

The employees of the Centre are entitled to vacation pay in the current year, based on the prior year's employment. A provision for this liability has been recorded in the financial statements.

11. LONG TERM DEBT

	2009	2008
Province of Manitoba loan bearing interest at 5.80% per annum, with annual principal payments of $18 plus interest. The loan matures on April 30, 2017.	**$ 160**	$ 177
Amounts payable within one year	**(18)**	(18)
	$ 142	$ 159

Principal repayment terms are approximately:

2010	$ 18
2011	18
2012	18
2013	18
2014	18

12. SEVERANCE LIABILITY

Effective April 1, 1998, the Centre commenced recording accumulated severance pay benefits for its employees. Severance pay is determined by multiplying years of service, to a maximum of twenty three years, by the weekly salary at date of retirement, provided the employee reaches nine years of service and retires from the Centre. The estimate is based upon the method of calculation set by the Province of Manitoba.

The Province has accepted responsibility for the severance benefits accumulated by the Centre's employees to March 31, 1998. That responsibility was reflected by a $41 receivable from the Province of Manitoba, which has been paid back during the fiscal year.

An actuarial report was completed for the severance pay liability as of March 31, 2005. The report provides a formula to update the liability on an annual basis. The Centre's actuarially determined net liability for accounting purposes as at March 31, 2009 was $112 (2008 - $99). Commencing in the 2006 fiscal year, the actuarial gain of $14 is being amortized over the 15 year expected average remaining service life of the employee group.

Significant long-term actuarial assumptions used in the March 31, 2005 valuation, and in the determination of the March 31, 2009 present value of the accrued severance benefit obligation were:

Annual rate of return	
inflation component	2.50%
real rate of return	4.00%
	6.50%
Assumed salary increase rates	
annual productivity increase	0.75%
annual general salary increase	3.25%
	4.00%

13. DEFERRED CAPITAL CONTRIBUTIONS

	2009	2008
Balance, beginning of year	**$ 10,422**	$ 9,256
Add: Contributions received		
Government of Canada	**356**	1,834
Less: Amount amortized as revenue	**(709)**	(668)
Balance, end of year	**$ 10,069**	$ 10,422

Deferred capital contributions represent the unamortized amount of contributions received for the purchase of equipment and improvements of a building. The amortization of contributions is recorded as revenue in the statement of income.

In 2004, the Centre received a loan from the Province of Manitoba for $2,625 bearing interest at 5.63% per annum, with annual payments of $175 plus interest. The loan matures on May 18, 2019. The loan is to be repaid through future appropriations from the Province of Manitoba and therefore has been treated as a grant and included in deferred capital contributions to be consistent with the accounting presentation adopted by the Province of Manitoba.

As the future principal and interest payments will be funded by the Province of Manitoba, the annual principal repayment will be netted against the grant revenue received and the interest payment will be reflected as interest expense.

The deferred capital contributions will be brought into income at the same rate as the corresponding equipment and building improvements are being amortized.

14. DEFICIENCY IN ASSETS

The Special Operating Agencies Financing Authority and the Manitoba Provincial Government entered into a Transfer Agreement respecting the transfer, from the Provincial Government to the Financing Authority, of the net assets required for the continuing operations of the Centre. As at April 1, 1996, the date of transfer, the liabilities assumed exceeded the value of the assets in the amount of $35. This amount was recorded as the deficit at April 1, 1996.

15. PENSION BENEFIT

In accordance with the provisions of The Civil Service Superannuation Act, employees of the Centre are eligible for pension benefits under the Civil Service Superannuation Fund. This pension plan is a defined benefit plan, which requires the Centre to contribute an amount equal to the employee's contribution to the Fund for current services. The amount contributed and expensed by the Centre in the current year was $89 (2008 - $85).

The Centre has no further liability associated with the annual cost of pension benefits earned by the Centre's employees.

16. PUBLIC SECTOR COMPENSATION DISCLOSURE

It is a requirement of the Public Sector Compensation Disclosure Act that annual public disclosure be made of individual compensation exceeding $50 annually to any officer or employee of the Province of Manitoba. The following employees received compensation in excess of $50:

Utioh, Alphonsus	Process and Product Development Manager	$	**95**
Appah, Paulyn	Senior Process Development Consultant		**64**
Lalla, Mike	Manager, Support Services		**89**
Gherasim, Gord	Supervisor, Pilot Plant		**56**
Nivet, Meeling	Product Development Group Leader		**75**
Schultz, Nona	HACCP/Regulatory Affairs Coordinator		**61**
Henuset, Alana	Information Officer		**61**
Templeton, Karen	Group Leader - Administration		**55**
Planinich, Javier	Manager, Pilot Plant and Commercial Activities		**85**
Dean, Sabrina	HACCP/Regulatory Affairs Coordinator		**66**

AUDITORS' REPORT

To the Special Operating Agency Financing Authority

We have audited the balance sheet of Green Manitoba Eco Solutions, An Agency of the Special Operating Agencies Financing Authority Province of Manitoba, as at March 31, 2009 and the statements of income and retained earnings and cash flows for the year then ended. These financial statements are the responsibility of Green Manitoba's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of Green Manitoba as at March 31, 2009 and the results of its operations and its cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

GREEN MANITOBA ECO SOLUTIONS

(An Agency of the Special Operating Agencies Financing Authority Province of Manitoba)

Management's Responsibility for Financial Reporting

Green Manitoba Eco Solutions (Green Manitoba) management is responsible for preparing the financial statements and other financial information in the Annual Report. This responsibility includes maintaining the integrity and objectivity of financial data and the presentation of Green Manitoba's financial position and results of operations and its cash flows in accordance with Canadian generally accepted accounting principles. In management's opinion, the financial statements have been properly prepared within reasonable limits of materiality, incorporating management's best judgement regarding all necessary estimates and all other data available through May 11, 2009.

Management maintains internal controls to properly safeguard Green Manitoba's assets. These controls also provide reasonable assurance that the books and records from which financial statements are derived accurately reflect all transactions, and that established policies and procedures are followed.

Green Manitoba's financial statements have been audited by The Exchange chartered accountants LLP, independent external auditors. The auditors' responsibility is to express an independent opinion on whether the financial statements of Green Manitoba are presented fairly, in all material respects, in accordance with Canadian generally accepted accounting principles. The Auditors' Report outlines the scope of their audit examination and provides their audit opinion.

On behalf of Green Manitoba's management,

Doug Smith
Director

Winnipeg, Manitoba
May 11, 2009

CASH - END OF YEAR	$ 890	$ 109

1. NATURE OF ORGANIZATION

Effective April 1, 2006, Green Manitoba Eco Solutions ("Green Manitoba") was designated as a Special Operating Agency pursuant to the Special Operating Agencies Financing Authority act (C.C.S.M. c.S185). Green Manitoba operates under a charter approved by the Lieutenant Governor in Council.

Green Manitoba is committed to connecting environmental quality and economic vitality through efficient resource utilization. Green Manitoba promotes the implementation of community practices that conserve water, reduce demand for energy, and effectively manage and minimize waste.

Green Manitoba is financed through the Special Operating Agencies Financing Authority (SOAFA). SOAFA has the mandate to hold and acquire assets required for and resulting from Green Manitoba's operations. It finances Green Manitoba through repayable loans and working capital advances. The financial framework enables Green Manitoba to operate in a business-like manner according to public policy expectations. A management agreement between the Financing authority and the Minister of Science, Technology, Energy and Mines assigns responsibility to Green Manitoba to manage and account for agency-related assets and operations on behalf of the Financing Authority.

Green Manitoba is part of the Department of Science, Technology, Energy and Mines and operates under policy direction of the Deputy Minister. Green Manitoba remains bound by relevant legislation and regulations, as well as by administrative policy except where specific exemptions have been provided for in its charter in order to meet business objectives.

Green Manitoba is economically dependent on the Province of Manitoba, as it derives a significant portion of its revenue from the Province. The transactions with the Province of Manitoba are recorded at the exchange amount, which is the amount agreed upon by both parties.

2. CHANGE IN ACCOUNTING POLICIES

Effective April 1, 2008, Green Manitoba adopted the following new handbook sections issued by the Canadian Institute of Chartered Accountants (CICA):

Section 1535 Capital Disclosures

Section 1535 establishes standards for disclosing information about an entity's capital and how it is managed. These standards require an entity to disclose its objectives, policies and processes for managing capital, a summary of quantitative data about what it manages as capital and whether it complied with any externally imposed capital requirements to which it is subject and, if not, the consequences of such non-compliance.

Section 3862 Financial Instruments – Disclosures

Section 3862 modifies the disclosure requirements for financial instruments that were included in Section 3861, Financial Instruments – Disclosure and Presentation. The new standards require an entity to provide disclosures in its financial statements that enable users to evaluate the significance of financial instruments on its financial position and performance, the nature and extent of the risks to which it is exposed during the period and at the balance sheet date, and how those risks are managed.

Section 3863 Financial Instruments – Presentation

Section 3863 carries forward the presentation requirements of Section 3861, Financial Instruments – Disclosure and Presentation, unchanged.

The above noted new standards have no impact on the recognition, measurement or presentation of financial instruments in Green Manitoba's year end financial statements.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of reporting

The financial statements of Green Manitoba have been prepared in accordance with Canadian generally accepted accounting principles (GAAP).

Use of estimates

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingencies at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates.

(continues)

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES *(continued)*

Capital disclosure

Green Manitoba's capital consists of retained earnings (deficit) and contributed surplus provided from operations.

Green Manitoba's capital management policy is to maintain sufficient capital to meet its objectives through its retained earnings by managing transfers of surplus funds to the Province of Manitoba; meet short-term capital needs with working capital advances from the Province of Manitoba; and meet long-term capital needs through long-term debt with the Province of Manitoba. There were no changes in the Agency's approach to capital management during the period.

Green Manitoba is not subject to externally imposed capital requirements.

Cash and equivalents

Cash and cash equivalents include cash on hand and balances with banks, net of bank overdrafts and short term investments with original maturities of six months or less. Bank borrowings are considered to be financing activities.

Capital Assets

Capital assets transferred to Green Manitoba on April 1, 2006 assumed a cost equal to their net book value at March 31, 2006.

Capital assets are stated at cost less accumulated amortization. Capital assets are amortized straight-line over a period of 5 years. Green Manitoba regularly reviews its capital assets to eliminate obsolete items. Government grants are treated as a reduction of capital asset cost.

Deferred revenue

Deferred revenue represents cash received for projects that were started but not completed by year end.

Revenue recognition

Grants are recognized as income in the year in which they are received. Special program funding is taken into income to match the program expenditures. Any remaining program funding is deferred.

4. FINANCIAL INSTRUMENTS

Financial assets and liabilities are initially recorded at fair value. Measurement in subsequent periods depends on the financial instrument's classification. Financial instruments are classified into one of the following five categories: held for trading; available for sale; held to maturity; loans and receivables; and other financial liabilities. All financial instruments classified as held for trading or available for sale are subsequently measured at fair value with any change in fair value recorded in net earnings and other comprehensive income, respectively. All other financial instruments are subsequently measured at amortized cost.

The financial assets and liabilities of Green Manitoba are classified and measured as follows:

Financial Asset/Liability	Category	Subsequent Measurement
Cash (working capital payable)	Held for trading	Fair value
Accounts receivable	Loans and receivables	Amortized cost
Accounts payable	Other financial liabilities	Amortized cost
Accrued liabilities	Other financial liabilities	Amortized cost

Amortized cost is determined using the effective interest rate method.

Gains and losses on financial instruments subsequently measured at amortized cost are recognized in the statement of earnings and retained earnings in the period the gain or loss occurs. Changes in fair value on financial instruments classified as held for trading are recognized in the statement of earnings and retained earnings for the current period. Changes in fair value on financial instruments classified as available for sale would be recorded in other comprehensive income until realized, at which time they recorded in the statement of earnings and retained earnings.

Fair value of financial instruments

The fair values of accounts receivable, accounts payable and accrued liabilities approximate their carrying values due to their short-term maturity.

Financial risk management - overview

Green Manitoba has exposure to the following risks from its use of financial instruments: credit risk; liquidity risk; market risk; interest risk; and foreign currency risk.

Credit risk

Credit risk is the risk that one party to a financial instrument fails to discharge an obligation and causes financial loss to another party. Financial instruments which potentially subject Green Manitoba to credit risk consist principally of cash and term deposits and accounts receivable.

The maximum exposure of Green Manitoba to credit risk at March 31, 2009 is:

Cash	$ 890
Accounts receivable	579
	$ 1,469

(continues)

4. FINANCIAL INSTRUMENTS *(continued)*

Cash: Green Manitoba is not exposed to significant credit risk as the cash and term deposits are primarily held by the Minister of Finance.

Accounts receivable: Green Manitoba is not exposed to significant credit risk as the customers are mostly government entities and payment in full is typically collected when it is due. Green Manitoba establishes an allowance for doubtful accounts that represents its estimate of potential credit losses. The allowance for doubtful accounts is based on management's estimates and assumptions regarding current market conditions, customer analysis and historical payment trends. These factors are considered when determining whether past due accounts are allowed for or written off.

Liquidity risk

Liquidity risk is the risk that Green Manitoba will not be able to meet its financial obligations as they come due.

Green Manitoba manages liquidity risk by maintaining adequate cash balances and by review from the Province of Manitoba to ensure adequate funding will be received to meet the obligations.

Market risk

Market risk is the risk that changes in market prices, such as interest rates and foreign exchange rates, will affect Green Manitoba's income or the fair values of its financial instruments. The significant market risks Green Manitoba is exposed to are interest rate risk and foreign currency risk.

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The interest rate exposure relates to funds on deposit.

The interest rate risk on funds on deposit is considered to be low because of their short-term nature.

Foreign currency risk

Foreign currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. Green Manitoba is not exposed to significant foreign currency risk as it does not have any financial instruments denominated in foreign currency.

5. ACCOUNTS RECEIVABLE

The accounts receivable balance is comprised of the following amounts:

	2009	2008
Severance	**$ 42**	$ -
Education - Gimli water project	**-**	8
E-waste recycling	**5**	112
UDI - West Broadway Low Income	**-**	75
Eco-Calendar	**1**	-
Low Income Residential Efficiency Program	**531**	-
	$ 579	$ 195

6. CAPITAL ASSETS

	2009		2008	
	Cost	**Accumulated amortization**	Cost	Accumulated amortization
Computer equipment	**$ 4**	**$ 2**	$ 4	$ 1
Furniture and fixtures	**9**	**5**	9	3
	$ 13	**$ 7**	$ 13	$ 4
Net book value	**$ 6**		$ 9	

7. WORKING CAPITAL PAYABLE

Green Manitoba has an authorized line of working capital from the Province of Manitoba of $500 of which $Nil was used at March 31, 2009 (2008 - $Nil).

8. SEVERANCE LIABILITY

Effective April 1, 2006, Green Manitoba commenced recording accumulated severance pay benefits for its employees.

An actuarial report was completed for the severance pay liability as of March 31, 2005. The report provides a formula to update the liability on an annual basis. The Green Manitoba's actuarially determined net liability for accounting purposes as at March 31, 2009 was $NIL (2008 - $2).

Significant long-term actuarial assumptions used in the March 31, 2005 valuation, and in the determination of the March 31, 2009 present value of the accrued severance benefit obligation were:

Annual rate of return	
inflation component	2.50%
real rate of return	4.00%
	6.50%
Assumed salary increase rates	
annual productivity increase	0.75%
annual general salary increase	3.25%
	4.00%

9. CONTRIBUTED SURPLUS

Green Manitoba and the Department of Energy, Science and Technology entered into a Transfer Agreement to transfer existing assets used in Green Manitoba Eco Solutions program of the Department of Energy, Science and Technology. They consist primarily of equipment, furniture and other items having an estimated value of $9. Green Manitoba has capitalized these assets with a corresponding increase in contributed surplus.

10. PENSION BENEFIT

In accordance with the provisions of The Civil Service Superannuation Act, employees of Green Manitoba are eligible for pension benefits under the Civil Service Superannuation Fund. The pension plan is a defined benefit plan, which requires Green Manitoba to contribute an amount equal to the employee's contribution to the fund for current services. The amount expensed by Green Manitoba in the current year is $29 (2008 - $25).

Green Manitoba has no further liability associated with the annual cost of pension benefits earned by Green Manitoba's employees.

11. PUBLIC SECTOR COMPENSATION DISCLOSURE

		2009	2008
Eckstein, Brett	Planning program analyst 1	$ -	$ 65
Ferguson, Jim	Planning program analyst 3	**70**	68
Jonasson, John	Planning consultant	**86**	77
McKenzie, Shane	Planning program analyst 2	**55**	52
Shymko, Randall	Planning program analyst 3	**59**	55
Storey, C. Marie	Planning program analyst 1	**51**	-

It is a requirement of the Public Sector Compensation Disclosure Act that annual disclosure be made of individual compensation exceeding $50 annually to any officer or employee of the Province of Manitoba. The above employees received compensation in excess of $50.

During the year, Green Manitoba was not the employer of record for any other employees receiving compensation in excess of $50. Where compensation in excess of $50 was paid, employee names and the amounts paid have been disclosed in the records of affected departments.

May 29, 2009

For the year ended March 31, 2009

The accompanying financial statements of the Industrial Technology Centre are the responsibility of management and have been prepared by ITC in accordance with Canadian generally accepted accounting principles. In management's opinion, the financial statements have been properly prepared within reasonable limits of materiality, incorporating management's best judgement regarding all necessary estimates and all other data available up to May 29, 2009.

Management maintains internal controls designed to indicate responsibility, provide reasonable assurance of the reliability and accuracy of the financial statements, and properly safeguard ITC's assets.

The responsibility of the external audit is to express an independent, professional opinion lending assurance and objectivity as to whether the financial statements of ITC are fairly presented in accordance with Canadian generally accepted accounting principles. The auditors' report outlines the scope of the audit examination and provides the audit opinion.

On behalf of management,

Auditors' Report

To the Special Operating Agencies Financing Authority

We have audited the balance sheet of the **INDUSTRIAL TECHNOLOGY CENTRE** as at March 31, 2009 and the statements of earnings, comprehensive income (loss) and retained earnings and cash flows for the year then ended. These financial statements are the responsibility of the Centre's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of the Centre as at March 31, 2009 and the results of its operations and its cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

1. Nature of Organization

The Industrial Technology Centre (ITC) was established in 1979 under "Enterprise Manitoba", a joint Federal/Provincial cost-shared funding agreement. ITC was managed by the Manitoba Research Council until September 1992 when responsibility for ITC was transferred to the Economic Innovation & Technology Council (EITC). ITC was created as a technical resource for Manitoba industry and government and continues to provide a wide range of technical services to both the private and public sectors.

Effective April 1, 1996, ITC was designated as a Special Operating Agency under The Special Operating Agencies Financing Authority Act, Cap. S185, C.C.S.M., and operates under a charter approved by the Lieutenant Governor in Council. ITC operates as part of Manitoba Science, Technology, Energy and Mines under the general direction of the Deputy Minister.

ITC is financed through the Special Operating Agencies Financing Authority (SOAFA). SOAFA has the mandate to hold and acquire assets required for and resulting from Agency operations. It finances ITC through working capital advances. The financial framework allows the Agency to operate in a business-like manner, which is facilitated by SOA status.

A Management Agreement between SOAFA and the Minister of Science, Technology, Energy and Mines assigns responsibility to the Agency to manage and account for the Agency-related assets and operations on behalf of SOAFA.

An Economic Development Contribution Agreement between ITC and Manitoba Science, Technology, Energy and Mines defines expected public policy benefits generated from ITC's operations.

ITC has full delegated authority for all administrative, financial and operational matters. This delegation is subject to any limitations, restrictions, conditions and requirements imposed by legislation or by the Minister.

2. Change in Accounting Policies

Effective April 1, 2008, the Agency adopted the following new handbook sections issued by the Canadian Institute of Chartered Accountants (CICA):

Section 1535 Capital Disclosures
Section 1535 establishes standards for disclosing information about an entity's capital and how it is managed. These standards require an entity to disclose its objectives, policies and processes for managing capital, a summary of quantitative data about what it manages as capital and whether it complied with any externally imposed capital requirements to which it is subject and, if not, the consequences of such non-compliance.

Section 3862 Financial Instruments – Disclosures
Section 3862 modifies the disclosure requirements for financial instruments that were included in Section 3861, Financial Instruments – Disclosure and Presentation. The new standards require an entity to provide disclosures in its financial statements that enable users to evaluate the significance of financial instruments on its financial position and performance, the nature and extent of the risks to which it is exposed during the period and at the balance sheet date, and how those risks are managed.

Section 3863 Financial Instruments – Presentation
Section 3863 carries forward the presentation requirements of Section 3861, Financial Instruments – Disclosure and Presentation, unchanged.

The above noted new standards have no impact on the recognition, measurement or presentation of financial instruments in the Agency's yearend financial statements.

3. Significant Accounting Policies

Basis of Reporting

The financial statements are prepared in accordance with Canadian generally accepted accounting principles.

Capital Assets

Capital assets are recorded at cost. Amortization, intended to write off the assets over their estimated useful lives, is recorded at the following annual rates and methods:

Furniture and fixtures	20%, declining balance
Office and laboratory equipment	20%, declining balance
Computer equipment and software	20%, straight-line
Leasehold improvements	10%, straight-line

3. Significant Accounting Policies (continued)

Capital Disclosures

The Agency's capital consists of contributed equity and retained earnings provided from operations.

The Agency's capital management policy is to maintain sufficient capital to meet its objectives through its retained earnings by managing transfers of surplus funds to the Province of Manitoba; meet short-term capital needs with working capital advances from the Province of Manitoba; and meet long-term capital needs through long-term debt with the Province of Manitoba. There were no changes in the Agency's approach to capital management during the period.

The Agency is not subject to externally imposed capital requirements.

Government Assistance

Non-repayable government assistance relating to capital expenditures is reflected as a reduction of the cost of such assets.

Revenue Recognition

Province of Manitoba funding is recognized over the term for which it applies. Fees for service are recognized as the service is performed.

Use of Estimates

The preparation of financial statements in accordance with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from management's best estimates as additional information becomes available in the future.

New Accounting Pronouncements

Recent accounting pronouncements that have been issued but are not yet effective, and have a potential implication for the Agency, are as follows:

Financial Statement Concepts
CICA Handbook Section 1000, Financial Statement Concepts has been amended to focus on the capitalization of costs that truly meet the definition of an asset and de-emphasizes the matching principle.

3. Significant Accounting Policies (continued)

The revised requirements are effective for annual and interim financial statements relating to fiscal years beginning on or after October 1, 2008. The Agency is currently evaluating the impact of the adoption of this change on the disclosure within its financial statements.

International Financial Reporting Standards
The AcSB plans to converge Canadian GAAP with International Financial Reporting Standards ("IFRS") over a transition period expected to end in 2011. The impact of the transition to IFRS on the Agency's financial statements has yet to be determined.

4. Financial Instruments and Financial Risk Management

Financial assets and liabilities are initially recorded at fair value. Measurement in subsequent periods depends on the financial instrument's classification. Financial instruments are classified into one of the following five categories: held for trading; available for sale; held to maturity; loans and receivables; and other financial liabilities. All financial instruments classified as held for trading or available for sale are subsequently measured at fair value with any change in fair value recorded in net earnings and other comprehensive income, respectively. All other financial instruments are subsequently measured at amortized cost.

The financial assets and liabilities of the Agency are classified and measured as follows:

Financial Asset/Liability	Category	Subsequent Measurement
Cash and funds on deposit	Held for trading	Fair value
Long term investment	Held for trading	Fair value
Accounts receivable	Loans and receivables	Amortized cost
Accounts payable	Other financial liabilities	Amortized cost
Accrued liabilities	Other financial liabilities	Amortized cost

Amortized cost is determined using the effective interest rate method.

Gains and losses on financial instruments subsequently measured at amortized cost are recognized in the statement of earnings and retained earnings in the period the gain or loss occurs. Changes in fair value on financial instruments classified as held for trading are recognized in the statement of earnings and retained earnings for the current period. Changes in fair value on financial instruments classified as available for sale would be recorded in other comprehensive income until realized, at which time they recorded in the statement of earnings and retained earnings.

Fair Value of Financial Instruments

The fair values of accounts receivable, accounts payable and accrued liabilities approximate their carrying values due to their short-term maturity.

4. Financial Instruments and Financial Risk Management (continued)

Financial Risk Management - Overview

The Agency has exposure to the following risks from its use of financial instruments: credit risk; liquidity risk; market risk; interest risk; and foreign currency risk.

Credit risk
Credit risk is the risk that one party to a financial instrument fails to discharge an obligation and causes financial loss to another party. Financial instruments which potentially subject the Agency to credit risk consist principally of cash and term deposits and accounts receivable.

The maximum exposure of the Agency to credit risk at March 31, 2009 is:

Cash and funds on deposit	$ 373
Accounts receivable	242
Long term investment	103
	$718

Cash, funds on deposits and long term investment: The Agency is not exposed to significant credit risk as the cash, term deposits and long term investment are primarily held by the Minister of Finance.

Accounts receivable: The Agency is not exposed to significant credit risk as payment in full is typically collected when it is due. The Agency establishes an allowance for doubtful accounts that represents its estimate of potential credit losses. The allowance for doubtful accounts is based on management's estimates and assumptions regarding current market conditions, customer analysis and historical payment trends. These factors are considered when determining whether past due accounts are allowed for or written off.

There was no change in the allowance for doubtful accounts during the year and the balance at March 31, 2009 was $20.

Liquidity Risk
Liquidity risk is the risk that the Agency will not be able to meet its financial obligations as they come due.

The Agency manages liquidity risk by maintaining adequate cash balances and by review from the Province of Manitoba to ensure adequate funding will be received to meet the obligations.

4. Financial Instruments and Financial Risk Management (continued)

Market Risk
Market risk is the risk that changes in market prices, such as interest rates and foreign exchange rates, will affect the Agency's income or the fair values of its financial instruments. The significant market risks the Agency is exposed to are interest rate risk and foreign currency risk.

Interest Rate Risk
Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The interest rate exposure relates to funds on deposit.

The interest rate risk on funds on deposit is considered to be low because of their short-term nature.

Foreign Currency Risk
Foreign currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Agency is not exposed to significant foreign currency risk as it does not have any significant financial instruments denominated in foreign currency.

5. Long Term Investment

The Province of Manitoba accepted responsibility for the vacation entitlements earned by the employees of the Agency prior to its designation as SOA, and the severance pay benefits accumulated to March 31, 1998 for certain of the Agency's employees. Accordingly, the Agency recorded a receivable of $103 from the Province of Manitoba for these accumulated benefits. Effective March 31, 2009 the Province of Manitoba paid the receivable balances related to the funding for these liabilities and has placed the amount of $103 into an interest bearing trust account to be held on the Agency's behalf until the cash is required to discharge the related liabilities.

6. Working Capital Advance

The Agency has an authorized line of working capital advances up to a maximum of $300. As at March 31, 2009 working capital advances were nil (2008 – nil). The line bears interest at prime less 1% and is not secured by specific assets.

7. Capital Assets

	2009		2008	
	Cost	**Accumulated amortization**	**Cost**	**Accumulated amortization**
Furniture and fixtures	$ 16	$ 7	$ 10	$ 6
Office and laboratory equipment	1,192	780	1,043	713
Computer equipment and software	680	572	664	521
Leasehold improvements	200	64	200	44
	$ 2,088	**$ 1,423**	**$ 1,917**	**$ 1,284**
Net book value	**$ 665**		**$ 633**	

8. Severance Pay Benefits

Effective April 1, 1998, the Agency began recording accumulated severance pay benefits for its employees. The amount of severance pay obligations is based on actuarial calculations. The periodic actuarial valuations of these liabilities may determine that adjustments are needed to the actuarial calculations when actual experience is different from that expected and/or because of changes in actuarial assumptions used. The resulting actuarial gains or losses are amortized over the expected average remaining service life of the related employee group.

An actuarial report was completed for the severance pay liability as of March 31, 2005. The report provides a formula to update the liability on an annual basis. The Agency's actuarially determined net liability for accounting purposes as at March 31, 2009 was $247 (2008 - $229). Commencing in the 2006 fiscal year the actuarial gain of $76 is being amortized over the 15 year expected average remaining service life of the employee group.

Significant long-term actuarial assumptions used in the March 31, 2005 valuation, and in the determination of the March 31, 2009 present value of the accrued severance benefit obligation were:

Annual rate of return	
inflation component	2.50%
real rate of return	4.00%
	6.50%
Annual salary increase rates	
annual productivity increase	0.75%
annual general salary increase	3.25%
	4.00%

9. Contributed Equity

A Transfer Agreement between the Special Operating Agencies Financing Authority (SOAFA) and Manitoba effected a transfer of capital assets, current assets and current liabilities from Manitoba to SOAFA as at March 31, 1996. Net assets in the amount of $124 were transferred to continue the operations of ITC. ITC has repaid SOAFA the debt portion of $62 (50% of the value of the net assets) and recorded the remaining $62 (50% of the value of the net assets) as Manitoba's equity in SOAFA as related to the Agency's operations.

10. Commitment

The Agency has entered into a lease agreement for the rental of a building at Smartpark, with space of 24,118 square feet. Of this space, ITC occupies 19,032 square feet, with 5,086 square feet being sublet to the Composites Innovation Centre (CIC). Occupancy costs pertaining to the CIC will be recoverable from them. This ten-year lease requires lease payments as follows:

	ITC	CIC	Total
FY 2009/10 - FY 2014/15 (per year)	$189	$51	$240
FY 2015/16 (7 mos)	110	30	140

11. Pension Benefits

In accordance with the provisions of the Civil Service Superannuation Act, employees of the Centre are eligible for pension benefits under the Civil Service Superannuation Fund. This pension plan is a defined benefit plan, which requires the Centre to contribute an amount equal to the employee's contribution to the Fund for current services. The amount contributed and expense by the Centre for 2009 is $78 (2008 - $75).

The Centre has no further liability associated with the annual cost of pension benefits earned by the Centre's employees.

12. Related Party Transactions

The Agency is related in terms of common ownership to all Province of Manitoba created departments, agencies and Crown corporations. The Agency enters into transactions with these entities in the normal course of business.

MERLIN

The accompanying financial statements are the responsibility of the Management of Manitoba Education, Research and Learning Information Networks (MERLIN) and have been prepared in accordance with Canadian generally accepted accounting principles. In Management's opinion, the financial statements have been properly prepared within reasonable limits of materiality, incorporating Management's best judgement regarding all necessary estimates and all other data available up to May 27, 2009.

Management maintains internal controls to properly safeguard MERLIN's assets. These controls also provide reasonable assurance that the books and records from which financial statements are derived accurately reflect all transactions, and that established policies and procedures are followed.

The Auditors' responsibility is to express an independent opinion on whether the financial statements of MERLIN are fairly presented in accordance with Canadian generally accepted accounting principles. The Auditors' report outlines the scope of the audit examination and provides an audit opinion.

On behalf of Management,

Greg Baylis	David Olafson
Chief Operating Officer	*Controller*

Manitoba Education, Research and Learning Information Networks (MERLIN)

Auditors' Report

To the Special Operating Agencies Financing Authority:

We have audited the balance sheet of **MANITOBA EDUCATION, RESEARCH AND LEARNING INFORMATION NETWORKS**, an Agency of the Special Operating Agencies Financing Authority, Province of Manitoba as at March 31, 2009 and the statements of income, comprehensive income and retained earnings, and cash flows for the year then ended. These financial statements are the responsibility of the Agency's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of the Agency as at March 31, 2009 and the results of its operations and its cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

MANITOBA EDUCATION, RESEARCH AND LEARNING INFORMATION NETWORKS

An Agency of the Special Operating Agencies Financing Authority

Province of Manitoba

Summary of Significant Accounting Policies

March 31, 2009

Basis of Reporting

The financial statements of the Agency are presented in accordance with Canadian generally accepted accounting principles.

Capital Assets

Capital assets are recorded at cost and are amortized annually on a straight-line basis as follows:

Computer hardware	20%
Computer software	20%
Equipment and furniture	20%
Leaseholds	20%

In the year of acquisition, amortization is calculated at one-half the rate indicated.

Revenue Recognition

Provincial funding is recognized over the term for which it applies.

Fees for service are recognized as the service is performed or ownership of goods has been transferred. Internet charges are recognized once service has been provided, and billed at the end of each quarter. Special projects are billed based on the terms of the contract.

Revenues for the Cyberschools project have been received in advance and are taken into income as expenditures are incurred.

Use of Estimates

The preparation of financial statements in accordance with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingencies at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates.

New Accounting Pronouncements

Recent accounting pronouncements that have been issued but are not yet effective, and have a potential implication for the Agency, are as follows:

Financial Statement Concepts

CICA Handbook Section 1000, Financial Statement Concepts has been amended to focus on the capitalization of costs that truly meet the definition of an asset and de-emphasizes the matching principle.

The revised requirements are effective for annual and interim financial statements relating to fiscal years beginning on or after October 1, 2008. The Agency is currently evaluating the impact of the adoption of this change on the disclosure within its financial statements.

International Financial Reporting Standards

The AcSB plans to converge Canadian GAAP with International Financial Reporting Standards ("IFRS") over a transition period expected to end in 2011. The impact of the transition to IFRS on the Agency's financial statements has yet to be determined.

1. Nature of Organization

Effective April 1, 1995, Manitoba Education, Research and Learning Information Networks (MERLIN) was designated as a Special Operating Agency pursuant to The Special Operating Agencies Financing Authority Act, Cap S185, C.C.S.M. and operates under a charter approved by the Lieutenant Governor in Council. Effective September 25, 2002, the Agency operates as part of Science, Technology, Energy and Mines under the general direction of the Deputy Minister.

The Agency is financed through the Special Operating Agencies Financing Authority (SOAFA). SOAFA has the mandate to hold and acquire assets required for and resulting from Agency operations. It finances the Agency through repayable loans and working capital advances. This financial framework enables the Agency to operate in a business like manner according to public policy expectations.

A Management Agreement between SOAFA and the Minister of Science, Technology, Energy and Mines assigns responsibility to the Agency to manage and account for the Agency related assets and operations on behalf of SOAFA.

The Agency remains bound by relevant legislation and regulations. It is also bound by administrative policy except where specific exemptions have been provided in its charter in order to meet business objectives.

The Agency is economically dependent on the Province of Manitoba as it derives much of its revenue and all of its financing requirements from the Province.

2. Change in Accounting Policies

Effective April 1, 2008 the Agency adopted the following new accounting standards issued by the Canadian Institute of Chartered Accountants (CICA):

Section 1535, Capital Disclosures

Section 1535 establishes standards for disclosing information about an entity's capital and how it is managed. These standards require an entity to disclose its objectives, policies and processes for managing capital, a summary of quantitative data about what it manages as capital and whether it complied with any externally imposed capital requirements to which it is subject and, if not, the consequences of such non-compliance.

Section 3862, Financial Instruments – Disclosures

Section 3862 modifies the disclosure requirements for financial instruments that were included in Section 3861, Financial Instruments – Disclosure and Presentation. The new standards require an entity to provide disclosures in its financial statements that enable users to evaluate the significance of financial instruments on its financial position and performance, the nature and extent of the risks to which it is exposed during the period and at the balance sheet date, and how those risks are managed.

2. Change in Accounting Policies (continued)

Section 3863, Financial Instruments – Presentation

Section 3863 carries forward the presentation requirements of Section 3861, Financial Instruments – Disclosure and Presentation, unchanged.

The above noted new standards have no impact on the recognition, measurement or presentation of financial instruments in the Agency's yearend financial statements

3. Financial Instruments and Financial Risk Management

Financial assets and liabilities are initially recorded at fair value. Measurement in subsequent periods depends on the financial instrument's classification. Financial instruments are classified into one of the following five categories: held for trading; available for sale; held to maturity; loans and receivables; and other financial liabilities. All financial instruments classified as held for trading or available for sale are subsequently measured at fair value with any change in fair value recorded in net earnings and other comprehensive income, respectively. All other financial instruments are subsequently measured at amortized cost.

The financial assets and liabilities of the Agency are classified and measured as follows:

Financial Asset/Liability	**Category**	**Subsequent Measurement**
Cash and funds on deposit and long term investment	Held for trading	Fair value
Accounts receivable	Loans and receivables	Amortized cost
Accounts payable and accrued expenses	Other financial liabilities	Amortized cost

Amortized cost is determined using the effective interest rate method.

Gains and losses on financial instruments subsequently measured at amortized cost are recognized in the statement of earnings and retained earnings in the period the gain or loss occurs. Changes in fair value on financial instruments classified as held for trading are recognized in the statement of earnings and retained earnings for the current period. Changes in fair value on financial instruments classified as available for sale would be recorded in other comprehensive income until realized, at which time they recorded in the statement of earnings and retained earnings.

3. **Financial Instruments and Financial Risk Management** (continued)

Fair value of financial instruments

The fair values of accounts receivable, accounts payable and accrued expenses approximate their carrying values due to their short-term maturity.

Financial risk management - overview

The Agency has exposure to the following risks from its use of financial instruments: credit risk; liquidity risk; market risk; interest risk; and foreign currency risk.

Credit risk

Credit risk is the risk that one party to a financial instrument fails to discharge an obligation and causes financial loss to another party. Financial instruments which potentially subject the Agency to credit risk consist principally of cash and funds on deposit, trust account and accounts receivable.

The maximum exposure of the Agency to credit risk at March 31, 2009 is:

Cash and funds on deposit	$	371
Accounts receivable		622
Long term investment		47
Maximum exposure to credit risk	$	1,040

Cash and funds on deposits and long term investment: The Agency is not exposed to significant credit risk as the cash and term deposits are primarily held by the Minister of Finance.

Accounts receivable: The Agency is not exposed to significant credit risk as payment in full is typically collected when it is due. The Agency establishes an allowance for doubtful accounts that represents its estimate of potential credit losses. The allowance for doubtful accounts is based on management's estimates and assumptions regarding current market conditions, customer analysis and historical payment trends. These factors are considered when determining whether past due accounts are allowed for or written off.

The change in the allowance for doubtful accounts during the year was as follows:

Balance, beginning of year	$	24
Amounts written off in the year		(3)
Balance, end of year	$	21

3. Financial Instruments and Financial Risk Management (continued)

Liquidity risk

Liquidity risk is the risk that the Agency will not be able to meet its financial obligations as they come due.

The Agency manages liquidity risk by maintaining adequate cash balances and by review from the Province of Manitoba to ensure adequate funding will be received to meet the obligations.

Market risk

Market risk is the risk that changes in market prices, such as interest rates and foreign exchange rates, will affect the Agency's income or the fair values of its financial instruments. The significant market risks the Agency is exposed to are interest rate risk and foreign currency risk.

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The interest rate exposure relates to funds on deposit.

The interest rate risk on funds on deposit is considered to be low because of their short-term nature.

Foreign currency risk

Foreign currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Agency is not exposed to significant foreign currency risk as it does not have any financial instruments denominated in foreign currency.

4. Long Term Investment

The Province accepted responsibility for the vacation entitlements earned by the employees of the Agency prior to its designation as a Special Operating Agency, and the severance pay benefits accumulated to March 31, 1998 for certain of the Agency's employees. Accordingly, the Agency recorded a receivable of $47 from the Province of Manitoba for these accumulated benefits. Effective March 31, 2009 the Province of Manitoba paid the receivable balances related to the funding for these liabilities and has placed the amount of $47 into an interest bearing trust account to be held on the Agency's behalf until the cash is required to discharge the related liabilities.

5. Capital Assets

	2009 Cost	2009 Accumulated Amortization	2008 Cost	2008 Accumulated Amortization
Computer hardware	$ 773	$ 249	$ 564	$ 201
Computer software	92	31	81	14
Equipment and furniture	39	16	47	18
Leaseholds	20	6	11	3
	$ 924	$ 302	$ 703	$ 236
Cost less accumulated amortization		$ 622		$ 467

6. Working Capital Advances

These advances are provided to the Agency through the Special Operating Agencies Financing Authority pursuant to the Management Agreement. The Agency has an authorized line of working capital advances of $2.0 million of which $NIL was used at March 31, 2009 (2008 - $NIL).

During the year, the Agency incurred interest charges of $NIL (2008 - $NIL).

7. Accrued Vacation Entitlements

The Agency follows the policy of the Department of Finance to recognize accumulated vacation entitlement liability. The liability is offset by a receivable from the Province of $19, which was the balance as at March 31, 1998. Any subsequent changes to the entitlement are reflected as a current year expense to the Agency. At March 31, 2009, the accrued vacation entitlement was $113 (2008 - $98).

8. Severance Pay Liability

Effective April 1, 1998, the Agency began recording accumulated severance pay benefits for its employees. The amount of severance pay obligations is based on actuarial calculations. The periodic actuarial valuations of these liabilities may determine that adjustments are needed to the actuarial calculations when actual experience is different from that expected and/or because of changes in actuarial assumptions used.

An actuarial report was completed for the severance pay liability as of March 31, 2005. The report provides a formula to update the liability on an annual basis. The Agency's' actuarially determined net liability for accounting purposes as at March 31, 2009 was $84 (2008 - $75). Commencing in the 2006 fiscal year the actuarial loss of $2 is being amortized over the 15 year expected average remaining service life of the employee group.

Significant long-term actuarial assumptions used in the March 31, 2005 valuation, and in the determination of the March 31, 2009 present value of the accrued severance benefit obligation were:

Annual rate of return	
inflation component	2.50%
real rate of return	4.00%
	6.50%
Annual salary increase rates	
annual productivity increase	0.75%
annual general salary increase	3.25%
	4.00%

9. Revenue - Manitoba Education, Citizenship and Youth

The Agency is responsible for the delivery of distance education and technology programs formerly provided through Manitoba Education, Citizenship and Youth. The Agency receives a fee from the Department, established annually and paid quarterly, in exchange for delivery of these services.

10. Commitments

The Agency leases office space under a long-term lease which expires March 31, 2013. The future minimum payments required under this lease are:

2010	$	39
2011		39
2012		39
2013		39

11. Pension Benefits

Employees of the Agency are eligible for pension benefits in accordance with the provisions of the Civil Service Superannuation Act (CSSA), administered by the Civil Service Superannuation Board (CSSB). The CSSA established a defined benefit plan to provide benefits to employees of the Manitoba Civil Service and to participating agencies of the Government, including the Manitoba Education, Research & Learning Information Network, through the Civil Service Superannuation Fund (CSSF).

Effective March 31, 2001, pursuant to an agreement with the Province of Manitoba, the Agency transferred to the Province the pension liability for its employees. Commencing April 1, 2001, the Agency was required to pay to the Province an amount equal to its employees' current pension contributions. The amount paid for 2009 was $48 (2008 - $41). Under this agreement, the Agency has no further pension liability.

12 Capital Disclosures

The Agency's capital consists of retained earnings provided from operations.

The Agency's capital management policy is to maintain sufficient capital to meet its objectives through its retained earnings by managing transfers of surplus funds to the Province of Manitoba; meet short-term capital needs with working capital advances from the Province of Manitoba; and meet long-term capital needs through long-term debt with the Province of Manitoba. There were no changes in the Agency's approach to capital management during the period.

The Agency is not subject to externally imposed capital requirements.

Auditors' Report

To The Special Operating Agencies Financing Authority:

We have audited the balance sheet of **THE MANITOBA SECURITIES COMMISSION**, An Agency of the Special Operating Agencies Financing Authority, Province of Manitoba as at March 31, 2009 and the statements of income and comprehensive income, retained earnings, reserve fund and cash flows for the year then ended. These financial statements are the responsibility of the Commission's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of the Commission as at March 31, 2009 and the results of its operations and its cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

Cash and cash equivalents, end of year	$ 7,813	$ 6,127
Supplementary information:		
Interest received	$ 168	$ 212

The accompanying summary of signficant accounting policies and notes are an integral part of these financial statements.

THE MANITOBA SECURITIES COMMISSION
Summary of Significant Accounting Policies

March 31, 2009

Basis of Reporting

The financial statements have been prepared in accordance with Canadian generally accepted accounting principles.

Capital Assets

Capital assets are recorded at cost and amortized over their estimated lives as follows:

Office equipment	20% straight-line
Furniture and fixtures	20% straight-line
Leasehold improvements	10% straight-line
Computer hardware	20% straight-line
Computer software	20% straight-line

The half-year rule is used in the year of acquisition.

Revenue Recognition

Fees and cost recoveries are recognized when received. Investment income is recorded in accordance with terms of the related investment.

Use of Estimates

The preparation of financial statements in accordance with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingencies at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates.

New Accounting Pronouncements

Recent accounting pronouncements that have been issued but are not yet effective, and have a potential implication for the Commission, are as follows:

Financial Statement Concepts

CICA Handbook Section 1000, Financial Statement Concepts has been amended to focus on the capitalization of costs that truly meet the definition of an asset and de-emphasizes the matching principle.

The revised requirements are effective for annual and interim financial statements relating to fiscal years beginning on or after October 1, 2008. The Commission is currently evaluating the impact of the adoption of this change on the disclosure within its financial statements.

New Accounting Pronouncements (continued)

International Financial Reporting Standards

The AcSB plans to converge Canadian GAAP with International Financial Reporting Standards ("IFRS") over a transition period expected to end in 2011. The impact of the transition to IFRS on the Commission's financial statements has yet to be determined.

1. Nature of Organization

Effective April 1, 1999 the Lieutenant Governor in Council designated the The Manitoba Securities Commission as a special operating agency under The Special Operating Agencies Financing Authority Act (C.C.S.M. c.S185) by Order in Council No. 144/1999. The Order also gave approval to the Special Operating Agencies Financing Authority and the Minister of Consumer and Corporate Affairs, being the Minister responsible for the Commission, at that time, to enter into a management agreement with respect to the Commission.

The Management Agreement between the Financing Authority and the Minister of Consumer and Corporate Affairs assigns responsibility to manage the assets transferred to The Manitoba Securities Commission in delivering regulated services to clients.

2. Change in Accounting Policies

Effective April 1, 2008, the Commission adopted the following new handbook sections issued by the Canadian Institute of Chartered Accountants (CICA):

Section 1535 Capital Disclosures

Section 1535 establishes standards for disclosing information about an entity's capital and how it is managed. These standards require an entity to disclose its objectives, policies and processes for managing capital, a summary of quantitative data about what it manages as capital and whether it complied with any externally imposed capital requirements to which it is subject and, if not, the consequences of such non-compliance.

Section 3862 Financial Instruments – Disclosures

Section 3862 modifies the disclosure requirements for financial instruments that were included in Section 3861, Financial Instruments – Disclosure and Presentation. The new standards require an entity to provide disclosures in its financial statements that enable users to evaluate the significance of financial instruments on its financial position and performance, the nature and extent of the risks to which it is exposed during the period and at the balance sheet date, and how those risks are managed.

Section 3863 Financial Instruments – Presentation

Section 3863 carries forward the presentation requirements of Section 3861, Financial Instruments – Disclosure and Presentation, unchanged.

The above noted new standards have no impact on the recognition, measurement or presentation of financial instruments in the Commission's year end financial statements.

3. Financial Instruments and Financial Risk Management

Financial assets and liabilities are initially recorded at fair value. Measurement in subsequent periods depends on the financial instrument's classification. Financial instruments are classified into one of the following five categories: held for trading; available for sale; held to maturity; loans and receivables; and other financial liabilities. All financial instruments classified as held for trading or available for sale are subsequently measured at fair value with any change in fair value recorded in net earnings and other comprehensive income, respectively. All other financial instruments are subsequently measured at amortized cost. Amortized cost is determined using the effective interest rate method.

Class of Financial Instruments	**Held for Trading**	**Loans and Receivables**	**Other Financial Liabilities**
Cash and short-term deposits	$ 7,813	$ -	$ -
Long-term investments	269	-	-
Restricted short-term deposits	750	-	-
Accounts receivable	-	19	-
Accounts payable and accrued liabilities	-	-	67

Gains and losses on financial instruments subsequently measured at amortized cost are recognized in the statement of earnings and retained earnings in the period the gain or loss occurs. Changes in fair value on financial instruments classified as held for trading are recognized in the statement of earnings and retained earnings for the current period. Changes in fair value on financial instruments classified as available for sale would be recorded in other comprehensive income until realized, at which time they recorded in the statement of earnings and retained earnings.

Fair value of financial instruments

The fair values of accounts receivable, accounts payable and accrued liabilities approximate their carrying values due to their short-term maturity.

Financial risk management - overview

The Commission has exposure to the following risks from its use of financial instruments: credit risk; liquidity risk; market risk; interest risk; and foreign currency risk.

Credit risk

Credit risk is the risk that one party to a financial instrument fails to discharge an obligation and causes financial loss to another party. Financial instruments which potentially subject the Commission to credit risk consist principally of cash and short-term deposits and accounts receivable.

3. **Financial Instruments and Financial Risk Management** (continued)

The maximum exposure of the Agency to credit risk at March 31, 2009 is:

Cash, short-term deposits and long-term investments	$	8,832
Accounts receivable		19
	$	8,851

Cash, short-term deposits and long-term investments: The Commission is not exposed to significant credit risk as the cash and term deposits are primarily held by the Minister of Finance.

Accounts receivable: The Commission is not exposed to significant credit risk as receivables consist of accrued interest owing from the Province of Manitoba and trade amounts owed primarily from other entities within the Government of the Province of Manitoba and payment in full is typically collected when it is due. The Commission establishes an allowance for doubtful accounts that represents its estimate of potential credit losses. The allowance for doubtful accounts is based on management's estimates and assumptions regarding current market conditions, customer analysis and historical payment trends. These factors are considered when determining whether past due accounts are allowed for or written off.

The change in the allowance for doubtful accounts during the year was as follows:

Balance, beginning of the year	$	Nil
Provision for receivable impairment		-
Amounts written off		-
Balance, end of the year	$	Nil

Liquidity risk

Liquidity risk is the risk that the Commission will not be able to meet its financial obligations as they come due.

The Commission manages liquidity risk by maintaining adequate cash balances and by review from the Province of Manitoba to ensure adequate funding will be received to meet the obligations.

Market risk

Market risk is the risk that changes in market prices, such as interest rates and foreign exchange rates, will affect the Commission's income or the fair values of its financial instruments. The significant market risks the Commission is exposed to are interest rate risk and foreign currency risk.

3. Financial Instruments and Financial Risk Management (continued)

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The interest rate exposure relates to funds on deposit.

The interest rate risk on funds on deposit is considered to be low because of their short-term nature.

Foreign currency risk

Foreign currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Commission is not exposed to significant foreign currency risk as it does not have any financial instruments denominated in foreign currency.

4. Cash and Short-term Deposits

The Commission invests all surplus cash in short-term deposits with the Province of Manitoba, which are made up of thirty, sixty and ninety day callable term deposits.

5. Accounts Receivable

	2009	2008
Accrued interest	$ **8**	$ 30
Trade	**11**	-
	$ **19**	$ 30

6. Restricted Short-term Deposits and Long-term Investments

The Commission maintains separate short-term deposits and long-term investments with the Province of Manitoba to fund expenses which may arise with respect to the Reserve Fund (Note 12), as well as funds received related to the Province's funding of vacation and severance pay entitlements prior to April 1, 1999 (Note 7).

7. Receivable from the Province of Manitoba

The receivable from the Province of Manitoba is made up of vacation and severance pay entitlement earned by employees of the Commission prior to creation of the SOA as at April 1, 1999. The Province of Manitoba paid in full the March 31, 2008 receivable balances related to prior years' funding for severance pay and vacation pay liabilities. These payments were placed in an interest bearing trust account on March 30, 2009 to be held on the Commission's behalf until the cash is required to discharge the related liabilities.

8. Capital Assets

	2009		2008	
	Cost	**Accumulated Amortization**	Cost	Accumulated Amortization
Office equipment	**$ 40**	**$ 31**	$ 40	$ 28
Furniture and fixtures	**151**	**138**	149	132
Leasehold improvements	**41**	**7**	41	3
Computer hardware	**139**	**127**	137	123
Computer software	**863**	**818**	863	766
	$ 1,234	**$ 1,121**	$ 1,230	$ 1,052
Cost less accumulated amortization		**$ 113**		$ 178

9. Accrued Vacation Entitlements

The Commission follows the policy of the Department of Finance to recognize the vacation entitlement liability accumulated to March 31, 1999. The liability at this date was offset by a receivable from the Province and was $117 as at March 31, 1999. Any subsequent changes to the entitlement are reflected as a current year expense to the Commission. The accrued vacation entitlement was $239 as of March 31, 2009 (2008 - $239).

10. Severance Pay Liability

Effective April 1, 1999, the Commission began recording accumulated severance pay benefits for its employees. The amount of severance pay obligations is based on actuarial calculations. The periodic actuarial valuations of these liabilities may determine that adjustments are needed to the actuarial calculations when the actual experience is different from that expected and/or because of changes in actuarial assumptions used. The resulting actuarial gains or losses are amortized over the expected average remaining service life of the related employee group.

An actuarial report was completed for the severance pay liability as of March 31, 2005. The report provides a formula to update the liability on an annual basis. The Commission's actuarially determined net liability for accounting purposes as at March 31, 2009 was $215 (2008 - $211). Commencing in the 2006 fiscal year, the actuarial loss of $7 is being amortized over the 15 year expected average remaining service life of the employee group.

Significant long-term actuarial assumptions used in the March 31, 2005 valuation, and in the determination of the March 31, 2009 present value of the accrued severance benefit obligation were:

Annual rate of return	
Inflation component	2.50 %
Real rate of return	4.00 %
	6.50 %
Assumed salary increase rate	
Annual productivity increase	0.75 %
Annual general salary increase	3.25 %
	4.00 %

11. Lease Commitment

The Commission has entered into a lease agreement commencing October 1, 2005 for rental of facilities at 400 St. Mary Avenue, which expires September 30, 2020. Occupancy charges for the year ended March 31, 2009 were $244. Minimum annual lease payments total $236 per year for each of the next five years.

12. Reserve Fund

The Commission has established a Reserve Fund to finance extraordinary expenses for isolated and unanticipated purposes that are regulatory in nature and for changes in market activity that has a negative effect on revenues. The amount of the Reserve Fund has remained unchanged in the current year.

13. Disposition of Surplus Operating Funds

The disposition of surplus operating funds consists of payments made to the Consolidated Revenue Fund of the Province of Manitoba according to Treasury Board Directives.

14. Contingency

The Commission has been named as defendant in one statement of claim. At the time of preparation of these financial statements, the outcome of these claims were undeterminable. The cost of a future settlement, if any, will be reflected as an expense in the year paid.

15. Pension Benefits

Employees of The Manitoba Securities Commission are eligible for pension benefits in accordance with the provisions of the Civil Service Superannuation Act (CSSA), administered by the Civil Service Superannuation Board (CSSB). The CSSA established a defined benefit plan to provide benefits to employees of the Manitoba Civil Service and to participating agencies of the Government, including the Manitoba Securities Commission, through the Civil Service Superannuation Fund (CSSF).

Effective March 31, 2001, pursuant to an agreement with the Province of Manitoba, The Manitoba Securities Commission transferred to the Province the pension liability for its employees.

Commencing April 1, 2001, The Manitoba Securities Commission was required to pay to the Province an amount equal to its employees' current pension contributions. The amount paid for 2009 was $95 (2008 - $92). Under this Agreement, the Manitoba Securities Commission has no further pension liability.

16. Working Capital Advances

These advances are provided to the Commission through the Special Operating Agencies Financing Authority pursuant to the Management Agreement. The Commission has an authorized line of working capital advances of $1.0 million which were unutilize at March 31, 2009 (2008 - $Nil).

The Commission incurred no interest charges during the year (2008 - $Nil).

17. Capital Disclosures

The Commission's capital consists of its reserve fund and retained earnings.

The Commission's capital management policy is to maintain sufficient capital to meet its objectives through its retained earnings by managing transfers of surplus funds to the Province of Manitoba; meet short-term capital needs with working capital advances from the Province of Manitoba; and meet long-term capital needs through long-term debt with the Province of Manitoba. There were no changes in the Commission's approach to capital management during the period.

The Commission is not subject to externally imposed capital requirements.

A Special Operating Agency of Manitoba Education, Citizenship and Youth

MANAGEMENT REPORT

The accompanying financial statements are the responsibility of the management of the Manitoba Text Book Bureau and have been prepared in accordance with Canadian generally accepted accounting principles. In management's opinion, the financial statements have been properly prepared within reasonable limits of materiality, incorporating management's best judgment regarding all necessary estimates and all other data available up to May 22, 2009.

Management maintains internal controls to properly safeguard the Bureau's assets and to provide reasonable assurance that the books and records from which the financial statements are derived accurately reflect all transactions and that established policies and procedures are followed.

The responsibility of the Auditor General is to express an independent opinion on whether the financial statements of the Bureau are fairly presented in accordance with Canadian generally accepted accounting principles. The Auditors' Report outlines the scope of the audit examination and provides the audit opinion.

On behalf of management,

Brenda McKinny
Chief Operating Officer

Denis Labossiere, C.G.A.
Controller

OFFICE OF THE
AUDITOR GENERAL
MANITOBA

AUDITORS' REPORT

To the Legislative Assembly of Manitoba
To the Manitoba Text Book Bureau
To the Special Operating Agencies Financing Authority

We have audited the balance sheet of the Manitoba Text Book Bureau, an agency of the Special Operating Agencies Financing Authority as at March 31, 2009, and the statements of income, comprehensive income and retained earnings and cash flows for the year then ended. These financial statements are the responsibility of the Bureau's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of the Bureau as at March 31, 2009, and the results of its operations and its cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

Notes to the Financial Statements

(in thousands)
For the year ended March 31, 2009

---

1. Nature of operations

In 1931, the Manitoba Text Book Bureau (MTBB) was created as a branch of the Department of Education. It was established to achieve economies of scale and reduce the cost of learning resources for schools in Manitoba.

Effective April 1, 1996, the MTBB was designated as a Special Operating Agency under The Special Operating Agencies Financing Authority Act, Chapter S 185, C.C.S.M. and operates under a charter approved by the Lieutenant-Governor in Council.

The MTBB is financed through the Special Operating Agencies Financing Authority (SOAFA). SOAFA has the mandate to hold and acquire assets required for and resulting from Agency operations. It finances the MTBB through working capital advances. This financial framework enables the MTBB to operate in a business-like manner according to public policy expectations.

A Management Agreement between the Special Operating Agencies Financing Authority and the Minister of Education and Training, being the Minister responsible for the Agency at that time, assigns responsibility to the MTBB to manage and account for the MTBB related assets and operations on behalf of SOAFA.

The MTBB continues to be part of the Department of Education, Citizenship and Youth under the general direction of the Assistant Deputy Minister, School Programs Division, and ultimately the policy direction of the Deputy Minister and Minister.

The MTBB remains bound by relevant legislation and regulations. It is also bound by administrative policy except where specific exemptions have been provided in its charter in order to meet business objectives.

2. Change in Accounting Policies

Effective April 1, 2008, the Agency adopted the following new handbook sections issued by the Canadian Institute of Chartered Accountants (CICA):

Section 1535, *Capital Disclosures*

Section 1535 establishes standards for disclosing information about an entity's capital and how it is managed. These standards require an entity to disclose its objectives, policies, and processes for managing capital, a summary of quantitative data about what it manages as capital, and whether it complied with any externally imposed capital requirements to which it is subject and, if not, the consequences of such non-compliance.

Section 3862, *Financial Instruments – Disclosures*

Section 3862 modifies the disclosure requirements for financial instruments that were included in Section 3861, *Financial Instruments – Disclosure and Presentation*. The new standards require an entity to provide disclosures in its financial statements that enable users to evaluate the significance of financial instruments on its financial position and performance, the nature and extent of the risks to which it is exposed during the period and at the balance sheet date, and how those risks are managed.

Section 3863, *Financial Instruments – Presentation*

Section 3863 carries forward the presentation requirements of Section 3861, Financial Instruments – Disclosure and Presentation, unchanged.

The above-noted new standards have no impact on the recognition, measurement, or presentation of financial instruments in the Agency's year-end financial statements.

Notes to the Financial Statements *(continued)*

(in thousands)
For the year ended March 31, 2009

Section 3031, *Inventories*

Section 3031 Inventories replaces Section 3030 Inventories. It provides more guidance on the measurement and disclosure requirements for inventories. The adoption of Section 3031 did not have an impact on the recognition, measurement, or presentation of inventory in the Agency's year-end financial statements.

3. Significant accounting policies

a) General

These financial statements have been prepared in accordance with Canadian generally accepted accounting principles (GAAP).

b) Use of Estimates

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingencies at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates.

c) Cash and funds on deposit

Cash and funds on deposit include cash on hand and bank balance.

d) Inventories

Inventories are valued using the average unit cost method.

e) Capital assets

Capital assets are recorded at cost in the year of acquisition. Rates and basis of amortization applied to write off the cost of capital assets over their estimated useful lives are as follows:

Office equipment, furniture and video recording equipment	20% declining balance
Computer software and equipment	20% straight line

One-half year's amortization is applied in the year of acquisition.

f) Revenue recognition

Revenue is recognized upon transfer of title to the customer.

g) Capital disclosures

The Agency's capital consists of contributed equity and retained earnings provided from operations.

The Agency's capital management policy is to maintain sufficient capital to meet its objectives through its retained earnings by managing transfers of surplus funds to the Province of Manitoba; meet short-term capital needs with working capital advances from the Province of Manitoba; and meet long-term capital needs through long-term debt with the Province of Manitoba. There were no changes in the Agency's approach to capital management during the period.

The Agency is not subject to externally imposed capital requirements.

Notes to the Financial Statements *(continued)*

(in thousands)
For the year ended March 31, 2009

4. Financial Instruments and Financial Risk Management

Financial assets and liabilities are initially recorded at fair value. Measurement in subsequent periods depends on the financial instrument's classification. Financial instruments are classified into one of the following five categories: held for trading; available for sale; held to maturity; loans and receivables; and other financial liabilities. All financial instruments classified as held for trading or available for sale are subsequently measured at fair value with any change in fair value recorded in net earnings and other comprehensive income, respectively. All other financial instruments are subsequently measured at amortized cost.

The financial assets and liabilities of the Agency are classified and measured as follows:

Financial Asset/Liability	Category	Subsequent Measurement
Cash and funds on deposit	Held for trading	Fair value
Accounts receivable	Loans and receivables	Amortized cost
Long-term investments	Held for trading	Fair value
Accounts payable	Other financial liabilities	Amortized cost
Accrued liabilities	Other financial liabilities	Amortized cost
Working capital advance	Other financial liabilities	Amortized cost
Interest payable – Province of Manitoba	Other financial liabilities	Amortized cost

Amortized cost is determined using the effective interest rate method.

Gains and losses on financial instruments subsequently measured at amortized cost are recognized in the statement of earnings and retained earnings in the period the gain or loss occurs. Changes in fair value on financial instruments classified as held for trading are recognized in the statement of earnings and retained earnings for the current period. Changes in fair value on financial instruments classified as available for sale would be recorded in other comprehensive income until realized, at which time they are recorded in the statement of earnings and retained earnings.

Fair value of financial instruments

The fair values of cash, accounts receivable, long-term investments, accounts payable and accrued liabilities, interest payable, and work capital advance approximate their carrying values due to their short-term maturity.

Financial risk management – overview

The Agency has exposure to the following risks from its use of financial instruments: credit risk; liquidity risk; market risk; interest risk; and foreign currency risk.

Credit risk

Credit risk is the risk that one party to a financial instrument fails to discharge an obligation and causes financial loss to another party. Financial instruments which potentially subject the Agency to credit risk consist principally of cash and term deposits and accounts receivable.

Notes to the Financial Statements *(continued)*

(in thousands)
For the year ended March 31, 2009

The maximum exposure of the Agency to credit risk at March 31, 2009 is:

Cash and funds on deposit	$ 5
Long-term investment	64
Accounts receivable	669
	$ 738

Cash and funds on deposits: The Agency is not exposed to significant credit risk as the cash and term deposits are primarily held by the Minister of Finance.

Long-term investments: The Agency is not exposed to significant credit risk as the long-term investments are primarily held by the Minister of Finance.

Accounts receivable: The Agency is not exposed to significant credit risk as the receivables are primarily with provincially funded school divisions and independent schools, Province of Manitoba departments, and Aboriginal Educational Authorities and payment in full is typically collected when it is due. The Agency establishes an allowance for doubtful accounts that represents its estimate of potential credit losses. The allowance for doubtful accounts is based on management's estimates and assumptions regarding current market conditions, customer analysis and historical payment trends. These factors are considered when determining whether past due accounts are allowed for or written off.

The change in the allowance for doubtful accounts during the year was as follows:

Balance, beginning of the year	$ —
Provision for receivable impairment	31
Amounts written off	—
Balance, end of the year	$ 31

Liquidity risk

Liquidity risk is the risk that the Agency will not be able to meet its financial obligations as they come due.

The Agency manages liquidity risk by maintaining adequate cash balances and by review from the Province of Manitoba to ensure adequate funding will be received to meet the obligations.

Market risk

Market risk is the risk that changes in market prices, such as interest rates and foreign exchange rates, will affect the Agency's income or the fair values of its financial instruments. The significant market risks the Agency is exposed to are interest rate risk and foreign currency risk.

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The interest rate exposure relates to funds on deposit and working capital advances.

The interest rate risk on funds on deposit is considered to be low because of their short-term nature.

Foreign currency risk

Foreign currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Agency is not exposed to significant foreign currency risk as it does not have any financial instruments denominated in foreign currency.

5. Long-term Investment

The Province of Manitoba accepted responsibility for the vacation entitlements earned by the employees of the Agency prior to its designation as SOA, and the severance pay benefits accumulated to March 31, 1998 for certain of the Agency's employees. Accordingly, the Agency recorded a receivable of $64 from the Province of Manitoba for these accumulated benefits. Effective March 31, 2009 the Province of Manitoba paid the receivable balances related to the funding for these liabilities and has placed the amount of $64 into an interest bearing trust account to be held on the Agency's behalf until the cash is required to discharge the related liabilities.

6. Capital assets

	2009		2008	
	Cost	Accumulated Amortization	Cost	Accumulated Amortization
Computer software & equipment	$ 285	$ 256	$ 283	$ 237
Office equipment & furniture	47	29	47	25
Video recording equipment	51	47	51	46
	$ 383	$ 332	$ 381	$ 308
Cost less accumulated amortization		$ 51		$ 73

7. Working capital

The MTBB has an authorized line of working capital advances of $4,000, of which $1,375 was used as of March 31, 2009 ($1,272 – 2008).

8. Severance liability

Effective April 1, 1998, the Agency began recording accumulated severance pay benefits for its employees. The amount of severance pay obligations is based on actuarial calculations. The periodic actuarial valuations of these liabilities may determine that adjustments are needed to the actuarial calculations when actual experience is different from that expected and/or because of changes in actuarial assumptions used. The resulting actuarial gains or losses are amortized over the expected average remaining service life of the related employee group.

An actuarial report was completed for the severance pay liability as of March 31, 2005. The report provides a formula to update the liability on an annual basis. The MTBB's actuarially determined net liability for accounting purposes as at March 31, 2009, was $51 ($47 – 2008). Commencing in the 2006 fiscal year the actuarial gain of $16 is being amortized over the 15 year expected average remaining service life of the employee group.

Significant long-term actuarial assumptions used in the March 31, 2005, valuation, and in the determination of the March 31, 2009, liability, the present value of the accrued severance benefit obligation were:

Annual rate of return	
inflation component	2.50%
real rate of return	4.00%
	6.50%
Assumed salary increase rates	
annual productivity increase	0.75%
annual general salary increase	3.25%
	4.00%

Notes to the Financial Statements *(continued)*

(in thousands)
For the year ended March 31, 2009

9. Contributed equity

SOAFA and the Government of Manitoba entered into a Transfer Agreement in connection with the transfer from Manitoba to SOAFA of assets valued at $5,240 and liabilities of $4,690 required for the continuing operations of the MTBB as at March 31, 1996. The MTBB recorded the balance of $550 (being the value of the net assets) as Manitoba's Contributed Equity in SOAFA as related to the MTBB's operations.

10. Related party transactions

The MTBB is related in terms of common ownership to all Province of Manitoba created Departments, Agencies, and Crown Corporations. The MTBB enters into transactions with these entities in the normal course of business.

11. Pension benefits

Employees of the MTBB are eligible for pension benefits in accordance with the provisions of the Civil Service Superannuation Act (CSSA), administered by the Civil Service Superannuation Board. The CSSA established a defined benefit plan to provide benefits to employees of the Manitoba Civil Service and to participating agencies of the Government, including the MTBB, through the Civil Service Superannuation Fund.

Effective March 31, 2001, pursuant to an agreement with the Province of Manitoba, the MTBB transferred to the Province the pension liability for its employees. Commencing April 1, 2001, the MTBB was required to pay to the Province an amount equal to its employees' current pension contributions. The amount paid for 2009 was $11 ($12 – 2008). Under this agreement, the MTBB has no further pension liability.

12. Public sector compensation

Pursuant to the disclosure required by The Public Sector Compensation Disclosure Act, no remuneration was paid to Advisory Board members. During the fiscal year ended March 31, 2009, the following employees received compensation in excess of $50.

Name	Position	2009	2008
Denis Labossiere	Controller	**$ 76**	$ 63
Brenda McKinny	Chief Operating Officer	**$ 68**	$ 63

CHARTERED ACCOUNTANTS

AUDITORS' REPORT

To the Special Operating Agencies Financing Authority

We have audited the balance sheet of the Materials Distribution Agency, an Agency of the Special Operating Agencies Financing Authority, Province of Manitoba as at March 31, 2009 and the statements of income, comprehensive income and retained earnings and cash flow for the year then ended. These financial statements are the responsibility of the Agency's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of the Agency as at March 31, 2009 and the results of its operations and cash flow for the year then ended in accordance with Canadian generally accepted accounting principles.

The financial statements as at March 31, 2008 and for the year then ended were audited by other auditors, who expressed an opinion without reservation on those financial statements in their report dated April 30, 2008.

NOTES TO FINANCIAL STATEMENTS
(in thousands)
MARCH 31, 2009

1. NATURE OF ORGANIZATION

The Government of Manitoba established a central warehouse operation in 1974. Its mandate is to effectively meet the cost needs of departments and certain boards, commissions and agencies of the Crown, for a variety of commonly used items.

Effective April 1, 1993, Materials Distribution Agency (the "Agency") was designated as a Special Operating Agency pursuant to The Special Operating Agencies Financing Authority Act, Cap. S185, C.C.S.M. and operates under a charter approved by the Lieutenant Governor in Council.

In 1956 Mail Management (Postal Service) was created as a branch of the Manitoba Provincial Government to provide centralized postal management. Effective April 1, 1996 the Postage Service was renamed Mail Management Agency and designated as a Special Operating Agency ("SOA") pursuant to The Special Operating Agencies Financing Authority Act, Cap. S185, C.C.S.M. and operates under a charter approved by the Lieutenant Governor in Council.

Effective April 1, 2005 the operations of the Materials Distribution Agency and the Mail Management Agency were amalgamated. The amalgamated operations have been operating as the Materials Distribution Agency.

The Agency is financed through the Special Operating Agencies Financing Authority (SOAFA). The Financing Authority has the mandate to hold and acquire assets required for and resulting from the Agency's operations. It finances the Agency through repayable loans and working capital advances. This financial framework enables the Agency to operate in a business like manner according to public policy expectations.

A Management Agreement between the Financing Authority and the Minister of Transportation and Government Services assigns responsibility to the Agency to manage and account for Agency-related assets and operations on behalf of the Financing Authority.

The Agency continues to be part of Manitoba Transportation and Government Services under the general direction of the Assistant Deputy Minister, Supply and Services Division, and ultimately the policy direction of the Deputy Minister and Minister.

The Agency remains bound by relevant legislation and regulations. It is also bound by administrative policy except where specific exemptions have been provided in its charter in order to meet business objectives.

The Agency is economically dependent on the Province of Manitoba and the Manitoba Regional Health Authorities deriving most of its revenue and all of its capital financing requirements from the Province. These transactions are recorded at the exchange amount, which is the amount agreed upon by both parties.

2. CHANGE IN ACCOUNTING POLICIES

Effective April 1, 2008, the Agency adopted the following new handbook sections issued by the Canadian Institute of Chartered Accountants (CICA):

Section 1535 Capital Disclosures

Section 1535 establishes standards for disclosing information about an entity's capital and how it is managed. These standards require an entity to disclose its objectives, policies and processes for managing capital, a summary of quantitative data about what it manages as capital and whether it complied with any externally imposed capital requirements to which it is subject and, if not, the consequences of such non-compliance. (See disclosure in Note 3)

2. CHANGE IN ACCOUNTING POLICIES (continued)

Section 3862 Financial Instruments - Disclosures

Section 3862 modifies the disclosure requirements for financial instruments that were included in Section 3861, Financial Instruments – Disclosure and Presentation. The new standards require an entity to provide disclosures in its financial statements that enable users to evaluate the significance of financial instruments on its financial position and performance, the nature and extent of the risks to which it is exposed during the period and at the balance sheet date, and how those risks are managed. (See disclosure in Note 15)

Section 3863 Financial Instruments - Presentation

Section 3863 carries forward the presentation requirements of Section 3861, Financial Instruments – Disclosure and Presentation, unchanged.

The above noted new standards have no impact on the recognition, measurement or presentation of financial instruments in the Agency's year end financial statements.

Section 3031 Inventories

Section 3031 Inventories replaces Section 3030 Inventories. It provides more guidance on the measurement and disclosure requirements for inventories. The adoption of Section 3031 did not have an impact on the recognition, measurement or presentation of inventory in the Agency's year end financial statements.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Reporting

The financial statements have been prepared in accordance with Canadian generally accepted accounting principles (GAAP).

Inventory

Inventory is valued at the lower of cost and net realizable value with the cost being determined on a first-in, first-out basis.

Included in cost of sales is $11,386 (2008 - $9,889) of inventory recognized as an expense during the year.

Capital Assets

Capital assets are recorded at cost and amortized over their estimated useful lives as follows:

Computer equipment	20% straight line
Fixtures	20% straight line
Leasehold improvements	5 years straight line
Office equipment	20% straight line
Production equipment	20% Declining balance
Rental equipment	2 - 5 years straight line
Warehouse equipment	20% Declining balance

Other Assets

Other assets are recorded at cost and amortized as follows:

Computer conversion	5 years straight line
Relocation expenses	10 years straight line

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Revenue Recognition

Warehouse sales are recognized when the products are shipped. Service revenues are recognized based on the provision of services provided.

Capital disclosures

The Agency's capital management policy is to maintain sufficient capital to meet its objectives through its retained earnings by managing transfers of surplus funds to the Province of Manitoba; meet short-term capital needs with working capital advances from the Province of Manitoba; and meet long-term capital needs through long-term debt with the Province of Manitoba. There were no changes in the Agency's approach to capital management during the period. The Agency's capital consists of contributed equity and retained earnings.

The Agency is not subject to externally imposed capital requirements.

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates.

Financial Instruments - recognition and measurement

Financial assets and liabilities are initially recorded at fair value. Measurement in subsequent periods depends on the financial instrument's classification. Financial instruments are classified into one of the following five categories: held for trading; available for sale; held to maturity; loans and receivables; and other financial liabilities. All financial instruments classified as held for trading or available for sale are subsequently measured at fair value with any change in fair value recorded in net earnings and other comprehensive income, respectively. All other financial instruments are subsequently measured at amortized cost.

The Agency has designated its financial instruments as follows:

Cash and short term deposits and long term investments are classified as financial assets held for trading and are measured at fair value with gains and losses recognized in net earnings. Due to the relatively short period to maturity of these financial assets, the carrying values approximate their fair values.

Accounts receivable are classified as loans and receivables. These financial assets are recorded at their amortized cost using the effective interest rate method.

Accounts payable and accrued liabilities are classified as other financial liabilities. These financial liabilities are recorded at their amortized cost using the effective interest rate method.

Gains and losses on financial instruments subsequently measured at amortized cost are recognized in the statement of earnings and retained earnings in the period the gain or loss occurs. Changes in fair value on financial instruments classified as held for trading are recognized in the statement of earnings and retained earnings for the current period. Changes in fair value on financial instruments classified as available for sale would be recorded in other comprehensive income until realized, at which time they are recorded in the statement of earnings and retained earnings.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Fair value of financial instruments

The fair values of accounts receivable and accounts payable and accrued liabilities approximate their carrying values due to their short-term maturity.

4. FINANCING ARRANGEMENTS

The Special Operating Agencies Financing Authority has provided the Agency with an authorized line of working capital of $2,300 of which $nil was used at March 31, 2009.

5. RECEIVABLE FROM PROVINCE OF MANITOBA

The receivable from the Province of Manitoba was for vacation entitlements earned by the employees of the Agency prior to creation of the Special Operating Agency and severance pay benefits prior to April 1, 1998. The balance is comprised of:

	2009	2008
Vacation entitlements	$ -	$ 116
Severance pay benefits	-	296
	$ -	$ 412

The balance was paid by the Province of Manitoba on March 31, 2009. (See Note 7)

6. INVENTORIES

	2009	2008
Medical supplies	$ 607	$ 583
Equipment	30	82
Stationary	439	520
Janitorial	194	230
New furniture	14	70
	$ 1,284	$ 1,485

7. LONG TERM INVESTMENTS

The Province of Manitoba accepted responsibility for the vacation entitlements earned by the employees of the Agency prior to its designation as SOA, and the severance pay benefits accumulated to March 31, 1998 for certain of the Agency's employees. Accordingly, the Agency recorded a receivable of $412 from the Province of Manitoba for these accumulated benefits. Effective March 31, 2009 the Province of Manitoba paid the receivable balances related to the funding for these liabilities and has placed the amount of $412 into a trust account bearing interest at 0.75% and maturing on March 30, 2010 to be held on the Agency's behalf until the cash is required to discharge the related liabilities. However, this is only likely to happen on the dissolution of the Agency. As such, this amount has been classified as a long term asset.

8. CAPITAL ASSETS

	Cost	Accumulated Amortization	Net Book Value 2009	Net Book Value 2008
Computer equipment	$ 226	$ 207	$ 19	$ 3
Fixtures	112	109	3	-
Leasehold improvements	727	710	17	25
Office equipment	64	64	-	-
Production equipment	284	284	-	44
Rental equipment	7,220	5,774	1,446	1,300
Warehouse equipment	804	525	279	269
	$ 9,437	$ 7,673	$ 1,764	$ 1,641

9. OTHER ASSETS

	Cost	Accumulated Amortization	Net Book Value 2009	Net Book Value 2008
Computer conversion	$ 337	$ 307	$ 30	$ 85
Relocation	287	164	123	153
	$ 624	$ 471	$ 153	$ 238

10.SEVERANCE LIABILITY

Effective April 1, 1998, the Agency began recording accumulated severance pay benefits for its employees. The amount of severance pay obligations is based on actuarial calculations. The periodic actuarial valuations of these liabilities may determine that adjustments are needed to the actuarial calculations when actual experience is different from that expected and/or because of changes in actuarial assumptions used. The resulting actuarial gains or losses are amortized over the expected average remaining service life of the related employee group.

An actuarial report was completed for the severance pay liability as of December 31, 2005. The report provides a formula to update the liability on an annual basis. In accordance with the formula, the Agency's actuarially determined net liability for accounting purposes as at March 31, 2009 was $425 (2008 - $379). Commencing in the 2006 fiscal year the actuarial loss of $40 is being amortized over the 15 year expected average remaining service life of the employee group.

Significant long-term actuarial assumptions used in the March 31, 2005 valuation, and in the determination of the March 31, 2009 present value of the accrued severance benefit obligation were:

Annual rate of return	
inflation compontent	2.50%
real rate of return	4.00%
	6.50%
Assumed salary increase rates	
annual productivity increase	0.75%
annual general salary increase	3.25%
	4.00%

11. PENSION BENEFITS

Employees of the Agency are eligible for pension benefits in accordance with the provisions of the Civil Service Superannuation Act (CSSA), administered by the Civil Service Superannuation Board (CSSB). The CSSA established a defined benefit plan to provide benefits to employees of the Manitoba Civil Service and to participating agencies of the Government, including the Agency, through the Civil Service Superannuation Fund (CSSF).

Effective March 31, 2001, pursuant to an agreement with the Province of Manitoba, the Agency transferred to the Province the pension liability for its employees. Commencing April 1, 2001, the Agency was required to pay to the Province an amount equal to its employees' current pension contributions.

The amount paid for 2009 was $433 (2008 - $410). Under this agreement, the Agency has no further pension liability.

12. CONTRIBUTED EQUITY

Loan Authority - April 1, 1993

The SOAFA and the Province of Manitoba entered into a Transfer Agreement respecting the transfer from Manitoba to the Financing Authority of inventories and capital assets valued at $1,464 required for the continuing operation of the Agency as at March 31, 1993. The Agency repaid the debt portion of $732 (being one-half of the value of the assets) and recorded the balance, $732, as Manitoba's contributed equity in the Financing Authority as related to the Agency operations.

Loan Authority - April 1, 1996 MMA

SOAFA and the Province of Manitoba entered into a Transfer Agreement respecting the transfer from Manitoba to the Financing Authority of equipment valued at $102 required for continuing operations of the Mail Management Agency as at March 31, 1996. The Mail Management Agency (now Materials Distribution Agency) repaid the debt portion in the amount of $51 (being one-half of the value of the assets) and recorded the balance of $51 as Manitoba's contributed equity in the Financing Authority as related to the Agency's operations.

Loan Authority - April 1, 1997

SOAFA and the Province of Manitoba entered into a Transfer Agreement respecting the transfer from Manitoba to the Financing Authority for the net assets of the Home Care Equipment and Supply Program valued at $1,027 as at April 1, 1997. The Agency repaid the debt portion of $513 (being one-half of the value of the assets) and recorded the balance of $514 as Manitoba's contributed equity in the Financing Authority as related to the Agency's operations.

13. COMMITMENTS

Leased Premises

On March 24, 2003, the Agency took partial possession of a rental property consisting of 76,067 square feet at 1715 St. James Street, Winnipeg, Manitoba. The lease is for a term of ten years with an additional five year option commencing May 1, 2003. The payments over the next five years are $521 per year.

Rental Agreement

The Agency has not entered into lease agreements with the Province of Manitoba for the four locations that it operates (405 Broadway, Winnipeg; 450 Broadway, Winnipeg; 340 - 9th Street, Brandon; and 25 Tupper Street, Portage La Prairie). As at March 31, 2009 the Agency no longer operates at 405 Broadway, Winnipeg. Occupancy charges for the year ended March 31, 2009 were $16 (2008 - $21)

14. INTEREST RECEIVED

The Agency received interest during the year of $10 (2008 - $17).

15. FINANCIAL INSTRUMENTS - RISK MANAGEMENT

In the normal course of operations the Agency is exposed to various financial risks. The financial risk management objectives and policies are as follows:

Credit risk

Credit risk is the risk that one party to a financial instrument fails to discharge an obligation and causes financial loss to another party. Financial instruments which potentially subject the Agency to credit risk consist principally of cash and short term deposits, accounts receivable and long term investments.

The maximum exposure of the Agency to credit risk at March 31, 2009 is:

Cash and short term deposits	$	910
Accounts receivable		2,424
Long term investments		412
	$	3,746

Cash and short term deposits and long term investments: The Agency is not exposed to significant credit risk as the cash and term deposits are primarily held by the Minister of Finance.

Accounts receivable: The Agency is not exposed to significant credit risk as the nature of the accounts receivable is with related entities and consists of a large client base and payment in full is typically collected when it is due. The Agency establishes an allowance for doubtful accounts that represents its estimate of potential credit losses. The allowance for doubtful accounts is based on management's estimates and assumptions regarding current market conditions, customer analysis and historical payment trends. These factors are considered when determining whether past due accounts are allowed for or written off. The balance in the allowance for doubtful accounts at March 31, 2009 was $96 (2008 - $21)

15. FINANCIAL INSTRUMENTS - RISK MANAGEMENT (continued)

Liquidity risk

Liquidity risk is the risk that the Agency will not be able to meet its financial obligations as they come due.

The Agency manages liquidity risk by maintaining adequate cash balances and by review from the Province of Manitoba to ensure adequate funding will be received to meet the obligations.

Market risk

Market risk is the risk that changes in market prices, such as interest rates and foreign exchange rates, will affect the Agency's income or the fair values of its financial instruments. The significant market risk the Agency is exposed to is interest rate risk.

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The interest rate exposure relates to short term deposits.

The interest rate risk on short term deposits is considered to be low because of their short-term nature.

16. COMPARATIVE FIGURES

Certain of the comparative figures have been reclassified to conform with the classifications used in the current year.

Auditors' Report

To the Special Operating Agencies Financing Authority

We have audited the balance sheet of the Office of the Fire Commissioner, an Agency of the Special Operating Agencies Financing Authority, Province of Manitoba as at March 31, 2009 and the statements of operations and retained earnings, and cash flows for the year then ended. These financial statements are the responsibility of the Agency's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of the Agency as at March 31, 2009 and the results of its operations and its cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

Summary of Significant Accounting Policies

March 31, 2009

Basis of Accounting

The financial statements are presented in accordance with Canadian generally accepted accounting principles (GAAP).

Capital Assets

Buildings, fire engines, other vehicles and air compressors transferred to the SOAFA from the Government of Manitoba on April 1, 1996 were valued at the lower of their amortized cost or estimated market value. All other assets transferred from the Government of Manitoba on April 1, 1996 were valued at their market value.

The Agency provides for amortization of its capital assets on the following basis:

Buildings	5% declining balance
Practical training site	10% declining balance
Equipment	20% declining balance
Fire engines	30% declining balance
Other vehicles	30% declining balance
Air compressors	20% declining balance
Furniture	20% declining balance
Computer equipment and software	30% declining balance

Inventory

Inventory is valued at cost.

Revenue Recognition

The Fires Prevention Act imposes a special assessment on licensed insurers equal to a set percentage of total property insurance premiums.

The Office of the Fire Commissioner collects this levy based on the value of premiums and assessments in respect to property insurance in a calendar year. Levy revenue with respect to the 2008 calendar year will be recognized as revenue in the fiscal year ending March 31, 2009. The levy rate is set at 1.25%.

Codes and standards, conference, and tuition and contract revenue is recognized when earned. Operating grant revenue is recognized as revenue when receivable. Grant revenue received for the purchase of capital assets is deferred and recognized as revenue in the same fiscal year and at the same rate as the amortization expense of the related capital assets.

Capital Disclosures

The Agency's capital consists of contributed capital, Water Bomber Reserve Fund, Canine Training Reserve Fund and retained earnings.

The Agency's capital management policy is to maintain sufficient capital to meet its objectives through its retained earnings by managing transfers of surplus funds to the Province of Manitoba; meet short-term capital needs with working capital advances from the Province of Manitoba; and meet long-term capital needs through long-term debt with the Province of Manitoba. There were no changes in the Agency's approach to capital management during the period.

The Agency is not subject to externally imposed capital requirements.

Use of Estimates

The preparation of financial statements in accordance with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amount of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amount of revenues and expenses during the reported period. These estimates are reviewed periodically, and, as adjustments become necessary, they are reported in earnings in the period in which they become known.

Future Accounting Policy Changes

Recent accounting pronouncements that have been issued but are not yet effective, and have a potential implication for the Agency, are as follows:

Financial Statement Concepts

CICA Handbook Section 1000, Financial Statement Concepts has been amended to focus on the capitalization of costs that truly meet the definition of an asset and de-emphasizes the matching principle.

The revised requirements are effective for annual and interim financial statements relating to fiscal years beginning on or after October 1, 2008. The Agency is currently evaluating the impact of the adoption of this change on the disclosure within its financial statements.

International Financial Reporting Standards

The AcSB plans to converge Canadian GAAP with International Financial Reporting Standards ("IFRS") over a transition period expected to end in 2011. The impact of the transition to IFRS on the Agency's financial statements has yet to be determined.

OFFICE OF THE FIRE COMMISSIONER
An Agency of the Special Operating Agencies Financing Authority
Province of Manitoba
Notes to Financial Statements
(in Thousands)

March 31, 2009

1. Nature of the Office of the Fire Commissioner

Effective April 1, 1996, the Office of the Fire Commissioner was designated as a Special Operating Agency (SOA) under The Special Operating Agencies Financing Authority Act, Cap. S185, C.C.S.M. and operates under a charter approved by the Lieutenant Governor in Council.

Effective April 1, 1996, a Transfer Agreement executed between the Government of Manitoba (Labour) and the Financing Authority, a corporation under The Special Operating Agencies Financing Authority (SOAFA) Act, transferred all assets in the Fires Prevention Fund valued at $11,809 to the Financing Authority.

A Management Agreement executed between the Financing Authority and the Government of Manitoba (Labour) assigned responsibility to the Office of the Fire Commissioner to manage and account for the related assets and operations on behalf of the Financing Authority. The Office itself does not hold title to any assets. Effective April 1, 1996, the Financing Authority established a fund account referred to as the Fires Prevention Fund to hold these assets.

The Office of the Fire Commissioner will continue to be part of the Department of Labour and Immigration and ultimately under the policy direction of the Minister of Labour and Immigration.

The Office of the Fire Commissioner will remain bound by relevant legislation and regulations. It will also remain bound by administrative policy except where specific exemptions have been provided for in its charter in order to meet business objectives.

The Office of the Fire Commissioner is economically dependent on the Province of Manitoba, as it derives most of its revenues from the Fires Prevention Levy.

2. Change in Accounting Policies

Effective April 1, 2008, the Agency adopted the following new handbook sections issued by the Canadian Institute of Chartered Accountants (CICA):

Section 1535 Capital Disclosures

Section 1535 establishes standards for disclosing information about an entity's capital and how it is managed. These standards require an entity to disclose its objectives, policies and processes for managing capital, a summary of quantitative data about what it manages as capital and whether it complied with any externally imposed capital requirements to which it is subject and, if not, the consequences of such non-compliance.

2. Change in Accounting Policies (continued)

Section 3862 Financial Instruments - Disclosures

Section 3862 modifies the disclosure requirements for financial instruments that were included in Section 3861, *Financial Instruments - Disclosure and Presentation*. The new standards require an entity to provide disclosures in its financial statements that enable users to evaluate the significance of financial instruments on its financial position and performance, the nature and extent of the risks to which it is exposed during the period and at the balance sheet date, and how those risks are managed.

Section 3863 Financial Instruments - Presentation

Section 3863 carries forward the presentation requirements of Section 3861, *Financial Instruments - Disclosure and Presentation*, unchanged.

The above noted new standards have no impact on the recognition, measurement or presentation of financial instruments in the Agency's year end financial statements.

3. Financial Instruments and Financial Risk Management

Financial assets and liabilities are initially recorded at fair value. Measurement in subsequent periods depends on the financial instrument's classification. Financial instruments are classified into one of the following five categories: held for trading; available for sale; held to maturity; loans and receivables; and other financial liabilities. All financial instruments classified as held for trading or available for sale are subsequently measured at fair value with any change in fair value recorded in net earnings and other comprehensive income, respectively. All other financial instruments are subsequently measured at amortized cost.

The financial assets and liabilities of the Agency are classified and measured as follows:

Financial Asset/Liability	Category	Subsequent Measurement
Cash and short-term investments	Held for trading	Fair value
Accounts receivable	Loans and receivables	Amortized cost
Accrued interest	Loans and receivables	Amortized cost
Due from Province of Manitoba	Loans and receivables	Amortized cost
Long term investment	Held for trading	Fair value
Accounts payable	Other financial liabilities	Amortized cost
Accrued liabilities	Other financial liabilities	Amortized cost

Amortized cost is determined using the effective interest rate method.

3. Financial Instruments and Financial Risk Management (continued)

Gains and losses on financial instruments subsequently measured at amortized cost are recognized in the statement of operations and retained earnings in the period the gain or loss occurs. Changes in fair value on financial instruments classified as held for trading are recognized in the statement of operations and retained earnings for the current period. Changes in fair value on financial instruments classified as available for sale would be recorded in other comprehensive income until realized, at which time they recorded in the statement of operations and retained earnings.

Fair Value of Financial Instruments

The fair values accounts receivable, accrued interest, due from Province of Manitoba, accounts payable and accrued liabilities approximate their carrying values due to their short-term maturity.

Financial Risk Management - Overview

The Agency has exposure to the following risks from its use of financial instruments: credit risk; liquidity risk; market risk; interest risk; and foreign currency risk.

Credit Risk

Credit risk is the risk that one party to a financial instrument fails to discharge an obligation and causes financial loss to another party. Financial instruments which potentially subject the Agency to credit risk consist principally of cash and term deposits and accounts receivable.

The maximum exposure of the Agency to credit risk at March 31, 2009 is:

Cash and short-term investments	$ 7,388
Accounts receivable	1,803
Long term investment	559
	$ 9,750

Cash, short-term investments and long term investment: The Agency is not exposed to significant credit risk as the cash and term deposits are primarily held by the Minister of Finance.

Accounts receivable: The Agency is not exposed to significant credit risk as the majority of the receivables are due from other reliable organizations and payment in full is typically collected when it is due. The Agency establishes an allowance for doubtful accounts that represents its estimate of potential credit losses. The allowance for doubtful accounts is based on management's estimates and assumptions regarding current market conditions, customer analysis and historical payment trends. These factors are considered when determining whether past due accounts are allowed for or written off.

3. Financial Instruments and Financial Risk Management (continued)

The change in the allowance for doubtful accounts during the year was as follows:

Balance, beginning of the year	$ 2
Amounts written off	(2)
Balance, end of the year	$ -

Liquidity Risk

Liquidity risk is the risk that the Agency will not be able to meet its financial obligations as they come due.

The Agency manages liquidity risk by maintaining adequate cash balances and by review from the Province of Manitoba to ensure adequate funding will be received to meet the obligations.

Market Risk

Market risk is the risk that changes in market prices, such as interest rates and foreign exchange rates, will affect the Agency's income or the fair values of its financial instruments. The significant market risks the Agency is exposed to are interest rate risk and foreign currency risk.

Interest Rate Risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The interest rate exposure relates to short-term investments.

The interest rate risk on short-term investments is considered to be low because of their short-term nature.

Foreign Currency Risk

Foreign currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Agency is not exposed to significant foreign currency risk as it does not have any financial instruments denominated in foreign currency.

4. Short Term Investments

The short term investment balance represents funds on deposit with the Department of Finance of the Province of Manitoba with maturities of less than one (1) year.

5. Accounts Receivable

The accounts receivable balance is made up of the following:

	2009	2008
Insurance Branch of Department of Consumer & Corporate Affairs	$ 182	$ 288
Office of Critical Infrastructure Protection and Emergency Preparedness	1,090	912
National Resources Canada	176	71
Manitoba Mutual Aid Grant	130	-
Manitoba STEM	3	30
Manitoba Health	110	110
Other	112	54
	1,803	1,465
Less: Allowance for doubtful accounts	-	(2)
	$ 1,803	$ 1,463

6. Long Term Investment

The Province of Manitoba accepted responsibility for the vacation entitlements earned by the employees of the Agency prior to its designation as SOA, and the severance pay benefits accumulated to March 31, 1998 for certain of the Agency's employees. Accordingly, the Agency recorded a receivable of $559 ($311 for severance pay benefits and $248 for vacation entitlements) from the Province of Manitoba for these accumulated benefits. Effective March 31, 2009 the Province of Manitoba paid the receivable balances related to the funding for these liabilities and has placed the amount of $559 into an interest bearing trust account to be held on the Agency's behalf until the cash is required to discharge the related liabilities.

7. Capital Assets

	Opening Balance	Additions	Disposals	Closing Balance

Total amortization	$ 6,216	$ -	$ 853	$ 7,069
Net capital assets	$ 6,129			$ 6,566

8. Severance Liability

Effective April 1, 1998, the Office of the Fire Commissioner began recording accumulated severance pay benefits for its employees. The amount of severance pay obligations is based on actuarial calculations. The periodic actuarial valuations of these liabilities may determine that adjustments are needed to the actuarial calculations when actual experience is different from that expected and/or because of changes in actuarial assumptions used.

An actuarial report was completed for the severance pay liability as of March 31, 2005. The report provides a formula to update the liability on an annual basis. The Agency's' actuarially determined net liability for accounting purposes as at March 31, 2009 was $427 (2008 - $393). Commencing in the 2006 fiscal year the actuarial loss of $81 is being amortized over the 15 year expected average remaining service life of the employee group.

Significant long-term actuarial assumptions used in the March 31, 2005 valuation, and in the determination of the March 31, 2009 present value of the accrued severance benefit obligation were:

Annual rate of return	
inflation component	2.50%
real rate of return	4.00%
	6.50%
Annual salary increase rates	
annual productivity increase	0.75%
annual general salary increase	3.25%
	4.00%

9. Contributed Capital

In consideration of the transfer of said assets effective April 1, 1996, the SOAFA shall:

a) not incur or repay to the Government of Manitoba any debt relative to the assets as described in the balance sheet prepared as of March 31, 1996 and verified by the Department of Finance; and

b) record the balance of $11,038 (being the balance of the net assets as described in the balance sheet prepared as of March 31, 1996 and verified by the Department of Finance) as Manitoba's equity in the Financing Authority as related to the Agency's operations.

Due to a change in accounting policy, buildings were being amortized over 40 years as opposed to 30 years. This has resulted in a revaluation of buildings as at April 1, 1996. The value of buildings and contributed equity has increased $241 as at April 1, 1996 to $11,279.

10. New Search and Rescue (SAR) Initiative (NIF)

On a quarterly basis, the Office of the Fire Commissioner applies for a grant from the National Search and Rescue Secretariat of the Department of National Defence. The purpose of this grant is to enhance Manitoba search and rescue capabilities by developing the volunteer search and rescue system aimed at northern and remote areas of Manitoba.

The New SAR Initiative (NIF) Grant line item reflects the grant received for the year ended March 31, 2009 of $34 (nil in 2008).

11. Joint Emergency Preparedness Program (JEPP) Grant

The Office of the Fire Commissioner applies for grants from the Office of Critical Infrastructure Protection and Emergency Preparedness. The two purposes of these grants are to enhance the Province of Manitoba's ability to respond to hazardous material and heavy urban search and rescue emergency responses through the provision of equipment and training.

JEPP operating grant revenue for the year ended March 31, 2009 is $668 ($404 in 2008). An amount of $142 was taken into revenue from the deferred revenue account for the amortization of the JEPP assets for the year ended March 31, 2009 ($129 in 2008).

JEPP capital assets in the amount of $165 have been purchased in the year ended March 31, 2009 ($236 in 2008). JEPP deferred revenue is equal to the net book value of assets purchased with JEPP capital grants. JEPP deferred revenue as at March 31, 2009 is $648 ($626 in 2008).

12. Water Bomber Reserve Fund

The Agency received approval from Treasury Board in Fiscal 2005 to establish a special reserve fund for water bomber fire suppression activities. This fund is capped at an amount of $200 and will be utilized to cover the costs associated with water bomber deployment for non-forest fire incidents occurring on Rural Municipality property. As at March 31, 2009, the Agency has allocated a total of $200 to this fund from its retained earnings account.

13. Canine Training Reserve Fund

The Agency established a special reserve fund for replacing and training a rescue dog. The total cost to train a dog is estimated at $40 and the average time a dog spends in service is six years. In March 2008, the Agency allocated $7.5 to this fund from its retained earnings. A final allocation of $7.5 was made this year to cap the fund at $40. In the year after the fund is capped, an annual allowance will be included in the Agency's operating budget. Once this fund has been used it will be discontinued.

14. Commitments and Contingencies

The Office of the Fire Commissioner as tenant has entered into a Lease Agreement with the City of Brandon as Landlord for the land upon which the practical training facility has been constructed. The term of the lease expires May 31, 2012. Minimum annual rent is $11 due in equal monthly instalments, plus all operating costs with respect to the subject land.

Office equipment leases exist for three copy machines. The longest lease expires December 31, 2010.

The Office of the Fire Commissioner has entered into leases on a fleet of 38 vehicles.

These three categories of leases give rise to commitments as follows:

2010	$	193
2011		163
2012		133
2013		115
2014		38

15. Pension Benefits

Employees of the Office of the Fire Commissioner are eligible for pension benefits in accordance with the provisions of the Civil Service Superannuation Act, administered by the Civil Service Superannuation Board (CSSB). The CSSA established a defined benefit plan to provide benefits to employees of the Manitoba Civil Service and to participating agencies of the Government, including the Office of the Fire Commissioner, through the Civil Service Superannuation Fund (CSSF).

Effective March 31, 2001, pursuant to an agreement with the Province of Manitoba the Office of the Fire Commissioner transferred to the Province the pension liability for its employees. Commencing April 1, 2001, the Office of the Fire Commissioner was required to pay to the Province an amount equal to its employees' current pension contributions. The amount paid for March 31, 2009 was $206 ($191 in 2008). Under this agreement, the Office of the Fire Commissioner has no further pension liability.

16. Obligation under Capital Lease

	2009	2008
Polaris Leasing Ltd., capital lease due November 1, 2013, interest at 7.318% per year with annual principal and interest payments of $43 for the first 4 years and a final payment of $79 in 2014.	$ 199	$ -
Current portion of obligation under capital lease	28	-
	$ 171	$ -

Obligations under capital lease are secured by the equipment under lease.

The future minimum lease payments for the next five years are as follows:

2010	$ 28
2011	30
2012	32
2013	35
2014	74
	$ 199

Management's Responsibility for Financial Reporting

The accompanying financial statements are the responsibility of the management of Organization and Staff Development and have been prepared in accordance with Canadian generally accepted accounting principles. In management's opinion, the financial statements have been properly prepared within reasonable limits of materiality, incorporating management's best judgement regarding all necessary estimates and all other data available to May 21, 2009.

Management maintains internal controls to properly safeguard the assets and to provide reasonable assurance that the books and records from which the financial statements are derived accurately reflect all transactions, and that established policies and procedures are followed.

The responsibility of the Auditor General is to express an independent opinion on whether the financial statements of Organization and Staff Development are fairly represented in accordance with Canadian generally accepted accounting principles. The Auditor's Report outlines the scope of the audit examination and provides the audit opinion.

On behalf of Management,

Organization and Staff Development

Anna Schmidt, Director
May 21, 2009

OFFICE OF THE
AUDITOR GENERAL
MANITOBA

AUDITORS' REPORT

To the Legislative Assembly of Manitoba
To Organization and Staff Development
To the Special Operating Agencies Financing Authority

We have audited the balance sheet of Organization and Staff Development, an Agency of The Special Operating Agencies Financing Authority as at March 31, 2009, and the statements of operations and retained earnings and cash flows for the year then ended. These financial statements are the responsibility of the Agency's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of the Agency as at March 31, 2009, and results of its operations and changes in its cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

ORGANIZATION AND STAFF DEVELOPMENT - AN AGENCY OF THE SPECIAL OPERATING AGENCIES FINANCING AUTHORITY

Notes to Financial Statements

March 31, 2009

(000's)

1. Nature of Organization

Effective April 1, 1994, Organization and Staff Development of the Civil Service Commission was designated by regulation as a Special Operating Agency under The Special Operating Agencies Financing Authority Act and operates under a charter approved by the Lieutenant Governor in Council. Its mandate is to provide consulting and training services to support the implementation of the government's human resource policies and priorities.

The Agency is financed through the Special Operating Agencies Financing Authority. The Financing Authority has the mandate to hold and acquire assets required for and resulting from Agency operations. It finances the Agency through repayable loans and working capital advances. This financial framework enables the Agency to operate in a business-like manner according to public policy expectations.

A Management Agreement between the Financing Authority and the Minister responsible for the Civil Service Commission assigns responsibility to the Agency to manage and account for the Agency related assets and operations on behalf of the Financing Authority.

Organization and Staff Development continues to be part of the Civil Service Commission under the general direction of the Commissioner and ultimately the policy direction of the Minister responsible for The Civil Service Act.

Organization and Staff Development remains bound by relevant legislation and regulations. It is also bound by administrative policy except where specific exemptions have been provided for in its charter in order to meet business objectives.

Organization and Staff Development is economically dependant on the Province of Manitoba. Currently, the Agency derives most of its revenue from the Province of Manitoba and all of its capital financing requirements through the Financing Authority.

2. New Accounting Policies

Effective April 1, 2008 the Agency adopted the following new accounting standards issued by the Canadian Institute of Chartered Accountants (CICA):

Section 1535 Capital Disclosures

Section 1535 establishes standards for disclosure information about an entity's capital and how it is managed. These standards require an entity to disclose its objectives, policies and processes for managing capital, a summary of quantitative data about what it manages as capital and whether it complied with any externally imposed capital requirements to which it is subject and, if not, the consequences of such non-compliance.

2. New Accounting Policies (continued)

Section 3862 Financial Instruments – Disclosures

Section 3862 modifies the disclosure requirements for financial instruments that were included in Section 3861, Financial Instruments – Disclosure and Presentation. The new standards require an entity to provide disclosures in its financial statements that enable users to evaluate the significance of financial instruments on its financial position and performance, the nature and extent of the risks to which it is exposed during the period and at the balance sheet date, and how those risks are managed.

Section 3863 Financial Instruments – Presentation

Section 3863 carries forward the presentation requirements of Section 3861, Financial Instruments – Disclosure and Presentation, unchanged.

The above-noted new standards have no impact on the recognition, measurement or presentation of financial instruments in the Agency's yearend financial statements.

Section 3031 Inventories

Section 3031 Inventories replaces Section 3030 Inventories. It provides more guidance on the measurement and disclosure requirements for inventories. The adoption of Section 3031 did not have an impact on the recognition, measurement or presentation of inventory in the Agency's yearend financial statements.

3. Significant Accounting Policies

Basis of Reporting

The financial statements of the Agency are presented in accordance with Canadian generally accepted accounting principles.

Revenue Recognition

Training and consulting revenue is recorded on an accrual basis by specific project.

Use of Estimates

In preparing the Agency's financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements and reported amounts of revenue and expenses during the period. Actual results could differ from these estimates.

Inventories

Inventories are valued at the lower of cost and net realizable value.

3. Significant Accounting Policies (continued)

Capital Assets

Rates of amortization applied to write off the cost of capital assets over their estimated life are as follows:

Office equipment	20% declining balance
Furniture and fixtures	20% declining balance
Computer equipment	20% straight-line

In the year of acquisition, amortization is calculated at one half of the rate indicated above.

Capital Disclosures

The Agency's capital consists of retained earnings provided from operations. The Agency's capital management policy is to maintain sufficient capital to meet its objectives through its retained earnings by managing transfers of surplus funds to the Province of Manitoba; meet short-term capital needs with working capital advances from the Province of Manitoba; and meet long-term capital needs through long-term debt with the Province of Manitoba. There were no changes in the Agency's approach to capital management during the period.

The Agency is not subject to externally imposed capital requirements.

New Accounting Pronouncements

Recent accounting pronouncements that have been issued but are not yet effective, and have a potential implication for the Agency, are as follows:

Financial Statement Concepts

CICA Handbook Section 1000, Financial Statement Concepts has been amended to focus on the capitalization of costs that truly meet the definition of an asset and de-emphasizes the matching principle.

The revised requirements are effective for annual and interim financial statements relating to fiscal years beginning on or after October 1, 2008. The Agency is currently evaluating the impact of the adoption of this change on the disclosure within its financial statements.

International Financial Reporting Standards

The AcSB plans to converge Canadian GAAP with International Financial Reporting Standards ("IFRS") over a transition period expected to end in 2011. The impact of the transition to IFRS on the Agency's financial statements has yet to be determined.

4. Financial Instruments and Financial Risk Management

Financial assets and liabilities are initially recorded at fair value. Measurement in subsequent periods depends on the financial instrument's classification. Financial instruments are classified into one of the following five categories: held for trading; available for sale; held to maturity; loans and receivables; and other financial liabilities. All financial instruments classified as held for trading or available for sale are subsequently measured at fair value with any change in fair value recorded in net earnings and other comprehensive income, respectively. All other financial instruments are subsequently measured at amortized cost. The financial assets and liabilities of the Agency are classified and measured as follows:

Financial Asset/Liability	Category	Subsequent Measurement
Cash and bank	Held for trading	Fair value
Short term investments	Held for trading	Fair value
Accounts receivable	Loans and receivables	Amortized cost
Long term investment	Held for trading	Fair value
Accounts payable and accrued liabilities	Other financial liabilities	Amortized cost

Amortized cost is determined using the effective interest rate method.

Gains and losses on financial instruments subsequently measured at amortized cost are recognized in the statement of earnings and retained earnings in the period the gain or loss occurs. Changes in fair value on financial instruments classified as held for trading are recognized in the statement of earnings and retained earnings for the current period. Changes in fair value on financial instruments classified as available for sale would be recorded in other comprehensive income until realized, at which time they recorded in the statement of earnings and retained earnings.

Fair Value of Financial Instruments

The fair values accounts receivable, and accounts payable and accrued liabilities approximate their carrying values due to their short-term maturity.

Financial Risk Management - Overview

The Agency has exposure to the following risks from its use of financial instruments: credit risk; liquidity risk; market risk; interest risk; and foreign currency risk.

4. Financial Instruments and Financial Risk Management (continued)

Credit Risk

Credit risk is the risk that one party to a financial instrument fails to discharge an obligation and causes financial loss to another party. Financial instruments which potentially subject the Agency to credit risk consist principally of cash and term deposits and accounts receivable.

The maximum exposure of the Agency to credit risk at March 31, 2009 is:

Cash and bank	$	203
Short-term investments - Province of Manitoba		460
Accounts receivable		222
Long term investment		39
	$	924

Cash and bank, short-term investments and long term investment: The Agency is not exposed to significant credit risk as the cash and term deposits are primarily held by the Minister of Finance.

Accounts receivable: The Agency is not exposed to significant credit risk as the majority of the receivables are due from other reliable organizations and payment in full is typically collected when it is due. The Agency establishes an allowance for doubtful accounts that represents its estimate of potential credit losses. The allowance for doubtful accounts is based on management's estimates and assumptions regarding current market conditions, customer analysis and historical payment trends. These factors are considered when determining whether past due accounts are allowed for or written off.

Management has determined that no allowance for doubtful accounts is required as at March 31, 2009.

Liquidity Risk

Liquidity risk is the risk that the Agency will not be able to meet its financial obligations as they come due.

The Agency manages liquidity risk by maintaining adequate cash balances and by review from the Province of Manitoba to ensure adequate funding will be received to meet the obligations.

Market Risk

Market risk is the risk that changes in market prices, such as interest rates and foreign exchange rates, will affect the Agency's income or the fair values of its financial instruments. The significant market risks the Agency is exposed to are interest rate risk and foreign currency risk.

4. Financial Instruments and Financial Risk Management (continued)

Interest Rate Risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The interest rate exposure relates to short-term investments.

The interest rate risk on short-term investments is considered to be low because of their short-term nature.

Foreign Currency Risk

Foreign currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Agency is not exposed to significant foreign currency risk as it does not have any financial instruments denominated in foreign currency.

5. Working Capital

The Agency has an authorized line of working capital advances of $120 which was unused and available at March 31, 2009.

6. Long Term Investment

The Province of Manitoba accepted responsibility for the vacation entitlements earned by the employees of the Agency prior to its designation as a Special Operating Agency, and the severance pay benefits accumulated to March 31, 1998 for certain of the Agency's employees. Accordingly, the Agency recorded a receivable of $39 from the Province of Manitoba for these accumulated benefits. Effective March 31, 2009 the Province of Manitoba paid the receivable balances related to the funding for these liabilities and has placed the amount of $39 into an interest bearing trust account to be held on the Agency's behalf until the cash is required to discharge the related liabilities.

7. Capital Assets

	2009			2008		
	Cost	Accumulated Amortization	Net Book Value	Cost	Accumulated Amortization	Net Book Value
Office equipment	$ 6	$ 3	$ 3	$ 6	$ 3	$ 3
Furniture and fixtures	50	24	26	50	19	31
Computer equipment	20	13	7	14	12	2
	$ 76	$ 40	$ 36	$ 70	$ 34	$ 36

8. Severance Liability

Effective April 1, 1998, the Agency began recording accumulated severance pay benefits for its employees. The amount of severance pay obligations is based on actuarial calculations. The periodic actuarial valuations of these liabilities may determine that adjustments are needed to the actuarial calculations when actual experience is different from that expected and/or because of changes in actuarial assumptions used.

An actuarial report was completed for the severance pay liability as of March 31, 2005. The report provides a formula to update the liability on an annual basis. The Agency's actuarially determined net liability for accounting purposes as at March 31, 2009 was $58 (2008 - $52). Commencing in the 2006 fiscal year the actuarial gain of $15 is being amortized over the 15 year expected average remaining service life of the employee group.

Significant long-term actuarial assumptions used in the March 31, 2005 valuation, and in the determination of the March 31, 2009 present value of the accrued severance benefit obligation were:

Annual rate of return	
inflation component	2.50%
real rate of return	4.00%
	6.50%
Annual salary increase rates	
annual productivity increase	0.75%
annual general salary increase	3.25%
	4.00%

9. Related Party Transactions

The Agency is related in terms of common ownership to all Province of Manitoba created Departments, Agencies and Crown Corporations. The Agency enters into transactions with these entities in the normal course of business.

10. Contingencies

A potential claim has been filed against the Agency for breach of an agreement. In the opinion of management and legal counsel, the amount of the potential loss can not be estimated, and the outcome of the claim is not determinable. Should any loss result from the resolution of this claim, such loss will be charged to operations in the year of resolution.

(000's)

11. Pension Benefits

Employees of Organization and Staff Development are eligible for pension benefits in accordance with the provisions of the Civil Service Superannuation Act ("CSSA"), administered by the Civil Service Superannuation Board. The CSSA established a defined benefit plan to provide benefits to employees of the Manitoba Civil Service and to participating agencies of the Government, including Organization and Staff Development, through the Civil Service Superannuation Fund.

Effective March 31, 2001, pursuant to an agreement with the Province of Manitoba, the Agency transferred to the Province of Manitoba the pension liability for its employees. Commencing April 1, 2001, the Agency was required to pay to the Province of Manitoba an amount equal to its employees' current pension contributions. The amount paid for 2009 was $25 ($16 in 2008). Under this agreement, the Agency has no further pension liability.

Auditors' Report

To the Special Operating Agencies Financial Authority:

We have audited the balance sheet of Pineland Forest Nursery, an Agency of the Special Operating Agencies Financial Authority as at March 31, 2009 and the statements of earnings (loss) and comprehensive income and deficit and cash flows for the year then ended. These financial statements are the responsibility of the Nursery's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of the Nursery as at March 31, 2009 and the results of its operations and its cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

The accompanying notes are an integral part of these financial statements

1. Nature of the organization

In 1953, Pineland Provincial Forestry Nursery (the "Nursery") was established to meet all the nursery stock requirements of the Province at one location. Prior to 1953 there were several small nurseries located throughout the Province. Effective April 1, 1995, Pineland Forest Nursery was designated as a special operating agency under The Special Operating Agencies Financing Authority Act (C.C.S.M. c.S185) and operates under a charter approved by the Lieutenant Governor in Council.

A management agreement between the Financing Authority and the Minister of Conservation assigns responsibility to the Nursery to manage and account for the agency related assets and operations on behalf of the Financing Authority. Pineland Forest Nursery continues to be part of Manitoba Conservation under the general direction of the Assistant Deputy Minister of Conservation Programs and ultimately the policy direction of the Deputy Minister and the Minister. Pineland Forest Nursery remains bound by relevant legislation and regulations. It is also bound by administrative policy, except where specific exemptions have been provided for in its charter in order to meet business objectives.

2. Change in accounting policies

Effective April 1, 2008, the Nursery adopted the following new handbook sections issued by the Canadian Institute of Chartered Accountants (CICA):

Section 1535 Capital Disclosures

Section 1535 establishes standards for disclosing information about an entity's capital and how it is managed. These standards require an entity to disclose its objectives, policies and processes for managing capital, a summary of quantitative data about what it manages as capital and whether it complied with any externally imposed capital requirements to which it is subject and, if not, the consequences of such non-compliance.

Section 3862 Financial Instruments – Disclosures

Section 3862 modifies the disclosure requirements for financial instruments that were included in Section 3861, Financial Instruments – Disclosure and Presentation. The new standards require an entity to provide disclosures in its financial statements that enable users to evaluate the significance of financial instruments on its financial position and performance, the nature and extent of the risks to which it is exposed during the period and at the balance sheet date, and how those risks are managed.

Section 3863 Financial Instruments – Presentation

Section 3863 carries forward the presentation requirements of Section 3861, Financial Instruments – Disclosure and Presentation, unchanged.

The above noted new standards have no impact on the recognition, measurement or presentation of financial instruments in the Nursery's year-end financial statements.

Section 3031 Inventories

Section 3031 Inventories replaces Section 3030 Inventories. It provides more guidance on the measurement and disclosure requirements for inventories. The adoption of Section 3031 did not have an impact on the recognition, measurement or presentation of inventory in the Nursery's year-end financial statements.

3. Significant accounting policies

The financial statements of the Nursery have been prepared in accordance with Canadian generally accepted accounting principles and include the following significant accounting policies.

Inventory

Supplies inventory is valued at the lower of cost and replacement cost.

3. Significant accounting policies *(Continued from previous page)*

Property, plant and equipment

Property, plant and equipment are recorded at cost. Amortization is provided using the declining balance method at rates intended to amortize the cost of assets over their estimated useful lives.

	Rate
Greenhouses, coldframes, freezers, holding area, minor service buildings, major pump-house, major service buildings, propane conversion	10%
Equipment	20-30%

Amortization on current year additions is pro-rated on the length of time in use in the current year.

Revenue recognition

Revenue is recognized on a percentage of completion basis. Any excess of revenue recorded on a percentage of completion basis over amounts billed is recorded as unbilled revenue. Any excess of amounts billed over revenue recorded on a percentage of completion basis is recorded as unearned revenue.

Measurement uncertainty

The preparation of financial statements in conformity with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Accounts receivable are stated after evaluation as to their collectability and an appropriate allowance for doubtful accounts is provided where considered necessary. Inventory is evaluated and is stated at the lower of the cost and the net realizable value. Amortization is based on the estimated useful lives of of property, plant and equipment.

These estimates and assumptions are reviewed periodically and, as adjustments become necessary they are reported in earnings in the periods in which they become known.

Accrued vacation entitlement

The Nursery follows the policy of the Department of Finance to recognize the vacation entitlement liability accumulated to March 31, 1995. The liability at this date is offset by a receivable from the Province and was $99,000 as at March 31, 1995. Any subsequent changes to the entitlement are reflected as a current year expense to the Nursery. The accrued vacation entitlement was $123,912 as of March 31, 2009 (2008 - $128,000) and is included in accounts payable and accruals.

Donated materials and services

Donated materials and services are recorded in the accounts at their fair value. Fair value is based on the amounts that would be paid if these materials and services were purchased in the normal course of business. No amount has been included in cases when fair value could not be reasonably estimated.

Capital disclosures

The Nursery's capital consists of contributed surplus and retained earnings (deficit) provided from operations.

The Nursery's capital management policy is to maintain sufficient capital to meet its objectives through its retained earnings by managing transfers of surplus funds to the Province of Manitoba; meet short-term capital needs with working capital advances from the Province of Manitoba; and meet long-term capital needs through long-term debt with the Province of Manitoba. There were no changes in the Nursery's approach to capital management during the period.

The Nursery is not subject to externally imposed capital requirements.

4. Financial instruments and financial risk management

Financial assets and liabilities are initially recorded at fair value. Measurement in subsequent periods depends on the financial instrument's classification. Financial instruments are classified into one of the following five categories: held for trading; available for sale; held to maturity; loans and receivables; and other financial liabilities. All financial instruments classified as held for trading or available for sale are subsequently measured at fair value with any change in fair value recorded in net earnings and other comprehensive income, respectively. All other financial instruments are subsequently measured at amortized cost.

The financial assets and liabilities of the Nursery are classified and measured as follows:

Financial Asset/Liability	Category	Subsequent Measurement
Accounts receivable	Loans and receivables	Amortized cost
Long-term investments	Held for trading	Fair value
Working capital advances	Held for trading	Fair value
Accounts payable and accruals	Other financial liabilities	Amortized cost
Long term debt	Other financial liabilities	Amortized cost
Severance pay liability	Other financial liabilities	Amortized cost

Amortized cost is determined using the effective interest rate method.

Gains and losses on financial instruments subsequently measured at amortized cost are recognized in the statement of earnings and retained earnings in the period the gain or loss occurs. Changes in fair value on financial instruments classified as held for trading are recognized in the statement of earnings and retained earnings for the current period. Changes in fair value on financial instruments classified as available for sale would be recorded in other comprehensive income until realized, at which time they recorded in the statement of earnings and retained earnings.

Fair value of financial instruments

The fair values of accounts receivable and accounts payable and accruals approximate their carrying values due to their short-term maturity. The fair value of the fixed rate long-term debt is also approximated by its carrying value, as there have been no significant changes in lending rates or other conditions.

Financial risk management - overview

The Nursery has exposure to the following risks from its use of financial instruments: credit risk; liquidity risk; market risk; interest risk; and foreign currency risk.

Credit risk

Credit risk is the risk that one party to a financial instrument fails to discharge an obligation and causes financial loss to another party. Financial instruments which potentially subject the Nursery to credit risk consist principally of cash and term deposits and accounts receivable.

The maximum exposure of the Nursery to credit risk at March 31, 2009 (in thousands) is:

Accounts receivable	582
Long-term investment	187
Maximum exposure to credit risk	769

Accounts Receivable: The Nursery is not exposed to significant credit risk due to the large customer base and payment in full is typically collected when it is due. The Nursery establishes an allowance for doubtful accounts that represents its estimate of potential credit losses. The allowance for doubtful accounts is based on management's estimates and assumptions regarding current market conditions, customer analysis and historical payment trends. These factors are considered when determining whether past due accounts are allowed for or written off.

Long-Term Investment: The Nursery is not exposed to significant credit risk as the investment is held with the Minister of Finance.

4. **Financial instruments and financial risk management** *(Continued from previous page)*

Credit risk *(Continued from previous page)*

The change in the allowance for doubtful accounts during the year (in thousands) was as follows:

Balance, beginning of the year	43
Provision for receivable impairment	-
Amounts written off	-
Balance, end of the year	43

Liquidity risk

Liquidity risk is the risk that the Nursery will not be able to meet its financial obligations as they come due.

The Nursery manages liquidity risk by maintaining adequate cash balances and by review from the Province of Manitoba to ensure adequate funding will be received to meet the obligations.

Market risk

Market risk is the risk that changes in market prices, such as interest rates and foreign exchange rates, will affect the Nursery's income or the fair values of its financial instruments. The significant market risks the Nursery is exposed to are interest rate risk and foreign currency risk.

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The interest rate exposure relates to long term debt.

The Nursery manages its interest rate risk on long-term debt through the exclusive use of fixed rate terms for its long-term debt.

Foreign currency risk

Foreign currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Nursery is not exposed to significant foreign currency risk as it does not have any financial instruments denominated in foreign currency.

5. **Accounts receivable**

Buildings	**5,200**	**2,843**	**2,357**	1,229
Equipment	**1,908**	**1,532**	**376**	279
	7,108	**4,375**	**2,733**	1,508

7. Long-term investments

The Province of Manitoba accepted responsibility for the vacation entitlements earned by the employees of the Nursery prior to its designation as SOA, and the severance pay benefits accumulated to March 31, 1998 for certain Nursery employees. Accordingly, the Nursery recorded as a receivable of $186,872 from the Province of Manitoba for these accumulated benefits. Effective March 31, 2009 the Province of Manitoba had agreed to pay the receivable balances related to the funding for these liabilities and has placed the amount of $186,872 into an interest bearing trust account to be held on the Nursery's behalf until the cash is required to discharge the related liabilities.

8. Working capital advances

The Financing Authority has provided the Nursery with an authorized line of working capital of $3,000,000 of which $2,263,000 was advanced at March 31, 2009 (2008 - $2,212,000).

9. Long-term debt

	2009 (In thousands)	2008 (In thousands)
Capital purchase loan payable in monthly instalments of $6,317, plus interest at 5.125%, due July 2024	**1,086**	-
	1,086	-
Less: current portion	**76**	-
	1,010	-

Principal repayments on long-term debt in each of the next five years (in thousands) are estimated as follows:

2010	76
2011	76
2012	76
2013	76
2014	76

10. Severance pay liability

Effective April 1, 1998, the Nursery began recording accumulated severance pay benefits for its employees. The amount of severance pay obligations is based on actuarial calculations. The periodic actuarial valuations of these liabilities may determine that adjustments are needed to the actuarial calculations when actual experience is different from that expected and/or because changes in actuarial assumptions used. The resulting actual gains or losses are amortized over the expected average remaining service life of the related employee group.

An actuarial report was completed for the severance pay liability as of March 31, 2005. The report provides a formula to update the liability on an annual basis. The Nursery's actuarially determined net liability for accounting purposes as at March 31, 2009 was $246,000 (2008 - $232,000). Commencing in the 2006 fiscal year the actuarial loss of $58,000 is being amortized over the 15 year expected average remaining service life of the employee group.

Significant long-term actuarial assumptions used in the March 31, 2005 valuation, and in the determination of the March 31, 2009 present value of the accrued severance benefit obligation were:

Annual rate of return	
Inflation component	2.50%
Real rate of return	4.00%
	6.50%
Assumed salary increase rates	
Annual productivity increase	0.75%
Annual general salary increase	3.25%
	4.00%

11. Pension benefits

Employees of the Nursery are eligible for pension benefits in accordance with the provisions of The Civil Service Superannuation Act (CSSA), administered by the Civil Service Supperannuation Board (CSSB). The CSSA established a defined benefit plan to provide benefits to employees of the Manitoba Civil Service Superannuation Fund (CSSF).

Effective March 31, 2001, pursuant to an agreement with the Province of Manitoba, the Nursery transferred to the Province the pension liability for its employees. Commencing April 1, 2001, the Nursery was required to pay to the Province an amount equal to its employees' current pension contributions. The amount paid for 2009 was $60,000 (2008 - $59,000). Under this agreement, the Nursery has no further pension liability.

12. Contributed surplus

The Special Operating Agencies Financing Authority and the Province of Manitoba entered into a Transfer Agreement respecting the transfer from the Province to the Financing Authority of inventory and capital assets values at $712,000 required for the continuing operations of Pineland Forest Nursery as at March 31, 1995. The Nursery was responsible to repay the Special Operating Agencies Financing Authority the debt portion, in the amount of $356,000 (being half of the value of the assets) and to record the remainder as the Province's equity in the Financing Authority as related to the Nursery's operations. The debt portion was fully repaid during the 2005 fiscal year.

13. Economic dependence

The Nursery is economically dependent on the Province of Manitoba, because it derives a significant portion of its revenue from the Province and all of its financing requirements through the Financing Authority.

14. Commitments

The Nursery has entered into a vehicle lease agreement with estimated minimum annual payments (in thousands) as follows:

2010	8
2011	8
	16

Pineland Forest Nursery

Auditors' Report

To the Special Operating Agencies Financing Authority

We have audited the balance sheet of **THE PROPERTY REGISTRY**, an Agency of the Special Operating Agencies Financing Authority, Province of Manitoba as at March 31, 2009 and the statements of income, comprehensive income and retained earnings and cash flows for the year then ended. These financial statements are the responsibility of the Agency's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of the Agency as at March 31, 2009 and the results of its operations and its cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

The accompanying summary of significant accounting policies and notes are an integral part of these financial statements.

1. Nature of Organization

Effective April 1, 1997, the Lieutenant Governor in Council designated The Property Registry as a Special Operating Agency under The Special Operating Agencies Financing Authority Act. The order also directed the Special Operating Agencies Financing Authority (SOAFA) and the Minister of Consumer and Corporate Affairs, being the Minister responsible for the Agency at that time, to enter into a management agreement with respect to The Property Registry. The Property Registry was established to operate the Land Titles and Personal Property Registry 7 offices on a self-sustaining financial basis while providing a standard of service that will meet the needs of its clients.

The Property Registry is part of the Department of Finance under the general direction of the Assistant Deputy Minister for Consumer and Corporate Affairs, who is also Chairperson of The Property Registry's Advisory Board. The Property Registry remains bound by relevant legislation, regulation and administrative policy as specified in its operating charter.

The Property Registry's financial contribution to the Province of Manitoba is included in the Manitoba Estimates of Revenue and Expenditure – Special Operating Agencies.

2. Change in Accounting Policies

Effective April 1, 2008, the Agency adopted the following new handbook sections issued by the Canadian Institute of Chartered Accountants (CICA):

Section 1535 Capital Disclosures - Section 1535 establishes standards for disclosing information about an entity's capital and how it is managed. These standards require an entity to disclose its objectives, policies and processes for managing capital, a summary of quantitative data about what it manages as capital and whether it complied with any externally imposed capital requirements to which it is subject and, if not, the consequences of such non-compliance.

Section 3862 Financial Instruments – Disclosures - Section 3862 modifies the disclosure requirements for financial instruments that were included in Section 3861, Financial Instruments – Disclosure and Presentation. The new standards require an entity to provide disclosures in its financial statements that enable users to evaluate the significance of financial instruments on its financial position and performance, the nature and extent of the risks to which it is exposed during the period and at the balance sheet date, and how those risks are managed.

Section 3863 Financial Instruments – Presentation - Section 3863 carries forward the presentation requirements of Section 3861, Financial Instruments – Disclosure and Presentation, unchanged.

The above noted new standards have no impact on the recognition, measurement or presentation of financial instruments in the Agency's yearend financial statements.

3. Significant Accounting Policies

Basis of Reporting

The financial statements of the Agency have been prepared in accordance with Canadian generally accepted accounting principles.

Cash and Cash Equivalents

Cash and cash equivalents included cash on hand, balances with banks and short term deposits with original maturities of three months or less.

Capital Assets

Capital assets are recorded at cost and amortization is computed using the straight-line method based on remaining estimated useful lives, after allowance for salvage value, where applicable as follows:

Computer system	20% (10% in year of acquisition)
Office equipment	20%
Leasehold improvements	10%
Equipment under capital lease	20%

In the year of acquisition, amortization is calculated at one-half the rate indicated.

Revenue Recognition

Revenue is recognized when the services have been performed. Investment income is recognized in the year it is received or receivable.

Cost Recoveries and Fee Wavier

Included in revenues are recoveries of costs or fees for services provided to other provincial government offices where no statutory provision precludes cost recovery.

Use of Estimates

The preparation of financial statements in accordance with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates as additional information becomes available in the future.

3. Significant Accounting Policies (continued)

Capital Disclosures

The Agency's capital consists of retained earnings provided from operations.

The Agency's capital management policy is to maintain sufficient capital to meet its objectives through its retained earnings by managing transfers of surplus funds to the Province of Manitoba; meet short-term capital needs with working capital advances from the Province of Manitoba; and meet long-term capital needs through long-term debt with the Province of Manitoba. There were no changes in the Agency's approach to capital management during the period.

The Agency is not subject to externally imposed capital requirements.

New Accounting Pronouncements

Recent accounting pronouncements that have been issued but are not yet effective, and have a potential implication for the Agency, are as follows:

Financial Statement Concepts

CICA Handbook Section 1000, Financial Statement Concepts has been amended to focus on the capitalization of costs that truly meet the definition of an asset and de-emphasizes the matching principle.

The revised requirements are effective for annual and interim financial statements relating to fiscal years beginning on or after October 1, 2008. The Agency is currently evaluating the impact of the adoption of this change on the disclosure within its financial statements.

International Financial Reporting Standards

The AcSB plans to converge Canadian GAAP with International Financial Reporting Standards ("IFRS") over a transition period expected to end in 2011. The impact of the transition to IFRS on the Agency's financial statements has yet to be determined.

4. Financial Instruments and Financial Risk Management

Financial assets and liabilities are initially recorded at fair value. Measurement in subsequent periods depends on the financial instrument's classification. Financial instruments are classified into one of the following five categories: held for trading; available for sale; held to maturity; loans and receivables; and other financial liabilities. All financial instruments classified as held for trading or available for sale are subsequently measured at fair value with any change in fair value recorded in net earnings and other comprehensive income, respectively. All other financial instruments are subsequently measured at amortized cost.

The financial assets and liabilities of the Agency are classified and measured as follows:

Financial Asset/Liability	Category	Subsequent Measurement
Cash, short-term investments, customer deposits and long-term investment	Held for trading	Fair value
Accounts receivable	Loans and receivables	Amortized cost
Accounts payable and accrued expenses	Other financial liabilities	Amortized cost

Amortized cost is determined using the effective interest rate method.

Gains and losses on financial instruments subsequently measured at amortized cost are recognized in the statement of earnings and retained earnings in the period the gain or loss occurs. Changes in fair value on financial instruments classified as held for trading are recognized in the statement of earnings and retained earnings for the current period. Changes in fair value on financial instruments classified as available for sale would be recorded in other comprehensive income until realized, at which time they recorded in the statement of earnings and retained earnings.

Fair Value of Financial Instruments

The fair values of accounts receivable, accounts payable and accrued expenses approximate their carrying values due to their short-term maturity.

Financial Risk Management - Overview

The Agency has exposure to the following risks from its use of financial instruments: credit risk; liquidity risk; market risk; interest risk; and foreign currency risk.

4. Financial Instruments and Financial Risk Management (continued)

Credit Risk

Credit risk is the risk that one party to a financial instrument fails to discharge an obligation and causes financial loss to another party. Financial instruments which potentially subject the Agency to credit risk consist principally of cash and term deposits and accounts receivable.

The maximum exposure of the Agency to credit risk at March 31, 2009 is:

Cash and short-term investments	$	12,507
Customer deposits		1,447
Accounts receivable		477
Long-term investment		1,602
	$	16,033

Cash and short-term investments, customer deposits and long-term investment: The Agency is not exposed to significant credit risk as the cash and short-term investments, customer deposits and the long-term investment are primarily held by the Minister of Finance.

Customer deposits: The Agency is not exposed to significant credit risk as the cash is held by a Chartered Bank.

Accounts receivable: The Agency is not exposed to significant credit risk as the majority of accounts receivable are due from customers which the Agency has experience with and payments from these customers are typically made in full and collected when the are due. The Agency establishes an allowance for doubtful accounts that represents its estimate of potential credit losses. The allowance for doubtful accounts is based on management's estimates and assumptions regarding current market conditions, customer analysis and historical payment trends. These factors are considered when determining whether past due accounts are allowed for or written off.

Management has determined that no allowance for doubtful accounts is required as at March 31, 2009.

Liquidity Risk

Liquidity risk is the risk that the Agency will not be able to meet its financial obligations as they come due.

The Agency manages liquidity risk by maintaining adequate cash balances and by review from the Province of Manitoba to ensure adequate funding will be received to meet the obligations.

4. Financial Instruments and Financial Risk Management (continued)

Market Risk

Market risk is the risk that changes in market prices, such as interest rates and foreign exchange rates, will affect the Agency's income or the fair values of its financial instruments. The significant market risks the Agency is exposed to are interest rate risk and foreign currency risk.

Interest Rate Risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The interest rate exposure relates to funds on deposit.

The interest rate risk on funds on deposit is considered to be low because of their short-term nature.

Foreign Currency Risk

Foreign currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Agency is not exposed to significant foreign currency risk as it does not have any financial instruments denominated in foreign currency.

5. Long-term Investment

The Province of Manitoba accepted responsibility for the vacation entitlements earned by the employees of the Agency prior to its designation as a Special Operating Agency, and the severance pay benefits accumulated to March 31, 1998 for certain of the Agency's employees. Accordingly, the Agency recorded a receivable of $1,602 from the Province of Manitoba for these accumulated benefits. Effective March 31, 2009 the Province of Manitoba paid the receivable balances related to the funding for these liabilities and has placed the amount of $1,602 into an interest bearing trust account to be held on the Agency's behalf until the cash is required to discharge the related liabilities.

6. Accounts Receivable

	2009	2008
Trade receivables	$ 382	$ 415
Receivable from government and departments	95	94
	$ 477	$ 509

7. Capital Assets

	2009 Cost	2009 Accumulated Amortization	2008 Cost	2008 Accumulated Amortization
Computer system	$ 621	$ 452	$ 664	$ 437
Office equipment	1,331	1,006	1,242	843
Leasehold improvements	581	376	554	336
Equipment under capital lease	70	70	70	70
	$ 2,603	$ 1,904	$ 2,530	$ 1,686
Cost less accumulated amortization		$ 699		$ 844

8. Working Capital Advances

The Property Registry has an authorized line of working capital advance of $1,000 that was not utilized as of March 31, 2009 (nil in 2008).

9. Land Titles Assurance Fund

Claims for loss as provided for in *The Real Property Act* are paid from this fund. The Agency's Land Titles Branch is responsible for the collection of deposits and the defence against claims on this fund. Claims in excess of the fund balance are paid out of the Consolidated Revenue Fund of the Province of Manitoba.

10. Severance Pay Liability

Effective April 1, 1998, the Agency began recording accumulated severance pay benefits for its employees. The amount of severance pay obligations is based on actuarial calculations. The periodic actuarial valuations of these liabilities may determine that adjustments are needed to the actuarial calculations when actual experience is different from that expected and/or because of changes in actuarial assumptions used.

An actuarial report was completed for the severance pay liability as of March 31, 2005. The report provides a formula to update the liability on an annual basis. The Agency's actuarially determined net liability for accounting purposes as at March 31, 2009 was $1,469 ($1,519 in 2008). Commencing in the 2006 fiscal year the actuarial loss of $40 is being amortized over the 15 year expected average remaining service life of the employee group.

Significant long-term actuarial assumptions used in the March 31, 2005 valuation, and in the determination of the March 31, 2009 present value of the accrued severance benefit obligation were:

Annual rate of return	
Inflation component	2.50%
Real rate of return	4.00%
	6.50%
Annual salary increase rates	
annual productivity increase	0.75%
annual general salary increase	3.25%

11. Land Transfer Tax

Land transfer tax is administered and collected by The Property Registry. Tax collected less refunds issued is remitted to the Consolidated Revenue Fund of the Province of Manitoba. Adjustments and refunds of land transfer tax are paid out of the Department of Finance under the advice of the Registrar General.

12. Commitments

The Agency has entered into a Memorandum of Understanding with Manitoba Infrastructure and Transportation (MIT) to lease it premises. The accommodation charges are established annually by MIT, and are based on its approved budget.

The Agency has also entered into agreements to lease equipment. These agreements carry various terms and conditions.

The estimated minimum lease payments for the premises and equipment in aggregate for each of the next five years are as follows:

	Premises	Equipment	Total
2010	$ 983	$ 89	$ 1,072
2011	1,012	89	1,101
2012	1,042	89	1,131
2013	1,073	89	1,162
2014	1,105	89	1,194
Total minimum lease payments	$ 5,215	$ 445	$ 5,660

13. Pension Benefits

Employees of The Property Registry are eligible for pension benefits in accordance with the provisions of the Civil Service Superannuation Act (CSSA), administered by the Civil Service Superannuation Board (CSSB). The CSSA established a defined benefit plan to provide benefits to employees of the Manitoba Civil Service and to participating agencies of the Government, including The Property Registry, through the Civil Service Superannuation Fund (CSSF).

Effective March 31, 2001, pursuant to an agreement with the Province of Manitoba, The Property Registry transferred to the Province the pension liability for its employees.

Commencing April 1, 2001, The Property Registry was required to pay to the Province an amount equal to its employees' current pension contributions. The amount paid for 2009 was $308 ($326 in 2008). Under this agreement, the Agency has no further pension liability.

14. Contingencies

The Property Registry has been named in five lawsuits. The likelihood of damages being awarded and the amount to be awarded is not reasonably estimable for any of the claims. Should any loss result from the resolution of these claims, such loss will be charged to the Assurance Fund of Manitoba in the year of resolution.

MANAGEMENT REPORT

The accompanying financial statements are the responsibility of management and have been prepared in accordance with Canadian generally accepted accounting principles. In management's opinion, the financial statements have been properly prepared within reasonable limits of materiality, incorporating management's best judgment regarding all necessary estimates and all other data available up to June 25, 2009. The financial information presented elsewhere in the Annual Report is consistent with that in the financial statements.

Management maintains internal controls to provide reasonable assurance that the financial information is reliable and accurate and that the assets of The Public Trustee are properly safeguarded.

The responsibility of the Auditor General is to express an independent, professional opinion on whether the financial statements are fairly stated in accordance with the accounting policies stated in the financial statements. The Auditor's Report outlines the scope of the audit examination and provides the audit opinion.

The Public Trustee has reviewed and approved these financial statements and the Annual Report in advance of its release and has approved its content and authorized its release.

Joanna K. Knowlton
Public Trustee

OFFICE OF THE
AUDITOR GENERAL
MANITOBA

AUDITORS' REPORT

To the Legislative Assembly of Manitoba,
To the Public Trustee of Manitoba, and
To the Special Operating Agencies Financing Authority

We have audited the balance sheet of the Public Trustee of Manitoba, an Agency of the Special Operating Agencies Financing Authority, Province of Manitoba as at March 31, 2009, and the statements of income, comprehensive income and retained earnings and cash flows for the year then ended. These financial statements are the responsibility of the Public Trustee's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of the Agency as at March 31, 2009, and the results of its operations and cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

PUBLIC TRUSTEE OF MANITOBA
(An Agency Of The Special Operating Agencies Financing Authority - Province of Manitoba)

NOTES TO FINANCIAL STATEMENTS
(In Thousands)
MARCH 31, 2009

1. Nature of organization

The Public Trustee protects the interests of Manitobans by providing trust, legal, financial and personal services on a last resort basis to people who are mentally incompetent, under the age of majority, or whose estates would otherwise be unadministered upon their death.

Effective April 1, 1996, The Public Trustee was designated as a Special Operating Agency pursuant to The Special Operating Agencies Financing Authority Act, Cap. s185, C.C.S.M. and operates under a charter approved by the Lieutenant Governor in Council.

The Public Trustee is financed through the Special Operating Agencies Financing Authority (SOAFA). SOAFA has the mandate to hold and acquire assets required for and resulting from Public Trustee operations. It finances The Public Trustee through repayable loans and working capital advances. The financial framework provides increased management authority which, coupled with more rigorous planning and reporting requirements afforded by Special Operating Agency status, assists The Public Trustee to sustain the provision of high quality service to her clients.

A Management Agreement between SOAFA and the Minister of Justice assigns responsibility to The Public Trustee to manage and account for Public Trustee related assets and operations on behalf of SOAFA.

The Public Trustee continues to be part of Manitoba Justice. The Public Trustee is a corporation sole with perpetual succession. As a corporate entity, The Public Trustee functions separately from government and is capable of suing or being sued on behalf of the clients, trusts and estates which are administered by her.

The Public Trustee remains bound by relevant legislation and regulations. The Public Trustee is also bound by administrative policy except where specific exemptions have been provided for in her charter in order to meet business objectives.

2. Change in Accounting Policies.

Effective April 1, 2008, the Agency adopted the following new handbook sections issued by the Canadian Institute of Chartered Accountants (CICA):

Section 1535 Capital Disclosure
Section 1535 establishes standards for disclosing information about an entity's capital and how it is managed. These standards require an entity to disclose its objectives, policies and processes for managing capital, a summary of quantitative data about what it manages as capital and whether it complied with any externally imposed capital requirements to which it is subject and, if not, the consequences of such non-compliance. (See Note 3e)

Section 3862 Financial Instruments – Disclosure
Section 3862 modifies the disclosure requirements for financial instruments that were included in Section 3861, Financial Instruments – Disclosures and Presentation. The new standards require an entity to provide disclosures in its financial statements that enable users to evaluate the significance of financial instruments on its financial position and performance, the nature and extent of the risks to which it is exposed during the period and at the balance sheet date, and how those risks are managed.

Section 3863 Financial Instruments – Presentation
Section 3863 carries forward the presentation requirements of Section 3861, Financial Instruments – Disclosure and Presentation, unchanged.

The above noted new standards have no impact on the recognition, measurement or presentation of financial instruments in the Agency's yearend financial statements.

3. Significant accounting policies

a) Basis of reporting

The financial statements of the Agency are presented in accordance with Canadian generally accepted accounting principles.

b) Revenue recognition

i. Administration fees are charged to client accounts quarterly based on the anniversary date of the account in accordance with provisions of The Public Trustee Act. The fees revenue recognized in a year consists of all fees charged, accruals and adjustments made to accounts.

ii. Other fees are recognized as revenue when charged to an account and could be subject to adjustment on closing.

iii. Statutory fees are recognized as revenue when received

c) Capital assets

Capital assets are recorded at cost and are amortized annually at the following rates and methods:

Furnishings and equipment	-	20%, declining balance
Computer equipment and software	-	20%, straight-line, 10% in year of acquisition, software purchases less than $1 are expensed in year of acquisition
Leasehold improvements	-	20%, straight-line

d) Use of estimates

In preparing the Agency's financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements and reported amounts of revenue and expenses during the period. Actual results could differ from these estimates.

e) Capital disclosures

The Agency's capital consists of retained earnings provided from operations and revenue stabilization reserve funds allocated from retained earnings.

The Agency's capital management policy is to maintain sufficient capital to meet its objectives through its retained earnings and revenue stabilization reserve. The Agency has developed appropriate risk management strategies, as described in Note 4, to preserve the retained earnings and revenue stabilization reserve of the Agency. There were no changes in the Agency's approach to capital management during the period.

The Agency is not subject to externally imposed capital requirements.

4. Financial Instruments and Financial Risk Management

Financial assets and liabilities are initially recorded at fair value. Measurement in subsequent periods depends on the financial instrument's classification. Financial instruments are classified into one of the following five categories: held for trading; available for sale; held to maturity; loans and receivables; and other financial liabilities. All financial instruments classified as held for trading or available for sale are subsequently measured at fair value with any change in fair value recoded in net earnings and other comprehensive income, respectively. All other financial instruments are subsequently measured at amortized cost.

The financial assets and liabilities of Agency are classified and measured as follows:

Financial Asset/Liability	Category	Subsequent Measurement
Cash and Short Term Investments	Held for trading	Fair value
Long Term Investments	Held for trading	Fair value
Accounts receivable	Loans and receivables	Amortized Cost
Accounts payable	Other financial liabilities	Amortized Cost
Accrued liabilities	Other financial liabilities	Amortized Cost

Amortized cost is determined using the effective interest rate method.

Gains and losses on financial instruments subsequently measured at amortized cost are recognized in the statement of income, comprehensive income and retained earnings in the period the gain or loss occurs. Changes in fair value on financial instruments classified as held for trading are recognized in the statement of income, comprehensive income and retained earnings for the current period. Changes in fair value on financial instruments classified as available for sale would be recorded in a statement of changes in net assets or other comprehensive income until realized, at which time they recorded in the statement of income, comprehensive income and retained earnings

Fair value of financial instruments

The fair values of accounts receivable, accounts payable and accrued liabilities approximates their carrying values due to their short-term maturity.

Financial risk management - overview

The Agency has exposure to the following risks from its use of financial instruments:

- credit risk;
- liquidity risk
- market risk
- Interest risk; and
- Foreign currency risk

The Agency manages its exposure to risks associated with financial instruments that have the potential to affect its operating performance. The Agency's management has overall responsibility for the establishment and oversight of the Agency's objectives, policies and procedures for measuring, monitoring and managing these risks.

The Agency has exposure to the following risks associated with its financial instruments. Analysis of sensitivity to specified risks is provided where there may be an effect on the results of operations or financial position. Sensitivity analysis is performed by relating the reasonably possible changes in risk variables as at March 31, 2009 to the financial instruments outstanding on that date.

Credit risk

Credit risk is the risk that one party to a financial instrument fails to discharge an obligation and causes financial loss to another party. Financial instruments which potentially subject the Agency to credit risk consist principally of cash and term deposits and accounts receivable.

The maximum exposure of the Agency to credit risk at March 31, 2009 is:

Cash and funds on deposit	$1,624
Accounts receivable	807
Long Term Investment	515
	$ 2,946

Cash and funds on deposits: Agency is not exposed to significant credit risk as the cash and term deposits are primarily held by the Minister of Finance.

Accounts receivable: The Agency is not exposed to significant credit risk as the receivable is composed of fees due from clients and payment in full is typically collected when it is due. The Agency establishes an allowance for doubtful accounts that represents its estimate of potential credit losses. The allowance for doubtful accounts is calculated at 5% of accrued fees.

The aging of accounts receivable and allowance for doubtful accounts as at March 31, 2009 was:

	Gross	Allowance
Current	$842	$ 35
30-60 days past billing date	-	-
61-90 days past the billing date	-	-
Greater than 90 days past the billing date	-	-
	$842	$ 35

Long Term Investment: Agency is not exposed to significant credit risk as the trust account is held by the Minister of Finance.

Liquidity risk

Liquidity risk is the risk that the Agency will not be able to meet its financial obligations as they come due.

The Agency manages liquidity risk by maintaining adequate cash balances. The Agency prepares and monitors detailed forecasts of cash flows from operations and anticipated investing and financing activities. The Agency continuously monitors and reviews both actual and forecasted cash flows through periodic financial reporting.

Market risk

Market risk is the risk that changes in market prices, such as foreign exchange rates, interest rates and equity prices will affect The Agency's income or the fair values of its financial instruments. The significant market risks the Agency is exposed to are: interest rate risk.

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The interest rate exposure relates to funds on deposit.

The interest rate risk on funds on deposit is considered to be low because of their short-term nature.

Foreign currency risk

Foreign currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Agency is not exposed to significant foreign currency risk as it does not have any financial instruments denominated in foreign currency.

5. Accounts receivable

	2009	2008
Fees receivable	$ 829	$ 767
Allowance for doubtful accounts	(35)	(33)
	794	734

Interest receivable	2	5
Miscellaneous receivable	0	3
Advances to client accounts	5	3
Cost recoveries	6	6
	$ 807	$ 751

6. Long Term Investment: Receivable from Province of Manitoba

The Province of Manitoba accepted responsibility for the severance pay benefits accumulated to March 31, 1998 for certain of its employees. Accordingly, the Agency recorded a receivable of $515 from the Province of Manitoba, which is an amount equal to the estimated liability for accumulated severance pay benefits at March 31, 1998.

Effective March 31, 2009 the Province of Manitoba has paid the receivable balances related to the funding for these severance pay liabilities and has placed the amount of $515 into an interest bearing trust account to be held on the Commission's behalf until the cash is required to discharge the related liabilities.

7. Capital Assets

	2009		2008	
	Cost	Accumulated Amortization	Cost	Accumulated Amortization
Furnishings & equipment	$ 308	$ 238	$ 308	$ 220
Computer equipment & software	118	96	116	87
Leasehold Improvements	34	19	34	12
	$ 460	$ 353	$ 458	$ 319
Cost less accumulated amortization		$ 107		$ 139

8. Accounts payable and accrued liabilities

	2009	2008
Operating expenses payable	$ 126	$ 108
Salaries and benefits payable	32	18
Vacation entitlements earned	346	332
GST payable to Canada Revenue Agency	26	22
	$ 530	$ 480

9. Working capital

The Agency has an authorized line of working capital of $1,000 through SOAFA, which was unused and available at March 31, 2009.

10. Fees revenue

	2009	2008
Administration	$ 4,741	$ 4,533
Legal	333	275
Income tax	304	200
Inspection	182	166
	$ 5,560	$ 5,174

PUBLIC TRUSTEE OF MANITOBA
(An Agency Of The Special Operating Agencies Financing Authority - Province of Manitoba)

NOTES TO FINANCIAL STATEMENTS
(In Thousands)
MARCH 31, 2009

11. Other Administration expenses

	2009	2008
Computer expenses	$ 508	$ 449
Courier charges	6	5
Insurance, loss, damage	85	40
Office supplies	60	46
Other	11	3

Records Centre Charges	26	19
Rentals, equipment	3	4
Repairs and maintenance	5	9
SAP costs	8	6
Support services - Department of Justice	21	21
Telephone	49	49
Travel	44	53
	$ 964	$ 884

12. Commitments

The Public Trustee has an arrangement with the Province of Manitoba, through the Department of Infrastructure and Transportation, for rental of its facilities at 155 Carlton Street in Winnipeg and its facility in the Provincial Building in Brandon. Accommodation costs are estimated to be $366 for the year ended 2009/2010.

13. Related party transactions

The Agency is related in terms of common ownership to all Province of Manitoba created departments, agencies and Crown corporations. The Agency enters into transactions with these entities in the normal course of business. These transactions are recorded at the exchange amount.

14. Escheats to the Crown

Escheats to the Crown, received by The Public Trustee during the year and remitted to the Minister of Finance, amounted to $221 (2008 - $75). These amounts are not reflected in these financial statements.

15. Estates and trusts under administration

The client assets under administration at March 31, 2009 total approximately $203,000 (2008 - $192,000). The trust activities of The Public Trustee are reported in separate Estates and Trusts under Administration financial statements.

16. Revenue stabilization reserve

The Public Trustee has allocated a reserve out of retained earnings to provide for short-term fluctuations in revenue due to changes in revenue patterns or extraordinary expenses.

17. Severance pay benefits

Effective April 1, 1998, the Agency began recording accumulated severance pay benefits for its employees. The amount of severance pay obligations is based on actuarial calculations. The periodic actuarial valuations of these liabilities may determine that adjustments are needed to the actuarial calculations when actual experience is different from that expected and/or because of changes in actuarial assumptions used. The resulting actuarial gains or losses are amortized over the expected average remaining service life of the related employee group.

An actuarial report was completed for the severance pay liability as of March 31, 2005. The report provides a formula to update the liability on an annual basis. The Agency's' actuarially determined net liability for accounting purposes as at March 31, 2009 was $453 (2008 - $424). Commencing in the 2006 fiscal year the actuarial loss of $113 is being amortized over the 15 year expected average remaining service life of the employee group.

Significant long-term actuarial assumptions used in the March 31, 2005 valuation, and in the determination of the March 31, 2009 present value of the accrued severance benefit obligation were:

Annual rate of return	
inflation component	2.50%
real rate of return	4.00%
	6.50%
Assumed salary increase rates	
annual productivity increase	0.75%
annual general salary increase	3.25%
	4.00%

18. Pension benefits

Employees of The Public Trustee are eligible for pension benefits in accordance with the provisions of the Civil Service Superannuation Act (CSSA), administered by the Civil Service Superannuation Board. The CSSA established a defined benefit plan to provide benefits to employees of the Manitoba Civil Service and to participating agencies of the Government, including The Public Trustee, through the Civil Service Superannuation Fund.

Effective March 31, 2001, pursuant to an agreement with the Province of Manitoba, The Public Trustee transferred to the Province the pension liability for her employees. Commencing April 1, 2001, The Public Trustee was required to pay to the Province an amount equal to her employees' current pension contributions. The amount paid at March 31, 2009 was $133 (2008 - $139). Under this agreement, The Public Trustee has no further pension liability.

NOTES TO FINANCIAL STATEMENTS
(In Thousands)
MARCH 31, 2009

19. Contingent Liabilities

The Public Trustee has identified an issue which may result in liability on the part of the SOA. Certain payments have been made by way of an advance on the anticipated settlement or award. The claim amount can not be reasonably estimated at the year end.

20. Public Sector Compensation Disclosure Act

It is a requirement of *The Public Sector Compensation Disclosure Act* that annual public disclosure be made of individual compensation in an amount exceeding $50 annually to any officer or employee of the Agency. For the year ended March 31, 2009, the following employees received compensation in excess of $50:

Employee	Position	Amount
Carroll, Jori	Investment Officer	55
Clark, Dwane	Estates Officer 3	54
Darrach, Bruce	Information Technologist 3	73
Derwin, George	Legal Counsel 3	52

AUDITORS' REPORT

TO THE SPECIAL OPERATING AGENCIES FINANCING AUTHORITY

We have audited the balance sheet of **Vital Statistics Agency,** an Agency of the Special Operating Agencies Financing Authority, Province of Manitoba as at **March 31, 2009** and the statements of earnings and comprehensive income, retained earnings and cash flows for the year then ended. These financial statements are the responsibility of the Agency's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of the Agency as at March 31, 2009 and the results of its operations and its cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

NOTES TO FINANCIAL STATEMENTS
(in thousands)
MARCH 31, 2009

1. ENTITY DEFINITION

Effective April 1, 1994, the Lieutenant Governor in Council designated the Vital Statistics Agency (the "Agency") as a special operating agency under The Special Operating Agencies Financing Authority Act (C.C.S.M. cS185) by Order in Council 232/1994. The Order also gave approval to the Special Operating Agencies Financing Authority (SOAFA) and the Minister of Consumer and Corporate Affairs, being the Minister responsible for the Agency at that time, to enter into a Management Agreement with respect to the Agency.

A Management Agreement between the Financing Authority and the Minister of Consumer and Corporate Affairs assigns responsibility to manage the assets transferred to the Agency in delivering regulated services to clients through administration of three major Acts; The Vital Statistics Act, The Change of Name Act, and The Marriage Act. The Agency also handles disinterment's under the Public Health Act. The ownership of the vital events records is excluded from this agreement, as their ownership is considered Crown property and should not be alienated from Government protection in the the public interest.

The Agency is part of Manitoba Consumer and Corporate Affairs Division in the Department of Finance under the general direction of the Minister of Finance, the Deputy Minister and Assistant Deputy Minister who is also Chairperson of Vital Statistics Advisory Board.

The Agency remains bound by relevant legislation and regulation. It is also bound by administrative policy except where specific exemptions have been provided for in its charter in order to meet business objectives.

2. CHANGE IN ACCOUNTING POLICIES

Effective April 1, 2008, the Agency adopted the following new handbook sections issued by the Canadian Institute of Chartered Accountants (CICA):

Section 1535 Capital Disclosures

Section 1535 establishes standards for disclosing information about an entity's capital and how it is managed. These standards require an entity to disclose its objectives, policies and processes for managing capital, a summary of quantitative data about what it manages as capital and whether it complied with any externally imposed capital requirements to which it is subject and, if not, the consequences of such non-compliance.

Section 3862 Financial Instruments – Disclosures

Section 3862 modifies the disclosure requirements for financial instruments that were included in Section 3861, Financial Instruments – Disclosure and Presentation. The new standards require an entity to provide disclosures in its financial statements that enable users to evaluate the significance of financial instruments on its financial position and performance, the nature and extent of the risks to which it is exposed during the period and at the balance sheet date, and how those risks are managed.

Section 3863 Financial Instruments – Presentation

Section 3863 carries forward the presentation requirements of Section 3861, Financial Instruments – Disclosure and Presentation, unchanged.

The above noted new standards have no impact on the recognition, measurement or presentation of financial instruments in the Agency's year end financial statements.

Change in Accounting Policies - continued

Section 3031 Inventories

Section 3031 Inventories replaces Section 3030 Inventories. It provides more guidance on the measurement and disclosure requirements for inventories. The adoption of Section 3031 did not have an impact on the recognition, measurement or presentation of inventory in the Agency's year end financial statements.

3. SIGNIFICANT ACCOUNTING POLICIES

These financial statements are in accordance with Canadian generally accepted accounting principles and reflect the following policies:

Inventory

Inventory of certificates and pre-printed forms are valued at cost. Cost is generally determined on a first-in, first-out method.

Capital Assets

Capital assets are recorded at cost. Amortization is provided for as follows:

	Rate	Method
Data conversion	20 %	Declining balance
Furniture and fixtures	20 %	Straight line
Information system	20 %	Declining balance
Leasehold improvements	20 %	Straight line
National Routing System - computer equipment	20 %	Declining balance
Office equipment	20 %	Straight line
NRS - software	10 %	Straight line
Security equipment	20 %	Straight line

Deferred Revenue and Revenue Recognition

The Agency receives cash payments at the time various certificates are ordered and the cash payments are reflected as deferred revenue. Revenue is recognized at the time the service is completed and the certificate is issued.

Capital Disclosures

The Agency's capital consists of retained earnings provided from operations and special purpose reserve funds allocated from retained earnings.

The Agency's capital management policy is to maintain sufficient capital to meet its objectives through its retained earnings by managing transfers of surplus funds to the Province of Manitoba; meet short-term capital needs with working capital advances from the Province of Manitoba; and meet long-term capital needs through long-term debt with the Province of Manitoba. There were no changes in the Agency's approach to capital management during the period.

The Agency is not subject to externally imposed capital requirements.

Significant Accounting Policies - continued

Measurement Uncertainty

The preparation of the financial statements in conformity with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period.

These estimates and assumptions are reviewed periodically and, as adjustments become necessary, they are reported in earnings in the periods in which they become known. Actual amounts could differ from these estimates.

4. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT

Financial assets and liabilities are initially recorded at fair value. Measurement in subsequent periods depends on the financial instrument's classification. Financial instruments are classified into one of the following five categories: held for trading; available for sale; held to maturity; loans and receivables; and other financial liabilities. All financial instruments classified as held for trading or available for sale are subsequently measured at fair value with any change in fair value recorded in net earnings and other comprehensive income, respectively. All other financial instruments are subsequently measured at amortized cost.

The financial assets and liabilities of the Agency are classified and measured as follows:

Financial Asset/Liability	Category	Subsequent Measurement
Cash and short term deposits	Held for trading	Fair value
Accounts receivable	Loans and receivables	Amortized cost
Receivable from the Province of Manitoba	Loans and receivables	Amortized cost
Long term investments	Held for trading	Fair value
Accounts payable	Other financial liabilities	Amortized cost
Accrued liabilities	Other financial liabilities	Amortized cost
Long term debt	Other financial liabilities	Amortized cost

Amortized cost is determined using the effective interest rate method.

Gains and losses on financial instruments subsequently measured at amortized cost are recognized in the statement of earnings and retained earnings in the period the gain or loss occurs. Changes in fair value on financial instruments classified as held for trading are recognized in the statement of earnings and retained earnings for the current period. Changes in fair value on financial instruments classified as available for sale would be recorded in other comprehensive income until realized, at which time they recorded in the statement of earnings and retained earnings.

Financial Instruments and Financial Risk Management - continued

Fair Value of Financial Instruments

The fair values of accounts receivable, receivable from the Province of Manitoba, accounts payable and accrued liabilities approximate their carrying values due to their short-term maturity.

Financial Risk Management - overview

The Agency has exposure to the following risks from its use of financial instruments: credit risk; liquidity risk; market risk; interest risk; and foreign currency risk.

Credit Risk

Credit risk is the risk that one party to a financial instrument fails to discharge an obligation and causes financial loss to another party. Financial instruments which potentially subject the Agency to credit risk consist principally of cash and short term deposits, accounts receivable and long term investments.

The maximum exposure of the Agency to credit risk at year end is:

	2009	2008
Cash and short term deposits	**$ 688**	$ 1,326
Accounts receivable	**80**	134
Receivable from the Province of Manitoba	**-**	94
Long term investments	**94**	-
	$ 862	$ 1,554

Cash and short term deposits: The Agency is not exposed to significant credit risk as the cash and short term deposits are primarily held by the Minister of Finance.

Receivable from the Province of Manitoba: The Agency is not exposed to significant credit risk as the receivable is from the Province of Manitoba.

Accounts receivable: The Agency is not exposed to significant credit risk as no one party accounts for a significant balance and payment in full is typically collected when it is due. The Agency establishes an allowance for doubtful accounts that represents its estimate of potential credit losses. The allowance for doubtful accounts is based on management's estimates and assumptions regarding current market conditions, customer analysis and historical payment trends. These factors are considered when determining whether past due accounts are allowed for or written off.

Long term investments: The Agency is not exposed to significant credit risk as the long term investments are primarily held by the Minister of Finance.

The change in the allowance for doubtful accounts during the year was as follows:

	2009	2008
Balance, beginning of the year	**$ 5**	$ 6
Provision for receivable impairment	**1**	1
Amounts written off	**(1)**	(2)
Balance, end of the year	**$ 5**	$ 5

Financial Instruments and Financial Risk Management - continued

Liquidity Risk

Liquidity risk is the risk that the Agency will not be able to meet its financial obligations as they come due.

The Agency manages liquidity risk by maintaining adequate cash balances and by review from the Province of Manitoba to ensure adequate funding will be received to meet the obligations.

Market Risk

Market risk is the risk that changes in market prices, such as interest rates and foreign exchange rates, will affect the Agency's income or the fair values of its financial instruments. The significant market risks the Agency is exposed to are interest rate risk and foreign currency risk.

Interest Rate Risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The interest rate exposure relates to short term deposits and long term investments.

The interest rate risk on short term deposits and long term investments is considered to be low because of their short term nature.

Foreign Currency Risk

Foreign currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Agency is not exposed to significant foreign currency risk as it does not have any financial instruments denominated in foreign currency.

5. WAIVER OF FEES

The Agency charges no fee for services in exchange for services from the following organizations:

(a) The Manitoba Development Centre, health care facilities, the Chief Medical Examiner's Office (Manitoba Justice), the Manitoba Funeral Association and the Department of Anatomy of the University of Manitoba as they provide services in accordance with The Vital Statistics Act.

(b) Child and Family Services Regional Operations of Manitoba Family Services to act as issuers of Marriage Licences and handling related administrative duties.

(c) Vital Statistics Offices in other jurisdictions through agreements to exchange information between jurisdictions as it relates to one another's residency or birthplace.

(d) Statistics Canada for national tabulation and statistical information. Statistics Canada provides payment for the microdata and microfilm records from the Vital Statistics Agency and provides half of the cost of printing registration forms.

(e) Health and Welfare Canada (Indian and Northern Affairs).

Services provided under the above agreements are valued at $5 for the year ended March 31, 2009 (2008 - $5).

Waiver of Fees - continued

The Agency provides services without compensation to victims of crimes as follows:

In March of 1998, the Ministers of Justice, Consumer and Corporate Affairs, and Highways and Transportation agreed that the fees for replacement documents should be waived. Representatives of Vital Statistics and the Division of Driver and Vehicle Licensing met to coordinate the process so the public would receive the same program from both agencies.

Effective January 1, 1999, members of the public who have had their birth certificate stolen during a criminal act can request replacement certificates and have the fee waived. This does not apply to members of the public who have lost their identification or individuals who are non-residents of Manitoba. Clients are asked to indicate that they are requesting a waiver of fees as a result of a criminal act and to provide police incident number.

Service provided under the above arrangement are valued at $10 for the year ended March 31, 2009 (2008 - $13).

6. CASH AND SHORT TERM DEPOSITS

	2009	2008
Cash on hand and balances in bank	$ 80	$ 38
Short term deposits	608	1,288
	$ 688	$ 1,326

Short term deposits interest rates range from 0.25% to 0.75% and maturity dates range from April 13, 2009 to June 29, 2009.

7. ACCOUNTS RECEIVABLE

	2009	2008
Trade	$ 85	$ 80
Interest	-	6
Federal government - Statistics Canada	-	53
	85	139
Allowance for doubtful accounts	5	5
	$ 80	$ 134

8. LONG TERM INVESTMENTS

The Province of Manitoba accepted responsibility for the vacation entitlements earned by the employees of the Agency prior to its designation as SOA, and the severance pay benefits accumulated to March 31, 1998 for certain of the Agency's employees. Accordingly, the Agency recorded a receivable of $94 from the Province of Manitoba for these accumulated benefits. Effective March 31, 2009 the Province of Manitoba paid the receivable balances related to the funding for these liabilities and has placed the amount of $94 into an interest bearing trust account to be held on the Agency's behalf until the cash is required to discharge the related liabilities.

The long term investments earns interest at 0.55%, matures on March 30, 2010, at that time the original deposit will be re-invested. The interest income earned on this deposit is available to be withdrawn and used for operating purposes.

9. CAPITAL ASSETS

	2009		2008	
	Cost	Accumulated Amortization	Cost	Accumulated Amortization
Data conversion	$ 2,154	$ 1,081	$ 1,509	$ 894
Furniture and fixtures	118	114	118	111
Information system	1,249	1,038	1,220	989
Leasehold improvements	92	86	86	84
National Routing System - Computer equipment and software	410	114	402	41
Office equipment	192	170	179	163
Security equipment	75	51	74	45
	4,290	2,654	3,588	2,327
Net Book Value	$ 1,636		$ 1,261	

10. DEFERRED REVENUE

	2009	2008
Trade	$ 139	$ 207
Federal government	310	383
Manitoba Public Insurance Corporation	334	-
	$ 783	$ 590

Federal government - Statistics Canada

The Agency agreed on March 7, 2007 with Statistics Canada to join the National Routing System (NRS) where the Agency is responsible for the procurement, development testing and implementation of the messaging solution to enable secure and timely notification of vital events data between provinces and federal organizations. Funds advanced to the Agency are to be used for the specific purpose of the agreement. The Agency is matching the amortization of the capital expenditures purchased with these restricted funds. The amount deferred represents the total funds advanced of $424 (2008 - $424) less $114 (2008 - $41) amortized into income. Total income recognized for the year was $73 (2008 - $41) and is included in proceeds from government departments on the statement of earnings.

Manitoba Public Insurance Corporation

The Agency entered into an information sharing agreement with Manitoba Public Insurance Corporation (MPIC) starting on January 2, 2009 which enabled MPIC to access certain data related to applicants for enhanced identification cards. The amount deferred represents the total funds advanced of $400 (2008 - $nil) less $66 (2008 - $nil) amortized into income. Revenue is being recognized on a straight-line basis over 18 months, which is the length of the agreement. Total income recognized for the year was $66 (2008 - $nil) and is included in proceeds from government departments on the statement of earnings.

11. PENSION BENEFITS

Employees of the Vital Statistics Agency are eligible for pension benefits in accordance with the provisions of the Civil Service Superannuation Act (CSSA) administered by the Civil Service Superannuation Board (CSSB). The CSSA established a defined benefit plan to provide benefits to employees of the Manitoba Civil Service and to participating agencies of the Government, including the Vital Statistics Agency, through the Civil Service Superannuation Fund (CSSF).

Effective March 31, 2001, pursuant to an agreement with the Province of Manitoba, the Vital Statistics Agency transferred to the Province the pension liability for its employees. Commencing April 1, 2001, the Agency was required to pay to the Province an amount equal to its employees' current pension contributions. The amount paid for 2009 was $55 (2008 - $60). Under this agreement, the Agency has no further pension liability.

12. SEVERANCE PAY LIABILITY

Effective April 1, 1998, the Agency began recording accumulated severance pay benefits for its employees. The amount of severance pay obligations is based on actuarial calculations. The periodic actuarial valuations of these liabilities may determine that adjustments are needed to the actuarial calculations when actual experience is different from that expected and/or because of changes in actuarial assumptions used. The resulting actuarial gains or losses are amortized over the expected average remaining service life of the related employee group.

An actuarial report was completed for the severance pay liability as of March 31, 2005. The report provides a formula to update the liability on an annual basis. The Vital Statistics Agency's actuarially determined net liability for accounting purposes as at March 31, 2009 was $186 (2008 - $163). Commencing in the 2006 fiscal year, the actuarial loss of $37 is being amortized over the 15 year expected average remaining service life of the employee group.

Significant long-term actuarial assumptions used in the March 31, 2005 valuation, and in the determination of the March 31, 2009 present value of the accrued severance benefit obligation were:

Annual rate of return	
Inflation component	2.50 %
Real rate of return	4.00 %
	6.50 %
Assumed salary increase rates	
Annual productivity increase	0.75 %
Annual general salary increase	3.25 %
	4.00 %

13. COMMITMENTS

The Agency has not entered into a lease agreement with the Province of Manitoba for rental of facilities at 254 Portage Avenue. Occupancy charges for the year ending March 31, 2010 are estimated to be $204 (2009 - $200).

The Agency has entered into an agreement with an unrelated party who is to convert all marriage and death registration forms to a useable electronic format to be imported into its electronic records management system. The Agency has agreed to total payments of an amount not to not exceed $723. The Agency has not recorded or capitalized any of these data conversion costs related to marriage and death registrations to March 31, 2009.

14. FINANCING ARRANGEMENTS

Working capital advances and long term financing for significant capital purchases are provided to the Agency through the Special Operating Agencies Financing Authority. The Financing Authority has approved a $250 limit for working capital advances for the Agency. The Agency has not accessed working capital advances at March 31, 2009 (2008 - $42).

AUDITORS' REPORT

To the Board of Directors of Sport Manitoba Inc.

We have audited the statement of financial position of Sport Manitoba Inc. as at March 31, 2009 and the statements of operations, changes in net assets and cash flows for the year then ended. These financial statements are the responsibility of the organization's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of the organization as at March 31, 2009 and the results of its operations and its cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

Cash, end of year	$ 2,421,106	$ 1,097,772

See accompanying notes to financial statements.

1. General:

Sport Manitoba Inc. (the organization) is a not-for-profit organization which has been empowered by the Province of Manitoba to play the lead role in the implementation of the Province's sport policy. The organization's purpose is to lead and support participation and achievement in sport by all Manitobans. The organization is exempt from income taxes and is funded through an agreement with the Province of Manitoba which expires March 31, 2010.

2. Significant accounting policies:

(a) Revenue recognition:

The organization follows the deferral method of accounting for contributions, which include government grants.

Unrestricted contributions and operating grants are recognized as revenue when received or receivable if the amount to be received can be reasonably estimated.

Externally restricted contributions and grants are recognized as revenue in the year in which the related expenses are recognized.

Endowment contributions are recognized as an increase in net assets when received.

(b) Inventories:

Inventories are valued at the lower of cost and estimated realizable value with cost being determined on the first-in, first-out basis.

(c) Capital assets:

Capital assets are stated at cost. Amortization is recorded on a straight-line basis using the following terms:

Asset	Term
Building	40 years
Computers	3 years
Furniture and equipment	5 years
Print shop equipment	15 years

2. Significant accounting policies (continued):

Leasehold improvements are recorded at cost and are amortized on a straight-line basis over the remaining term of the lease.

Interest is capitalized on payments for major capital asset additions made prior to them being ready for use and is included in the cost of the asset.

Any gain or loss on disposal of these assets is charged to operations in the year of disposal.

(d) Internally restricted funds:

The initiatives program represents net assets restricted by the Board of Directors. These net assets are to be used to meet exceptional or one time initiatives and to support Sport Manitoba's pro-active participation in collaborative projects with partners in sport. All expenditures greater than $5,000 must be approved by the Board.

The Board of Directors has also internally restricted certain net assets to be used for coaching initiatives.

(e) Princess Royal Pan Am Scholarship endowment:

The organization received $100,000 to establish the Princess Royal Pan Am Scholarship endowment. The principal cannot be used to fund programs. The investment income earned is used to provide annual scholarships to one male and one female athlete, up to $3,000 each, who are competing in sport at a national or international level and who are enrolled in a post-secondary education program at a Manitoba post-secondary institution. The endowment is recorded at fair value.

(f) Use of estimates:

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the year. Actual results could differ from those estimates.

2. Significant accounting policies (continued):

(g) Financial instruments:

Financial assets and liabilities classified as held-for-trading are measured at fair value with gains and losses recognized in the statement of operations. Financial instruments classified as held-to-maturity, loans and receivables and other liabilities are measured at amortized cost. Available-for-sale financial instruments are measured at fair value, with unrealized gains and losses recognized directly in unrestricted net assets.

The organization has designated cash and marketable securities as held-for-trading; accounts receivable as loans and receivables; and accounts payable and accrued liabilities and loan payable as other liabilities. The organization has neither available-for-sale nor held-to-maturity financial instruments.

Except for held-for trading designated financial instruments, transaction costs that are directly attributable to the acquisition or issuance of financial assets or liabilities are accounted for as part of the respective asset or liability's carrying value at inception and amortized over the expected life of the financial instrument using the effective interest method. For held-for trading financial assets and liabilities, transaction costs are recorded in the statement of operations as incurred.

(h) Future accounting changes:

The Canadian Institute of Chartered Accountants (CICA) issued the following accounting standards that will come into effect for the organization's next fiscal year. The organization is in the process of determining the impact that these standards will have on its financial reporting.

CICA Section 3862, *Financial Instruments - Disclosures* and Section 3863, *Financial Instruments - Presentation* were to replace the existing Section 3861, *Financial Instruments - Disclosure and Presentation*, effective April 1, 2009 for the organization. These new sections revise and enhance disclosure requirements, and carry forward, unchanged, existing presentation requirements. These new sections place increased emphasis on disclosures about the nature and extent of risks arising from financial instruments and how the entity manages those risks. However, the CICA subsequently amended these sections to eliminate the requirement for not-for-profit entities to adopt these sections. Not-for-profit entities are permitted to continue to apply Section 3861 in place of Section 3862 and 3863. An entity that does so must disclose the fact.

2. Significant accounting policies (continued):

In September 2008, a number of standards applicable to not-for-profit organizations were amended and new Section 4470, *Disclosures of Allocated Expenses by Not-for-Profit Organizations*, was issued. The new Section 4470 requires entities that make allocations of general support and fundraising costs to other functions to disclose the policies adopted for the allocation of expenses among functions, the nature of the expenses being allocated, the basis on which such allocations have been made, and the functions to which they have been allocated. In addition, the amendments to the not-for-profit organization standards include clarification of when revenues and expenses are to be reported on a gross basis; clarification of the treatment of internal and external restriction on net assets; and improved guidance related to application of GAAP hierarchy, capital asset standards and statement of cash flows. The organization will adopt these standards on April 1, 2009.

3. Capital assets:

			2009	2008
	Cost	Accumulated amortization	Net book value	Net book value
Land	$ 1,200,000	$ –	$ 1,200,000	$ –
Building	3,150,465	–	3,150,465	–
Computers	207,870	173,555	34,315	31,677
Furniture and equipment	426,071	328,010	98,061	10,024
Print shop equipment	291,749	253,960	37,789	84,921
Leasehold improvements	146,038	146,038	–	–
	$ 5,422,193	$ 901,563	$ 4,520,630	$ 126,622

During the year, interest of $28,288 was capitalized as part of the cost of the building.

4. Facility Development Fund trust assets:

In accordance with the previous funding agreement with the Province of Manitoba, the organization is holding at March 31, 2009 $12,044 (2008 - $11,849) of cash in trust for the Facility Development Fund. The Facility Development Fund is administered by advisory representatives from Sport Manitoba Inc. and the Provincial Government. These trust assets together with the related obligation, interest income and administrative expenses have not been recorded in these financial statements for financial reporting purposes.

4. Facility Development Fund trust assets (continued):

Facility Development Fund trust assets are comprised of the following:

Initial contribution	$ 4,137,303
Interest earned to date	1,892,555
Administrative expenses paid to date	(292,236)
Projects funded	(5,725,578)
	$ 12,044

The previous Advisory Board approved 102 rural sport facility capital projects under Phase I, II, III and IV of the rural sport facility program which have been fully funded in the amount of $5,725,578.

5. KidSport Canada trust assets:

In accordance with a Delegation of Authority agreement with KidSport Canada signed March 19, 2008, the organization is holding $559,488 of assets in trust for KidSport Canada as at March 31, 2009 (2008 - $646,679). The agreement delegates authority to the organization to issue tax receipts for qualifying donations on behalf of KidSport Canada. These trust assets together with the related obligation, donation income and grant expenses have not been recorded in these financial statements for financial reporting purposes.

6. Sport For Life Centre:

In February 2009, the organization purchased land and building at 145 Pacific for $3,700,000 which will become home to the new Sport For Life Centre. The Phase 1 renovations have started with an anticipated occupancy date in the 2010 fiscal year. Phase 2 which will include the activity space is anticipated to be developed within the next two years.

7. Loan payable:

Province of Manitoba: Loan payable bearing interest at 5.90%, unsecured, repayable in monthly principal instalments of $13,889 plus interest maturing February 24, 2039	$ 4,986,101
Current portion	166,667
	$ 4,819,434

Principal repayments over the next five years are as follows:

2010	$ 166,667
2011	166,667
2012	166,667
2013	166,667
2014	166,667

8. Deferred contributions:

Deferred contributions related to expenses of future periods represent restricted funding received for future expenses.

	2009	2008
Balance, beginning of year	$ 491,092	157,101
Contributions in the current year	453,500	411,335
Contributions repaid	–	(57,925)
Amounts amortized to revenue	(82,171)	(19,419)
Balance, end of year	$ 862,421	$ 491,092

8. Deferred contributions (continued):

Deferred contributions for expenses of future periods are comprised of the following:

	2009	2008
Sport heritage	$ 41,155	$ 41,155
Western Canada Summer Games, future bids, and costs for storage of equipment	113,477	104,837
2010 Olympics	538,189	325,000
Manitoba Games	99,600	20,100
KidSport Canada	70,000	–
	$ 862,421	$ 491,092

Deferred contributions related to the 2010 Olympics represents funding received from the Province of Manitoba to attract Olympic and Paralympic related sport and training events to Manitoba leading up to the Vancouver 2010 Winter Olympic and Paralympic Games.

9. Commitments:

(a) The organization rents its premises under an operating lease which expired in 2008. The lease was extended to December 31, 2009 for certain parts of the premises for minimum base rental payments of $816,909. During the year, the organization entered into an operating lease agreement to rent additional space until December 31, 2009. The minimum lease rental payment committed is $72,869.

(b) The organization has made a commitment to fund a best ever project for the National Women Volleyball Centre in the amount of $50,000 for the year ending March 31, 2010, subject to the present levels of funding from the Province of Manitoba being maintained.

(c) The organization has an agreement with Canadian Sport Centre Manitoba Inc. to provide funding for the implementation of programs and services in support of the pursuit of excellence by high performance athletes and coaches in Manitoba. The terms of this agreement have committed the organization to provide funding of $190,000 for the year ending March 31, 2010 subject to the present levels of funding from the Province of Manitoba being maintained.

9. Commitments (continued):

(d) The organization has an agreement with the Manitoba Games Council to provide funding in support of The Manitoba Games summer and winter programs. The terms of the agreement have committed the organization to provide funding of $345,000 to the games annually, subject to present levels of funding from the Province of Manitoba being maintained and the annual approval by the Board of Directors. The term of the agreement will expire March 31, 2010.

(e) As at March 31, 2009, the organization has committed to capital expenditures of $1,917,875 relating to the redevelopment of 145 Pacific (notes 6 and 15).

10. Manitoba Sports Hall of Fame and Museum Incorporated:

The organization is the sole voting member of the Manitoba Sports Hall of Fame and Museum Incorporated (Hall of Fame), which is a registered charity organized to honour Manitoba athletes and builders. The financial statements of the Hall of Fame have not been consolidated with those of the organization. During the year the organization provided the Hall of Fame with an operating grant of nil (2008 - $65,000).

On April 1, 2008, the Hall of Fame entered into an occupancy and support agreement with the organization whereby certain services are provided by the organization to the Hall of Fame for a fee equal to the cost of providing such services, minus the sum of $65,000. In 2009, the organization provided services to the Hall of Fame in the amount of $61,645 under this agreement and, accordingly, a liability of $3,355 has been recorded in these financial statements.

10. Manitoba Sports Hall of Fame and Museum Incorporated (continued):

The following represents the financial position and the results of operations of the Hall of Fame as at March 31:

	2009	2008
Assets	$ 75,300	$ 77,918
Liabilities	$ 93,778	$ 78,586
Net assets	(18,478)	(668)
	$ 75,300	$ 77,918
Revenues	$ 154,097	$ 252,240
Expenses	157,507	241,811
Excess (deficiency) of revenues over expenses	$ (3,410)	$ 10,429

11. Manitoba Foundation for Sports Inc.:

The organization is the sole voting member of the Manitoba Foundation for Sports Inc. (Foundation), which is a registered charity organized for the purpose of furthering the development of amateur athletics in the Province of Manitoba. The financial statements of the Foundation have not been consolidated with those of the organization.

The following represents the financial position and results of operations of the Foundation as at March 31:

	2009	2008
Assets	$ 1,283,998	$ 1,345,662
Liabilities	$ 4,000	$ 65,110
Deferred contributions	399,313	394,907
Unrestricted net assets	75,685	80,645
Pan Am Games Legacy endowment	805,000	805,000
	$ 1,283,998	$ 1,345,662
Revenue	$ 60,954	$ 64,753
Expenses	65,914	18,780
Excess (deficiency) of revenue over expenses	$ (4,960)	$ 45,973

11. Manitoba Foundation for Sports Inc. (continued):

The deferred contributions have been restricted by the donors and are not available for distribution for a minimum of ten years from the date of receipt.

During the year, the Foundation provided $22,000 (2008 - $15,980) of scholarship grants to Manitoba athletes.

12. Invested in capital assets:

Invested in capital assets is calculated as follows:

	2009	2008
Unspent cash proceeds from loan	$ 649,535	$ –
Capital assets	4,520,630	126,622
Loan payable	(4,986,101)	–
	$ 184,06[illegible]	126,622

13. Pension plan:

The organization has a defined contribution pension plan. Pension expense for the year ended March 31, 2009 was $91,906 (2008 - $89,101).

14. Financial instruments:

Fair values:

The carrying values of accounts receivable and accounts payable and accrued liabilities approximate their fair value due to their short term to maturity. The fair value of the loan payable is not practicable to determine due to the underlying terms and conditions.

Credit risk:

The organization is subject to credit risk related to accounts receivable. This risk is alleviated based on the relationship the organization has with the organizations with which the accounts receivable exist.

15. Subsequent event:

On April 1, 2009, the organization signed an agreement to obtain additional financing in the amount of $11,000,000 from the Province of Manitoba with respect to the redevelopment of 145 Pacific (note 6). The loan is unsecured, repayable in equal monthly instalments of $30,556 plus interest, commencing December 31, 2009. The loan bears interest at bank prime less 0.75 percent until December 31, 2009, after which the interest rate becomes 5.95 percent.

AUDITORS' REPORT ON SUPPLEMENTARY INFORMATION

To the Board of Directors of Sport Manitoba Inc.

We have audited and reported separately herein on the financial statements of Sport Manitoba Inc. as at and for the year ended March 31, 2009 in accordance with Canadian generally accepted auditing standards.

Our audit was conducted for the purpose of forming an opinion on the basic financial statements of the organization taken as a whole. The supplementary information included in the schedule is presented for purposes of additional analysis and is not a required part of the basic financial statements. Such supplementary information has been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, is fairly stated, in all material respects, in relation to the basic financial statements taken as a whole.

AUDITORS' REPORT

To the Board of Directors of the
Tire Stewardship Board

We have audited the balance sheet of the Tire Stewardship Board as at March 31, 2009 and the statements of net operations, surplus, and changes in financial position for the year then ended. These financial statements are the responsibility of the Board's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of the Board as at March 31, 2009 and the results of its operations and the changes in financial position for the year then ended in accordance with Canadian generally accepted accounting principles.

CASH AND EQUIVALENTS – Beginning of year	99,205	11,858
CASH AND EQUIVALENTS – End of year	$ -	$ 99,205

This is the Statement of Changes in Financial Position referred to in the Auditors' report dated June 15, 2009.
The accompanying notes are an integral part of these financial statements.

TIRE STEWARDSHIP BOARD

NOTES TO FINANCIAL STATEMENTS

MARCH 31, 2009

NOTE 1 – AUTHORITY AND PURPOSE

The Tire Stewardship Board operates under the authority of the Waste Reduction and Prevention Act Chapter W40, Statutes of Manitoba, 1990, pursuant to the Tire Stewardship Regulation, Manitoba Regulation 33/95.

The Board is a not-for-profit association and, accordingly, no provision for corporate taxes is provided for pursuant to Section 149(1)(l) of The Income Tax Act, Canada.

The purpose of the Tire Stewardship Board is to recycle scrap tires, diverting them from the waste stream into reusable products or material for resale.

NOTE 2 – SIGNIFICANT ACCOUNTING POLICIES

Revenue from advance disposal surcharges on new tires supplied in Manitoba is recognized by the Tire Stewardship Board at the time the tires are supplied to the end consumer. Revenue from government grants is recognized by The Board **when approved by the Province of Manitoba**. The Board bases its accounting policies on generally accepted accounting principles in Canada, specifically those comprising the accounting recommendations for not-for-profit organizations included in the Accounting Recommendations of the Canadian Institute of Chartered Accountants Handbook.

Equipment is recorded at cost less accumulated amortization. Amortization is recorded on the declining balance basis over the estimated useful lives of the assets at the following annual rates.

Furniture and fixtures	20%
Computer equipment and software	30%

The preparation of financial statements in conformity with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amount of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amount of revenues and expenses during the reporting period. Actual results could differ from those estimates.

The Board's financial instruments consist of cash, receivables, accounts and wages payable and accrued liabilities. Unless otherwise noted, it is management's opinion that the Board is not exposed to significant interest, currency or credit risks arising from these financial instruments.

NOTE 3 – GRANT FUNDING – MANITOBA CONSERVATION

A $125,000 sustainable development fund grant was awarded to Tire Stewardship Board to undertake an off-the-road (OTR) Tire Program and complete the transition to the new industry lead program under Tire Stewardship Manitoba. Funding was as follows:

Grant awarded		$ 125,000
Final payment of grant not required or requested	$ 12,500	
Funds remaining on wind-up and forwarded to Manitoba Conservation	12,779	25,279
Manitoba Conservation funding utilized by Tire Stewardship Board		$ 99,271

The cost in the amount of $98,437 related to the final OTR Clean-up was paid out prior to year-end without having the final clean-up related work being done. Normally, this would be reflected as prepaid expense with offsetting balance to surplus. However, the Province of Manitoba has transferred its responsibility to follow-up completion of the program to Tire Stewardship Manitoba Inc. which is the successor entity to the Tire Stewardship Board.

Because of the seasonal nature of road repair construction, work could not be completed until spring of 2009. The material was purchased prior to December 31, 2008 but not delivered for project work until the second quarter into mid 2009.

Tire Stewardship Manitoba Inc. will follow-up on the program completion as it occurs sometime around mid 2009.

It is also noted that Tire Stewardship Board has either not used or returned $25,279 as per the above to Manitoba Conservation.

NOTE 4 – EQUIPMENT

	Cost	Accumulated Amortization	2009 Net Book Value	2008 Net Book Value
Computer equipment	$ -	$ -	$ -	$ 943
Furniture and fixtures	-	-	-	492
	$ -	$ -	$ -	$ 1,435

This equipment was old, had no market value, and was sent to recycling.

NOTE 5 – FUTURE DIRECTION OF THE TIRE STEWARDSHIP BOARD

The Province of Manitoba has approved in principle a long-term strategy whereby an industry-led funding organization would manage a scrap tire recycling program under an extended producer responsibility model. This proposed program has no direct financial implications for The Province of Manitoba and takes effect subsequent to the finalization of the Tire Stewardship Board completing its final responsibilities. The entity is incorporated and operates under the name Tire Stewardship Manitoba Inc. effective April 1, 2008.

The Tire Stewardship Board has completed, in conjunction with Tire Stewardship Manitoba Inc., the OTR clean-up of off road tires as outlined in the agreements entered into, subsequent to March 31, 2009, with two recyclers. This program utilized all remaining funds except for $12,500 final installment not requested and $12,779 which was sent to The Province of Manitoba and reflected as a reduction to the grant received as reflected in note 3. This resulted in the wind-up of the Tire Stewardship Program under the auspices of The Province of Manitoba.

AUDITORS' REPORT

To the Members of TRAVEL MANITOBA

We have audited the statement of financial position of TRAVEL MANITOBA as at March 31, 2009 and the statements of operations, changes in net assets and cash flows for the year then ended. These financial statements are the responsibility of the Organization's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of the Organization as at March 31, 2009, and the results of its operations and its cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

The accompanying summary of significant accounting policies and notes are an integral part of these financial statements.

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

As at March 31, 2009

BASIS OF REPORTING

The financial statements of the Organization have been prepared in accordance with Canadian generally accepted accounting principles.

CAPITAL ASSETS

Capital assets are recorded at cost and amortized on a declining balance basis at the following rates:

Computer hardware	30% straight-line
Computer software	30% straight-line
Furniture and equipment	5% straight-line
Leasehold improvements	5% straight-line

REVENUE RECOGNITION

The Organization follows the deferral method of accounting for contributions. Grant revenue is recognized in the period earned. Partnership and marketing revenue are recognized when services are rendered if the amount to be received can be reasonably estimated and collection is reasonably assured.

The Organization recognizes revenue arising from non-monetary transactions in the period when services have been rendered if the amount to be received can be reasonably estimated and collection is reasonably assured.

FINANCIAL INSTRUMENTS

The Organization utilizes various financial instruments. Unless otherwise noted, it is management's opinion that the Organization is not exposed to significant interest, currency or credit risks arising from these financial instruments and the carrying amounts approximate fair values.

All transactions related to financial instruments are recorded on a settlement date basis.

The Organization classifies its financial instruments as follows based on the purpose for which the asset was acquired and follows the disclosed accounting policy for each category.

Assets/Liability	**Category**	**Measurement**
Cash	Held for trading	Fair value
Short-term deposits	Held for trading	Fair value
Trade accounts receivable	Loans and receivables	Amortized cost
Due from Province of Manitoba	Loans and receivables	Amortized cost
Accounts payable and accrued liabilities	Other financial liabilities	Amortized cost

- Held for trading items are carried at fair value, with changes in their fair value recognized in the statement of operations.
- Other financial liabilities are carried at amortized cost, using the effective interest method.
- Loans and receivables are carried at amortized cost, using the effective interest rate method, less any provision for impairment.

Transaction costs are expensed as incurred.

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

As at March 31, 2009

RESTRICTED FUND FOR ACQUISITION OF CAPITAL ASSETS

A fund has been established by the Board of Directors in order to finance the future acquisition of capital items which are not funded by the Province of Manitoba through the provision of operating grants. Charges to the fund will occur at the discretion of the President and Chief Executive Officer. Any future redesignation of the fund balance would be subject to approval by the Board of Directors.

USE OF ESTIMATES

The preparation of financial statements in accordance with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from management's best estimates as additional information becomes available in the future.

NEW ACCOUNTING PRONOUNCEMENTS

Recent accounting pronouncements that have been issued but are not yet effective, and have a potential implication for the Organization, are as follows:

Financial Statement Concepts

CICA Handbook Section 1000, Financial Statement Concepts has been amended to focus on the capitalization of costs that truly meet the definition of an asset and deemphasizes the matching principle.

The revised requirements are effective for annual and interim financial statements relating to fiscal years beginning on or after October 1, 2008. The Organization is currently evaluating the impact of the adoption of this change on the disclosure within its financial statements.

Financial Instruments - Disclosure and Presentation

On October 15, 2008 the CICA deferred indefinitely the requirement of not-for-profit organizations to implement new standards dealing with certain financial instrument, disclosures and presentation. The Organization has elected to defer application of these standards.

Financial Statements by Not-for-Profit Organizations

In September 2008, a number of standards applicable to not-for-profit organizations were amended and issued. The changes are intended to improve financial reporting by not-for-profit organizations and make not-for-profit standards consistent with those of profit-oriented enterprises when they address the same issues. These amendments which are effective for fiscal years beginning on or after January 1, 2009 will not have a significant impact on the results of operations or financial position.

NEW ACCOUNTING PRONOUNCEMENTS (continued)

In December 2008, the AcSB and the Public Sector Accounting Board issued a joint Invitation to Comment, "Financial Reporting by Not-for-Profit Organizations," to invite feedback on the future of financial reporting by not-for- profit organizations. The financial reporting options under consideration by the AcSB include IFRSs, private enterprise standards and public sector standards. Until the strategy has been determined and implemented, not-for-profit organizations will continue to apply current accounting standards.

The Organization continues to monitor the developments in this area and evaluate the implications of the potential changes in financial reporting standards.

NOTES TO FINANCIAL STATEMENTS

As at March 31, 2009

1. NATURE OF ORGANIZATION

Travel Manitoba was created as a Crown Corporation on April 1, 2005 under The Travel Manitoba Act as the culmination of extensive consultation and leadership from both the tourism industry and the provincial government. Travel Manitoba's mission is to be the leader in stimulating innovative, sustainable tourism growth in Manitoba. Travel Manitoba collaborates closely and in partnership with the tourism industry and governments to attract visitors to Manitoba, sustaining and creating jobs and businesses in the tourism sector in the province.

Travel Manitoba receives core funding from the Province of Manitoba to facilitate operations and to mobilize public and private resources to further foster the growth and professionalism of the tourism industry in Manitoba. Travel Manitoba is economically dependent on the Province of Manitoba, because it derives a significant portion of its revenue from the Province of Manitoba.

2. CHANGE IN ACCOUNTING POLICY

Capital Disclosures

On April 1, 2008 the Organization adopted a requirement of the CICA to provide disclosure about how it manages its unrestricted net assets (See Note 9).

3. CASH AND SHORT-TERM DEPOSITS

The Organization invests all surplus cash into short-term deposits with the Province's Treasury Division. These deposits are made up of 30, 60 and 90 day callable term deposits.

4. SEVERANCE PAY BENEFITS

Upon inception on April 1, 2005, the Organization recorded accumulated severance pay benefits receivable and payable of $368,937 transferred from the Province of Manitoba for its employees. This receivable, or portion thereof, for the Organization, will be collected by the organization as severance benefits are paid to employees on record as at April 1, 2005. The amount of severance pay obligations is based on actuarial calculations. The periodic actuarial valuations of these liabilities may determine that adjustments are needed to the actuarial calculations when actual experience is different from that expected and/or because of changes in actuarial assumptions used. The resulting actuarial gains or losses are recorded in the period of the change.

An actuarial report was completed for the severance pay liability as of March 31, 2009. The report provides a formula to update the liability on an annual basis. The Organization's actuarially determined net liability for accounting purposes as at March 31, 2009 was $355,870.

During the year, the Organization reduced the receivable from the government in the amount of $8,923 related to employees no longer employed by the Organization.

NOTES TO FINANCIAL STATEMENTS

As at March 31, 2009

5. CAPITAL ASSETS

	2009		2008	
	COST	ACCUMULATED AMORTIZATION	COST	ACCUMULATED AMORTIZATION
Computer hardware	**$ 80,631**	**$ 29,668**	$ 73,664	$ 9,721
Computer software	**29,503**	**20,947**	29,503	16,631
Furniture and equipment	**12,053**	**1,494**	8,715	1,056
Leasehold improvements	**97,679**	**4,626**	38,153	2,862
	$ 219,866	**$ 56,735**	$ 150,035	$ 30,270
Cost less accumulated amortization		**$ 163,131**		$ 119,765

6. EMPLOYEE PENSION BENEFITS

Employees of Travel Manitoba are eligible for pension benefits in accordance with the provisions of the Civil Service Superannuation Act ("CSSA"), administered by the Civil Service Superannuation Board. The CSSA established a defined benefit plan to provide benefits to employees of the Manitoba Civil Service and to participating agencies of the Government, including Travel Manitoba, through the Civil Service Superannuation Fund.

The Organization is required to pay the Province of Manitoba an amount equal to its employees current pension contributions. The amount paid for 2009 was $111,754 (2008 - $102,071). Under this agreement, the Organization has no further pension liability.

7. LEASE COMMITMENTS

The Organization has entered into lease agreements expiring March 2010 for rental of facilities at various locations with total annual payments of $618,595.

8. NON-MONETARY TRANSACTIONS

The Organization in the current year has entered into contracts with exchanges of non-monetary services for other non-monetary services with little or no monetary consideration involved. These transactions are within normal business activities and were done in order to carry out the mandate of the Organization.

NOTES TO FINANCIAL STATEMENTS

As at March 31, 2009

8. NON-MONETARY TRANSACTIONS (continued)

The Organization has used the fair value of the services that have been given up in order to measure the amount of the transaction as this is the more reliable and accurate measure of the revenue and expenses that have been incurred through these transactions. The aggregate amount of all non-monetary transactions in the current year total $89,600 (2008 - nil).

The Organization has not incurred any gains or losses in the current year with respect to these non-monetary transactions.

9. CAPITAL MANAGEMENT

The Organization considers its capital to comprise its unrestricted net assets, reserve capital for purchase of capital assets and capital invested in capital assets. There have been no changes to what the organization considers to be its capital since the previous period.

As a not-for-profit entity, the Organization's operations are reliant on revenues generated annually. The Organization has accumulated unrestricted net assets over its history. A portion of these accumulated funds is retained as working capital (current assets less current liabilities) which may be required from time to time due to timing delays in receiving its primary funding.

The remaining funds are available for the use of the Organization at the Board's discretion.

OFFICE OF THE
AUDITOR GENERAL

AUDITORS' REPORT

To the Lieutenant Governor in Council
To the Legislative Assembly of Manitoba
To the Governing Council of the University College of the North

We have audited the statement of financial position of the University College of the North as at June 30, 2008, and the statements of operations, changes in fund balances and cash flows for the year then ended. These financial statements are the responsibility of the University College's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of the University College as at June 30, 2008, and the results of its operations and its cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

1. NATURE OF OPERATIONS

The University College of the North operates under the authority of *The University College of the North Act* Chapter U55 of the *Continuing Consolidation of the Statutes of Manitoba*, which came into force July 1, 2004. This Act provides for the continuation of Keewatin Community College, as established under *The Colleges Act* as a board-governed institution on April 1, 1993.

The purpose of the University College of the North is to provide post-secondary education in northern Manitoba. It should be learner and community centred, be characterized by a culture of openness, inclusiveness and tolerance, and be respectful of Aboriginal and northern values and beliefs.

The educational purposes of UCN are to serve the educational needs of Aboriginal and northern Manitobans and to enhance the economic and social well-being of northern Manitoba.

The university college has tax-exempt status as a registered charity under *The Income Tax Act*.

2. SIGNIFICANT ACCOUNTING POLICIES

The financial statements of the University College of the North (UCN) have been prepared in accordance with Canadian generally accepted accounting principles. University College of the North follows the restricted fund method of accounting for contributions.

a) General

The transactions of UCN have been segregated into the following funds in accordance with specified activities or objectives:

UCN Fund - transactions related to educational and ancillary activities of UCN.

Inter-Universities Services Fund - transactions related to the educational programs of the Inter-Universities Services Program which is administered by UCN.

Northern Forest Diversification Centre Fund - transactions related to the educational and ancillary activities of the Northern Forest Diversification Centre.

Student Award Fund - transactions related to donations for student scholarships and bursaries.

Endowment Fund - transactions related to endowments for student scholarships and bursaries.

Capital Campaign Fund - transactions related to donations received towards the development and capital needs of University College of the North.

Internally Restricted Fund - transactions related to appropriations made from (to) the Unrestricted Fund.

2. SIGNIFICANT ACCOUNTING POLICIES *(continued)*

b) New Accounting Policies

Effective July 1, 2007 the entity adopted the following new accounting standards issued by the Canadian Institute of Chartered Accountants (CICA).

Section 1506, *Accounting Changes*
Section 1506 requires that voluntary changes in accounting policies are made only if they result in the financial statements providing reliable and more relevant information. Additional disclosure is required when the entity has not yet applied a new primary source of Canadian GAAP that has been issued but is not yet effective, as well as when changes in accounting estimates and errors occur. The adoption of this revised standard had no material impact on the entities financial statements for the year ended June 30, 2008.

Section 3855, *Financial Instruments – Recognition and Measurement*
Section 3855 prescribes the criteria for recognition and presentation of financial instruments on the balance sheet and the measurement of financial instruments according to prescribed classifications. Under this section, financial assets and liabilities are initially recorded at fair value. This section also addresses how financial instruments are measured subsequent to initial recognition and how the gains and losses are recognized.

The entity is required to designate its financial instruments into one of the following five categories: held for trading; available for sale; held to maturity; loans and receivables; and other financial liabilities. All financial instruments classified as held for trading or available for sale are subsequently measured at fair value with any change in fair value recorded in net earnings or directly to unrestricted net assets, respectively. All other financial instruments are subsequently measured at amortized cost.

The Entity has designated its financial instruments as follows.

Cash and short-term investments are classified as financial assets held for trading and are measured at fair value with gains and losses recognized in net earnings.

Accounts receivable and amounts due from the Province of Manitoba are classified as loans and receivables. These financial assets are recorded at their amortized cost using the effective interest rate method.

Accounts payable, accrued liabilities and accrued vacation benefits are classified as other financial liabilities. These financial liabilities are recorded at their amortized cost using the effective interest rate method.

The adoption of this revised standard had no material impact on the entities financial statements for the year ended June 30, 2008.

c) Financial Instruments

The financial instruments at UCN consist of cash and short term investments, accounts receivable, due from Province of Manitoba – vacation and severance benefits, accounts payable and accrued liabilities, and accrued vacation benefits.

The fair value of accounts receivable, due from Province of Manitoba – vacation benefits, accounts payable and accrued liabilities, and accrued vacation pay approximates their carrying values due to their short term maturity.

The carrying value of the due from Province of Manitoba – severance benefits approximates its fair value as the annual interest accretion is funded.

Unless otherwise noted, it is management's opinion that Plan is not exposed to significant interest, currency or credit risk arising from these financial instruments.

2. SIGNIFICANT ACCOUNTING POLICIES *(continued)*

d) Future Accounting Policy Changes

The CICA has issued two new standards, CICA 3862 *Financial Instruments – Disclosures* and CICA 3863: Financial Instruments - Presentation, which enhance the abilities of users of financial statements to evaluate the significance of financial instruments to an entity, related exposures and the management of these risks.

The CICA has issued a new standard, CICA 1535 *Capital Disclosures*, which requires the disclosure of qualitative and quantitative information that enables users of financial statements to evaluate the entity's objectives, policies and processes for managing capital.

These changes in accounting policies, which will be adopted affective July 1, 2008, will only require additional disclosures in the financial statements.

The CICA has also issued Section 3031, Inventories, replacing Section 3030, Inventories. The new Section will be applicable to financial statements relating to fiscal years beginning on or after January 1, 2008. Accordingly, UCN will adopt the new standards for its fiscal year beginning July 1, 2008. It provides more guidance on the measurement and disclosure requirements for inventories. (For example, it requires that fixed and variable production overheads be systematically allocated to the carrying amount of inventory.) UCN does not expect that the adoption of this new Section will have a material impact on its financial statements.

e) Revenue Recognition

Tuition and fees are recognized as revenue in the semester or term earned.

Revenue from Market Driven Training contracts is recognized during the year at a rate approximating the delivery of the contracted programs and services.

Investment income is recognized as revenue when earned.

Contributions:

Unrestricted contributions and grants are recognized as revenue when received or receivable.

Restricted contributions for which a corresponding restricted fund is not presented are recognized as revenue in the year in which the related expenditures are incurred.

Donations are reported as revenue when received. Donations restricted to disbursement as scholarships and bursaries are restricted to that purpose.

Endowment contributions (and/or investment income thereon) that are held in perpetuity according to restrictions placed by the donors are recognized as revenue in the Endowment Fund.

Contributions (or portions permitted thereof) which are designated for the purchase of capital assets are deferred and amortized to revenue at the same rate as the related capital assets are amortized to expenditures.

f) Short-term investments

Investments are recorded at fair market value.

2. SIGNIFICANT ACCOUNTING POLICIES *(continued)*

g) Inventory

UCN Fund - inventory is recorded at the lower of cost or net realizable value.

Northern Forest Diversification Centre Fund - inventory is recorded at lower of average cost or net realizable value.

h) Capital Assets

Individual capital assets with a value greater than $5,000 are capitalized and recorded at cost in the year of acquisition. Individual capital assets with a value less than $5,000 are expensed in the year of acquisition. Amortization of capitalized assets is recorded on a straight line basis commencing the year after acquisition over the following periods:

Automotive equipment	5 years
Buildings	40 years
Building improvements	10 years
Computer equipment	5 years
Other equipment	10 years

Library holdings are valued using the "base stock" method and accordingly are recorded at the value transferred upon governance at April 1, 1993. No amortization is taken on library holdings, and subsequent library acquisitions are expensed in the year of acquisition.

Certain capital assets purchased for specific Market Driven Training contracts are expensed in the year of purchase.

i) Measurement Uncertainty

The preparation of financial statements in accordance with Canadian generally accepted accounting principles requires that management make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements, and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from management's best estimates as additional information becomes available in the future.

	$	4,533,149	$	1,826,974	$	2,706,175	$	1,780,737

5. DUE FROM PROVINCE OF MANITOBA

The Province of Manitoba has recognized its liability to the University College for the opening balances of accrued employee severance benefits and vacation benefits as at April 1, 1998, when Keewatin Community College (precursor to UCN) assumed responsibility for these expenditures.

The amount recorded as due from Province of Manitoba – vacation benefits was initially based on the estimated value of the corresponding liability as at April 1, 1998. Subsequent to April 1, 1998, the Province has included in its ongoing annual funding to UCN, an amount equal to the current year's expense for vacation pay entitlements.

The amount recorded as due from Province of Manitoba – severance benefits is the value of the corresponding actuarial liability for severance benefits as at April 1, 1998. There has been no change to the value subsequent to April 1, 1998 because the Province has provided, in its ongoing annual funding to UCN, an amount equivalent to the change in the post employment liability including annual interest accretion related to the receivable. The receivable will be paid by the Province when it is determined that the funding is required to discharge the related severance benefits.

5. DUE FROM PROVINCE OF MANITOBA *(continued)*

	2008	2007
Accrued severance benefits	$ 793,500	$ 793,500
Accrued vacation benefits	752,589	752,589
	$ 1,546,089	$ 1,546,089

6. ACCOUNTS PAYABLE AND ACCRUED LIABILITIES

UCN Fund	2008	2007
Accrued liabilities	$ 302,800	$ 300,662
Wages and benefits payable	765,796	758,395
Trade accounts payable	1,677,735	649,202
Due to Student Associations	11,282	8,430

Inter-Universities Services Fund		
Trade accounts payable	$ 62,702	$ 56,393
Northern Forest Diversification Centre Fund		
Trade accounts payable	$	$ 3,371
Student Award Fund		
Other	$ 500	$
	$ 2,820,815	$ 1,776,453

7. DEFERRED CONTRIBUTIONS

Deferred contributions reported in each fund relate to designated contributions received in the current year that are related to expenditures of a subsequent year. Changes in deferred contributions during the year are as follows:

	Beginning of Year	Increases	Decreases	End of Year
UCN Fund	$ 3,050,154	$ 1,236,354	$ (898,920)	$ 3,387,588

8. DEFERRED CONTRIBUTIONS RELATED TO CAPITAL ASSETS

	Beginning of Year	Increases	Decreases	End of Year
UCN Fund	$ 945,765	$ 855,537	$ 178,371	$ 1,622,931
Inter-Universities Services Fund	88,714		24,908	63,806
	$ 1,034,479	$ 855,537	$ 203,279	$ 1,686,737

9. ACCRUED SEVERANCE BENEFITS

UCN Fund	2008	2007
Balance, beginning of year	$ 1,302,812	$ 1,225,187
Experience gain (loss)		
Benefits accrued	105,538	99,133
Interest on accrued benefits	91,196	86,044
Severance paid	(170,871)	(108,552)
Balance, end of year	$ 1,328,675	$ 1,302,812

9. ACCRUED SEVERANCE BENEFITS *(continued)*

Inter-Universities Services Fund

Balance, beginning of year	$	47,060	$	40,703
Experience gain (loss)				
Benefits accrued		4,022		3,711
Interest on accrued benefits		3,294		2,646
Severance paid				
Balance, end of year	$	54,376	$	47,060
	$	1,383,051	$	1,349,872

An actuarial valuation of the severance obligations as at March 31, 2005 was conducted by Ellement & Ellement Ltd., Consulting Actuaries. The key actuarial assumptions were a rate of return of 7% (2000 - 7.5%), 2.5% inflation (2000 - 2.75%), salary rate increases of 3.25% (2000 - 3.5%). The accrued benefit cost method with salary projection was used and the liabilities have been extrapolated to June 30, 2008 using the projection formula provided by the actuary.

10. PENSION COSTS AND OBLIGATIONS

The University College's employees are contributing members of the provincially operated Civil Service Superannuation Plan or the Teacher's Retirement Annuity Fund defined benefit pension plans. The accumulated superannuation liabilities continue to be funded directly by the Province of Manitoba, rather than the University College itself for all employees hired prior to October 1, 2002.

The benefit to the University College of having its share of pension benefits paid directly by the Province of Manitoba has not been quantified by an actuarial valuation. The total contributions during the fiscal year by employees hired prior to October 1, 2002 were $505,323 (2007 - $509,623).

Total contributions during the fiscal year by employees hired after October 1, 2002 (and matched by the University College) were $388,019 (2007 - $262,007). These contributions represent the total pension obligations of the University College. The University College is not required under present legislation to make contributions with respect to any actuarial deficiencies of the plan.

11. CONTRACTUAL OBLIGATIONS

The University College has entered into various contracts to rent office equipment, lease facility space, and for services provided by third parties for security, food services, and snow removal. Contractual obligations over the next four years are as follows:

2008/09	398,574
2009/10	156,419
2010/11	28,071
2011/12	8,499

12. INTERNALLY RESTRICTED NET ASSETS

Appropriations from the Unrestricted Fund are made to provide for future funding for campus development, innovations funds, fiscal stabilization, conference and the establishment of a science lab.

	Opening Balance	Increases	Decreases	Ending Balance
UCN Fund				
Campus Development Fund	$ 160,653	$	$	$ 160,653
Innovations Fund	22,878			22,878
Fiscal Stabilization	781,260	62,220		843,480
Programming Initiatives		2,260,200		2,260,200
Total	$ 964,791	$ 2,322,420	$	$ 3,287,211
Inter-Universities Services Fund				
Innovations Fund	$ 642,890	$ 12,094	$	$ 654,984
Conferences	50,000			50,000
Science Lab	100,000			100,000
Total	$ 792,890	$ 12,094	$	$ 804,984
	$ 1,757,681	$ 2,334,514	$	$ 4,092,195

The net increase to the Internally Restricted Net Assets in the UCN Fund is $2,322,420 and the IUS Fund is $12,094. The overall increase to the Internally Restricted Net Assets is $2,334,514.

13. RELATED PARTY TRANSACTIONS

The University College is related in terms of common ownership to all Province of Manitoba created departments, agencies and Crown Corporations. The University College enters into transactions with these entities in the normal course of business. These transactions are recorded at the exchange amount. The $817,388 in facility costs was paid to Manitoba Infrastructure and Transportation for the rental of buildings. Funds available for short-term investments are invested with the Province of Manitoba. At June 30, 2008 $8.2 million (2007 - $7.1 million) was invested with the Province of Manitoba.

14. COMPARATIVE FIGURES

Certain of the comparative figures have been reclassified to conform to the financial statement presentation adopted for the current year.

15 DISCONTINUED OPERATIONS - NFDC

On December 31, 2007, the operations of NFDC ceased to continue. In the 2008/09 fiscal year management will seek approval to close the bank account and use the dollars to continue the training portion of NFDC under regular educational operations through UCN.

UNIVERSITY
OF MANITOBA

STATEMENT OF MANAGEMENT RESPONSIBILITY FOR FINANCIAL REPORTING

The University is responsible for the preparation of the consolidated financial statements and has prepared them in accordance with generally accepted accounting principles as set out by the Canadian Institute of Chartered Accountants (CICA). The University believes the consolidated financial statements present fairly the University's consolidated financial position as at March 31, 2009 and the results of its operations for the year then ended.

The University's Board of Governors is responsible for overseeing the business affairs of the University and also has the responsibility to approve the consolidated financial statements. The Board has delegated certain responsibilities to its Audit Committee including the responsibility for reviewing the annual consolidated financial statements and meeting with management and the Auditor General of Manitoba on matters relating to the financial reporting. The Auditor General has full access to the Audit Committee with or without the presence of management. The Board has approved the consolidated financial statements.

In fulfilling its responsibilities and recognizing the limits inherent in all systems, the University has developed and maintains a system of internal controls designed to provide reasonable assurance that University assets are safeguarded from loss and that accounting records are a reliable basis for the preparation of consolidated financial statements. The integrity of internal controls is reviewed on an ongoing basis by Audit Services and the Auditor General.

The consolidated financial statements for the year ended March 31, 2009 have been reported on by the Auditor General of Manitoba, the auditor appointed under the University of Manitoba Act. The Auditor's Report outlines the scope of her examination and provides her opinion on the fairness of presentation of the consolidated financial statements.

OFFICE OF THE
AUDITOR GENERAL
MANITOBA

AUDITOR'S REPORT

To the Lieutenant Governor in Council
To the Legislative Assembly of Manitoba
To the Board of Governors of the University of Manitoba

We have audited the consolidated statement of financial position of the University of Manitoba as at March 31, 2009, and the consolidated statements of operations and changes in fund balances and cash flows for the year then ended. These financial statements are the responsibility of the University's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these consolidated financial statements present fairly, in all material respects, the financial position of the University as at March 31, 2009, and the results of its operations and its cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

Carol Bellringer

(The accompanying Notes form an integral part of the Consolidated Financial Statements)

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEARS ENDED MARCH 31
(in thousands of dollars)

1. AUTHORITY AND PURPOSE

The University of Manitoba was established in 1877. It is governed by a Board of Governors acting under the authority of The University of Manitoba Act, R.S.M. 1987, c. U60. The University of Manitoba is a registered charity and is exempt from income taxes under Section 149 of the Income Tax Act.

The University of Manitoba, as the largest and most comprehensive institution of higher learning in Manitoba, plays a distinctive role within the Province. In addition to offering an undergraduate liberal education in arts, science and education, the University of Manitoba provides programs in a broad range of professional studies, applied sciences and the fine and performing arts and is responsible for the vast majority of graduate education and research in Manitoba. The University of Manitoba reaches out to a variety of constituencies in order to enhance the health, cultural, social and economic life of Manitobans and to provide lifelong learning opportunities for them. Through community service the University makes its expertise available to all Manitobans.

2. SIGNIFICANT ACCOUNTING POLICIES

a. General

These consolidated financial statements have been prepared in accordance with Generally Accepted Accounting Principles (GAAP) as recommended by the Canadian Institute of Chartered Accountants ("CICA") for not-for-profit organizations. The University has adopted the restricted fund method of accounting for contributions.

b. Basis of Consolidation

The consolidated financial statements include the accounts of Smartpark Development Corporation, a wholly owned subsidiary of the University of Manitoba. The company has a March 31 year end and its purpose is to develop and operate a research park at the University of Manitoba.

c. Fund Accounting

The University classifies resources used for various purposes into separate Funds which correspond to its major activities and objectives. The Consolidated Statement of Financial Position combines the assets and liabilities of all Funds.

The University maintains its Funds under three fund categories, General, Restricted and Endowment Funds. The General Funds include the Funds for General Operating, Specific Provisions and Expenses Funded from Future Revenues. The Restricted Funds include the Capital Asset, Research and Special, Staff Benefits and Trust Funds. The Endowment Fund includes endowment funds of the University.

d. Accounting Estimates

Accounting estimates are included in financial statements to approximate the effect of past revenue or expense transactions or events, or to approximate the present status of an asset or liability. Examples include accruals for salaries and benefits, the estimated useful life of an asset and certain actuarial assumptions used in determining employee future benefits. It is possible that changes in future conditions could require changes in the recognized amounts for accounting estimates.

e. General Funds

General Operating Fund:

The General Operating Fund includes the academic, administrative, operational and ancillary costs that are funded by tuition and related fees, government grants, net investment income and miscellaneous income, sales of goods and services to external parties and ancillary income. As such, this Fund reports unrestricted resources and restricted resources earmarked for general operating purposes.

All funds received or accrued by the University for general operating purposes and for equipment and renovation expenses not meeting the University's capitalization criteria are included in the General Operating Fund. The net cost of operating units is determined by including internal cost allocations for certain centrally administered services such as the telephone system in the units' expenses and by deducting these expenses as internal cost recoveries from the total expenses incurred by the unit administering these services.

The University BookStore, Parking, Student Residences and Pharmacy/Post Office are classified as Ancillary Services and are budgeted on a break-even basis. Any surpluses or deficits are transferred to/from the Specific Provisions Fund. Overhead costs have been allocated to all ancillary operations. Amortization of ancillary capital assets and interest expense is recorded in the Capital Asset Fund.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEARS ENDED MARCH 31
(in thousands of dollars)

Specific Provisions Fund:
The Specific Provisions Fund records appropriations made from (to) the General Operating, Capital Asset and Research and Special Funds.

These appropriations are made to provide future funding for the replacement, improvement or emergency maintenance of capital assets, unit carryover, a fiscal stabilization provision to offset potential spending in excess of future budgets and other matters. Such appropriations are shown as inter-fund transfers on the Consolidated Statement of Operations and Changes in Fund Balances.

Expenses Funded From Future Revenues:
Expenses Funded from Future Revenues records the amount of unpaid vacation pay for staff which will be funded from future revenues. It also records the actuarially determined expense for employee future benefits and change in pension obligations.

f. Restricted Funds

Capital Asset Fund:
The Capital Asset Fund consists of restricted contributions resulting from capital asset co-funding arrangements with external parties, contributed capital assets, sinking fund investment income and government grants, restricted for the purpose of acquiring capital assets and retiring capital advances. Funding agreements, using promissory notes as a vehicle, entered into with the Provincial Government, for the construction or acquisition of capital assets, which will be repaid from future funding provided by the Provincial Government through the Council on Post Secondary Education (COPSE) are recorded as capital grants. These capital grants, under the restricted fund method of accounting, are reflected as revenue in the Consolidated Statement of Operations and Changes in Fund Balances. The related future funding from COPSE over the terms of the promissory notes, to offset the interest expense and principal payments are both excluded from the Consolidated Statement of Operations and Changes in Fund Balances. Expenses include interest on debt relating to the acquisition or construction of capital assets, amortization and gains or losses on disposal of capital assets, including write-downs resulting from obsolescence.

Research and Special Fund:
The Research and Special Fund consists of contributions specifically restricted for research or other special activities. Contributions are provided from both federal and provincial granting agencies and other public and private sources. These funds are spent in accordance with the conditions stipulated in the governing contracts and agreements.

Staff Benefits Fund:
The Staff Benefits Fund is divided into Fund Accounts for Pension Reserve, Self-Insured Plans and Benefit Reserve, the revenues of which are restricted for the purposes noted.

(i) Pension Reserve:
This Fund Account is restricted for special payments towards any unfunded liability of the University of Manitoba Pension Plan (1970) and the University of Manitoba Pension Plan (1993) and other pension obligations.

(ii) Self-Insured Plans:
This Fund Account records the assets and liabilities for two self-insured benefit plans, the Long Term Disability Income Plan and the Dental Plan. The Long Term Disability Income Plan is used for long term disability payments arising on and after June 1, 1981 for eligible staff. The Plan contains two funds, one for the payment of Basic Benefits and another for the payment of Cost-of-Living Benefits. The Dental Plan is administered by a contracted third party. Surplus funds are held for the purpose of covering deficits which may occur in this self-insured plan.

(iii) Benefit Reserve:
This Fund Account is used for the support of current and future staff benefit programs. Experience refunds related to the group insurance plans are credited to this Fund Account. Employment Insurance premium savings resulting from the extended sick leave coverage provided by the University are also credited to this Fund Account.

Trust Fund:
The Trust Fund records gifts and bequests received which may be used in their entirety along with net investment income earned on these funds, according to donor restrictions. The majority of these funds are used for scholarships, bursaries, awards, loans, and other scholarly activities.

g. Endowment Fund

The Endowment Fund records gifts and bequests received with the stipulation that these funds be invested in perpetuity and the net realized investment income earned be utilized for designated purposes. The Fund balance also reflects the change in fair value of Endowment Fund investments, which is recorded as a component of net investment income.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEARS ENDED MARCH 31
(in thousands of dollars)

h. Revenue Recognition

Restricted contributions are recognized as revenue of the appropriate Fund when received or receivable, if the amount to be received can be reasonably estimated and collection is reasonably assured.

Unrestricted contributions, including sales of goods and services and ancillary revenues, are recognized as revenue of the General Operating Fund in the year received or receivable, if the amount to be received can be reasonably estimated and collection is reasonably assured.

Contributions for endowment purposes are recognized as revenue in the Endowment Fund in the year received. Net realized investment income earned on endowments is recorded in the appropriate Fund depending on the restrictions imposed by the original donor. The change in fair value (unrealized investment income) of Endowment Fund investments is recorded as a component of net investment income in the Endowment Fund.

Net investment income earned on temporary surplus funds is recorded in the appropriate Fund depending on the restrictions imposed. Investment income on unrestricted surplus funds is recorded as unrestricted income in the General Operating Fund.

i. Contributed Materials and Services

Gifts-in-kind are recorded in the consolidated financial statements to the extent that they are eligible for an official donation receipt, since this results in the capture of the information in the University's financial records.

Because of the difficulty involved in tracking and recording contributed services, the market value of these services are not recognized in the consolidated financial statements. Contributed services include activities such as membership on the University's Board of Governors and its various committees, lecturing services and volunteer services at fund raising or sporting events all of which are performed by staff, students and the community at no charge to the University. These services, although not recognized in the consolidated financial statements, are critical to the successful functioning of the University.

j. Investments

Investments are classified as held-for-trading and are carried at fair value. The change in fair value of investments is reflected as a component of net investment income in the consolidated statement of operations. Fair value of investments is determined based on year end quoted market prices.

k. Pledges Receivable

The University does not record pledges receivable in its consolidated financial statements. Revenue from gifts, bequests and donations is recognized on a cash basis because of the uncertainty surrounding collection and in some instances because of the difficulty in determining the valuation of pledges receivable. The University recognizes gifts and donations to be received through the University of Manitoba Foundation U.S.A. Inc. only when the Board of Directors of the Foundation have formalized the transfer with a resolution, collectibility is reasonably assured and the valuation of these gifts and donations can be reasonably determined.

l. Inventories

Inventories have been valued at the lower of cost and net realizable value.

m. Capital Assets

Purchased capital assets are recorded at cost. Capital assets which are constructed by the University are recorded as Construction in Progress until the capital asset is put into use. Contributed capital assets are recorded at market value at the date of contribution. Intangibles such as patents and copyrights are recorded at a nominal amount of one dollar in the year the patent or copyright is obtained.

Amortization is provided on a straight-line basis over the assets' estimated useful lives as follows:

Buildings and Major Renovations	15-50 years
Computer Hardware, Software and Electronics	5-10 years
Furniture and Equipment	10 years
Library Books	10 years
Parking Lots	20 years
Vehicles	5 years

Equipment acquired under a capital lease is amortized over the useful life of the asset. Works of art, treasures, rare books and manuscripts are not amortized.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEARS ENDED MARCH 31
(in thousands of dollars)

n. Collections

The University holds a number of collections which have been donated to its libraries, faculties and schools over the years. The library, faculty or school receiving the donation assumes responsibility for safeguarding and preserving the collection. The University seldom, if ever, disposes of its collections or of individual pieces in its collections and therefore does not have a formal policy with respect to the use of proceeds of disposal. However, the University abides by all restrictions placed by donors at the time a donation is received, which may include restrictions imposed relating to the sale of a collection or items contained therein.

The University's policy with regard to its collections is to fund maintenance expenses from the General Operating Fund, if monies are not available for such purposes in a Restricted Fund. The cost of maintenance is not tracked and is therefore not determinable.

o. Pension Costs

The University sponsors three pension plans for its employees and retirees:

The University of Manitoba Pension Plan (1970), The University of Manitoba Pension Plan (1993) and The University of Manitoba GFT Pension Plan (1986). The 1970 Plan and 1986 Plan are defined contribution plans and as a result the pension costs are based on contributions required by those plans.

The Pension Costs for the 1993 Plan are determined actuarially using the projected unit credit actuarial cost method and best estimate expectations of investment performance, salary escalation, retirement ages of employees and member mortality. Actuarial gains and losses are amortized on a straight line basis over the expected average remaining service life of the active employees.

The funded position of the 1993 plan is disclosed in Note 15.

p. Financial Instruments

The financial instruments at the University consist of cash, marketable investments, accounts receivable, investments, accounts payable, unearned revenue, staff vacation entitlements, other long term liabilities, capital lease obligations and long term debt.

The primary risk exposures for investments are foreign currency, interest rate volatility, and market and credit risk. The University, through the work of its investment committees, has formal policies and procedures in place governing asset mix among equity, fixed income and alternative investments, requiring diversification within categories, and setting limits on the size of exposure to individual investments.

The University is also exposed to interest rate risk on its long term debt. The University has entered into interest rate swap agreements for a portion of its long term debt obligations.

q. Employee Future Benefits

The University accrues its obligations for employee future benefit plans relating to health, dental, long term disability, and group life insurance. The cost of non-pension post-retirement and post-employment benefits earned by employees is actuarially determined using the projected benefit method pro-rated on service and management's best estimates for the discount rate for liabilities, the expected rate of return on assets, retirement ages and expected future cost trends.

The University also accrues its obligations relating to post-retirement adjustments to pensions for specifically entitled employees who retired prior to 1993. The cost of such post-retirement pension adjustments is actuarially determined using the projected benefit method and management's best estimate for the discount rate for liabilities and the expected rate of return on assets. Any increase in such adjustments is recognized in the year that it occurs.

Actuarial gains or losses are recognized in the year the gain or loss arises.

r. Foreign Currency Translation

Monetary assets and liabilities denominated in foreign currencies are translated at the year end exchange rate. Revenues and expenses are translated at exchange rates on the transaction dates. Gains or losses arising from these translations are included in earnings.

s. Derivative Financial Instruments

From time to time, the University uses derivative financial instruments, including interest rate swap agreements, in its management of exposures to fluctuations in interest rates. An interest rate swap is a derivative financial contract between two parties who agree to exchange fixed rate interest payments for floating rate payments on a predetermined notional amount and term. Hedge accounting is used when there is a high degree of correlation between price movements in the derivative instrument and the item designated as being hedged. Any derivative financial instruments that do not qualify for hedge accounting are adjusted to fair value at each year end with any resulting gains or losses recorded in net revenue.

t. Future Accounting Policy Changes

Disclosure and Presentation of Financial Instruments

The CICA has issued two new standards, CICA 3862 "Financial Instruments – Disclosures" and CICA 3863 "Financial Instruments – Presentation" which are intended to enhance the abilities of users of financial statements to evaluate the significance of financial instruments to an entity, related exposures, and the management of these risks.

These new standards, which were effective April 1, 2008, would require additional disclosure in the financial statements. However, the CICA subsequently amended these sections to eliminate the requirement for not-for-profit entities to adopt these sections. These entities are permitted to continue to apply CICA 3861 "Financial Instruments - Disclosure and Presentation" in place of CICA 3862 and CICA 3863. An entity that does so must disclose this fact.

Not-For-Profit Organizations

The CICA amended a number of standards applicable to not-for-profit organizations (NFPOs) and issued new standard, CICA 4470 "Disclosures of Allocated Expenses by Not-for-Profit Organizations."

CICA 4400 "Financial Statement Presentation by Not-For-Profit Organizations" was amended to:

- eliminate the requirement to treat net assets invested in capital assets as a separate component of net assets and, instead, permit a NFPO to present such an amount as a category of internally restricted net assets when it chooses to do so;
- clarify that revenues and expenses must be recognized and presented on a gross basis when a not-for-profit organization is acting as a principal in transactions;
- make CICA 1540 "Cash Flow Statements" applicable to NFPOs; and
- make CICA 1751 "Interim Financial Statements" applicable to NFPOs that prepare interim financial statements in accordance with GAAP.

CICA 4430 "Capital Assets Held by Not-For-Profit Organizations" was amended to provide additional guidance with respect to the appropriate use of the scope exemption for smaller entities.

CICA 4460 "Disclosure of Related Party Transactions by Not-For-Profit Organizations" was amended to make the language in the standard consistent with CICA 3840 "Related Party Transactions."

New standard CICA 4470 "Disclosure of Allocated Expenses by Not-For-Profit Organizations" establishes disclosure standards for not-for-profit organizations that choose to classify their expenses by function and allocate expenses from one function to another. The main features of the new standard are:

- A requirement for an entity that allocates its fundraising and general support expenses to other functions to disclose the policies adopted for the allocation of expenses among functions, the nature of the expenses being allocated and the basis on which such allocations have been made; and
- A requirement for an entity to disclose the amounts allocated from each of its fundraising and general support functions and the amounts and functions to which they have been allocated.

These new requirements are effective April 1, 2009 and will only require additional disclosure in the financial statements.

Business Combinations and Non-controlling Interests

The CICA has issued three new standards, CICA 1582 "Business Combinations," CICA 1601 "Consolidated Financial Statements" and CICA 1602 "Non-controlling Interests."

CICA 1582 will be converged with International Financial Reporting Standard (IFRS) 3 "Business Combinations". CICA 1602 will be converged with the requirements of International Accounting Standard (IAS) 27 Consolidated and Separate Financial Statements for non-controlling interests. CICA 1601 carries forward the requirements of CICA 1600 "Consolidated Financial Statements" other than those relating to non-controlling interests.

CICA 1582 applies to a transaction in which the acquirer obtains control of one or more businesses. The term "business" is more broadly defined than in the existing standard. Most assets acquired and liabilities assumed, including contingent liabilities that are considered to be improbable, will be measured at fair value. Any interest in the acquiree owned prior to obtaining control will be remeasured at fair value at the acquisition date, eliminating the need for guidance on step acquisitions. A bargain purchase will result in recognition of a gain. Acquisition costs must be expensed.

Any non-controlling interest will be recognized as a separate component of equity [net assets]. Net income is calculated without deduction for the non-controlling interest. Rather, net income is allocated between the controlling and non-controlling interests.

The new standards are effective for fiscal years beginning on or after January 1, 2011. Early adoption is encouraged. These standards will affect the accounting treatment used for any future business acquisitions.

3. CHANGES IN ACCOUNTING POLICIES

The University adopted the new standards, CICA 3031 "Inventories" and CICA 1535 "Capital Disclosures".

Inventories

Effective April 1, 2008, the organization adopted CICA 3031 "Inventories". This standard provides guidance on the measurement and disclosure requirements for inventories. The adoption of the standard had no impact on the organization's financial statements.

Capital Disclosures

Effective April 1, 2008, the University adopted CICA 1535 "Capital Disclosures", which requires the disclosure of qualitative and quantitative information that enables users of the financial statements to evaluate the organization's objectives, policies and processes for managing capital. The adoption of this standard only required additional disclosures, which are provided in Note 17.

4. ACCOUNTS RECEIVABLE

	2009	2008

	25,908	33,791
Total Investments	$ 389,864	$ 388,436

**Represents Sinking Fund Assets on Deposit with the Province of Manitoba, which are held to retire the Capital Advances as described in Note 9*

As at March 31, the average yields and the terms to maturity are as follows:

- Bankers Acceptances, Guaranteed Investment Certificates and Money Market Funds: 0.71% (2008, 3.58%); term to maturity: less than one year
- Government and Corporate bond funds: 3.94% (2008, 3.88%): terms to maturity: range from less than one year to more than 12 years.

The University's investment in real estate consists of units of a pooled real estate investment in the Great West Life Assurance Company – Canadian Real Estate Investment Fund No. 1. Effective December 15, 2008, the Great West Life Assurance Company placed a suspension on redemptions and transfers of units of the Fund. As at May 25, 2009 the suspension of redemptions and transfers of units was still in effect and The Great West Life Assurance Company had not publicly disclosed when the suspension will be lifted.

During the year ended March 31, 2009, the University recognized net unrealized losses of $79,568 on investments classified as held-for-trading, which is recorded in net investment income in the consolidated statement of operations.

6. CREDIT RISK EXPOSURE AND MANAGEMENT

The carrying amount of financial assets represents the maximum credit exposure. The maximum exposure to credit risk at March 31 was:

	2009	2008
Financial Assets Held-For-Trading:		
Cash	$ 90,419	$ 17,605
Marketable Investments	30,715	138,470
Investments	389,864	388,436
Loans and Receivables:		
Accounts receivable	60,914	78,828
Totals	$ 571,912	$ 623,339

The University manages the credit risk related to these items as follows:

Cash and marketable investments are held in high quality Canadian money market instruments in Canadian Chartered banks or equivalent. Exposure to risk is managed by considering the rates of return in conjunction with liquidity needs and making investments in a variety of short term instruments with several financial institutions.

Credit risk related to investments is managed by maintaining a diverse portfolio of investments, investing with counterparties considered to be of high quality, and limiting the amount that can be invested in any one holding.

A significant portion of the University's accounts receivable are related to Research and Special Funds as disclosed in Note 4 and are from the federal and provincial governments, not-for-profit organizations, corporations, the US government and other universities. The University also has accounts receivable from students and staff. The credit risk on these receivables is minimal. The remaining accounts receivable are due from a diverse group of customers and are subject to normal credit risks.

7. CAPITAL ASSETS, NET OF ACCUMULATED AMORTIZATION

	2009		2008	
	Cost	Accumulated Amortization	Cost	Accumulated Amortization
Assets Under Capital Lease	$ 3,285	$ 2,275	$ 3,266	$ 2,027
Buildings and Major Renovations	659,161	155,232	572,596	142,045
Computer Hardware, Software and Electronics	97,186	72,419	96,437	66,989

Works of Art	2,085		1,948	
	1,166,338	455,341	1,086,118	416,914
Less Accumulated Amortization	455,341		416,914	
Net Book Value	$ 710,997		$ 669,204	

On Saturday, March 28, 2009 the Duff Roblin Building suffered significant damage due to an electrical fire. Work is underway to restore the building and either recover the contents or replace what was lost. The original cost of the Duff Roblin Building is estimated to be $8.1 million with an approximate net book value of $3.0 million. The University maintains insurance coverage however the amount of damages/restoration and the related insurance proceeds cannot be determined at this time. The University is unable to estimate the damages in terms of original costs and by various asset categories or items that may have been a period expense. As a result, no write down in asset values or insurance proceeds have been recorded in these financial statements. Any write down in asset values will be recorded in future years as the amounts can be identified along with the insurance proceeds.

8. CAPITAL LEASE OBLIGATIONS

Minimum lease payments which include principal and interest under the capital lease obligations are as follows:

2010	$ 467
2011	323
2012	211
2013	49
Total Minimum Lease Payments	1,050
Less: Interest at 5.55%	(97)

	(4,188)	(5,293)
	$ 166,748	$ 164,118

**Represents debt of Smartpark Development Corporation.*

Interest expense on long term debt was $11,872 (2008, $9,819).

The determination of the fair value of the Province of Manitoba promissory notes and capital advances is not practicable due to their underlying terms and conditions. The fair value of the term loans and bankers acceptances is approximately $32,761 compared to their carrying value of $28,063. Fair value of these long term debt instruments has been determined using future payments of principal and interest of the actual outstanding long term debt discounted at current interest rates available to the University.

The University entered into an interest rate swap agreement whereby the University has fixed a swap rate of 5.92% on a 25 year loan for the Arthur V. Mauro Student Residence. The stamping fee is committed until September 1, 2013. Under the terms of the agreement, the University is required to make monthly principal and interest repayments similar to a conventional amortizing loan. The notional principal underlying this swap agreement amounted to $15,093 as at March 31, 2009 (2008, $15,488).

The University entered into an interest rate swap agreement whereby the University has fixed a swap rate of 4.31% on the Energy Performance Program loan. Under the terms of this agreement, the University is also required to make monthly principal and interest payments. The notional principal underlying this agreement amounted to $1,245 as at March 31, 2009 (2008, $3,045). The stamping fee is committed until November 10, 2009.

Smartpark Development Corporation, (the Corporation), entered into an interest rate swap agreement to finance the development of 150 Innovation Drive, whereby the Corporation has fixed a swap rate of 3.85% that is committed until February 11, 2029. A stamping fee of .50% on the balance outstanding is committed for a 10 year term. Under the terms of the agreement, the Corporation is required to make monthly principal and interest repayments based on a total amortization period of 25 years, similar to a conventional amortizing loan after February 11, 2016. The notional principal underlying this swap agreement was $7,075 as at March 31, 2009.

The fair value of the swap agreements at March 31, 2009 was $4,608 (2008, $1,891) and has been recorded in accounts payable.

Principal repayments on long term debt payable over the next five years are as follows:

	Promissory Notes	Capital Advances	Term Loans	Bankers Acceptances	Total
2010	$ 2,484	$	$ 39	$ 1,665	$ 4,188
2011	2,621	555	42	445	3,663
2012	2,766		44	474	3,284
2013	2,918		1,175	503	4,596
2014	3,080		3,350	533	6,963
Thereafter	128,449			19,793	148,242
	$ 142,318	$ 555	$ 4,650	$ 23,413	$ 170,936

10. OTHER LONG TERM LIABILITIES

Amounts included in other long term liabilities are non interest bearing and due as follows:

	2009	2008
2010	$	$ 2,500
2011	1,700	1,700
2012	346	346
	$ 2,046	$ 4,546

The $346 represents a refundable deposit held by Smartpark Development Corporation which is fully refundable to a tenant, provided the tenant renews their lease beyond 2012.

11. EMPLOYEE FUTURE BENEFITS

The University of Manitoba provides certain health, dental and group life benefits for its retired employees, and long term disability benefits for current employees. Post-retirement pension benefits are also provided for specifically entitled retirees.

Health, dental and group life benefits are provided to employees who retired prior to July 1, 2004 on a non-contributory basis. The group life benefits are indexed post-retirement. For eligible employees retiring on or after July 1, 2004, no group life benefit is available, and employees share in the cost of the health and dental benefits.

The long term disability income benefit is provided on a contributory basis.

Post-retirement pension benefits are provided to specifically entitled employees who retired prior to 1993. The adjustments for a year are determined as the lesser of the amounts that can be provided by a weighted average percentage salary increase at the University, or the excess interest approach provided under the University of Manitoba Pension Plan (1993). One hundred percent of the adjustments are paid by the University (50% from the General Operating Fund and 50% from the Staff Benefits Fund).

The University measures the fair value of assets and the accrued benefit obligations for the non-pension and post-retirement pension adjustments as of March 31. The most recent actuarial valuations were as of March 31, 2007 with the next valuations due as of March 31, 2010.

The Accrued Benefit Obligation for the non-pension benefit plans and the post-retirement adjustments are reported in the university's consolidated statement of financial position under long term liabilities.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEARS ENDED MARCH 31
(in thousands of dollars)

Information about the University's defined benefit plans as at March 31 is as follows:

	Non-Pension Benefit Plans		Post-Retirement Adjustments		Total	
	2009	2008	2009	2008	2009	2008
Benefit Cost	$ 9,014	$ 4,714	$ 492	$ 99	$ 9,506	$ 4,813

14. CONTRIBUTED CAPITAL ASSETS

Contributions recognized in the Capital Asset Fund include contributed building, capital equipment, library books and artwork of $1,159 (2008, $1,184).

15. PENSION PLANS

The University of Manitoba administers The University of Manitoba Pension Plan (1970), The University of Manitoba GFT Pension Plan (1986) and The University of Manitoba Pension Plan (1993). These are trusteed pension plans. The Trustees are responsible for the custody of the Plans' assets and issuance of annual financial statements, which do not form part of the University's financial statements.

1993 Plan

The University of Manitoba Pension Plan (1993) is a money purchase plan with a defined benefit minimum. In prior years, the surplus from the Plan was adequate to fund any amounts required in excess of matching contributions of active members and the University.

The actuarial present value of accrued pension benefits for the 1993 Plan has been determined using the projected unit credit actuarial cost method, and assumptions developed by reference to expected long term market conditions. An actuarial valuation effective December 31, 2007 was completed in 2008 by a firm of consulting actuaries. The results of this valuation were extrapolated by the actuary to December 31, 2008.

The University uses a December 31 measurement date for reporting plan assets and obligations.

The actuarial present value of benefits and plan assets as of December 31, were as follows:

Accrued Benefit Obligation	2008	2007
Actuarial present value of accrued pension benefits at beginning of year	$ 939,667	$ 870,172
Interest accrued on defined benefits	19,442	34,533
Interest accrued (decreased) on Member Accounts	(93,809)	53,611
Benefits accrued	35,894	31,941
Benefits paid	(70,613)	(69,023)
Actuarial loss	42,517	
Valuation method adjustment		18,433
Change in assumptions	13,918	
Actuarial present value of accrued pension benefits at end of year	$ 887,016	$ 939,667

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEARS ENDED MARCH 31
(in thousands of dollars)

The actuarial present value of accrued pension benefits for 2007 have been restated to reflect the effect of using the fair value of assets at the 2007 year end.

	2008	2007

Mortality based on an adjustment to the Uninsured Pensioner 1994 Mortality table Projected to 2015.	the adjustment varies by age (average 67%)	90% of the Projected Table

During the year, the Manitoba Pension Commission advised that the University is required to begin to make additional payments with respect to current service costs. The total estimated payment for calendar 2009 is $2.7 million.

The following events had a material impact on the funded position of the 1993 Plan at December 31, 2008, as compared to December 31, 2007 and the impact is reflected in the above reported amounts.

1. In 2008, the actuary for the pension plan completed a study of the mortality of the pensioners of the 1993 Plan. As a result of that study, it was determined that the assumption of the mortality rates should be adjusted to reflect improved mortality rates in the future. This resulted in an increase in the accrued benefit obligation for the plan of approximately $14 million.
2. In calendar year 2008, reflecting the impact of the turmoil in the capital markets, the return from the pension fund assets was -15.7% compared to the 6% rate assumed by the plan's actuary. This resulted in an actuarial loss on the plan assets of approximately $75 million.
3. In addition to the loss described in 2. above, the impact of the -15.7% return on plan assets was to reduce the value of the members' accounts by approximately $94 million, which produced an increase in the

obligation for supplemental pensions for active members. This resulted in an actuarial loss of approximately $43 million.

4. The unamortized net actuarial losses shown above, which were determined on the basis of this valuation for accounting purposes, is to be amortized over a period of 9 years (expected average remaining service life) starting in fiscal 2009-10. In prior years, actuarial gains/losses were recognized immediately. This change in accounting policy is applied prospectively as it is not practicable to determine the cumulative effect on the prior periods. However, cash funding for the pension plan is based on the going-concern funding valuation as described below.

The going concern deficit that results from these and other sources of loss, as they apply to the valuation for funding purposes filed with the pension regulators, will have to be funded under the Pension Benefits Act over a maximum of 15 years following the next funding valuation date, scheduled for December 31, 2009 to be completed in 2010. It is expected that this will lead to a significant increase in the required funding contribution of the University following the next actuarial funding valuation. In addition to matching contributions and additional contributions for current service costs, the University would also have to make payments to fund the deficit over 15 years.

In 2009, the University applied to the Province of Manitoba for an exemption to solvency funding requirements under the Pension Benefits Act as permitted under the University Pension Plans Exemption Regulation. If approved, the effect will be to exempt the 1993 Plan from the solvency funding requirements of the Pension Benefits Act. The Plan will continue to be subject to the going-concern funding provisions of the Act and any funding deficits will have to be paid by the University over a maximum of 15 years as indicated above.

1986 Plan

For the 1986 Plans, which is a money purchase plan for active members, the University recorded contributions of $1,669 (2008, $1,604) and this is included in the consolidated statement of operations as an expense.

1970 Plan

There were no university employees earning pension entitlements in 2008 in the1970 Plan. As a result, the University made no contributions to the Plan during the year.

16. NET INVESTMENT INCOME (LOSS)

2009	General Operating Fund	Staff Benefits Fund	Trust Fund	Capital Fund	Endowment Fund	Total Funds

17. CAPITAL DISCLOSURES

a. Capital Management

General Funds (note 2e)

The University's objective in managing its operating capital is to maintain sufficient resources to allow it to satisfy its financial obligations even if adverse financial events were to occur.

The University manages its operating capital through an operating budget which is approved by the Board of Governors. The University has been successful at achieving a balanced budget at the end of each fiscal year and this success is credited to a strong commitment to fiscal responsibility and financial stability as well as a strong commitment by faculties, schools, libraries and support units who share in that responsibility. This is achieved in a decentralized system of budgetary control whereby academic and support units are allocated resources on an annual basis to meet their strategic priorities and those of the University. These operating units are provided with procedures to administer their budgets responsibly and to ensure that there is accountability for the resources that are transferred to them. In the event of a shortfall in revenues, the University could invoke a spending freeze, reduce budgets, or access its Provisions Funds including the Fiscal Stabilization Fund.

Restricted Funds and Endowment Fund (notes 2f and 2g)
The University also maintains externally and internally restricted funds (note 2f) and an endowment fund (note 2g).

The restricted funds are managed with the objectives to spend the funds in accordance with the various terms and not spend beyond the resources that have been provided. Individual funds are established and carefully monitored both within the departments and within central administration. In the event of an over expenditure or ineligible expenditure, the department would be responsible for funding the costs from other resources. In the case of the Capital Asset Fund, at the approval of the Province of Manitoba, the University is permitted to enter into long term debt to assist with the financing of capital assets.

The endowment fund is managed with the long term objective of preserving the capital of the individual endowment accounts to ensure inter-generational equity, whereby current students are neither advantaged nor disadvantaged compared to future students. The goal is to earn investment returns, adjusted for inflation, which will support the ongoing expenditures and commitments of the fund. The Trust Investment Committee ("the Committee") is responsible for the investment of endowment assets. Assets are invested in accordance with an Investment Policy Statement. The Committee determines an asset mix that meets the return objectives of the fund while assuming an appropriate level of risk. Each individual asset (within the mandate of the approved asset mix) is invested by professional external managers, and the portfolio is rebalanced to the target asset mix according to the Investment Policy Statement. The asset mix is reviewed annually to assess whether the risk and return objectives of the fund are met.

The approved spending rate of the net investment income earned on the endowment fund, plus inflation, must be supported by the long term investment. The spending rate is set by the Vice-President (Administration) based on the recommendation of the Committee and reviewed annually to determine the viability of maintaining the rate in light of long term investment performance. The performance of the fund is subject to volatility. The endowment fund is monitored through full market cycles to assess the effectiveness of the asset mix and spending rates which are then adjusted accordingly.

b. Quantitative data

The University's capital comprises its fund balances, which include unrestricted funds, internally restricted funds, externally restricted funds, and funds invested in capital assets. Capital in the restricted funds also includes long term debt. The University's Consolidated Statement of Operations and Changes in Fund Balances sets out fund balances at the beginning and end of the year.

As at March 31, 2009, The University has met its objectives with respect to its capital requirements.

18. CONTRACTUAL OBLIGATIONS AND CONTINGENCIES

The University of Manitoba is a member of the Canadian Universities Reciprocal Insurance Exchange (CURIE). CURIE pools the property damage and public liability insurance risks of its members. All members pay annual deposit premiums, which are actuarially determined and are subject to further assessment in the event members' premiums and reserves are insufficient to cover losses and expenses. No additional assessment was necessary for the current year.

Contractual obligations relating to Construction in Progress amount to $13,502 (2008, $24,990).

The University of Manitoba is named as a defendant in litigations where action has commenced or is anticipated. While the ultimate outcome of these proceedings cannot be predicted at this time, management and its legal counsel are of the opinion that the outcome will not have a material effect on the financial position of the University. No provision has been made in the financial statements in respect of these claims as of March 31, 2009.

The University entered into an agreement with a third party for the sale of a building for total proceeds of $7.15 million. The closing date of the transaction is expected to be in fiscal 2009-10.

19. ECONOMIC INTEREST IN RELATED ENTITIES

The University of Manitoba Foundation U.S.A. Inc.

The University has an economic interest in the University of Manitoba Foundation U.S.A. Inc. ("the Foundation") which is an Illinois Not-For-Profit Corporation incorporated in December 1989. The Foundation's purpose is exclusively charitable, literary, scientific and educational and its activities include the promotion, encouragement, aid and advancement of higher education, research and training in the Province of Manitoba, in Canada and elsewhere.

The Foundation is exempt from U.S.A. Federal Income Tax under Section 501(c)(3) of the Internal Revenue Code.

The Board of Directors of the Foundation is an independent board whose members direct and guide the Foundation's actions. Members of the Board include, among others, certain senior staff of the University of Manitoba. The University of Manitoba, however, is one of many universities eligible to receive aid from the Foundation. The University must make application to the Foundation's Board of Directors to request funds, which may or may not be granted. The University's economic interest therefore is beneficial, as gifts and donations which are solicited by the Foundation may be transferred to the University of Manitoba from time to time.

20. COMPARATIVE FIGURES

Comparative figures for the year ended March 31, 2008 have been reclassified, where appropriate, to conform with the presentation adopted for the year ended March 31, 2009.

THE UNIVERSITY OF
WINNIPEG

UNIVERSITY OF WINNIPEG

MANAGEMENT REPORT

The accompanying consolidated financial statements are the responsibility of management and have been prepared in accordance with Canadian generally accepted accounting principles. These accounting principles have been applied on a basis consistent with the prior year. In management's opinion, the consolidated financial statements have been properly prepared within reasonable limits of materiality, incorporating management's best judgement regarding all necessary estimates and all other data. Management maintains internal controls to provide reasonable assurance of the reliability and accuracy of the financial information and to ensure the assets of the University are properly safeguarded.

The Board of Regents has reviewed and approved these consolidated financial statements.

OFFICE OF THE
AUDITOR GENERAL
MANITOBA

AUDITOR'S REPORT

To the Lieutenant Governor in Council
To the Legislative Assembly of Manitoba
To the Board of Regents of the University of Winnipeg

We have audited the consolidated statement of financial position of the University of Winnipeg as at March 31, 2009, and the consolidated statements of operations, changes in net assets and cash flows for the year then ended. These financial statements are the responsibility of the University's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the consolidated financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these consolidated financial statements present fairly, in all material respects, the financial position of the University as at March 31, 2009, and the results of its operations and its cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

THE UNIVERSITY OF WINNIPEG
CONSOLIDATED STATEMENT OF FINANCIAL POSITION
as at March 31, 2009
(with comparative figures for 2008)

Statement I

ASSETS

	2009 $000	2008 $000
Current Assets:		
Cash and Cash Equivalents (Note 4)	$16,638	$12,791
Accounts Receivable	9,291	6,638
Due from Related Parties (Note 24)	101	135
Prepaid Expenses	802	959
Inventories (Note 5)	1,395	1,057
	28,227	21,580
Long Term Investments (Note 6)	1,324	1,566
Capital Assets (Note 7)	94,575	76,410
	$124,126	$99,556

LIABILITIES AND NET ASSETS

	2009 $000	2008 $000
Current Liabilities:		
Accounts Payable and Accrued Liabilities	$10,408	$8,470
Deferred Revenue	4,402	2,297
Deferred Contributions (Note 8)	6,697	5,350
Staff Benefits Payable (Note 9)	1,522	1,496
Current Portion of Long Term Debt (Note 11, 12)	2,538	1,271
Due to Related Party (Note 24)	25	301
Settlement Payable for Pension Superintendent's Decision (Note 23)	7,000	0
	32,592	19,185
Obligations under Capital Leases (Note 11)	425	386
Long Term Liabilities (Note 12)	12,666	4,643
Deferred Capital Contributions (Note 13)	69,377	60,048
Net Assets:		
Unrestricted Net Assets (Deficiency)	(7,286)	332
Internally Restricted Net Assets (Note 14)	1,418	751
Endowments (Note 15)	2,628	2,684
Investment in Capital Assets	12,306	11,527
	9,066	15,294
	$124,126	$99,556

Special Purpose and Trust Assets (Notes 4, 15)
Contractual Obligations (Notes 19, 20, 21)
Contingencies (Note 23)

Approved by the Board of Regents

Statement IV

THE UNIVERSITY OF WINNIPEG
CONSOLIDATED STATEMENT OF CASH FLOWS
For the Year Ended March 31, 2009
(with comparative figures for 2008)

	2009 $000	2008 $000
CASH FLOWS FROM OPERATING ACTIVITIES:		
Cash Received from:		
Government Grants	$54,238	$44,987
Student Academic Fees	29,163	28,024
Gifts, Grants and Bequests	2,960	1,080
Investment Income	1,695	1,745
Sales of Services and Products	4,551	4,705
Other Revenues	5,864	5,878
Cash Paid for:		
Salaries and Benefits	(64,842)	(59,776)
Supplies, Services and Other Expenses	(14,921)	(14,010)
Cost of Sales	(3,459)	(3,025)
Building, Utility and Related Expenses	(7,770)	(6,442)
Provincial and Municipal Taxes	(1,208)	(1,151)
Scholarships and Awards	(3,242)	(2,658)
Gifts to Related Party	(634)	(833)
	2,395	(1,476)
CASH FLOWS FROM INVESTING ACTIVITIES:		
Cash Purchase of Capital Assets	(20,100)	(22,624)
Cash from Sale of Capital Assets	1,000	0
Proceeds on Sale of Long Term Investments	186	0
	(18,914)	(22,624)
CASH FLOWS FROM FINANCING ACTIVITIES:		
Long Term Debt Repayments on Mortgages	(845)	(843)
Long Term Debt Proceeds – Building Purchase and Construction	10,150	4,400
Cash Received for Deferred Capital Contributions	11,061	14,557
	20,366	18,114
NET INCREASE (DECREASE) IN CASH AND CASH EQUIVALENTS	3,847	(5,986)
CASH AND CASH EQUIVALENTS, BEGINNING OF YEAR	12,791	18,777
CASH AND CASH EQUIVALENTS, END OF YEAR	$16,638	$12,791
Cash and Cash Equivalents Consists of:		
Cash in Bank	13,007	6,160
Short Term Investments	3,631	6,631
	$16,638	$12,791

Excluded from Investing and Financing Activities are assets acquired under Capital Leases and the related obligations under Capital Leases totalling $260 (2008 - $114).

See accompanying notes to the consolidated financial statements.

1. Authority and Purpose

The University of Winnipeg (the University) operates under the authority of the University of Winnipeg Act of the Province of Manitoba. The primary role of the University is to provide post secondary education and research in Arts, Sciences and Education. The University also operates the Collegiate, an independent high school and a number of other education related activities. The University is a registered charity and is exempt from the payment of income taxes.

2. Summary of Significant Accounting Policies

The consolidated financial statements have been prepared in accordance with Canadian generally accepted accounting principles.

A) Contributions

The University has chosen to use the deferral method of accounting for contributions. Under the deferral method of accounting for contributions, restricted contributions related to expenses of future periods are deferred and recognized as revenue in the period in which the related expenses are incurred. Restricted contributions are stipulations imposed that specify how resources must be used. External restrictions are imposed from outside the organization, usually by the contributor of the resources. Restrictions on contributions may only be externally imposed.

B) Revenue Recognition

Operating grants are recognized as revenue in the period received or receivable. Revenues received for tuition fees and sales of goods and services are recognized in the period in which the goods are received or the services rendered or substantially rendered.

Deferred contributions are externally restricted non-capital and non-endowment contributions which are deferred and are recognized as revenue in the period in which the related expenses are incurred.

Promissory notes entered into with the Provincial Government, for the construction or purchase of capital assets, which will be repaid from future funding provided by the Provincial Government through the Council on Post Secondary Education (COPSE) are, in substance, capital grants. These capital grants, under the deferral method of accounting, are reflected as deferred capital contributions in the statement of financial position, if the asset acquired has a limited useful life. The related funding from COPSE to offset the interest expense over the terms of the promissory notes as well as the interest expense are both excluded from the statement of operations and changes in fund balances.

Externally restricted contributions for the acquisitions of capital assets having limited lives are recorded as deferred capital contributions in the period in which they are received. Amortization of deferred capital contributions is recognized as earned revenue in the periods in which the related amortization expense of the funded capital asset is recorded.

Endowment contributions are recorded as direct increases in net assets in the period in which they are received.

C) Cash and Cash Equivalents

Cash and cash equivalents include cash on hand, balances with banks and highly liquid temporary money market instruments convertible to cash within three months or less. Bank borrowings are considered to be financing activities.

D) Investments

Investments are recorded at fair value with the exception of a donated equity investment in certain properties, which is recorded at estimated fair value on the date received and designated as available for sale.

E) Inventories

Inventories are valued at the lower of cost or net realizable value.

F) Capital Assets

Capital assets and collections purchased by the University are recorded at cost. Collections include Art Work and Rare Books recorded at fair value derived by independent appraisal at the time of acquisition or donation. Donated assets are recorded at estimated fair market value on the date received. Land, collections of rare books and works of art are not amortized. Capital assets are amortized on a straight-line basis over their estimated useful lives as follows:

Buildings, Additions and Improvements	60 years
Leasehold Improvements	Term of Lease
Library Acquisitions	10 years
Furnishings and Equipment	10 years
Major System Computer Software	10 years
Computer Equipment and Software	5 years
Vehicles	5 years
Equipment under Capital Lease	Term of Lease

G) Financial Instruments

All financial instruments are recorded at fair value. Subsequent measurement is determined by the classification of each financial asset and liability. Financial instruments are classified as one of the following: held-for-trading, loans and receivables, held-to-maturity, available-for-sale or other liabilities. Financial instruments classified as held-for-trading are measured at fair value with gains and losses recognized in the Statement of Operations. Financial instruments classified as held-to-maturity, loans and receivables and other liabilities are measured at amortized cost using the effective interest rate method. Available-for-sale financial instruments are measured at fair value, with unrealized gains and losses recognized directly in unrestricted net assets.

Cash and cash equivalents are designated as held-for-trading; accounts receivable and due from related parties as loans and receivables; accounts payable and accrued liabilities, staff benefits, due to related party and long term liabilities as other liabilities.

Long term investments are designated as available for sale as they are comprised of investments that are not held for the purpose of earning short term income and investments that relate to an equity investment for which fair value information is not readily available.

The University does not have any held-to-maturity instruments.

Except for held-for-trading designated financial instruments, transaction costs that are directly attributable to the acquisition or issuance of financial assets or liabilities are accounted for as part of the respective asset or liability's carrying value at inception and amortized over the expected life of the financial instrument using the effective interest method. For held-for-trading financial assets and liabilities, transaction costs are recorded in the statement of operations as incurred.

H) Use of Estimates

In preparing the University's consolidated financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the consolidated financial statements, the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from these estimates.

I) Principles of Consolidation

The consolidated financial statements of the University include the accounts of the University of Winnipeg Education Housing Corporation (UWEHC), a wholly owned entity. UWEHC secures and provides affordable residential accommodation for the benefit of persons enrolled at the University. The University of Winnipeg Foundation (the Foundation) (Note 20) and the University of Winnipeg Community Renewal Corporation (UWCRC) (Note 21), both controlled entities, are not consolidated in these financial statements.

J) Pension Plan

The University contributes to the University of Winnipeg Pension Plan which is a trustee-administered pension plan for University employees. The pension expense for the defined benefit component of the pension plan is determined actuarially using the projected unit credit actuarial cost method and management's best estimates of investment performance, salary escalation, retirement ages of employees and member mortality. With respect to the amortization of actuarial gains or losses, the University has adopted a policy consistent with the minimum requirements of CICA Handbook section 3461 which is to amortize the excess of the unamortized net gains or losses over 10% of the greater of the defined benefit obligation or defined benefit plan assets as at the beginning of the year, over the expected average remaining service life of active employees. The pension expense for the defined contribution component of the pension plan equals the contributions made during the year.

The accounts of the University of Winnipeg Pension Plan do not form part of the financial statements of the University.

K) Future Accounting Policy Changes

Not-For-Profit Organizations

The CICA amended a number of standards applicable to not-for-profit organizations (NFPOs) and issued new standard, CICA 4470 "Disclosures of Allocated Expenses by Not-for-Profit Organizations."

CICA 4400 "Financial Statement Presentation by Not-For-Profit Organizations" was amended to:

- eliminate the requirement to treat net assets invested in capital assets as a separate component of net assets and, instead, permit a NFPO to present such an amount as a category of internally restricted net assets when it chooses to do so;
- clarify that revenues and expenses must be recognized and presented on a gross basis when a not-for-profit organization is acting as a principal in transactions;
- make Cash Flow Statements, Section 1540 applicable to NFPOs; and
- make Interim Financial Statements, Section 1751, applicable to NFPOs that prepare interim financial statements in accordance with GAAP.

CICA 4430 "Capital Assets Held by Not-For-Profit Organizations" was amended to provide additional guidance with respect to the appropriate use of the scope exemption for smaller entities.

CICA 4460 "Disclosure of Related Party Transactions by Not-For-Profit Organizations" was amended to make the language in Section 4460 consistent with Related Party Transactions, Section 3840.

New standard CICA 4470 "Disclosure of Allocated Expenses by Not-For-Profit Organizations" establishes disclosure standards for not-for-profit organizations that choose to classify their expenses by function and allocate expenses from one function to another. The main features of the new Section are:

- A requirement for an entity that allocates its fundraising and general support expenses to other functions to disclose the policies adopted for the allocation of expenses among functions, the nature of the expenses being allocated and the basis on which such allocations have been made; and
- A requirement for an entity to disclose the amounts allocated from each of its fundraising and general support functions and the amounts and functions to which they have been allocated.

These new requirements are effective April 1, 2009 and will only require additional disclosure in the financial statements.

Business Combinations and Non-controlling Interests

The CICA has issued these new standards, Business Combinations Section 1582, Consolidations Section 1601 and Non-controlling Interests Section 1602.

Section 1582 will be converged with IFRS 3 Business Combinations. Section 1602 will be converged with the requirements of IAS 27 Consolidated and Separate Financial Statements for non-controlling interests. Section 1601 carries forward the requirements of Consolidated Financial Statements Section 1600 other than those relating to non-controlling interests.

Section 1582 applies to a transaction in which the acquirer obtains control of one or more businesses. The term "business" is more broadly defined than in the existing standard. Most assets acquired and liabilities assumed, including contingent liabilities that are considered to be improbable, will be measured at fair value. Any interest in the acquiree owned prior to obtaining control will be remeasured at fair value at the acquisition date, eliminating the need for guidance on step acquisitions. A bargain purchase will result in recognition of a gain. Acquisition costs must be expensed.

Any non-controlling interest will be recognized as a separate component of equity [net assets]. Net income is calculated without deduction for the non-controlling interest. Rather, net income is allocated between the controlling and non-controlling interests.

The new standards are effective for fiscal years beginning on or after January 1, 2011. Early adoption is encouraged. This standard will affect the accounting treatment used for any future business acquisitions.

3. Change in Accounting Policies

Effective April 1, 2008, the University adopted the following new CICA accounting standards:

Inventories

Section 3031, establishes standards for determining the cost of inventories. The standard requires that inventories be measured at the lower of cost and net realizable value, and provides guidance on the types of costs that are to be assigned to inventories. There was no material effect on the University's consolidated financial statements as a result of implementing the new standard (Note 5).

Financial Instruments – Disclosures and Presentation

Sections 3862 and 3863 establish standards for the disclosure and presentation of financial instruments. The new standards require additional disclosure regarding financial instruments to assist in evaluating their significance on an entity's financial position, performance and cash flows, the nature and extent of risks to which the entity is exposed during the period and at the balance sheet date and how the risks are managed. Adoption of these new standards has resulted in additional note disclosure (Note 16).

Capital Disclosures

Section 1535 establishes standards for disclosing information about an entity's capital to enable an evaluation of the entity's objectives, policies and processes for managing capital. These standards require an entity to disclose its objectives, policies and processes for managing capital, a summary of quantitative data about what it manages as capital and whether it complied with any externally imposed capital requirements to which it is subject and, if not, the consequences of such non-compliance. Adoption of this new standard has resulted in additional note disclosure (Note 17).

4. Cash and Cash Equivalents

Cash and cash equivalents consist of the following:

	2009 $000	2008 $000
Operating Funds	$7,822	$5,295
Sponsored Research and Designated Funds	3,343	2,675
	11,165	7,970
Special Purpose and Trust Funds	5,473	4,821
	$16,638	$12,791

Trust funds are restricted funds held for deferred contributions - $2,810 (2008 - $2,148) and endowments - $1,304 (2008 - $1,118). Special purpose funds are comprised of internally restricted net assets - $431 (2008 - $479), due to operating - $734 (2008 - $673) and due to related party - $194 (2008 - $403).

5. Inventories

Inventory consists of finished goods, comprised primarily of books purchased for resale. During the year ended March 31, 2009, inventories totalling $ 2,672 were expensed (2008 - $2,665) to Cost of Sales.

6. Long Term Investments

Long term investments are comprised of endowment funds (Note 15):

	2009 $000	2008 $000
Fixed Income Instruments	$600	$600
Investment Shares	0	50
Equity investment in properties	724	916
	$1,324	$1,566

Long term investments are recorded at fair value with the exception of the equity investment in properties of which market information is not readily available.

7. Capital Assets

	2009			2008
	Cost $000	Accumulated Amortization $000	Net Book Value $000	Net Book Value $000
Land	$8,168	$0	$8,168	$8,278
Buildings, Additions and Improvements	72,107	20,822	51,285	46,451
Library Acquisitions	13,285	11,245	2,040	2,026
Furnishings and Equipment	29,263	22,421	6,842	6,458
Collections	1,304	0	1,304	1,239
Buildings Under Construction	24,330	0	24,330	11,443
Equipment Under Capital Leases	979	373	606	515
	$149,436	$54,861	$94,575	$76,410

Furnishings and Equipment include Vehicles, Major System Computer Software and Computer Equipment and Software.

8. Deferred Contributions

Deferred contributions represent contributions received for special purposes such as Sponsored Research and Designated Funds and Special Purpose Trust consisting of scholarships and bursaries, library acquisitions and lecture funds.

	2009 $000	2008 $000
Balance, Beginning of Year	$5,350	$5,702
Contributions Received	10,284	7,078
Contributions Expended	(8,333)	(5,507)
Transferred to Foundation	(604)	(1,923)
Balance, End of Year	$6,697	$5,350
Balance Consists of:		
Sponsored Research and Designated Funds	$3,704	$3,052
Special Purpose Trust	2,810	2,148
Operating Funds	183	150
	$6,697	$5,350

9. Staff Benefits Payable

The balance of staff benefits is comprised of accrued vacation pay of $1,522 (2008 - $1,496).

10. Bank Indebtedness

The University has an operating line of credit with a bank authorized in the amount of $1,250. The line of credit is unsecured and bears interest at prime. It was not utilized at March 31, 2009 or March 31, 2008.

11. Obligations under Capital Leases

The following is a schedule of future minimum lease payments under capital leases expiring between June 1, 2011 and March 1, 2014 together with the balances of the obligations under capital leases:

	$000
2009/10	$220
2010/11	220
2011/12	140
2012/13	74
2013/14	31
Total minimum lease payments	685
Less amount representing interest at approximately 3.5%	(62)
Balance of Obligations under Capital Leases	623
Less: Current Portion	(198)
Obligations under Capital Leases	$ 425

Interest expense for the current year on the lease obligations amounted to $23 (2008 - $23).

12. Long Term Liabilities

	2009 $000	2008 $000
Promissory Notes	$13,926	$4,488
Mortgage Payable	142	174
UWEHC Mortgages Payable	466	564
Supplementary Pensions Payable	472	546
	15,006	5,772
Less: Current Portion	(2,340)	(1,129)
	$12,666	$4,643

The promissory notes are loans from the Province of Manitoba. The loans were used to finance and are secured by the properties listed below:

	2009 $000	2008 $000
509 Ellice and 433 Young Street Interest rate 4.45%, due April 15, 2015	$596	$694
CanWest Centre for Theatre and Film Interest rate 4.00%, due March 31, 2011	1,200	1,800
Duckworth Athletic Complex Expansion Interest rate 5.55%, due October 31, 2047	1,980	1,994
Wesley Hall – HVAC Interest rate 3.875%, due June 30, 2010	1,700	0
Student Housing Bridge Financing Interest rate 4.10%, due September 30, 2013	1,500	0
Student Housing Interest rate 5.25%, due October 31, 2049	6,950	0
	$13,926	$4,488

Annual principal payments on the notes during the next five years and thereafter are: 2010 - $1,977; 2011 - $2,138; 2012 - $689; 2013 - $690; 2014 - $691; thereafter - $7,741.

The mortgage payable, secured by Graham Hall, is payable to Canada Mortgage and Housing with interest at 5 3/8% due October 1, 2012. The Council on Post-Secondary Education annual operating grant provides for the $40 annual mortgage payment. Principal payments on this mortgage during the next four years are: 2010 - $33; 2011 - $35; 2012 - $36; 2013 - $38.

UWEHC mortgages are secured by Balmoral Street and Spence Street properties and are payable to the Assiniboine Credit Union. The mortgage payable on the Balmoral Street properties is a variable term mortgage and has a floating interest rate at prime. The three individual mortgages payable on the Spence Street properties are due April 1, 2012 and have an interest rate of 6.55%. Principal payments on these mortgages during the next four years are: 2010 - $279; 2011 - $11; 2012 - $11; 2013 - $165.

Supplementary pensions payable represents payments to past Presidents of the University for services performed and is based on an actuarial calculation. The amount due in 2010 is $51.

The determination of the fair value of the Province of Manitoba promissory notes and the other long term debt is not practicable due to their underlying terms and conditions.

Interest expense during the year on long term liabilities totalled $347 (2008 - $126).

13. Deferred Capital Contributions

Deferred capital contributions represent unamortized external contributions related to the purchase of capital assets in the amount of $67,812 (2008 - $59,739) and funds held for future capital project expenditures in the amount of $1,565 (2008 - $309). The amortization of deferred capital contributions is recorded as revenue in the Statement of Operations.

	2009 $000	2008 $000
Balance, Beginning of Year	$60,048	$48,221
Contributions Received	8,182	9,386
Contributions from University of Winnipeg Foundation	2,972	4,106
Mortgage Principal Contributions	46	30
Amortization of Deferred Capital Contributions	(1,871)	(1,695)
Balance, End of Year	$69,377	$60,048

14. Internally Restricted Net Assets

Internally restricted net assets balance at March 31, 2009 is $1,418 (2008 - $751). It consists of cumulative net unrestricted trust income of $430 (2008 - $479) and strategic provisions of $988 (2008 - $272).

The cumulative net unrestricted trust income of $430 is available to fund Board of Regents scholarships.

The strategic provisions additions represent an appropriation from unrestricted net assets to internally restricted assets. These appropriations are made to provide for future funding support of initiatives within the Strategic Plan and the Academic Plan. The 2009 addition represents the net proceeds on the sale of two properties which have been used to create a capital reserve. Actual expenses related to strategic provisions are charged to operations with a corresponding transfer of funds from internally restricted (see Statement III).

The strategic provisions provide for:

	March 31, 2008 $000	Reductions $000	Additions $000	March 31, 2009 $000
Infrastructure				
Capital Reserve	0	0	877	877
Academic Equipment	100	(100)	0	0
Building Renovations	51	0	0	51
Strategic Development				
Internal Research Grants	59	(57)	0	2
Project Development	62	(4)	0	58
	$ 272	($ 161)	$ 877	$ 988

15. Net Assets Restricted for Endowment Purposes

Endowments consist of externally restricted contributions where the principal donation is required to be maintained in perpetuity. The investment income generated from endowments must be used in accordance with the various purposes established by the donors.

Endowments are comprised of long-term investments of $1,324 – Note 6 (2008 - $1,566) and short term investments of $1,304 (2008 – $1,118).

Endowments of $1,978 (2008 - $2,034) are held in trust in accordance with the terms of a certain bequest. In 2009, the University has a 10% share in the income distribution from this trust (2008 – 10% share).

16. Financial Instruments

The University's financial instrument assets consist of cash and cash equivalents, which is designated as held for trading and measured at fair value; accounts receivable and due from related parties, which are designated as loans and receivables and are measured at amortized cost; long term investments, which are designated as available for sale and are measured at fair value. Financial instrument liabilities are accounts payable and accrued liabilities, staff benefits, current portion of long term debt, due to related party, obligations under capital leases and long term debt which are designated as other liabilities and measured at amortized cost. The University is exposed to credit, interest rate and liquidity risk. Based on the University's small amount of foreign currency denominated assets and liabilities, a change in exchange rates would not have a material effect on its Consolidated Statement of Operations.

Credit risk

Credit risk is the risk of potential loss to the University if a counterparty to a financial instrument fails to discharge an obligation. The University's credit risk is primarily attributable to its cash and cash equivalents, accounts receivable and long term investments. The credit risk on cash and cash equivalents is considered low as the counterparties are high credit quality institutions. The credit risk on receivables is considered low as the counterparts are primarily various levels of government and student fee related. The carrying amount of accounts receivable has been reduced through the use of allowance for doubtful accounts. The credit risk on long term investments is considered low as the counterparts are highly rated financial institutions and quality commercial property.

The carrying amount of financial assets represents the maximum credit exposure. The maximum exposure to credit risk at March 31 was:

	Carrying Amount	
	2009 $000	2008 $000
Financial Assets Held-For-Trading:		
Cash and Cash Equivalents	$16,638	$12,791
Financial Assets Available for Sale:		
Long Term Investments – Fixed Income Instruments	1,324	1,566
Loans and Receivables:		
Accounts Receivable	9,291	6,638
Due from Related Parties	101	135
	$27,354	$21,130

The University manages the credit risk related to these items by maintaining its cash and cash equivalents and its long term investments with highly rated financial institutions. Accounts receivable are due, for the most part, from various levels of government and student fee accounts where collection is considered very likely.

The ageing of accounts receivable at March 31, 2009 is as follows:

	2009 $000
Accounts Receivable, gross	
Current	$7,928
Past Due	1,727
	9,655
Less: Allowance for Doubtful Accounts	(364)
Accounts Receivable	$9,291

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The University's exposure to interest rate risk is concentrated in its cash equivalents. Generally, the value of cash equivalents increases if interest rates fall and decrease if interest rates rise. Due to the short term nature of the cash equivalents, the University has minimal exposure to risk associated with changes in interest rates.

Liquidity risk

Liquidity risk is the risk that an investment could not be readily converted into cash when needed. The risk is managed by holding the majority of our investments in cash and cash equivalents. As cash equivalents are held in a premium money market fund in which at least 90% of the assets must be comprised of liquid investments, the exposure to liquidity risk is not considered material.

17. Capital Disclosures

The university's objectives in managing capital are:

- minimizing the cost of capital
- preserving the ability to continue as a going concern
- maintaining flexibility to ensure the ongoing ability to execute the Strategic Plan

Management considers the current and long term portions of debt, unrestricted net assets and internally restricted net assets as capital. The University has various policies in place to manage capital, including a policy requiring Board approval on major capital expenditures, securing debt and capital budget approval. The University also uses its unrestricted net assets in a strategic fashion to support the Strategic Plan, special initiatives and campus expansion and redevelopment. During the fiscal year ended March 31, 2009 the University has received Province of Manitoba funding to provide financing to support major capital projects. The University also maintains deferred contribution accounts and endowments for externally restricted funding. These funds are managed with the objectives of spending the funds in accordance with the various terms stipulated in the funding arrangements. For the year ended March 31, 2009, the University has met its externally imposed capital requirements.

18. University of Winnipeg Pension Plan (the Plan)

The Plan was established as a contributory defined benefit pension plan at September 1, 1972. The Plan is registered under the Income Tax Act and the Manitoba Pension Benefits Act (Registration #309914). A Trust Company holds the assets under a Trust Agreement and provides daily administration of the Plan. Professional investment managers administer the portfolio. A Pension Committee of the Board of Regents of the University was responsible for overseeing the administration of the Plan, monitoring investments and making policy recommendations to the Board until March 25, 2008, when the University and the Stakeholders signed a series of agreements including a Transition Agreement and a Trust Agreement, to transfer the administration of the Plan from the University to an independent Board of Trustees, which became fully effective July 7, 2008. Until then, the University continued to administer the Plan, although the new Board of Trustees, for all intents and purposes, had assumed that responsibility.

The Plan covers all eligible employees of the University, except those who are members of the United Church of Canada Pension Plan. Permanent academic employees join the Plan on their date of employment. Permanent non-academic employees may elect to join on their date of employment but must join on their first anniversary date of employment. The defined benefit side of the Plan is now closed, and all new employees must now participate in the defined contribution side of the Plan.

At December 31, 2008 the fair value of the Plan's net assets was $111,474 (2007 - $135,044). Under the Plan, contributions are made by Plan members, which are matched by the University for the defined contribution members; for defined benefit members, an additional 1% is paid by the University. A member who receives benefits from the long-term disability plan of the University is not required to contribute to the Plan. The annual pension payable to a defined benefit member on retirement is based on the member's final average earnings and years of credited service.

In accordance with the Canadian Institute of Chartered Accountants (CICA) accounting standard for Employee Future Benefits, Section 3461 of the CICA Handbook – Accounting, the University uses a three-month accelerated measurement date for financial reporting purposes. As a result, with respect to the defined benefit segment of the Plan, the reported value of the plan assets and plan obligations as at December 31, 2008 are $95,016 and $120,328 respectively. The corresponding values for the plan assets and plan obligations projected to the fiscal year-end, March 31, 2009 are $92,614 and $121,045 respectively.

The University's financial statements reflect a liability regarding the settlement of the Pension Superintendent's Decision. Note 23 provides additional details regarding this decision.

Defined Contribution Obligation

The obligation for pension benefits under the defined contribution segment of the Plan will always be equal to the net assets in each member's account. Therefore, no surplus or deficiency arises from fluctuations in the investment market. Contributions of $1,291 (2008 - $1,085) were recorded as an expense in the statement of operations.

The defined contribution segment of the Plan consists of:

	December 31 2008 $000	December 31 2007 $000
Balance, Beginning of Year	$18,560	$16,561
Contributions	2,499	2,110
Refunds and transfers	(860)	(486)
Net Investment Return (Loss)	(3,741)	375
Balance, End of Year	$16,458	$18,560

Defined Benefit Obligation

In accordance with the Pension Benefits Act, an actuarial valuation of the defined benefit segment of the Plan is required at least every 3 years. An actuarial valuation of the Plan was prepared effective December 31, 2007 by Eckler Ltd., a firm of consulting actuaries. The results were extrapolated by them to December 31, 2008.

The benefit obligation has been calculated pursuant to CICA Handbook 3461, using a prescribed market-related discount rate. This approach differs from the calculation of the benefit obligation in the Pension Plan financial statements which uses a discount rate based on the expected long-term rate of return consistent with the investment policy of the fund and determined in accordance with accepted actuarial practice.

Excluding the obligation with respect to the Revised Order of the Superintendent of Pensions, made June 6, 2008, the financial information is based on the financial position of the Defined Benefit Pension Plan as of December 31, 2008, the "measurement date" and for the purpose of financial statements, the in-year pension expense (and the calculation of the valuation allowance in particular) reflects the employer contributions to the Plan during the three-month period ending March 31, 2009.

Change in Defined Benefit Obligation

	December 31 2008 $000	December 31 2007 $000
Benefit Obligation, January 1	$124,184	$125,951
Current Service Cost	2,640	2,816
Interest Cost	6,511	6,138
Benefits and Refunds Paid	(7,610)	(9,199)
Actuarial Gain	(5,397)	(1,522)
Benefit Obligation, December 31	$120,328	$124,184

Change in Plan Assets

	December 31 2008 $000	December 31 2007 $000
Fair Value of Plan Assets, January 1	$116,485	$123,236
Actual Return on Plan Assets, Net of Expenses	(16,630)	(235)
Employer Contributions	1,847	1,748
Employee Contributions	924	935
Benefits and Refunds Paid	(7,610)	(9,199)
Fair Value of Plan Assets, December 31	$95,016	$116,485

Reconciliation of Accrued Benefit Asset

	March 31 2009 $000	March 31 2008 $000
Accrued Benefit Obligation	($25,312)	($7,699)
Employer Contributions After December 31	422	423
Unamortized Transitional Asset	(2,732)	(3,188)
Unamortized Net Actuarial Losses	28,496	11,160
Accrued Benefit Asset, Before Valuation Allowance	874	696
Less: Valuation Allowance	(874)	(696)
Accrued Benefit Asset, Net of Valuation Allowance	$ 0	$ 0

Components of Pension Expense

	December 31 2008 $000	December 31 2007 $000
Employer Share of Current Service Cost	$1,716	$1,881
Interest Cost	6,511	6,138
Expected Return on Plan Assets	(6,103)	(5,999)
Amortization of Transitional Asset	(456)	(456)
Increase in Valuation Allowance	178	319
Net Pension Expense	$1,846	$1,883

Significant actuarial assumptions used in the determination of the 2008-09 pension expense were:

Discount Rate	- pre and post-retirement	5.35%
Rate of salary increase	- 2008 and 2009	2.50%
	- thereafter	4.00%

Significant actuarial assumptions used in the determination of the defined benefit obligation at December 31, 2008 were:

Discount Rate	- pre and post-retirement	6.00%
Rate of salary increase	- 2008 and 2009	2.50%
	- thereafter	4.00%

Funding Obligation

In the event that the actuarial valuation of the Plan determines that the Plan is not fully funded, the University is responsible for providing adequate funding levels in accordance with the *Pension Benefits Act of Manitoba.*

The actuarial valuation at December 31, 2007 reported that the defined benefit segment of the Plan has a solvency deficiency of $20,665. The actuary projects this amount to be $43,936 at December 31, 2008.

The University would normally be required under the *Pension Benefits Act* to make additional contributions to amortize the solvency deficiency over a five year period. However, the Provincial Government has provided universities in Manitoba with an opportunity to be permanently exempted from the usual solvency funding requirements, while the Plan continues on a going-concern basis. The University Pension Plan's exemption regulation (regulation 141/2007) was registered October 15, 2007. The University has complied with all requirements to be entitled to the permanent exemption.

The going-concern deficiency at December 31, 2007 was $2,384 and the annual deficiency funding payments are $386, which the University will continue to make until the deficiency is eliminated.

In addition, because of the going-concern deficiency at December 31, 2007, the University is required to make additional contributions of $295 in 2009, $291 in 2010 to cover the current service shortfall.

During 2005, amendments were made to the *Pension Benefits Act* which will affect the benefits payable from the Plan. These amendments have been proclaimed but the corresponding regulations have yet to be published. Based on a preliminary interpretation, the Plan's Actuary has estimated that these changes will add approximately $1,100 to the actuarial present value of accrued benefits at December 31, 2004 and would have increased the annual special funding payments by approximately $110 per year at that time. The 2005 amendments have not yet come into effect. The longer the effective date is delayed; the financial impact will tend to decline as active members retire.

19. Contractual Obligations

The University has operating lease obligations that cover equipment and building space integral to the University's operations. The lease obligations expire at various dates up to and including March 31, 2022. In addition, the University has entered into a number of contracts to complete capital additions and renovations on campus properties during the upcoming year. The above obligations require annual payments over the next five years and thereafter as follows:

	$000
2009/10	$11,784
2010/11	1,776
2011/12	1,148
2012/13	1,033
2013/14	929
Thereafter	2,768
	$19,438

20. The University of Winnipeg Foundation Inc.

The University's Board of Regents approved the establishment of the University of Winnipeg Foundation Inc. (the Foundation) in March 2003. The Foundation's vision is to strengthen, deepen and advance the University's mission through the creation of a long-term income stream.

The establishment of the Foundation is based upon mutually binding agreements between the University and the Foundation that provide for the administration of the specified fund, the basis of operation and the relationship between the University and the Foundation, the transfer of endowment funds and the provision of support services by the University to the Foundation.

The agreements with the Foundation are as follows:

(a) Coordination, Cooperation and Funding Agreement

The University and the Foundation have jointly agreed that all future fund raising activities directed to the general public shall generally be conducted by the Foundation. However, certain fund raising activities, such as the Wesmen Booster Club and direct gifts to libraries, will continue on an agency basis through the University.

During the 2008-2009 budget discussions and as approved by the University's Board of Regents and the Foundation's Board of Directors, the University agreed to provide an operating grant to the Foundation of $575 for the year. In addition, the University provided $50 from the interest earned on Science Complex funding. The operating grant is subject to annual approval of the Board of Regents.

(b) Occupancy and Support Agreement

This Agreement, which expired March 31, 2009, documents the basis upon which the Foundation occupied space on campus and the Foundation's use of certain existing systems, programs and personnel of the University. Through this agreement, the Foundation has agreed to pay the University a fee of $45 per annum for occupancy and support services. The University has agreed to waive the occupancy and support costs of $45 per year until March 31, 2009. The University and the Foundation have negotiated a renewed Occupancy and Support Agreement which takes effect April 1, 2009 and expires March 31, 2014. This agreement largely continues the terms of the current agreement unchanged.

(c) Specified Fund Agreement

This Agreement provides for the transfer of the $14,000 Government of Manitoba capital contribution from the University to the Foundation. As at March 31, 2009, the entire $14,000 has been transferred to the University to fund capital projects under the Campus Development Plan.

(d) Endowment Fund Agreement

The University and the Foundation entered into an Agreement that provided for the transfer of existing endowment funds from the University to the Foundation, with an effective date of April 1, 2004.

This Agreement states that the Foundation will assume responsibility for the Endowment Fund effective April 1, 2004. In accordance with the Endowment Agreement, the Foundation has a commitment to provide the University with an amount equal to the agreed percentage multiplied by the current year's beginning balance of the contributed capital. The agreed percentage is established by the Foundation and the University between September and December of each year.

The University and the Foundation have agreed that the amount will be determined by applying the agreed percentage (4.25% for 2008-2009) to the prior year beginning balance of the contributed capital plus a pro-rated percentage of the agreed percentage for those gifts received in each quarter of the previous year. (ie. ¾ of 4.25% for those gifts received in the first quarter, ½ of 4.25% in the second quarter and ¼ of 4.25% for those gifts received in the third quarter). Based on this formula, the Foundation provided the University with $1,119 in 2008-2009.

The Foundation is entitled to an annual administration fee equal to ½ of 1% of the Endowment Fund capital of the previous year (or such other higher percentage as the University may agree to from time to time). On April 24, 2008, the University confirmed its continued support of the Foundation by providing that the Foundation may continue to retain an annual administration fee of 2% each year for the duration of the Capital Campaign.

(e) Endowment Supplemental Agreement

This agreement, signed on July 22, 2008, formalizes practices in place between the Foundation and the University with respect to the handling of residuals, immature funds and the calculation of the award based on the agreed percentage.

The financial information of the Foundation is not consolidated in the University's financial statements and is provided within this note and note 24 on Related Party Transactions and Balances. The Foundation is a controlled entity of the University based upon the following factors:

i) The University has a significant economic interest in the Foundation which conducts its activities for the exclusive benefit of the University.

ii) The Foundation requires the University's consent to amend its by-laws.

iii) The objectives of the Foundation and the University have the common purpose to strengthen, deepen and advance the University's mission.

Financial Position:

The Foundation follows the restricted fund method of accounting for contributions. The Foundation maintains separate funds within its assets and follows the principles of fund accounting to record the day to day transactions.

The financial position of the Foundation at March 31 is summarized as follows:

	2009 $000	2008 $000
Statement of Financial Position:		
Assets	$35,479	$39,200
Liabilities	1,034	726
Fund Balances:		
Operating Fund	310	109
Unrestricted Fund	1	10
Investment in Capital Assets	42	48
Building and Program Fund	4,612	5,171
Funds Held Pending Terms of Reference	84	57
Specified Fund	0	59
Unrestricted Bequests	299	254
Endowment Fund	29,097	32,766
	34,445	38,474
	$35,479	$39,200
Statement of Operations		
Sources of Funds:		
Transfer from University of Winnipeg	$119	$927
Investment Income	715	2,867
Unrealized Loss on Investments	(5,455)	(3,247)
University of Winnipeg Support Funding	625	575
Endowment Administration Fee	668	584
Annual Donations	7,442	5,334
	4,114	7,040
Uses of Funds:		
Capital Programs	59	2,406
Endowment - Gifts to the University	1,119	1,000
Endowment - Administration Fee	668	584
Endowment - Administration Expenses	98	99
Operations	1,320	1,564
Donations Gifted to the University of Winnipeg	4,879	3,095
	8,143	8,748
Decrease in Funds	(4,029)	(1,708)

Restrictions are placed upon expenditures within Funds including:

i) The Operating Fund reflects the administrative and overhead costs of undertaking the Foundation's activities.

ii) The Unrestricted Fund records the receipt of donations received in the year that are identified by the donor to go to the area of greatest need.

iii) The Building and Program Fund is specifically intended to record the receipt of all donations intended for University programs and capital projects.

iv) The Specified Fund consists of the initial funding of $14,000 transferred to the Foundation from the University, pursuant to the "Specified Fund Agreement".

v) The Funds held pending Terms of Reference includes donations received for capital gifts, endowment gifts, and other restricted purposes not yet allocated pending donor wishes.

vi) The Endowment Fund reports the receipt of funds established from gifts by donors, which are designated to remain under the Foundation's management in perpetuity for endowment purposes.

In the Coordination Cooperation and Funding Agreement, the University has agreed to provide the Foundation with a $300 per annum operating grant, reducing by $30 per annum commencing in 2010-2011. This funding commitment will end in 2013-2014.

The University is required to make annual payments over the next 5 years and thereafter as follows:

	$000
2009/10	275
2010/11	270
2011/12	240
2012/13	210
2013/14	180
	$1,175

For 2009-2010, the University and the Foundation have agreed that the operating grant will be $275. However, no formal agreement has been signed to reflect this change.

21. University of Winnipeg Community Renewal Corporation

The University of Winnipeg Community Renewal Corporation ("UWCRC") was incorporated by Articles of Incorporation, without share capital, on April 6, 2005, as a controlled entity of the University. UWCRC's mandate is to support the University by developing a sustainable university community that promotes the attractiveness of the University to its faculty, staff, students, and the greater community. As part of its mandate, UWCRC will manage projects on behalf of the University, including but not limited to, the development of a comprehensive Campus and Community Development Plan, the assessment of particular development projects and the development of partnerships with community, private and public sector organizations.

During the year, UWCRC provided consulting services (in accordance to agreements entered into) to the University in connection with the following:

a) To assist the University with the design and development of the Science Building Complex on the basis of a per diem fee of $1 for a total of $122 for the year.

b) To assist in the early development of a variety of capital projects on behalf of the University based on a fee for performance contract. The amount of the consulting fee for services rendered in the year is $75.

c) To manage the University's Student Housing assets and all aspects of the Student Housing Program for a fixed annual fee of $250. In return, the UWCRC contracted back to the University for delivery of the Student Life aspects of the Student Housing Program, which continues to be managed by the University's Student Life Services Department, for a fixed annual fee of $175.

d) In addition, the University paid $56 for management services related to student housing and food services.

UWCRC holds a 25% investment in the land and building situated at 491 Portage Avenue ("Property") in Winnipeg, Manitoba. It does so by owning all of the shares of 4332181 Manitoba Ltd., which owns 25% of the property and shares of 4306946 Manitoba Ltd. The latter entity holds title to the Property as bare trustee for its shareholders. The Property is a commercial complex comprising an office building, retail stores, a bus depot and a parkade adjacent to the University's main Campus. The University is leasing office space in the Property.

UWCRC records its 25% investment in the Property on an equity basis as a result of significant influence.

As one of the conditions to obtaining financing for the Property, the financing company required that the University take responsibility for assuring that the debt service coverage ratio on the Property did not go below 1.0:1.0; (that is, that the Property would always generate $1.00 in revenue from its tenants for each $1.00 the owners of the Property are required to pay to its lender). If for any reason the Property fell below that ratio, the University would be required to lease space in the property at normal commercial rents, or assure that another tenant is obtained, such that the additional revenue would bring the debt service coverage ratio back to 1.0:1.0. The debt service coverage ratio did not go below 1.0:1.0 during the 2008-09 fiscal year.

The financial position of UWCRC at March 31 is summarized as follows:

	2009 $000	2008 $000
Statement of Financial Position:		
Assets:		
Cash	$224	$198
Investment, at Equity	925	900
Other	276	89
	$1,425	$1,187
Liabilities and Net Assets:		
Accounts Payable and Accrued Liabilities	$58	$41
Due to University of Winnipeg (Note 23)	102	78
Future Income Taxes	101	0
Net Assets	1,164	1,068
	$1,425	$1,187

	2009 $000	2008 $000
Statement of Operations and Changes in Net Assets:		
Revenue		
Operating Grants	$0	$25
Share of Equity Income	146	221
Consulting	541	450
Net Property Income	10	69
Other	33	68
	730	833
Expenses	634	512
Excess of Revenue over Expenses	96	321
Net Assets – Beginning of Year	1,068	747
Net Assets – End of Year	$1,164	$1,068

22. Gain on Sale of Capital Assets

During the year, the University disposed of two properties previously recorded as land and buildings within capital assets. These properties were not considered integral to the ongoing operations of the University.

As the disposal of land and buildings is not a regular occurrence for the University, the gain on sale of these properties ($603) is disclosed separately on the Statement of Operations (Statement II) after the Excess of Revenue over Expenses from Operations.

The net proceeds (net of transaction costs and debt repayment) of $877 are reported on the Statement of Changes in Net Assets (Statement III) as an addition to Internally Restricted Net Assets. This addition was used to establish a capital reserve (see Note 14).

23. Contingencies

a) The University is named as a defendant in litigations where legal action has commenced or is anticipated. While the ultimate outcomes of these proceedings cannot be predicted at this time, management and its legal counsel are of the opinion that, either the outcomes will not have a material effect on the financial position of the University, or the outcomes are not determinable. No provision has been made in the financial statements in respect of these claims, as of March 31, 2009.

b) On December 8, 2006, the Superintendent of Pensions issued an Order requiring the University to develop and implement a written governance framework, and pay a lump sum amount estimated to be $6,454, plus interest net of adjustments of approximately $1.6 million, into the Plan, for the benefit of defined benefit members, in relation to the undistributed portion of their proportionate share of the Plan surplus, as determined by the Plan Actuary in 1999.

The University appealed the Superintendent's decision to the Pension Commission, and the Commission's Final Decision was made on April 23, 2008. The Final Decision upheld the Superintendent's Order. The University further appealed the decision of the Commission to the Manitoba Court of Appeal; and the Court denied the appeal in January 2009.

There are a number of issues affecting the value of the payment to be made, and the Plan's Board of Trustees has written the Superintendent requesting clarification of several of these issues. Once the Superintendent has provided this clarification and an amount is calculated, the payment will be made. The University has been granted an extension until August 31, 2009 to make the payment. The exact amount of the payment with interest is unknown at the date of the Financial Statements, but is expected to be within the range of $7 to $12 million. In accordance with CICA Handbook sections 3290 Contingencies, and 3461 Employee Future Benefits, the University has accrued in its accounts for the year ended March 31, 2009 the minimum likely amount of the range of estimated liabilities. As the University deems there is no future economic benefit associated with this payment, the entire amount has been recognized as an expense in the current year. Any difference between the actual payout amount and the accrued amount will be recognized as an expense in the period the amount is determined.

The University is currently discussing arrangements with the Province of Manitoba to borrow the monies required to make the payment as soon as the amount is known. The exact amount and interest rate of the loan will not be known until such time as the loan is executed which is expected on or before August 31, 2009. The University expects the loan to be for a term of 30 to 40 years.

24. Related Party Transactions and Balances

The Foundation and UWCRC are controlled entities of the University. The Trusteed Plan is also a related party.

The University charges benefit administration costs to the Pension Plan. The charge for 2008-2009 was $50 (2007-2008 - $56). These transactions are measured at the exchange amount, which is the amount of consideration established and agreed to by the related parties.

During the year ending March 31, the University incurred transactions as follows:

		2009 $000	2008 $000
From the University to the Foundation:			
i)	Operating grant	$625	$575
ii)	Gifts for endowment	$624	$1,004
iii)	Transfer of income allocation	$0	$920
From the Foundation to the University:			
i)	Transfer of specified funds	$59	$2,417
ii)	Transfer of annual donations	$4,879	$3,095
iii)	Income allocation	$1,119	$1,000
From the University to UWCRC			
i)	Consulting fees	$469	$475
From UWCRC to the University			
i)	Management fees	$167	$176

These transactions are recorded at the exchange amount which is the amount established and agreed to by the related parties.

At the end of the year, the amounts due to and from related parties are as follows:

	2009 $000	2008 $000
Due from Related Parties		
Specified Fund – Foundation	$0	$52
Operating – UWCRC	101	83
	101	135
Due to Related Party		
Operating – Foundation	25	301
	$ 25	$ 301

25. Richardson College for the Environment & Science Complex

The University has commenced the development and design of the Richardson College for the Environment and Science Complex to be completed in March 2011. The University signed a Definitive Agreement with Laureate Developments Inc. (the Developer) to assemble and transfer lands to the University that will become the site for the University's Science Complex, develop and build the Science Building Complex for the University on a turnkey basis and assist the University in attracting partners to the project for the purposes of fund-raising.

The University has received a commitment from the Provincial Government to provide funding of $25,000 to contribute to the funding of the Science Building Complex. The University has received $12,643 from the Provincial Government. This capital funding has been recorded as deferred capital contributions. The funding is financed by promissory notes payable to the Province of Manitoba in the amount of $5,000, $5,311 and $2,332 bearing interest at 5.15%, 5.80% and 5.65% respectively. The notes are notionally repayable over a term of 40 years with funding from the Province of Manitoba.

The remaining $12,357 will be provided to the University on the basis of $1.00 of funding for every $2.00 raised on the Foundation's Capital Campaign.

26. Reclassification of Comparative Figures

Certain 2008 comparative figures have been reclassified to conform with the financial statement presentation adopted for 2009.

Auditors' Report

To the Shareholder of Venture Manitoba Tours Ltd.:

We have audited the balance sheet of Venture Manitoba Tours Ltd. as at March 31, 2009 and the statements of operations and deficit and cash flows for the year then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of the Company as at March 31, 2009 and the results of its operations and its cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

Cash resources, beginning of year	129,923	83,030
Cash resources, end of year	30,372	129,923

The accompanying notes are an integral part of these financial statements

1. Incorporation and operations

Venture Manitoba Tours Ltd. (the "Company") was incorporated under the Manitoba Corporations Act. The issued shares are owned by the Province of Manitoba.

The Province of Manitoba owns the Falcon Lake Golf Course and Games Area. The Company operates this facility under a lease agreement with the Province of Manitoba. The Company is responsible for the operating costs of the golf course and games area, and, in return, is authorized to realize the revenue generated by their operations. These facilities are situated in the Whiteshell Provincial Park and are not subject to realty taxes.

The Company is not subject to income tax.

2. Significant accounting policies

The financial statements have been prepared in accordance with Canadian generally accepted accounting principles and include the following significant accounting policies:

Inventory

Inventory is valued at the lower of cost and net realizable value. Cost is determined by the first-in, first-out method. Net realizable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and selling costs.

Property and equipment

Property and equipment are recorded at cost less applied grant funds. Amortization is provided using the straight-line method at rates intended to amortize the cost of assets over their estimated useful lives.

	Rate
Staff quarters	10 to 25 years
Automotive	3 years
Golf course improvements	10 to 40 years

These financial statements do not include the property and equipment of the Falcon Lake Golf Course and Games Area which are owned by the Province of Manitoba.

Revenue recognition

The Company recognizes revenue when the goods are received by the customer and the services are provided.

Measurement uncertainty

The preparation of financial statements in conformity with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Accounts receivable are stated after evaluation as to their collectibility and an appropriate allowance for doubtful accounts is provided where considered necessary. Provisions are made for slow moving and obsolete inventory. Amortization is based on the estimated useful lives of property and equipment.

These estimates and assumptions are reviewed periodically and, as adjustments become necessary they are reported in earnings in the periods in which they become known.

Long-lived assets

Long-lived assets consist of property and equipment. Long-lived assets held for use are measured and amortized as described in the applicable accounting policies.

The Company performs impairment testing on long-lived assets held for use whenever events or changes in circumstances indicate that the carrying value of an asset, or group of assets, may not be recoverable. Impairment losses are recognized when undiscounted future cash flows from its use and disposal are less than the asset's carrying amount. Impairment is measured as the amount by which the asset's carrying value exceeds its fair value. Any impairment is included in earnings for the year.

3. Significant accounting policies *(Continued from previous page)*

Financial instruments

Held for trading:

The Company has classified cash as held for trading. These instruments are initially recognized at their fair value. Fair value is approximated by the instrument's initial cost in a transaction between unrelated parties.

Held for trading financial instruments are subsequently measured at their fair value. Gains and losses arising from changes in fair value are recognized immediately in income.

Loans and receivables:

The Company has classified accounts receivable as loans and receivables. These assets are initially recognized at their fair value. Fair value is approximated by the instrument's initial cost in a transaction between unrelated parties.

Loans and receivables are subsequently measured at their amortized cost. Amortized cost is the amount at which the financial asset is measured at initial recognition less principal repayments and any reduction for impairment or uncollectability. Gains and losses arising from changes in fair value are recognized in net income upon derecognition or impairment.

Other financial liabilities:

The Company has classified accounts payable and accruals and advances from the Province of Manitoba as other financial liabilities. These liabilities are initially recognized at their fair value. Fair value is approximated by the instrument's initial cost in a transaction between unrelated parties.

Other financial liabilities are subsequently measured at amortized cost. Amortized cost is the amount at which the financial liability is measured at initial recognition less principal repayments. Gains and losses arising from changes in fair value are recognized in net income upon derecognition or impairment.

Comprehensive income

The Company does not have any items giving rise to other comprehensive income (loss), nor is there any accumulated balance of other comprehensive income. All gains and losses, including those arising from measurement of all financial instruments have been recognized in net income for the period.

3. Change in accounting policies

Inventory

Effective April 1, 2008, the Company adopted the Canadian Institute of Chartered Accountants' new recommendation for inventory under CICA 3031 *Inventories*. The new Section provides guidance on the measurement and disclosure of inventories. The new recommendation establishes that inventories should be measured at the lower of cost and net realizable value and provides guidance on the determination of cost. There was no material impact on the financial statements from the retrospective application of the new accounting recommendations.

4. Property and equipment

	Cost	Accumulated amortization	2009 Net book value	2008 Net book value
Staff quarters	102,395	49,130	53,265	57,361
Automotive	960,857	843,430	117,427	117,811
Computer equipment	68,174	61,910	6,264	-
Golf course improvements	618,039	142,485	475,554	465,574
	1,749,465	1,096,955	652,510	640,746

5. Advances from the Province of Manitoba

The Advances from the Province of Manitoba are unsecured, non-interest bearing and due on demand.

6. Share capital

		2009	*2008*
Authorized			
Unlimited Common shares			
Issued			
Common shares			
3,643,500	Common shares	**3,643,500**	3,643,500

7. Commitments

The Company operates the Falcon Lake Golf Course and Games Area under lease agreements with the Province of Manitoba for an annual amount of $109,413. This amount is included in cost of sales for the year.

The Company rents space and equipment under various operating leases which expire through 2009 for an annual amount of $61,100.

8. Government reporting entity - related parties

The following information is presented in accordance with a request by the Minister of Finance of The Government of the Province of Manitoba.

As at March 31, 2009, the Company had the following balances with entities in the Government Reporting Entity:

	2009	*2008*
Payable to:		
Manitoba Hydro	**903**	988
Department of Conservation	-	109,413
	903	110,401

9. Financial instruments

The Company as part of its operations carries a number of financial instruments. It is management's opinion that the Company is not exposed to significant interest, currency or credit risks arising from these financial instruments except as otherwise disclosed.

10. Capital management

The Company's objective when managing capital is to safeguard the entity's ability to continue as a going concern, so that it can continue to provide services to it's customers.

The Company sets the amount of capital in proportion to risk and manages the capital structure and makes adjustments to it in light of changes to economic conditions and the risk characteristics of the underlying assets. In order to maintain or adjust the capital structure, the Company may decrease expenses.

The Company manages the following as capital:

	2009	*2008*
Share capital	**3,643,500**	3,643,500
Contributed surplus	**257,910**	257,910
Retained earnings	**(3,458,660)**	(3,484,169)
	442,750	417,241

The Company monitors capital on a monthly basis, as well as annually, including the Board's input as to the capital management approach to take, and through advice from the Company's shareholders. During the year, the Company's strategy was to protect the capital through minimizing operating expenses.

11. Comparative figures

Certain comparative figures have been reclassified to conform with current year presentation.

GOVERNMENT ENTERPRISES

MANAGEMENT REPORT

For the year ended March 31, 2009

The accompanying consolidated financial statements and all additional information contained in the Annual Report are the responsibility of management and have been approved by the Manitoba Hydro-Electric Board. The financial statements have been prepared by management in accordance with accounting principles generally accepted in Canada, applied on a basis consistent with that of the preceding year. In management's opinion, the consolidated financial statements have been properly prepared within reasonable limits of materiality, incorporating management's best judgment regarding all necessary estimates and all other data available up to June 9, 2009. The financial information presented elsewhere in the Annual Report is consistent with that in the consolidated financial statements.

Management maintains internal controls to provide reasonable assurance that the assets of the Corporation are properly safeguarded and that the financial information is reliable, timely, and accurate. An internal audit function independently evaluates the effectiveness of these internal controls on an ongoing basis and reports its finding to management and to the Audit Committee of the Board.

The responsibility of the external auditors, Ernst & Young LLP, is to express an independent, professional opinion on whether the consolidated financial statements are fairly presented in accordance with Canadian generally accepted accounting principles. The Auditors' Report outlines the scope of their examination and their opinion.

The Audit Committee of the Board is comprised of five members, the majority of whom are members of the Manitoba Hydro-Electric Board. The Audit Committee of the Board meets with the external auditors, representatives of the Auditor General's Office, the internal auditors and management to satisfy itself that each group has properly discharged its respective responsibility and to review the consolidated financial statements before recommending approval by the Board. The internal and external auditors have full and unrestricted access to the Audit Committee, with or without the presence of management. The Board reviews the Annual Report in advance of its release and approves its content and authorizes its publication.

On behalf of management:

R. B. Brennan, FCA
President and Chief Executive Officer

Vince Warden

V. A. Warden, CMA, FCMA
Senior Vice-President,
Finance & Administration and Chief Financial Officer

Winnipeg, Canada
June 9, 2009

**TO THE BOARD OF DIRECTORS OF
MANITOBA HYDRO-ELECTRIC BOARD**

We have audited the consolidated balance sheet of Manitoba Hydro-Electric Board as at March 31, 2009 and the consolidated statements of income, comprehensive income, accumulated other comprehensive income, retained earnings and cash flows for the year then ended. These consolidated financial statements are the responsibility of the Corporation's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Corporation as at March 31, 2009 and the results of its operations and its cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

The accompanying notes are an integral part of the consolidated financial statements.

NOTE 1 SIGNIFICANT ACCOUNTING POLICIES

Consolidation - The consolidated financial statements include the financial statements of the Corporation and its subsidiaries. For purposes of consolidation, all significant intercompany accounts and transactions have been eliminated.

Rate Regulated Accounting - The prices charged for the sale of electricity and natural gas within Manitoba are subject to review and approval by the Public Utilities Board of Manitoba (PUB). The rate-setting process is designed such that rates charged to electricity and natural gas customers recover costs incurred by Manitoba Hydro in providing electricity and gas service. Accordingly, Manitoba Hydro applies various accounting policies that differ from enterprises that do not operate in a rate-regulated environment. Such accounting policies allow for the deferral of certain costs or credits which will be recovered or refunded in future rates. These costs or credits would otherwise have been included in the determination of net income in the year that the cost or credit is incurred. Manitoba Hydro refers to such deferred costs or credits as regulated assets or regulated liabilities which are generally comprised of the following:

- Deferred taxes - Taxes paid by Centra Gas (July 1999) as a result of its change to non-taxable status on acquisition by Manitoba Hydro, have been deferred and are being amortized on a straight-line basis over a period of 30 years.
- Acquisition costs - Costs associated with the acquisition of Centra Gas (July 1999) and Winnipeg Hydro (September 2002) have been deferred and are being amortized on a straight-line basis over a period of 30 years.
- Site restoration costs - Site restoration costs, other than those for which an Asset Retirement Obligation (ARO) has been established, are recorded as a deferred expense and are amortized on a straight-line basis over 15 years.
- Purchased gas variance accounts (PGVA) - Accounts are maintained to recover/ refund differences between the actual cost of gas and the cost of gas incorporated into rates charged to customers as approved by the PUB. The difference between the recorded cost of natural gas and the actual cost of natural gas is carried as an account receivable/ payable, and recovered or refunded in future rates.
- Gas Power Smart programs - The costs of the Corporation's energy conservation programs for its natural gas operations are deferred and amortized on a straight-line basis over a period of 5 years.

Manitoba Hydro's other significant accounting policies are as follows:

a) **Property, Plant and Equipment**
Property, plant and equipment is stated at cost which includes direct labour, materials, contracted services, a proportionate share of overhead costs and interest applied at the average cost of debt. Finance expense is allocated to construction until a capital project becomes operational or a decision is made to abandon, cancel or indefinitely defer construction. Once the transfer to in-service property, plant and equipment is made, finance expense allocated to construction ceases, and depreciation and finance expense charged to operations commences.

b) **Depreciation**
Depreciation is provided on a straight-line remaining-life basis. The major components of generating stations are depreciated over the lesser of the remaining life of the major component or the remaining life of the associated generating station.

The range of estimated service lives of each major asset category is as follows:

Generation	- Hydraulic	45 - 100 years
	- Thermal	25 - 65 years
Transmission	- Lines	40 - 85 years
	- Stations	20 - 57 years
Distribution		15 - 65 years

Provision for removal costs of major property, plant and equipment is charged to depreciation expense on a straight-line basis over the remaining service lives of the related assets. Retirements of these assets, including costs of removal, are charged to accumulated depreciation with no gains or losses reflected in operations. The estimated service lives and removal costs of the assets are based upon depreciation studies conducted periodically by the Corporation.

c) **Asset Retirement Obligations**
Asset retirement obligations are measured initially at fair value in the period in which the obligations are incurred, provided that a reasonable estimate of the fair value can be made. The present value of the estimated retirement cost is added to the carrying amount of the related asset. In subsequent periods, the estimated retirement cost is amortized over the useful life of the asset and the carrying value of the liability is increased to recognize increases in the liability's present value with the passage of time.

d) **Materials and Supplies**
Materials and supplies are valued at the lower of average cost or net realizable value.

e) **Contributions in Aid of Construction**
Contributions are required from customers whenever the costs of extending service exceed specified construction allowances. Contributions are amortized on a straight-line basis over the estimated service lives of the related assets.

f) **Planning Studies**
The costs of planning studies related to uncommitted major generation or transmission facilities are deferred and amortized on a straight-line basis over 15 years. If there is reasonable assurance that a project will proceed to construction, any unamortized balance related to that project is transferred to construction in progress.

g) **Electric Power Smart Programs**
The costs of the Corporation's electric energy conservation programs, referred to as Power Smart, are deferred and amortized on a straight-line basis over a period of 10 years.

h) **Revenues**
Customers' meters are read and billed on a cyclical basis. Revenues are accrued in respect of energy delivered for those cycles not yet billed.

i) **Cost of Gas Sold**
Cost of natural gas sold is recorded at the same rates charged to customers.

j) **Employee Future Benefits**
Manitoba Hydro provides employee future benefits, including pension and other post-retirement benefits, to both existing and retired employees. Pension plans include the Civil Service Superannuation Board (CSSB) plan, three Centra Gas curtailed pension plans, and the Winnipeg Civic Employee Benefits Program (WCEBP).

The costs and obligations of pension and other post-retirement benefits are calculated by an independent actuary using the accrued benefit actuarial cost method and reflect management's best estimate of future compensation increases, service lives and inflation rates. Pension expense is comprised of the cost of pension benefits provided during the year, the amortization of past service benefits, experience gains and losses, and expected returns on fund assets net of interest on the obligation. Expected returns on fund assets are calculated using market related values based on a five year moving average. The unamortized present value of past service benefits and actuarially determined experience gains or losses are recognized in the financial statements as deferred assets or credits.

The Corporation utilizes the "corridor method" of amortizing actuarial gains and losses. The amortization of experience gains and losses is recognized only to the extent that the cumulative unamortized net actuarial gain or loss exceeds 10% of the greater of the accrued benefit obligation and the fair market value of plan assets at the beginning of the year. When required, the excess of the cumulative gain or loss balance is amortized over the expected average remaining service life of the employees covered by the plan.

Pension and long-term disability expenses pertaining to the former Winnipeg Hydro employees are recognized at the time contributions are made to the WCEBP which maintains the funds and obligations relating to these employees in its financial records.

Other employee benefits earned by employees include vacation, vested sick leave, severance and a retirement health spending plan. Where applicable, the future costs of these benefits are based on management's best estimates.

k) Comprehensive Income

Comprehensive income consists of net income and other comprehensive income (OCI). OCI includes unrealized gains and losses arising from changes in the fair value of available-for-sale assets, changes in the fair value of derivatives designated in a hedging relationship, and changes in the foreign exchange rate for U.S. denominated long-term debt in effective cash flow hedging relationships. Such amounts are recorded in accumulated OCI (AOCI) until the criteria for recognition in net income are met.

l) Financial Instruments

All financial instruments are measured at fair value on initial recognition as of the trade date. Transaction costs are included in the initial carrying amount of financial instruments. Measurement in subsequent periods depends on the classification of the instrument. Financial instruments are classified into one of the following five categories: held-to-maturity investments, loans and receivables, held-for-trading, available-for-sale, or other financial liabilities.

Financial instruments classified as loans and receivables, held-to-maturity investments and other financial liabilities are measured at amortized cost using the effective interest method of amortization. Available-for-sale financial assets are measured at fair value with revaluation gains and losses recorded in OCI until the instrument is derecognized or impaired. Translation gains and losses on available-for-sale financial assets in a hedging relationship with financial liabilities are credited or charged to finance expense. Held-for-trading financial instruments are measured at fair value and all gains and losses are included in income in the period in which they arise.

m) Foreign Currency Translation

Revenues and expenditures resulting from transactions in foreign currencies are translated into Canadian dollar equivalents at exchange rates in effect at the transaction dates.

Long-term monetary assets and liabilities denominated in U.S. currencies are translated into Canadian currency at the exchange rate prevailing at the balance sheet date. Translation gains and losses are credited or charged to finance expense in the current period except for long-term debt obligations in hedging relationships with future export revenues. Translation gains and losses for long-term debt obligations in hedging relationships with future export revenues are recorded in OCI until such time that the hedged export revenues are realized, at which time accumulated exchange gains and losses are credited or charged to finance expense.

Current monetary assets and liabilities denominated in foreign currencies are translated into Canadian currency at the exchange rate prevailing at the balance sheet date. Any exchange gains and losses on the translation of current monetary assets and liabilities are credited or charged to finance expense in the current period.

n) **Derivatives**
The Corporation does not engage in derivative trading or speculative activities. All derivative instruments are carried at fair value on the consolidated balance sheet with the exception of those that were entered into for the purpose of physical receipt or delivery in accordance with the Corporation's expected normal purchases and sales. Changes in the fair value of derivatives that are not designated in a hedging relationship and do not qualify for the normal purchase and sale exemption are recorded in net income.

o) **Hedges**
The Corporation has designated cash flow and fair value hedges linking financial instruments to specific assets and forecasted transactions. The Corporation documents the relationship between the hedging instrument and the hedged item and assesses at inception, and on an ongoing basis, the effectiveness of the hedging relationship.

p) **Debt Discounts and Premiums**
Debt discounts and premiums are amortized to finance expense using the effective interest method.

q) **Cash and Cash Equivalents**
Cash and cash equivalents include cash on hand and short-term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

r) **Goodwill**
Goodwill represents the amount of the Corporation's investments in Centra Gas and Winnipeg Hydro over and above the fair market value of the identified net assets acquired. The goodwill balance is evaluated annually to determine whether any impairment has occurred. An impairment would be recognized if it was determined that the carrying value of the Corporation's investments in Centra Gas or Winnipeg Hydro exceeded the present value of the future cash flows from these investments. Should impairment occur, it would be recorded as a charge against operations in the year of impairment.

s) **Use of Estimates**
The preparation of financial statements in accordance with generally accepted accounting principles requires management to make estimates and assumptions that affect amounts reported in the financial statements. Actual amounts could differ from those estimates, but differences are not expected to be material.

NOTE 2 ACCOUNTING CHANGES

Financial Instruments - Disclosure and Presentation

Effective April 1, 2008, the Corporation adopted Canadian Institute of Chartered Accountants (CICA) Handbook Section 3862, Financial Instruments – Disclosures and Section 3863, Financial Instruments – Presentation. These sections replace Section 3861, Financial Instruments – Disclosure and Presentation and require disclosure of both qualitative and quantitative information that enables users of financial statements to evaluate the nature and extent of risks from financial instruments to which the Corporation is exposed. These additional disclosures are provided in Note 16.

Capital Disclosures

Effective April 1, 2008, the Corporation adopted CICA Section 1535, Capital Disclosures. The section establishes standards for disclosing information that enables users of financial statements to evaluate how an entity manages its capital structure (i.e. debt and equity), its objectives, policy and processes for managing capital. These disclosures are provided in Note 17.

Materials and Supplies (Inventories)

Effective April 1, 2008, the Corporation adopted CICA Section 3031, Inventories. The new standard requires that inventory items which are used primarily for property, plant and equipment (PP&E) be recognized as PP&E rather than as inventory. In addition, the new standard stipulates which costs can be included in the cost of inventory in particular as it applies to storage and carrying charges. Adopting this standard resulted in $26 million of assets being reclassified from materials and supplies to PP&E (2008 – $23 million).

Future Accounting Changes

Goodwill and Intangible Assets

Effective April 1, 2009, the Corporation will be adopting the new CICA Section 3064, Goodwill and Intangible Assets which provides more comprehensive guidance on intangible assets, particularly for the costing of internally developed intangible assets. The impact of this new standard on Manitoba Hydro's financial statements is currently being assessed.

Regulated Activities

For year ends beginning on or after January 1, 2009, the temporary exemption provided in CICA Section 1100, Generally Accepted Accounting Principles (GAAP), which allows the recognition and measurement of regulatory assets and liabilities, was withdrawn. Pursuant to a practice allowed by Canadian GAAP, the Corporation will, however, rely on Statement of Financial Accounting Standard No. 71, Accounting for the Effects of Certain Types of Regulation, issued by the U.S. Financial Accounting Standards Board, to maintain the current accounting treatment for regulatory assets and liabilities. Consequently, the withdrawal of the exemption should not have any impact on the consolidated financial statements.

International Financial Reporting Standards (IFRS)

The CICA's Accounting Standards Board announced that Canadian publicly accountable enterprises will adopt IFRS as issued by the International Accounting Standards Board effective for fiscal years beginning on or after January 1, 2011. The transition date for Manitoba Hydro of April 1, 2011 will require the restatement, for comparative purposes, of the April 1, 2010 balance sheet and of the amounts reported by the Corporation for its year ended March 31, 2011. Although IFRS uses a conceptual framework similar to Canadian GAAP, differences in accounting standards are expected. Manitoba Hydro is currently assessing the impact of those differences.

NOTE 3 EXTRAPROVINCIAL REVENUES

	2009	2008
	millions of dollars	
United States	491	515
Canada	132	110
	623	625

U.S. extraprovincial revenues were translated at exchange rates in effect at the date of the transaction. The average effective exchange rate for the year was $1.00 U.S. = $1.10 Canadian (2008 - $1.00 U.S. = $1.03 Canadian).

NOTE 4 FINANCE EXPENSE

	2009	2008
	millions of dollars	
Interest on debt	544	587
Interest capitalized	(56)	(51)
Amortization of premiums and discounts	(11)	(11)
Investment income	(27)	(33)
Realized foreign exchange gains on debt in cash flow hedges	(11)	(52)
	439	440

Included in interest on debt is $74 million (2008 - $73 million) related to the Provincial Debt Guarantee Fee. The fee during the year was 1.0% of the total outstanding debt guaranteed by the Province of Manitoba (2008 – 1.0%).

NOTE 5 WATER RENTALS AND ASSESSMENTS

	2009	2008
	millions of dollars	
Water rentals	115	117
Assessments	8	7
	123	124

Water rentals are paid to the Province of Manitoba for the use of water resources in the operation of the Corporation's hydroelectric generating stations. Water rental rates during the year were $3.34 per MWh (2008 - $3.34 per MWh).

NOTE 6 PROPERTY, PLANT AND EQUIPMENT

	2009			2008		
	millions of dollars					
	In Service	Accumulated Depreciation	Construction in Progress	In Service	Accumulated Depreciation	Construction in Progress

	12 514	4 443	1 449	11 884	4 187	1 238

NOTE 7 MATERIALS AND SUPPLIES

	2009	2008
	millions of dollars	
Materials and supplies	67	62
Natural gas inventory	15	16
	82	78

NOTE 8 SINKING FUND INVESTMENTS

Manitoba Hydro is legislated under the Manitoba Hydro Act to make annual sinking fund contributions to the Province of Manitoba of not less than 1% of the principal amount of the outstanding debt on the preceding March 31, and 4% of the balance in the sinking fund at such date. Contributions to the sinking fund during the year were $124 million (2008 - $96 million). Income earned on sinking fund investments is included with investment income for the year.

Sinking funds are invested in government bonds and the bonds of highly rated corporations and financial institutions.

	2009	2008
	millions of dollars	
U.S. investments	643	700
Premium on purchase of sinking fund investments	23	18
	666	718

U.S. investments have a weighted average term to maturity of 3.1 years (2008 - 2.1 years) and an effective yield to maturity of 3.8% (2008 – 4.9%). U.S. investments are translated into Canadian currency at the exchange rate prevailing at the balance sheet date, $1.00 U.S. = $1.26 Canadian (2008 - $1.00 U.S. = $1.03 Canadian). The March 31 balance includes $12 million (2008 - $36 million) of unrealized fair value gains.

NOTE 9 PENSION ASSETS AND OBLIGATION

Manitoba Hydro employees are eligible for pensions under the Civil Service Superannuation Board (CSSB) defined benefit plan that provides pension benefits based on years of service and on the average earnings of the 5 best years. The CSSB plan requires the Corporation to contribute approximately 50% of the pension disbursements made to retired employees. In addition, the former employees of Centra Gas are entitled to pension benefits earned under the Centra Gas curtailed pension plans. The former Winnipeg Hydro employees continue to earn benefits under the Winnipeg Civic Employee Benefits Program (WCEBP) in which, upon the acquisition of Winnipeg Hydro, Manitoba Hydro became a participating employer. The WCEBP is also a defined benefit plan that provides pension benefits based on years of service and on the average earnings of the 5 best years.

The CSSB manages the Corporation's pension fund (MH Pension Fund) on behalf of the Corporation. The assets related to the Centra Gas curtailed pension plans are held in trust by State Street Trust Co. of Canada and are not reflected on Manitoba Hydro's balance sheet. Similarly, the assets and liabilities of the WCEBP are not reflected on Manitoba Hydro's balance sheet.

The following tables present information concerning the MH Pension Fund and the Centra Gas curtailed pension plans:

	MH Pension Fund		Centra Gas curtailed pension plans	
	2009	2008	2009	2008
	millions of dollars			
Plan Assets at Fair Value				
Balance at beginning of year	781	800	72	75
Actual return (loss) on plan assets	(126)	(5)	(13)	(1)
Employer contributions	-	-	4	3
Benefit payments and refunds	(32)	(14)	(6)	(5)
	623	781	57	72
Accrued Benefit Obligation				
Balance at beginning of year	714	663	81	78
Interest on obligation	46	43	6	5
Current service cost	22	19	-	-
Benefit payments and refunds	(32)	(30)	(6)	(5)
Actuarial losses (gains)	(20)	19	-	3
	730	714	81	81
Surplus (deficit) at end of year	(107)	67	(24)	(9)

Pension assets are valued at market rates and are invested as follows:

	MH Pension Fund Fair Value		Centra Gas curtailed pension plans Fair Value	
	2009	2008	2009	2008
	millions of dollars			
Equities	308	436	31	44
Bonds and debentures	226	247	22	24
Real estate	85	84	2	3
Short-term investments	4	14	2	1
	623	781	57	72

The return on pension fund assets for the MH Pension Fund was negative 16.3% (2008 - negative 0.6%). The return for the Centra Gas curtailed plan fund assets was negative 18.1% (2008 - negative 1.7%).

The weighted average term to maturity on fixed income investments is 8.0 years (2008 – 8.2 years).

The most recent actuarial valuations for the Corporation's obligations under the CSSB and Centra Gas curtailed pension plans were performed with respect to the liabilities outstanding as at December 31, 2008. These valuations incorporated management's best estimate assumptions and took into consideration the long-term nature of the pension plans. The next actuarial valuations for all plans will occur in December 2009.

The Centra Gas curtailed pension plans are also subject to a solvency valuation for funding purposes with the latest valuation taking place as at December 31, 2008.

The significant actuarial assumptions adopted in measuring the Corporation's pension and other employee benefit obligations are as follows:

	2009	2008
Discount rate	6.5%	6.5%
Expected long-term rate of return on plan assets	7.5%	7.5%
Rate of compensation increase, including merit and promotions	1.5 - 2.0%	1.5 - 2.0%
Expected average remaining service life of employees- MH Pensions	14 years	14 years
Expected average remaining service life of employees- Centra Pensions	10 years	14 years
Long-term inflation rate	2.5%	2.5%

The Corporation's pension expense related to each of the pension benefit plans is as follows:

	CSSB Plan		Centra Gas curtailed pension plans	
	2009	2008	2009	2008
		millions of dollars		
Current service cost	22	19	-	-
Administrative fees	2	2	-	-
Canada Pension Plan	13	12	-	-
Interest on obligation	46	43	5	5
Expected return on plan assets	(54)	(50)	(5)	(5)
Amortization of net experience loss	2	3	1	1
Amortization of transitional gain	(1)	(1)	-	-
	30	28	1	1

Pension expense for the former Winnipeg Hydro employees is equal to employer contributions to the WCEBP in addition to employer remittances to the Canada Pension Plan. Total contributions to the WCEBP during the year amounted to $0.2 million (2008 - $0.2 million) and reflect an employer contribution rate approximating 0.6% of pensionable earnings to January 7, 2009 and 1.3% of pensionable earnings thereafter.

NOTE 10 DEFERRED CHARGES

	2009	2008
	millions of dollars	
Employee future benefits	261	103
Power Smart programs - electric	164	149
Contract receivables	78	69
Advances to TPC (Note 21)	35	25
Affordable Energy Fund (Note 20)	33	34
Planning studies	25	25
Regulated assets		
Site restoration costs	40	42
Deferred taxes	36	38
Power Smart programs - gas	27	19
Acquisition costs	24	24
Other	9	11
	732	539

If the Corporation were not subject to rate regulation, the costs associated with the regulated assets would be charged to operations in the period that they were incurred and net income for 2009 would have been reduced by $3 million (2008 - $8 million).

In total, deferred charges of $44 million (2008 - $33 million) were amortized to operations during the period.

NOTE 11 LONG-TERM DEBT

During the year, the Corporation arranged long-term financing of $423 million (2008 - $981 million). The current year financing was in the form of Provincial advances with floating interest rates.

	2009	2008
	millions of dollars	
Advances from the Province of Manitoba represented by debenture debt of the Province	7 836	7 142
Manitoba HydroBonds	165	213
Manitoba Hydro-Electric Board Bonds	216	244
	8 217	7 599
Less: Current portion of long-term debt	519	353
	7 698	7 246
Debt discounts and premiums	(11)	1
Transaction costs	(26)	(29)
	7 661	7 218

Included in the current portion of long-term debt are $498 million (2008 - $284 million) of debt maturities, and $21 million (2008 - $69 million) of floating-rate Manitoba HydroBonds with maturity dates in 2011 and 2012. Floating rate Manitoba HydroBonds are redeemable at the option of the holder.

Long-term debt is guaranteed by the Province of Manitoba, with the exception of Manitoba Hydro-Electric Board Bonds in the amount of $77 million (2008 - $104 million) issued for mitigation projects.

Debt principal amounts (excluding transaction costs, debt discounts and premiums) and related yields are summarized by fiscal years of maturity in the following table:

					2009	2008
			millions of Canadian dollars			
Years of Maturity	Canadian	Cdn Yields	U.S.	U.S. Yields	Total	Total
2010	208	5.2%	311	5.6%	519	441
2011	90	4.9%	252	3.3%	342	297
2012	16	4.7%	-	-	16	16
2013	78	5.3%	-	-	78	78
2014	475	5.0%	427	7.1%	902	823
	867	5.0%	990	6.3%	1 857	1 655
2015-2019	1 409	6.8%	504	9.7%	1 913	1 823
2020-2024	154	4.6%	1 512	6.9%	1 666	1 387
2025-2029	360	7.3%	-	-	360	360
2030-2034	889	9.3%	-	-	889	889
2035-2039	1 425	4.8%	-	-	1 425	1 025
2040-2057	107	4.9%	-	-	107	107
	5 211	6.3%	3 006	7.4%	8 217	7 246

U.S. debt is translated into Canadian currency at the exchange rate prevailing at the balance sheet date, $1.00 U.S. = $1.26 Canadian (2008 - $1.00 U.S. = $1.03 Canadian).

NOTE 12 ACCOUNTS PAYABLE AND ACCRUED LIABILITIES

	2009	2008
	millions of dollars	
Accounts payable	330	338
Regulated liabilities		
Purchased gas variance accounts	11	1
	341	339

The Corporation passes all costs related to the purchase and transportation of natural gas onto its customers without markup. If the Corporation were not subject to rate regulation, the purchased gas variance accounts would not be maintained and the actual cost of gas would be expensed in the period incurred. If actual gas costs were expensed and sales rates were not adjusted accordingly, net income would have increased by $10 million (2008 - decreased by $8 million).

NOTE 13 NOTES PAYABLE

	2009	2008
	millions of dollars	
Canadian notes	100	-
	100	-

Notes payable at March 31, 2009 had a weighted average term to maturity of 12 days at a weighted average rate of 0.33%. The Corporation has bank credit facilities that provide for overdrafts and notes payable up to an amount of $500 million denominated in Canadian and/or U.S. currency.

NOTE 14 DEFERRED LIABILITIES AND CREDITS

	2009	2008
	millions of dollars	
Employee future benefits, excluding pensions	144	136
Mitigation liability (Note 19)	120	127
Refundable advances from customers	49	38
Non-controlling interest (Note 21)	39	24
Asset retirement obligations	37	24
Affordable Energy Fund (Note 20)	33	34
Interest income and other credits	4	4
	426	387

Asset retirement obligations have been recognized for the future decommissioning of the Corporation's two thermal generating stations, a hydraulic generating station, and for the removal and disposal of polychlorinated biphenyl contaminated fluid in HVDC converter station capacitors. The Corporation estimates the undiscounted cash flows required to settle the asset retirement obligations are approximately $76 million, $8 million of which will be incurred between March 31, 2009 and March 31, 2011 for polychlorinated biphenyl contaminated oil removal and disposal; $19 million is expected to be incurred by March 2018 as part of decommissioning the hydro electric generating station; and the balance of $49 million is expected to be incurred in 2024 as part of the decommissioning of Manitoba Hydro's two thermal generating stations. No funds are being set aside to settle the asset retirement obligations.

NOTE 15 ASSET PURCHASE OBLIGATION

Effective September 3, 2002, the Corporation acquired the net assets of Winnipeg Hydro from the City of Winnipeg. The Asset Purchase Obligation represents the net present value of payments to the City of Winnipeg of $20 million per annum in fiscal years 2009 to 2011, and $16 million per annum in fiscal year 2012 and each year thereafter in perpetuity.

NOTE 16 FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

The carrying amount and fair values of the Corporation's non-derivative financial instruments at March 31 are as follows:

	2009		2008	
Financial instruments	Carrying Value	Fair Value	Carrying Value	Fair Value
		millions of dollars		
Held-for-Trading				
Cash and cash equivalents	170	170	133	133
Loans and Receivables				
Accounts receivable and accrued revenue	434	434	464	464
Interest receivable	6	6	10	10
Available for Sale				
Sinking fund investments	666	666	718	718
Other Financial Liabilities				
Long-term debt (including current portion)	8 180	9 513	7 571	9 189
Accounts payable and accrued liabilities	341	341	339	339
Notes payable	100	100	-	-
Accrued interest	99	99	106	106
Asset purchase obligation	218	272	222	288

The estimated fair values of the Corporation's long-term debt, sinking fund investments and asset purchase obligation are based on market yields at close of business on the balance sheet date for similar instruments available in capital markets. The carrying values of all other financial assets and liabilities approximate fair value.

Financial Risks

During the normal course of business, Manitoba Hydro is exposed to a number of financial risks including credit and liquidity risks, and market risks resulting from fluctuations in foreign currency, interest rates and commodity prices. Risk management policies, processes and systems have been established to identify and analyze financial risks faced by the Corporation and its subsidiaries, to set risk tolerance limits, establish controls and to monitor risk and adherence to policies. An integrated risk management plan has been developed, and reviewed by the Audit Committee of the Board, to ensure the adequacy of the risk management framework in relation to the risks faced by the Corporation. The nature of the financial risks and Manitoba Hydro's strategy for managing these risks has not changed significantly from the prior year.

a) **Credit Risk**

Credit risk is the risk that one party to a financial instrument will cause a financial loss to the other party by failing to discharge an obligation. Manitoba Hydro is exposed to credit risk related to sinking fund investments, short-term investments, and pension fund investments. The Corporation limits its exposure to credit risk by only investing in government-guaranteed bonds, highly rated investments and well diversified investment portfolios.

The Corporation is also exposed to credit risk related to accounts receivable arising from domestic and export energy sales. Credit risk related to domestic sales is mitigated by the large and diversified electric and gas customer base. Credit risk in the export market is mitigated by establishing minimum credit rating requirements, conducting standard credit reviews of all counterparties, and setting and monitoring exposure limits for each of these counterparties. Letters of credit and netting provisions are also in place to provide further credit risk control. The maximum exposure to credit risk related to non-derivative financial assets is its carrying value.

The value of the Corporation's aged accounts receivable for domestic and export customers, and related bad debt provisions are presented in the following table:

	Domestic	Extraprovincial	2009 Total
		millions of dollars	
Under 30 days	275	29	304
30 to 60 days	37	4	41
61 to 90 days	38	-	38
Over 90 days	16	-	16
	366	33	399
Provision at end of period	(8)	-	(8)
Total accounts receivable	358	33	391

The provision for bad and doubtful accounts is reviewed annually, based on an estimate of aged domestic and export receivables that are considered uncollectible. The provision of $8 million for bad and doubtful accounts did not increase significantly from the previous year.

To mitigate credit risk related to the use of derivative instruments, the Corporation adheres to well established credit exposure limits with institutions that possess a minimum credit rating of 'A' from recognized bond rating agencies or provide a parental guarantee from an 'A' rated parent company. The Corporation's maximum exposure to credit risk related to its derivative counterparties is equal to the positive fair value of its financial derivatives.

b) Liquidity Risk

Liquidity risk refers to the risk that Manitoba Hydro will not be able to meet its financial obligations as they come due. To meet the Corporation's forecasted cash requirements, the Corporation uses cash generated from operations, a short-term borrowing program, long-term borrowings advanced from the Province of Manitoba, and sinking funds for debt retirements.

The following is an analysis of the contractual undiscounted cash flows payable under financial liabilities and derivative liabilities as at the balance sheet date:

	Carrying Value	2010	2011	2012	2013	2014	2015 and thereafter
				millions of dollars			
Non-derivative financial liabilities							
Accounts payable and accrued liabilities	341	341	-	-	-	-	-
Notes payable	100	100	-	-	-	-	-
Asset purchase obligation	218	20	20	16	16	16	16*
Long-term debt**	8 279	1 117	925	587	647	1 449	11 957
		1 578	945	603	663	1 465	11 973
Derivative financial liabilities							
Foreign exchange forward obligations	(12)	61	-	-	-	-	-

		125	-	-	-	-	-
		1 703	945	603	663	1 465	11 973

* per year in perpetuity

** including current portion and interest payments

c) **Market Risk**

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Manitoba Hydro is exposed to three types of market risk: currency risk, interest rate risk, and commodity price risks associated with the price of electricity and natural gas. Manitoba Hydro continually monitors it's exposure to these risks and may use hedges or derivative contracts to manage these risks.

i. Foreign Exchange Risk

Manitoba Hydro has exposure to U.S. dollar foreign exchange rate fluctuations primarily through the sale and purchase of electricity in the U.S. This exposure is managed through a long-term natural hedge between U.S. dollar cash inflows from export revenues and U.S. dollar cash outflows for long-term coupon and principal payments.

To mitigate annual net income impacts due to foreign exchange rate fluctuations, a long-term cash flow hedge has been established between the U.S. long-term debt balances and future U.S. export revenues. Accordingly, translation gains and losses for U.S. long-term debt obligations in effective hedging relationships with future export revenues, are recognized in other comprehensive income until future hedged U.S. export revenues are realized, at which time the associated gains or losses in accumulated other comprehensive income are recognized in net income. For the year ended March 31, 2009, foreign exchange translation losses of $446 million were recognized in other comprehensive income and net gains of $11 million were reclassified from other comprehensive income into net income.

Manitoba Hydro also has a fair value hedging relationship between U.S. long-term debt balances and U.S. sinking fund investments. Offsetting foreign exchange translation gains and losses on these items are recognized in net income.

As a means to bridge temporary timing differences between inflows and outflows of U.S. dollar requirements, the Corporation utilizes derivative foreign exchange forward contracts as hedging instruments in a cash flow hedge. As at March 31, 2009, Manitoba Hydro has outstanding foreign exchange contract purchases of $58 million U.S. (2008 - $107 million U.S.) at a weighted average exchange rate of $1.06 (2008 - $0.98). As of March 31, 2009 outstanding forward exchange contracts had a weighted average term of 43 days (2008 - 73 days). For the year ended March 31, 2009 foreign exchange gains of $7 million were recorded in other comprehensive income and gains of $5 million were recognized in net income. The fair value of these contracts as at March 31 is as follows:

	2009	2008
	millions of dollars	
Foreign exchange forward contracts	12	5

Foreign exchange forward contracts are valued monthly at market prices.

In addition to natural hedging relationships and forward U.S. exchange contracts, cross currency swap arrangements transacted by the Province of Manitoba on the Corporation's behalf are utilized to manage exchange rate exposures and as a means to capitalize favourable financing terms in either U.S. or Canadian capital markets. Cross currency agreements represent an exchange of principal and/or interest flows denominated in one currency for principal and/or interest flows denominated in another. Such transactions effectively amend the terms of the original debt obligation with the Province of Manitoba with the swapped debt arrangement.

As of March 31, 2009, a change in the Canadian dollar of plus (minus) $0.10 relative to the U.S. dollar, would decrease (increase) net income by $2 million, while other comprehensive income would increase (decrease) by $184 million.

ii. Interest Rate Risk

Interest rate risk is the risk that the future cash flows of a financial instrument will fluctuate due to changes in market interest rates. Manitoba Hydro is exposed to interest rate risk associated with notes payable net of temporary investments and floating rate long-term debt. At March 31, 2009, an increase or decrease of 1% in the interest rate would reduce or increase net income, respectively, by $15 million, with no impact to other comprehensive income.

Interest rate swap agreements transacted by the Province of Manitoba on the Corporation's behalf are utilized to manage the fixed and floating interest rate mix of the total debt portfolio, interest rate exposure, and related overall cost of borrowing. Interest rate swap agreements represent an agreement between two parties to periodically exchange payments of interest without the exchange of the principal amount upon which payments are based. The Province of Manitoba may also enter into forward start interest rate swap arrangements where the agreement to exchange interest payments commences at some future date. In either swap arrangement, the terms of the debt advanced by the Province of Manitoba to the Corporation are amended by the swap.

iii. Commodity Price Risk

The Corporation is exposed to natural gas price risk through its purchase of gas for delivery to customers throughout Manitoba. The Corporation mitigates natural gas price volatility through its use of derivative instruments restricted to price swaps, call options and cashless collars. Manitoba Hydro does not use derivative contracts for trading or speculative purposes.

The Corporation has entered into cashless collar contracts until January 2010 to purchase 24 390 000 gigajoules (GJ) of natural gas at a weighted average upper strike price of $9.31/ GJ and a weighted average lower strike price of $7.32/ GJ. The weighted average forward price of the cashless collars per the Alberta Energy Company Exchange (AECO) at March 31, 2009 is $4.69/ GJ. Settlement values are recorded in the purchased gas variance account in the month the natural gas is delivered.

The Corporation has also entered into natural gas price swaps until April 2014 to purchase 96 540 gigajoules of natural gas at a weighted average fixed price of $7.44/ GJ. The weighted average forward price of the swaps per AECO at March 31, 2009 was $6.64/ GJ. These contracts are reported as derivatives and carried at fair value on the balance sheet. At March 31, 2009 the fair value was immaterial.

The unrealized fair value of these natural gas derivative contracts as at March 31 is as follows:

	2009	2008
	millions of dollars	
Cashless collar contract gains (losses)	(64)	22

Fair value is calculated by using the monthly forward AECO price as reported by the Natural Gas Exchange (NGX) as at March 31, 2009.

A change in fair value of cashless collars due to a 10% increase or decrease in the price of natural gas would decrease or increase the purchase gas variance account by $11 million.

NOTE 17 CAPITAL MANAGEMENT

Manitoba Hydro manages its capital structure to ensure sufficient equity to enable the Corporation to absorb the financial effects of adverse circumstances and to ensure continued access to stable low-cost funding for the Corporation's capital projects and its ongoing operational requirements.

The Corporation monitors its capital structure on the basis of its equity ratio. Manitoba Hydro's current target is to maintain a minimum equity ratio of 25%.

The Corporation's equity ratio as at March 31 was as follows:

	2009	2008
	millions of dollars	
Long-term debt, net of sinking funds	6 995	6 500
Current portion, long-term debt	519	353
Notes payable	100	-
Less: Cash & cash equivalents	(170)	(133)
Net debt	7 444	6 720
Retained earnings	2 120	1 822
Contributions in aid of construction	296	300
Total equity	2 416	2 122
Equity ratio	25%	24%

Manitoba Hydro issues debt for its capital requirements under the authority of the Manitoba Hydro Act and the Loan Act. The Manitoba Hydro Act grants the Corporation the power to issue up to $500 million of short-term promissory notes. Manitoba Hydro submits annual requests under the Loan Act for the necessary borrowing authority for new capital requirements and the refinancing of any maturing long-term debt. The majority of Manitoba Hydro's long-term debt is obtained through advances by the Province of Manitoba.

NOTE 18 COMMITMENTS AND CONTINGENCIES

Manitoba Hydro has energy purchase commitments of $648 million (2008 - $1 105 million) that relate to future purchases of wind, natural gas (including transportation and storage contracts), coal, and electricity. Commitments are primarily for wind, which expire in 2027 and natural gas purchases, which expire in 2013. In addition, other outstanding commitments, principally for construction, are approximately $893 million (2008 - $413 million).

The Corporation will incur future costs associated with the assessment and remediation of contaminated lands and facilities, and for the phase-out and destruction of polychlorinated biphenyl contaminated mineral oil from electrical equipment. Although these costs cannot be reasonably determined at this time (except for items already recognized as Asset Retirement Obligations), a contingent liability exists.

Due to the size, complexity, and nature of Manitoba Hydro's operations, various legal and operational matters are pending. It is not possible at this time to predict with any certainty the outcome of these matters. Management believes that any settlements related to these matters will not have a material effect on Manitoba Hydro's consolidated financial position or results of operations.

Manitoba Hydro has provided guarantees to counterparties at March 31, 2009 totalling $331 million. These guarantees have no specific maturity dates. Letters of credit in the amount of $2 million have been issued for energy related transactions with maturities between 2009 and 2012.

NOTE 19 MITIGATION

The Corporation is party to an agreement dated December 16, 1977, with Canada, the Province of Manitoba and the Northern Flood Committee Inc., representing the five First Nations in the communities of Cross Lake, Nelson House, Norway House, Split Lake and York Landing. This agreement, in part, provides for compensation and remedial measures necessary to ameliorate the impacts of the Churchill River Diversion and Lake Winnipeg Regulation projects. Comprehensive settlements have been reached with all communities except Cross Lake.

Expenditures incurred or settlements reached to mitigate the impacts of all projects amounted to $22 million during the period (2008 - $37 million). In recognition of future anticipated mitigation payments, the Corporation has recorded a liability of $120 million (2008 - $127 million).

The Corporation has also entered into agreements with the Province of Manitoba whereby the Corporation has assumed obligations of the Province of Manitoba with respect to certain northern development projects. The Corporation has assumed obligations totalling $144 million for which water power rental charges were fixed until March 31, 2001. The obligations outstanding at March 31, 2009 amounted to $11 million (2008 - $11 million).

To March 31, 2009, $675 million (2008 - $653 million) has been recorded to mitigate and compensate for all project-related impacts. These expenditures are included in the costs of the related projects and amortized over the respective remaining lives. There are other mitigation issues, the outcomes of which are not determinable at this time. However, in total, such other mitigation issues are not considered to be significant.

NOTE 20 AFFORDABLE ENERGY FUND

In accordance with the provisions of the Winter Heating Cost Control Act (the Act), Manitoba Hydro established an Affordable Energy Fund (the Fund) in the initial amount of $35 million for the purpose of providing support for programs and services that:

(a) encourage energy efficiency and conservation;
(b) encourage the use of alternative energy sources, including earth energy; and
(c) facilitate research and development of alternative energy services and innovative energy technologies.

For accounting purposes, the Fund was established as a deferred charge (Note 10) with an offsetting deferred credit (Note 14). Expenditures of $1 million (2008 - $1 million) during the year were charged to operations with the deferred accounts reduced accordingly.

NOTE 21 ADVANCES TO TASKINIGAHP POWER CORPORATION

Taskinigahp Power Corporation (TPC) has a non-controlling interest in the Wuskwatim Generating Station which is currently under construction and projected to be placed in-service in 2011.

TPC is owned beneficially by Nisichawayasihk Cree Nation (NCN). Both Manitoba Hydro and NCN are parties to the Wuskwatim Power Limited Partnership (WPLP) which was formed to carry on the business of developing, owning and operating the generating station.

In accordance with the partnership agreements, Manitoba Hydro provides debt financing to TPC. At March 31, 2009 Manitoba Hydro has provided advances to TPC of $32 million (2008 - $23 million). The advances are repayable by TPC, with interest, subsequent to the in-service date of the Wuskwatim Generating Station. TPC's non-controlling interest is $39 million (2008 - $24 million).

NOTE 22 SEGMENTED INFORMATION

The Corporation operates primarily in two business segments: electricity and natural gas. Each segment has its own particular economic characteristics and differs in nature, production processes, and technology. The electricity segment encompasses the generation, transmission, and distribution of electricity. The gas segment represents natural gas supply and distribution activities through the operations of Centra Gas. The Corporate segment represents the costs to acquire Centra Gas and to integrate its operations into those of Manitoba Hydro. These costs are allocated to gas and electricity segments in accordance with the synergies and benefits derived by each of these segments as a result of the acquisition.

The following table contains information related to the operating results, assets, liabilities, contributions in aid of construction, and retained earnings by segment:

	Electricity		Gas		Corporate		Total	
	2009	2008	2009	2008	2009	2008	2009	2008

NOTE 23 COMPARATIVE FIGURES

Where appropriate, comparative figures for 2008 have been reclassified in order to conform to the presentation adopted in 2009.

AUDITORS' REPORT

To the Board of Commissioners of
The Liquor Control Commission

We have audited the balance sheet of **The Liquor Control Commission** [an Agency of the Government of the Province of Manitoba] as at March 31, 2009 and the statements of income and cash flows for the year then ended. These financial statements are the responsibility of The Liquor Control Commission's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of The Liquor Control Commission as at March 31, 2009 and the results of its operations and its cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

The Liquor Control Commission

NOTES TO FINANCIAL STATEMENTS

[in thousands of dollars]

March 31, 2009

1. NATURE OF ORGANIZATION

The Liquor Control Commission [the "MLCC"] was formed in 1923 as an agency of the Government of Manitoba under *The Liquor Control Act*. The MLCC's mandate is to purchase, sell and regulate alcoholic beverages; to determine locations for retail liquor outlets; to licence and regulate facilities used by the consuming public; to provide revenue to the Province of Manitoba from the activities of the MLCC; and to do all such things necessary to effect the provisions of *The Liquor Control Act*.

2. SIGNIFICANT ACCOUNTING POLICIES

[a] Cash and cash equivalents include cash on hand, balances with banks and outstanding electronic fund transactions forwarded to banks.

[b] Cash and cash equivalents [restricted] consist of cash balances held in a trust account which has been advanced by the Province of Manitoba to fund employee pension and retiring allowances benefits.

[c] Accounts receivable include electronic fund transactions to be forwarded to banks after March 31.

[d] Inventories of goods for resale are valued at the lower of average cost and net realizable value.

[e] Revenue is recognized at the time the product is shipped, title passes, the sales price is fixed and determinable, and collectibility is reasonably assured.

[f] Property and equipment are recorded at cost less accumulated depreciation. Depreciation is provided on the declining balance basis at the following annual rates:

Automobiles	30%
Equipment and furnishings	20%
Paving	8%
Systems development	30%

Leasehold improvements are depreciated on a straight-line basis over the remaining term of the lease or a minimum of five years.

Buildings are depreciated on a straight-line basis over 40 years.

Equipment under capital lease is depreciated on a straight-line basis over the term of the lease.

[g] Substantially all of the employees of the MLCC are eligible for pension benefits based on length of service and average annualized earnings calculated on the best five years prior to retirement, termination, or death that provides the highest earnings. Pension costs, included in salaries, benefits and pension costs, consist of the employer's share of pension benefits paid to retired employees, as well as the increase in unfunded pension liabilities during the fiscal year. This liability is determined actuarially every three years with the balances for the intervening years being determined by formula provided by the actuary as detailed in note 10. Actuarial gains and losses are recognized in income immediately as detailed in note 10.

[h] In preparing the MLCC's financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and reported amounts of revenue and expenses during the period. Actual results could differ from these estimates.

[i] The MLCC's financial assets and financial liabilities are measured as follows:

Cash and cash equivalents are classified as held for trading and measured at fair value. The gains or losses arising on the revaluation to fair value at the end of the period are included in net income.

Accounts receivable are classified as loans and receivables and recorded at cost, which upon initial recognition is equal to their fair value. Subsequent measurements are recorded at amortized cost using the effective interest method.

Accounts payable, obligation under capital lease, net profit payable to the Province of Manitoba, and other taxes payable are classified as other financial liabilities and are initially measured at their fair value. Subsequent measurements are recorded at amortized cost using the effective interest rate method.

It is management's opinion that the MLCC is not exposed to significant interest rate, currency, liquidity, or credit risks arising from these financial instruments. The fair values of the MLCC's financial instruments approximate their carrying value unless otherwise stated due to the short period between initial recognition and subsequent settlement.

NOTES TO FINANCIAL STATEMENTS

[in thousands of dollars]

March 31, 2009

3. CHANGES IN ACCOUNTING POLICIES

Effective April 1, 2008, the MLCC prospectively adopted the Canadian Institute of Chartered Accountants ["CICA"] Section 1535, "Capital Disclosures", Section 3862, "Financial Instruments – Disclosures", Section 3863, "Financial Instruments – Presentation", and Section 3031, "Inventories".

The adoption of Section 1535 resulted in additional disclosure requirements in presenting management's policies and processes, both qualitatively and quantitatively, for defining and managing its capital. These disclosures are included in note 5.

Section 3862 and Section 3863 enhance the existing disclosures for financial instruments. In particular, Section 3862 focuses on the identification of risk exposures and the MLCC's approach to management of these risks, as further discussed in note 4.

Section 3031 replaces the previous inventories standard and provides guidance on the determination of cost, including any write-down to net realizable value. The adoption of this section did not impact the MLCC's financial statements.

Effective April 1, 2008, the MLCC prospectively adopted the amended CICA Section 1400, "General Standards of Financial Statement Presentation". This section requires that management assess the entity's ability to continue as a going concern and to disclose material uncertainties related to the going concern basis of presentation. The application of this section did not impact the MLCC's financial statements.

4. FINANCIAL INSTRUMENTS

Interest on restricted cash of $1,013 is restricted for payment of future pension liabilities and retirement allowances and is recorded as a recovery of pension costs in general and administrative expenses. Interest on obligation under capital lease is included in general and administrative expenses.

Credit risk

Accounts receivable are all current at year end and were fully collected subsequent to year end. Therefore no allowance for uncollectible accounts was accrued by management. Accounts receivable are written-off when management determines that they cannot be collected or they have been outstanding for greater than 120 days.

NOTES TO FINANCIAL STATEMENTS

[in thousands of dollars]

March 31, 2009

Liquidity risk

Liquidity risk is mitigated by collection terms on accounts receivable being set at less than or equal to the payment terms of accounts payable. All accounts payable are due within 30 days of year end. See note 12 for details of other contractual obligations and their maturities.

Foreign currency risk

The MLCC is exposed to currency risk through inventory purchase transactions that require settlement in foreign currencies. Exposure to fluctuations in exchange rates is mitigated by the policy of adjusting purchase or selling prices to maintain the profit margin approved by the Board of Commissioners.

5. CAPITAL DISCLOSURES

In managing capital, the MLCC focuses on cash and cash equivalents available for operations. The MLCC's objectives are to have sufficient liquid resources available for operations, to provide flexibility to take advantage of opportunities that will advance its purposes and to meet its obligation to transfer its net income to the Province of Manitoba annually. The need for liquid resources is considered in the preparation of an annual budget and in the monitoring of cash flows and actual operating results compared to budget. As at March 31, 2009, the MLCC has met its objective of having sufficient liquid resources to meet its current obligations.

6. INVENTORY

Inventory consists of the following:

	2009 $	2008 $
Warehouse	23,743	23,377
Stores	12,036	10,675
	35,779	34,052

The amount of unpaid and unrecorded Customs and Excise duties on owned merchandise held in bond is approximately $3,550 at March 31, 2009 [2008 - $3,858].

10. PROVISION FOR EMPLOYEE PENSION BENEFITS

The MLCC maintains a defined benefit pension plan in accordance with the provision of *The Civil Service Superannuation Act* administered by the Civil Service Superannuation Board. An actuarial valuation of the provision for employee pension benefits was conducted by Ellement & Ellement Ltd. Consulting Actuaries as at December 31, 2007. The service to date projected benefit method was used and the liabilities have been extrapolated to March 31, 2009 using a formula provided by the actuary.

	2009 $	2008 $
Accrued benefit liability, beginning of year	51,124	48,844
Gain based on 2007 actuarial report	(1,956)	—
Benefits accrued	1,572	1,506
Interest accrued on benefits	3,453	3,416
Benefits paid	(2,658)	(2,423)
Manitoba Finance matching pension contributions	(322)	(219)
Accrued benefit liability, end of year	51,213	51,124
Pension expense	5,025	4,922
Employee contributions	1,509	1,393
Employer contributions	2,980	2,642

The pension expense consists of benefits accrued of $1,572 [2008 - $1,506] and interest accrued on benefits of $3,453 [2008 - $3,416].

The key actuarial assumptions used in determining the MLCC's provision for employee pension benefits were at the following weighted average rates:

	2009 %	2008 %
Expected long-term rate of return	6.50	6.50
Inflation	2.50	2.50
Rate of future compensation increases	4.25	4.25

In addition, post retirement indexing is at 1.67%.

The amount of the long-term provision for employee pension benefits of $40,731 as at March 31, 2003, has been funded by the cash advanced by the Province of Manitoba. The funds are held in a trust account and are recorded as restricted cash *[note 2[b]]*.

NOTES TO FINANCIAL STATEMENTS

[in thousands of dollars]

March 31, 2009

11. PROVISION FOR RETIREMENT ALLOWANCES

Effective April 1, 1998, the MLCC commenced recording accumulated retirement allowances for its employees. Eligible employees are entitled to receive a retirement allowance equal to one week's pay, to a maximum of 25 weeks, for each year of continuous employment based on the current salary at date of retirement. The provision recorded is calculated based on a formula provided by the Province of Manitoba.

The amount of the opening provision for retirement allowances as at April 1, 1998 of $3,165 has been funded by the cash advanced by the Province of Manitoba. The funds are held in a trust account and are recorded as restricted cash *[note 2[b]]*.

12. COMMITMENTS

[a] The MLCC leases 44 buildings. Leases have expiry dates ranging from 2009 to 2028.

The future minimum annual lease payments for each of the next five years and thereafter are as follows:

Year ending March 31

	$
2010	4,322
2011	3,757
2012	3,402
2013	3,247
2014	3,088
Thereafter	17,483
	35,299

[b] The MLCC leases computer equipment. Leases on this computer equipment have expiry dates ranging from 2009 to 2011.

The future minimum lease payments for each of the next two years to the expiry of the lease contracts are as follows:

Year ending March 31	$
2010	597
2011	294
	891

[c] The MLCC entered into a contract for software, hardware and implementation services associated with the installation of a new point of sale system. The balance of the contractual obligation to be paid in 2010 is $1,545.

13. COMPARATIVE FIGURES

The comparative financial statements have been reclassified from statements previously presented to conform to the presentation of the current year's financial statements.

MANAGEMENT REPORT

The accompanying consolidated financial statements are the responsibility of management and have been prepared in accordance with the accounting policies stated in the consolidated financial statements. These accounting policies have been applied on a basis consistent with the prior year. In management's opinion, the consolidated financial statements have been properly prepared within reasonable limits of materiality, incorporating management's best judgment regarding all necessary estimates and all other data available. The financial information presented elsewhere in the Annual Report is consistent with that in the consolidated financial statements.

Management is responsible for establishing and maintaining disclosure controls and procedures and internal controls over financial reporting for the Corporation. Management designed such internal controls, or caused them to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with Canadian generally accepted accounting principles.

Management maintains internal controls to provide reasonable assurance of the reliability and accuracy of the financial information and that the assets of the Corporation are properly safeguarded. As part of the financial statement audit performed by Ernst & Young LLP, they reviewed the Corporation's internal controls to the extent that they considered necessary and reported their findings to management and the Board of Directors.

The responsibility of Ernst & Young LLP is to express an independent opinion on whether the consolidated financial statements are fairly stated in accordance with Canadian generally accepted accounting principles. The Auditor's Report outlines the scope of the audit examination and provides the audit opinion.

The Audit Committee of the Board meets with management and Ernst & Young LLP to satisfy itself that each group has properly discharged its respective responsibilities and to review the consolidated financial statements before approving them. The Board has reviewed and approved the consolidated financial statements for the fiscal year ended March 31, 2009.

AUDITORS' REPORT

To the Board of Directors of
MANITOBA LOTTERIES CORPORATION

We have audited the consolidated balance sheet of **Manitoba Lotteries Corporation** as at March 31, 2009 and the consolidated statements of net income, comprehensive income and retained earnings and cash flows for the year then ended. These financial statements are the responsibility of the Corporation's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these consolidated financial statements present fairly, in all material respects, the financial position of the Corporation as at March 31, 2009 and the results of its operations and its cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

Notes to Consolidated Financial Statements

FOR THE YEAR ENDED MARCH 31, 2009 (IN THOUSANDS)

1. BACKGROUND

The Manitoba Lotteries Foundation was established by **The Manitoba Lotteries Foundation Act**. On July 27, 1993, the Act was amended and continued under **The Manitoba Lotteries Corporation Act**. By consent of the Legislative Assembly of Manitoba, the organization continues its operations as a Crown corporation under the name of the Manitoba Lotteries Corporation (MLC) or the "Corporation".

2. SIGNIFICANT ACCOUNTING POLICIES

(a) Basis of consolidation

These consolidated financial statements have been prepared in accordance with Canadian generally accepted accounting principles and combine the accounts of MLC and MLC Holdings Inc. This controlled entity was established to purchase capital assets, which are leased to MLC at cost. All intercompany transactions and accounts have been eliminated on consolidation.

(b) Western Canada Lottery Corporation

The Western Canada Lottery Corporation (WCLC) was incorporated without share capital under Part II of **the Canada Corporations Act** on May 13, 1974. The Provincial Governments of Manitoba, Saskatchewan and Alberta are members in the Corporation, and the Yukon Territory, the Northwest Territories and Nunavut participate with the provinces as associate members in the sale of gaming products. Each province and territory has appointed a lottery organization to assist the WCLC with the distribution of gaming products in its jurisdiction (MLC for the Province of Manitoba). The proportionate share of WCLC's sales and cost of sales is included in the consolidated financial statements based on relative sales levels by jurisdiction.

(c) Revenue and expenses recognition

Revenue and expenses are recorded on an accrual basis except for lottery revenue. Lottery revenue is recorded as of the date of the draw with the exception of instant game revenue which is recorded at the time the ticket is activated by the retailer via the on-line accounting system for sale to customers. Video lottery and other gaming revenue is recorded net of prizes paid. Administration fees related to First Nations are recorded in income as earned.

(d) Property, equipment and amortization

Major capital expenditures with a future useful life beyond the current year are capitalized at cost and amortized on a straight-line basis according to their estimated useful lives. A half-year amortization is taken in the year of acquisition on assets under $1 million. For assets over $1 million amortization is taken at date of implementation.

Furniture and equipment	4-5 years
Gaming equipment	5 years
Casino stages	10 years
Buildings and parking lots	30 years
Leasehold improvements	Over term of lease
Capital lease – building	25 years
Assets related to First Nations Casinos	5-7 years
Other assets – (see note 7)	26 years

Capital assets related to First Nations Casinos under the Conduct and Management Agreement consist primarily of the cost of the gaming equipment and related hardware and software.

(e) Goods and Services Tax

In lieu of Goods and Services Tax (GST) on lottery and gaming revenue, the Corporation foregoes claiming input tax credits and pays an additional 5% GST on gaming expenditures, including retailer commissions. This additional 5% is reported as GST expense.

An input tax credit is claimed for GST paid on non-gaming expenditures.

(f) Inventories

Inventories are valued at the lower of cost and replacement value for replacement parts and the lower of cost and net realizable value for all other inventory.

(g) Pension plans

In accordance with the provisions of **the Civil Service Superannuation Act** (Act), employees of the Corporation are eligible for pension benefits. Plan members are required to contribute to the Civil Service Superannuation Fund (Fund) at prescribed rates for defined benefits and will receive benefits based on the length of service and on the average of annualized earnings calculated on the best five years prior to retirement, termination or death that provides the highest earnings. The Corporation is required to match contributions contributed to the Fund by the employees at prescribed rates, which is recorded as an operating expense. Under this Act, the Corporation has no further pension liability.

For employees whose annual earnings exceed the limit under the Civil Service Superannuation Fund, a pension liability is established. This liability is determined actuarially every three years with the balances for the intervening years being determined by a formula provided by the actuary. Actuarial gains and losses are recognized in income immediately.

The Corporation also makes contributions for employees and officers to a money purchase pension plan at prescribed rates.

(h) Foreign currency translation

Monetary assets and liabilities are translated at the year-end exchange rate while non-monetary assets and liabilities and revenue and expenses are translated at the exchange rate prevailing on the transaction date. All exchange gains and losses are reflected in income during the period they occur.

(i) Use of estimates

The preparation of financial statements in accordance with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the consolidated financial statements, and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

(j) Promotional allowances

The retail value of food, beverages and other items provided on a complimentary basis to customers has been included in gross revenue and a corresponding amount has been deducted as promotional allowances. Costs of providing these promotional allowances have been included in operating expenses.

(k) Loyalty points program

The Corporation operates a program whereby patrons can earn points based upon their level of play on certain casino games. Points can be redeemed for certain goods and services provided by the casinos. The retail value of these complimentary items is included in gross revenue and then deducted as a promotional allowance to arrive at net revenue.

The future redemption liability is included in accounts payable and accrued liabilities and is based on an assessment of anticipated point redemptions and point value. The Corporation will adjust the estimated liability based on redemption experience and additional points earned and any adjustments will be recorded in the results of operations.

(l) Financial instruments

In accordance with Section 3855 Financial Instruments – Recognition and Measurement, the Corporation has classified all financial instruments into one of the following five categories: held for trading, held to maturity investments, available for sale financial assets, loans and receivables and other financial liabilities. All financial instruments are included on the consolidated balance sheet and are measured at fair value with the exception of loans and receivables, held to maturity investments and other financial liabilities, which are measured at amortized cost. Subsequent measurement and recognition of changes in fair value of financial instruments depend on their initial classification. Held for trading financial instruments are measured at fair value and all gains and losses are included in income in the period in which they arise. Available for sale financial instruments are measured at fair value with revaluation gains and losses included in other comprehensive income until the asset or liability is removed from the consolidated balance sheet.

(m) Changes in accounting policies

On April 1, 2008 the Corporation adopted the following Canadian Institute of Chartered Accountants (CICA) Handbook Sections:

Section 3031 Inventories replaces the previous inventories standard and provides guidance on the determination of cost, including any write-down to net realizable value. The adoption of this standard has had no impact on the Corporation's consolidated financial statements.

Section 3862 Financial Instruments – Disclosures and Section 3863 Financial Instruments – Presentation replace Section 3861 Financial Instruments – Disclosure and Presentation. The new standards enhance and expand disclosure standards to complement the accounting policy adopted in accordance with Section 3855 Financial Instruments – Recognition and Measurement and place increased emphasis on disclosures about risks associated with both recognized and unrecognized financial instruments and how these risks are managed. The Corporation discloses information surrounding the risks associated with financial instruments in note 16.

Section 1535 Capital Disclosures establishes standards for disclosing information about an entity's capital and how it is managed. This standard requires disclosure of information about an entity's objectives, policies and processes for managing capital. The Corporation discloses information surrounding its capital structure in note 11.

Section 1400 General Standards of Financial Statement Presentation was amended to include requirements to assess an entity's ability to continue as a going concern and to disclose material uncertainties related to events and conditions that may cast significant doubt on the entity's ability to continue as a going concern. The adoption of this standard has had no impact on the Corporation's consolidated financial statements.

(n) Recent accounting pronouncements

Section 1601 Consolidated Financial Statements and Section 1602 Non-Controlling Interests establish standards for the accounting and reporting of ownership interests in subsidiaries held by parties other than the parent and are effective for fiscal years beginning on or after January 1, 2011. The Corporation does not expect these sections to have an impact on the consolidated financial statements.

3. ACCOUNTS RECEIVABLE

	$ 416,288	$ 243,022	$ 173,266

7. OTHER ASSETS

The Corporation has entered into an agreement for the right to use 22.28 acres of land for 200 years. The land is being used for parking facilities at the McPhillips Station Casino. The facilities became available for use during the 2004 fiscal year, at which time the Corporation began amortizing the asset over the life of the adjacent casino. The asset is presented net of accumulated amortization of $1,341 (2008 - $1,095) [see note 2(d)].

8. ACCOUNTS PAYABLE AND ACCRUED LIABILITIES

	2009	2008
Trade	$ 21,213	$ 31,795

9. LONG-TERM DEBT

	2009	2008
Province of Manitoba, bearing interest at 6.95%, interest only payable semi-annually, with all principal due at maturity on August 30, 2010.	$ 135,000	$ 135,000
Province of Manitoba, bearing interest at 5.25%, repayable in quarterly principal installments of $1,071 plus interest until June 30, 2011.	9,643	13,929
Province of Manitoba, bearing interest at 4.625%, repayable in quarterly principal installments of $1,071 plus interest until September 30, 2011.	10,714	15,000
Province of Manitoba, bearing interest at the prevailing Bankers Acceptance rate plus ¼ of 1%, repayable in quarterly principal payments of $679 plus interest, until May 10, 2012. The interest rate on the debt at March 31, 2009 was 0.893%.	8,822	11,536
Province of Manitoba, bearing interest at 4.875%, repayable in monthly principal installments of $43 plus interest until March 31, 2009.	-	514
Province of Manitoba, bearing interest at 4.050%, repayable in monthly principal installments of $84 plus interest until August 31, 2012.	3,455	4,467
Province of Manitoba, bearing interest at 4.150%, repayable in monthly principal installments of $96 plus interest until July 31, 2013.	4,974	-
Capital lease obligation to the Province of Manitoba, with a 7.63% implicit interest rate and annual minimum lease payments of $64 until July 13, 2017.	368	402
	172,976	180,848
Less current portion of long-term debt and capital lease obligation	13,482	12,846
	$ 159,494	$ 168,002

Annual payments in future years are as follows:

	Loans	CAPITAL LEASE Principal	Interest
2010	$ 13,445	$ 37	$ 27
2011	148,445	40	24
2012	8,088	43	21
2013	2,247	46	18
2014	383	50	14
Subsequent years	-	152	20
	$ 172,608	$ 368	$ 124

The fair market value of long-term debt at March 31, 2009 is $184,152.

10. PROVISION FOR EMPLOYEE PENSION BENEFITS

The pension expense related to the Corporation's contributions to the Civil Service Superannuation Fund is $3,103 (2008 - $2,707) and is recorded in operating expenditures.

A pension liability of $543 (2008 - $379) has been established for employees whose annual earnings exceed the limit under the Civil Service Superannuation Fund plan. A loss of $126 was experienced in the current year based on the most recently available triennial actuarial report of pension obligations as at December 31, 2007, and is included in the above pension expense.

The pension expense related to the Corporation's contributions to the money purchase plan is $228 (2008 - $252) and is recorded in operating expenditures.

11. CAPITAL STRUCTURE

The Corporation's capital is comprised of retained earnings and long-term debt. The Corporation's objectives when managing its capital structure are to continue its ability to meet its financial obligations and to finance growth and capital expenditures. These objectives have remained unchanged over the fiscal years presented.

The Corporation is subject to capital growth restrictions as the result of the requirement to allocate 100% of annual consolidated net income to the Province of Manitoba.

12. SEGMENTED INFORMATION

The Corporation's management has designated the areas of Video Lotto, Casinos and Lottery as its operating segments. All indirect costs have been allocated to the operating segments. A summary of these operating segments is as follows:

2009	Video Lotto	Casinos	Lottery	Total
REVENUE				
Revenue	$ 354,235	$ 210,798	$ 210,587	$ 775,620

13. ALLOCATIONS AND PAYMENTS

(a) Provinces of Alberta and Saskatchewan

The Province of Manitoba is a member in the Western Canada Lottery Corporation. An agreement is in place with the other members to provide economic benefit equalization. The cost to the Corporation for this allocation for the 2009 fiscal year is $3,024 (2008 - $2,948).

(b) Payment to Government of Canada

Effective January 1, 1980 the Government of Canada terminated its involvement in lotteries. In return, the ten provinces are to contribute an annual sum of $24,000, adjusted for inflation, to the Federal Government. The Province of Manitoba's share for the 2009 fiscal year is $2,345 (2008 - $2,327).

(c) Gaming Commission Fees & Crown Levy

The Corporation provides funding to the Manitoba Gaming Control Commission (MGCC) through payment of annual registration fees for electronic gaming machines and employees. The Corporation also provides funding to the Crown Corporations Council through the payment of an annual levy. Funding provided to MGCC and Crown Corporations Council in the 2009 fiscal year is $3,094 (2008 - $2,209).

(d) Responsible Gaming Funding

Funding to the Addictions Foundation of Manitoba (AFM) and other organizations for their responsible gaming research and programming for the 2009 fiscal year is $3,387 (2008 - $2,894).

(e) Charitable and Community Organizations

The Corporation provides over four hundred charitable and community organizations the opportunity to raise funds for their organizations by assisting the Corporation in the bingo events held at its casinos and providing funding to various community groups throughout Manitoba. Payments made to these organizations for the 2009 fiscal year amounted to $4,131 (2008 - $5,736).

14. FIRST NATIONS CASINOS

The Government of Manitoba has overall control over gaming in Manitoba in accordance with the requirements of the Criminal Code of Canada, and has appointed MLC to act as its agent in the Conduct and Management of the gaming regime. Through a selection process, the Government has provided certain First Nations the opportunity to operate casinos, with MLC maintaining the Conduct and Management authority over these casinos. Effective December 1, 2005, the Corporation received approval from its Board of Directors to discontinue the recovery of general administrative and compliance costs from First Nations Casinos and to provide these services only upon request on a fee for service basis. The Corporation will continue to recover all direct and/or gaming related expenses.

15. FUTURE COMMITMENTS AND CONTINGENCIES

(a) Lease Obligations

The future minimum rental payments relating to operating leases are as follows:

2010	$	1,402
2011		533
2012		447
2013		346
2014		301
Subsequent years		1,225
	$	4,254

(b) Incidental to the nature of its business, the Corporation is defending various legal actions and claims that are pending. While the outcome of these claims cannot be determined, management is of the opinion that the appropriate provisions have been made in the accounts, and the ultimate outcome will not have a material adverse effect on the Corporation's financial position

Subsequent to year end, the Corporation has been named as a party to a lawsuit related to Scratch 'N Win lottery tickets. The matter is in its preliminary stages and any liability related to this claim is not determinable at this time.

(c) The Corporation entered into a VLT revenue sharing agreement with the Manitoba Jockey Club Inc., in the amount of $14,750 that covered the period from January 1, 2004 to December 31, 2006. This agreement was amended in April 2005 to extend MLC's commitment by another two years to December 31, 2008 during which time the Manitoba Jockey Club Inc. received $5,000 annually plus an additional 20% commission on net VLT revenues over $5,000. The Corporation's relationship with the Manitoba Jockey Club Inc. continues and the terms of the agreement are currently under review with no fixed commitment yet established.

(d) During the year the Corporation maintains its commitment to spend 2% of its net income over five years for responsible gaming research and programming. It is anticipated that the continuation of expenditures will occur in the 2010 fiscal year.

16. FINANCIAL INSTRUMENTS

The Corporation's financial instruments consist of cash, accounts receivable, accounts payable and accrued liabilities, payable to the Province of Manitoba, and long-term debt. The Corporation is exposed to interest rate, liquidity, foreign exchange and credit risks arising from financial assets and liabilities. The Corporation's objectives in managing these risks are to protect the organization from volatility and to minimize exposure from fluctuations in market rates.

Interest rate risk

Interest rate risk is the risk to the Corporation's income that arises from fluctuations in interest rates and the degree of volatility of these rates. The Corporation does not use derivative instruments to reduce its exposure to interest rate risk, though risks associated with interest rate fluctuations are mitigated through the use of fixed-rate long term debt.

Liquidity risk

Liquidity risk is the risk the Corporation will encounter difficulties in meeting its financial liability obligations. The Corporation mitigates this risk through cash and long-term debt management. Trade payables are due within one year and long-term debt is repayable in either quarterly or monthly installments with the exception of one long-term debt with a principal payment of $135,000 due August 31, 2010.

Foreign exchange risk

Foreign exchange risk is the risk to the Corporation's income that arises from fluctuations in foreign exchange rates and the degree of volatility of these rates. The Corporation mitigates this risk through its contract and purchasing practices.

Credit risk

Credit risk is the risk to the Corporation that a counterparty will fail to perform its obligations or pay amounts due causing a financial loss. The Corporation mitigates this risk through its credit management and collection practices. The Corporation establishes a reasonable allowance for non-collectible amounts which is netted against accounts receivable. The maximum credit risk exposure associated with accounts receivable is the total carrying value and it is management's opinion that the Corporation does not have significant concentration risk.

The status of accounts receivable in relation to when they are due and payable is as follows:

Neither impaired nor past due	$ 15,431
Not impaired and past due as follows:	
Within 30 days	42
31 to 60 days	34
61 to 90 days	7
Over 90 days	1
Allowance for doubtful accounts	(9)
	$ 15,506

Fair value

The fair value of the Corporation's financial instruments on initial recognition is the transaction price, which is the value of the consideration given or received.

The Corporation has made the following classifications of its financial instruments:

Cash is classified as held for trading and measured at fair value.

Accounts receivable are classified as loans and receivables and recorded at cost, which upon their initial measurement is equal to their fair value. Subsequent measurements are recorded at amortized cost using the effective interest rate method.

Accounts payable and accrued liabilities, payable to the Province of Manitoba and long-term debt are classified as other financial liabilities and are initially measured at their fair value. Subsequent measurements are recorded at amortized cost using the effective interest rate method.

Unless otherwise stated, the fair value of the Corporation's financial instruments approximates their carrying value.

17. SUPPLEMENTAL CASH FLOW INFORMATION

	2009	2008
NET DECREASE (INCREASE) IN CURRENT ASSETS		
Accounts receivable	$ 1,529	$ 1,069

(see accompanying notes to the consolidated financial statements)

Responsibility for Financial Statements

The financial statements are the responsibility of management and are prepared in accordance with Canadian generally accepted accounting principles. The financial information contained elsewhere in the annual report is consistent with that in the financial statements. The financial statements necessarily include amounts that are based on management's best estimate and judgments, which have been reached based on careful assessment of data available through the corporation's information systems. In the opinion of management, the accounting practices utilized are appropriate in the circumstances and the financial statements fairly reflect the financial position and results of operations of the corporation.

In carrying out its responsibilities, management maintains appropriate systems of internal and administrative controls designed to ensure that transactions are accurately recorded on a timely basis, are properly approved and result in reliable financial statements. The adequacy and operation of the control systems are monitored on an ongoing basis by the Internal Audit Department.

The financial statements were approved by the Board of Directors, which has overall responsibility for their contents. The Board of Directors is assisted with this responsibility by its Audit Committee (the "Committee"), which consists primarily of Directors not involved in the daily operations of the corporation.

The general responsibilities of the Committee are categorized into the following: review of financial reporting, review of internal controls and processes, review of actuarial functions, monitoring of corporate integrity, compliance with authorities and review of performance reporting. The Committee's role is that of oversight in these areas in order to ensure management processes are in place and functioning so as to identify and minimize risks to the business operations.

In carrying out the above responsibilities, this Committee meets regularly with management, and with both the corporation's external and internal auditors to approve the scope and timing of their respective audits, to review their findings and to satisfy itself that their responsibilities have been properly discharged. The Committee is readily accessible to the external and internal auditors.

The Committee is responsible for the review of the actuarial function. As well, the Committee recommends, for approval, the appointment of the external actuary and his fee arrangements to the Board of Directors. The actuary is responsible for ensuring that the assumptions and methods used in the valuation of policy and claims liabilities are in accordance with accepted actuarial practice, applicable legislation and associated regulations or directives. In addition, the actuary provides an opinion regarding the valuation of policy and claims liabilities at the balance sheet date to meet all policyholder obligations of the corporation. Examination of supporting data for accuracy and completeness of assets and their ability to meet the policy and claims liabilities are important elements in forming the actuary's opinion.

KPMG LLP, the corporation's appointed external auditors, have audited the financial statements. Their Auditors' Report is included herein. Their opinion is based upon an examination conducted in accordance with Canadian generally accepted auditing standards, performing such tests and other procedures as they consider necessary in order to obtain reasonable assurance that the financial statements are free of material misstatement and present fairly the financial position of the corporation in accordance with Canadian generally accepted accounting principles.

Auditors' Report

To the Board of Directors of Manitoba Public Insurance Corporation:

We have audited the balance sheet of Manitoba Public Insurance Corporation as at February 28, 2009 and the statements of operations, retained earnings, comprehensive income (loss), accumulated other comprehensive income (loss) and cash flows for the year then ended. These financial statements are the responsibility of the corporation's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of the corporation as at February 28, 2009 and the results of its operations and its cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

Actuary's Report

To the Board of Directors of Manitoba Public Insurance Corporation:

I have valued the policy liabilities of Manitoba Public Insurance Corporation for its balance sheet at February 28, 2009 and their change in the statement of operations for the year then ended in accordance with accepted actuarial practice, including selection of appropriate assumptions and methods.

In my opinion, the amount of policy liabilities makes appropriate provision for all policyholder obligations and the financial statements fairly present the results of the valuation.

Notes To Financial Statements

February 28, 2009

1. Status of the Corporation

The Manitoba Public Insurance Corporation (the "corporation") was incorporated as a Crown corporation under *The Automobile Insurance Act* in 1970. In 1974, *The Automobile Insurance Act* was revised and became *The Manitoba Public Insurance Corporation Act* (Chapter A180 of the continuing consolidation of the Statutes of Manitoba). In 1988, the Act was re-enacted in both official languages as Chapter P215 of the Statutes of Manitoba.

Under the provisions of its Act and regulations, the corporation operates an automobile insurance division and a discontinued general insurance division. The lines of business for the automobile insurance division provide for basic universal compulsory automobile insurance, extension and special risk coverages. For financial accounting purposes, the lines of business for the automobile insurance division and the discontinued general insurance division are regarded as separate operations and their revenues and expenses are allocated on a basis described in the summary of significant accounting policies. For financial reporting purposes, due to the immateriality of the financial results of the discontinued general insurance operations (Note 15), the operations are reported as part of the Special Risk Extension line of business. The basic universal compulsory automobile insurance line of business is subject to regulation by the Public Utilities Board (PUB) of Manitoba with respect to insurance rates and service fees (Note 23).

Operations pertaining to driver safety, vehicle registration and driver licensing, including all related financial, administrative and data processing services, were transferred to the corporation, from the Province of Manitoba, effective October 4, 2004.

2. Basis of Reporting

The financial statements of the corporation are in such form as prescribed by Section 43(1) of *The Manitoba Public Insurance Corporation Act* and are presented in accordance with Canadian generally accepted accounting principles.

The external actuary is appointed by the Board of Directors of the corporation. With respect to preparation of these financial statements, the external actuary is required to carry out a valuation of the policy liabilities and to report thereon to the corporation's Board of Directors.

The external actuary also uses the work of the external auditors in his verification of the information prepared by the corporation used in the valuation of the policy liabilities.

The external auditors are appointed by the Lieutenant Governor in Council to conduct an independent and objective audit of the financial statements of the corporation in accordance with Canadian generally accepted auditing standards. In carrying out their audit, the external auditors also make use of the work of the external actuary and his report on the corporation's policy liabilities. The external auditors' report outlines the scope of their audit and their opinion.

3. Summary of Significant Accounting Policies

This summary outlines those accounting policies followed by the corporation that have a significant effect on the financial statements.

Investments

Funds available for investments are managed by the Department of Finance, on behalf of the corporation, in accordance with Section 12(1) of *The Manitoba Public Insurance Corporation Act*.

Under the provision of CICA 3855 *Financial Instruments – Recognition and Measurement*, the financial assets of Manitoba Public Insurance's investment portfolio are designated as Available for Sale (AFS), Held to Maturity (HTM), or Held for Trading (HFT).

Corporate investments that experience a decline in fair value, which is determined to have been other than temporary, are deemed to be impaired and written down to their expected recoverable amount.

The fair value of financial instruments are obtained from external pricing services and are based on bid prices for financial assets. Short-term investments comprise investments due to mature within 12 months from the date of purchase and are carried at fair value.

The corporation accounts for the purchase and sale of securities using settlement date accounting.

i) AFS Financial Assets

AFS financial assets are carried at fair value on the Balance Sheet starting on the settlement date and the changes in fair value are recorded in Other Comprehensive Income (OCI) until the asset is disposed of, or has become other than temporarily (OTT) impaired. As long as an AFS asset is held and not OTT impaired, the gains and losses are not recognized in the Statement of Operations. When the asset is disposed of, or has become OTT impaired, the gain or loss is recognized in the Statement of Operations and the amount is deducted from OCI.

The fair value of AFS bonds, including federal, provincial, certain municipal, certain hospitals, other provinces and corporations, is estimated based on bid prices of these or similar investments.

Transaction costs related to AFS financial assets are capitalized on initial recognition and, where applicable, are amortized to interest income using the effective interest method.

ii) HTM Financial Assets

HTM financial assets are carried at amortized cost on the Balance Sheet starting on the settlement date.

The fair value of HTM bonds, including schools, certain municipal and certain hospitals, is based on their carrying value, which approximates market value.

Transaction costs related to financial assets and liabilities classified as HTM are capitalized on initial recognition, when applicable.

iii) HFT Financial Assets

HFT financial assets are carried at fair value on the Balance Sheet starting on the settlement date and the changes in fair value are recorded in the Statement of Operations.

Transaction costs related to HFT financial assets are recognized in the Statement of Operations on initial recognition.

Transition Adjustment

As a result of the corporation adopting the recommendations of the CICA Handbook Section 1530, *Comprehensive Income*; Section 3855, *Financial Instruments – Recognition and Measurement*; Section 3861 – *Financial Instruments – Disclosure and Presentation*; and Section 3251, *Equity*, the following transition adjustments were recorded at March 1, 2007.

(in thousands of dollars)	February 28, 2007	Transition Adjustments	March 1, 2007
Assets			
AFS Financial Assets:			
Canadian Equities	$ 336,748	$ 40,258	$ 377,006
U.S. Equities	96,736	7,755	104,491
Bonds	1,099,255	32,262	1,131,517
		$ 80,275	
Liabilities			
Provision for Unpaid Claims	$ 1,399,748	$ 22,948	$ 1,422,696
Retained Earnings			
Basic Rate Stabilization Reserve	128,122	(22,693)	105,429
Extension Retained Earnings	46,373	(58)	46,315
SRE Retained Earnings	64,610	(197)	64,413
		(22,948)	
Accumulated Other Comprehensive Income	–	80,275	80,275
		$ 80,275	

Loans and receivables

All financial assets designated as loans and receivables are carried at amortized cost using the effective interest method. These receivables include financing plans for customers using interest rates set at the prime rate of the corporation's principal banker plus 2 per cent and updated at each fiscal quarter. The interest rate for a customer remains unchanged throughout the term of the policy.

Deferred Policy Acquisition Costs

Commissions and premium taxes are deferred and charged to expense over the term of the insurance contract to which such costs relate.

Property and Equipment

Property and equipment are stated at cost less accumulated amortization. Amortization is provided on a straight-line basis which will amortize the cost of each asset over its estimated useful life:

Computer equipment	3 years
Vehicles	5 years
Furniture and equipment	10 years
Land improvements	25 years
Buildings	40 years

Leasehold improvements are amortized over the term of the lease plus the first renewal period.

Amortization of construction in progress will begin, in accordance with the above policy, when construction has been completed.

Deferred Development Costs

The costs of developing major information systems that are expected to be of continuing benefit to the corporation are deferred to future periods. These information system expenditures are stated at cost net of accumulated amortization and are amortized on a straight-line basis over five years. Accumulated amortization of deferred development costs at February 28, 2009 is $36.2 million (2008 – $34.5 million).

Unearned Premiums

The liability for unearned premiums is the portion of premiums that relate to the unexpired term of each insurance contract.

Provision for Employee Benefits

PROVISION FOR EMPLOYEE CURRENT BENEFITS

The provision for employee current benefits includes an accrual for vacation pay determined in accordance with the Collective Agreement.

PROVISION FOR EMPLOYEE FUTURE BENEFITS

Included in the provision for employee future benefits are the pension benefit plan and other benefit plans.

i) Pension Benefit Plan

The employees of the corporation are members of a defined benefit pension plan administered under *The Civil Service Superannuation Act*. Included in the accounts is a provision for the employer's future pension liability calculated on an indexed basis. The provision for pension is actuarially determined on an annual basis using the projected benefit method prorated on services. The actuarial present value of the accrued pension benefits is measured using the corporation's best estimates based on assumptions relating to market interest rates at the measurement date based on high quality debt instruments, salary changes, withdrawals and mortality rates. Changes in experience gains and losses are recognized in the current period.

ii) Other Benefit Plans

Other benefit plans consist of post-retirement extended health and severance pay benefits.

The provision for post-retirement extended health benefits is actuarially determined on an annual basis using the projected benefit method prorated on services, which includes the corporation's best estimates based on assumptions relating to retirement ages of employees and expected health costs.

Employees of the corporation are entitled to severance pay in accordance with the Collective Agreement and corporation policy. The provision for severance pay is actuarially determined on an annual basis using the projected benefit method prorated on services, without salary projection, which includes the corporation's best estimates based on assumptions relating to the proportion of employees that will ultimately retire.

Provision for Unpaid Claims

The provision for unpaid claims represents an estimate for the full amount of all costs, including adjustment expenses, and the projected final settlements of claims incurred to the Balance Sheet date. These provisions take into account the time value of money. These estimates of future loss activity are necessarily subject to uncertainty and are selected from a wide range of possible outcomes. To recognize the uncertainty in establishing these estimates and to allow for possible deterioration in experience, actuaries include explicit margins for adverse deviation in their assumptions. These provisions are adjusted up or down as additional information affecting the estimated amounts becomes known during the course of claims settlement. All changes in estimates are recorded as incurred claims in the current period.

Salvage and Subrogation

Recoveries from salvage and subrogation are recorded as an offset to claims costs. Expected future subrogation recoveries are included in the provision for unpaid claims.

Premium Deficiencies

A premium deficiency exists when future claims and related expenses exceed unearned premiums.

Premium deficiencies are recognized first by writing down the deferred policy acquisition costs with any remainder recognized as a liability.

Allocation of Revenue, Claims Incurred and Expenses

Premiums written, premiums earned and claims incurred are allocated directly to the division writing the insurance risk.

Investment income is allocated to the automobile insurance division lines of business and the discontinued general insurance division based on a monthly averaging of the funds available within each division.

Expenses, including claims expense, are allocated to the automobile insurance division lines of business on the following basis:

i) Identifiable direct expenses are charged to each line of business.

ii) Where direct allocation is not possible, expenses are prorated to each line of business based mainly on factors such as space, number of employees and time usage. The formulas developed for the allocation of expenses are approved by the Board of Directors.

Reinsurance Ceded

Premiums, claims and expenses are reported net of amounts due to and recoverable from reinsurers. Estimates of amounts recoverable from reinsurers on unpaid claims are recorded separately from estimated amounts payable to policyholders.

The reinsurers' share of unearned premiums is recognized as an asset in a manner which is consistent with the method used in determining the unearned premium liability.

Foreign Currency

Monetary items denominated in foreign currencies are adjusted to reflect the exchange rate in effect at the year-end. Revenue and expense items in foreign currencies are translated at the exchange rate in effect at the transaction date. Unrealized gains and/or losses arising on translation are charged to operations in the current year.

The corporation uses currency swaps and forward exchange contracts to manage the currency risk on specific foreign exchange denominated assets. Any gains or losses are recorded in the Statement of Operations under the heading "Investment income," on a fair value basis.

Changes in unrealized foreign exchange currency translation amounts for AFS equity investments are recorded in the Statement of Comprehensive Income, and included in accumulated other comprehensive income until recognized in the Statement of Operations.

Basic Insurance Rate Stabilization Reserve

The Basic Insurance Rate Stabilization Reserve relates to basic universal compulsory automobile insurance and is intended to protect motorists from rate increases made necessary by unexpected events and losses arising from non-recurring events or factors.

Immobilizer Incentive Fund

The Immobilizer Incentive Fund is an appropriation from the Basic Insurance Rate Stabilization Reserve. The fund is used to provide financial resources for vehicle owners to install electronic immobilizers and cover the administrative costs of the program.

Extension Development Fund

The Extension Development Fund is an appropriation from the Competitive Lines Retained Earnings. The fund is used to defray the annual driver licensing project costs that flow through the Extension line of business Statement of Operations.

Retained Earnings

Retained earnings are comprised of the accumulation of net income or losses for the Basic, Extension and Special Risk Extension lines of business.

Comprehensive Income

Comprehensive income consists of net income after surplus distribution and other comprehensive income. Changes in unrealized gains and losses on financial assets classified as Available for Sale, and changes in unrealized foreign exchange currency translation amounts are recorded in the Statement of Comprehensive Income, and included in accumulated other comprehensive income until recognized in the Statement of Operations. Accumulated other comprehensive income is included on the Balance Sheet as a separate component.

Future Changes in Accounting Policy and Disclosure

In February 2008, the Canadian Accounting Standards Board confirmed that publicly accountable enterprises will be required to adopt International Financial Reporting Standards (IFRS) for interim and annual reporting in fiscal years beginning on or after January 1, 2011. The corporation will be adopting IFRS reporting requirements for the fiscal year beginning March 1, 2011. This requirement also extends to any comparative financial information included within the reports.

The corporation has taken the following steps in managing the transition from Canadian GAAP to IFRS:

- Engaged an external consultant to prepare an IFRS high level diagnostic which was presented to the senior management, the Board of Directors and Public Utilities Board;
- Established a project team, including a team of external consultants, to oversee the transition to and manage the implementation of IFRS;
- Commenced analysis to identify key differences between current accounting policies and IFRS requirements that may have a significant impact on the reported results; and
- Purchased software that will enable the corporation to record transactions in accordance with IFRS for comparative reporting purposes.

As this undertaking is in the early stages, the corporation is unable to determine the impact of the change to IFRS on the financial results.

Commencing with the 2009/10 fiscal year, the corporation will apply the new accounting standards contained in CICA Handbook Section 3064, *Goodwill and Intangible Assets* and updates to Section 1000, *Financial Statement Concepts*. These standards update the measurement and disclosure requirements of intangible assets. The corporation does not expect material impacts due to the new CICA standards.

Measurement Uncertainty

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates.

4. Changes in Accounting Policies

Effective March 1, 2008 the corporation adopted the recommendations of the CICA Handbook Section 1535, *Capital Disclosures* ("Section 1535"); Section 3862, *Financial Instruments – Disclosure* ("Section 3862"); and Section 3863, *Financial Instruments – Presentation* ("Section 3863").

Section 1535 requires the following disclosures: (i) qualitative information about an entity's objectives, policies and processes for managing capital; (ii) quantitative data about what the entity manages as capital; (iii) whether the entity has complied with any externally imposed capital requirements; and (iv) if it has not complied, the consequences of such non-compliance. (Note 7)

Section 3862 and Section 3863 replace Section 3861, *Financial Instruments – Disclosure and Presentation*, revising and enhancing its disclosure requirements, but not changing the existing presentation requirements for financial instruments. These new sections place increased emphasis on disclosures about the nature and extent of risks arising from financial instruments and how the entity manages those risks. Section 3862 requires qualitative and quantitative disclosure of: (i) exposures to risks arising from financial instruments, how they arose and the potential impact on the amount, timing and certainty of future cash flows; (ii) information about the risk management function and the reporting and measurement systems used; (iii) the entity's policies for hedging or mitigating risk and avoiding concentrations of risk; and (iv) the sensitivity to individual market risk factors together with the methodology for performing the analysis. Section 3863 deals with the classification of financial instruments, from the perspective of the issuer, between liabilities and equity, the classification of related interest, dividends, losses and gains, and the circumstances in which financial assets and financial liabilities are offset. (Note 6)

5. Cash and Investments

Cash consists of cash net of cheques issued in excess of amounts on deposit. Included in cash and short-term investments are funds held in trust on behalf of other insurance companies in the amount of $1,269,000 (2008 – $976,000).

Short-term investments have a total principal amount of $272,039,000 (2008 – $125,302,000) comprised of provincial short-term deposits with effective interest rates of 0.50 to 0.65 per cent (2008 – 3.30 to 4.80 per cent), with interest receivable at varying dates.

The corporation has an unsecured operating line of credit with its principal banker in the amount of $5.0 million. There were no drawdowns against this line of credit at February 28, 2009.

6. Financial Risk Management

Investments carry certain financial risks including interest rate, cash flow and credit risk. The corporation manages these risks through the Investment Committee of the Board, which meets at least quarterly to discuss strategy and review performance and, if required, take remedial action. The investment objectives and goals of the corporation are embodied in an Investment Policy document, which sets target asset allocation and portfolio concentration limits as well as defining the credit quality of the counterparties and the percentage of highly liquid investments required to meet cash flow needs.

Market Risk

Market risk is the risk that changes in foreign exchange rates, market interest rates and other changes in market prices will result in fluctuation of the fair value or future cash flows of a financial instrument.

CURRENCY RISK

Currency risk is the risk that changes in foreign exchange rates will result in fluctuation of the fair value or future cash flows of a financial instrument. The corporation mitigates its currency risk by entering into contracts which offset against changes in foreign exchange rates. Any changes in foreign exchange rates are offset by the opposite change in the value of the foreign denominated financial instrument. The currency contracts include:

i) Foreign exchange contracts

The corporation has entered into monthly foreign exchange forward contracts, which provide that the corporation sells a specified amount of U.S. dollars at a predetermined forward exchange rate and purchases the same amount of U.S. dollars at the prevailing spot rate on the settlement date. At February 28, 2009, the corporation has contracted to sell U.S. $45,300,000 at a forward rate of 1.2689 and purchase the same amount of U.S. dollars at the spot rate on March 31, 2009.

ii) Currency swap

The corporation has entered into a currency swap relating to a Province of Quebec provincial bond denominated in U.S. dollars for $10,000,000. The currency swap provides a fixed 5.76 per cent return in Canadian dollars. The agreement also provides that at predetermined future dates, the corporation pays a fixed 7.5 per cent rate based on the U.S. $10,000,000 par value of the bond and receives 5.76 per cent return based on a Canadian dollar notional value of $13,350,000. The maturity date of the currency swap and the bond is July 15, 2023.

INTEREST RATE RISK

Interest rate risk is the risk that changes in market interest rates will result in fluctuation of the fair value or future cash flows of a financial instrument.

The market valuation of the corporation's fixed income portfolio is directly impacted by fluctuations in interest rates and will have a larger impact on instruments with a long duration.

[illegible]

	2009	2008
Federal	**2.49**	2.73
Provincial	**3.62**	3.73
Municipal	**4.91**	5.03
Hospitals	**4.82**	7.32
Schools	**6.15**	6.38
Corporations	**4.79**	4.83

As at February 28, 2009, a 100 basis point change in interest rates would result in a change in the fair value of the corporation's fixed income portfolio of approximately $82.4 million comprised of a change of $65.2 million in other comprehensive income and $17.2 million in net income.

Fluctuation in the interest rate will also have an impact on the corporation's unpaid claims. The corporation's duration of its fixed income portfolio approximates the duration of unpaid claims liability and therefore any change in interest rates related to these investments would have an offsetting impact on the unpaid claims liability.

EQUITY PRICE RISK

The fair value of equity securities held by the corporation can be affected by changes in market prices, other than currency and interest rate risks, which may be caused by factors specific to the individual financial instrument or factors affecting all similar financial instruments. General economic conditions, political conditions and other factors affect the equity market. As at February 28, 2009, a 10 per cent change in the fair value of the corporation's equity portfolio would result in a $27.1 million change in other comprehensive income.

As all equities are classified as AFS, all changes in prices are recorded as other comprehensive income and do not directly impact the Statement of Operations until such time as an investment is sold or has become other than temporarily impaired. The corporation has policies in place to limit and monitor its exposure to individual issuers and classes of issuers of equity securities.

Credit Risk

Credit risk is the potential for the corporation to incur a financial loss due to the failure of the other party to discharge an obligation. Financial instruments that give rise to potential credit risk for the corporation include fixed income securities, accounts receivable, reinsurance receivables and structured settlements.

FIXED INCOME SECURITIES RISK

The corporation mitigates its exposure to credit risk by placing fixed income securities with high-quality institutions with investment grade ratings. The credit quality of financial assets that are neither past due nor impaired can be assessed by reference to external credit ratings, where available, or to historical information about counterparty default rates. The following table highlights the fixed income securities by credit quality according to Moody's Investors Service at February 28/29.

	2009		2008	
	Carrying Value (in thousands of dollars)	**Percentage of Portfolio**	Carrying Value (in thousands of dollars)	Percentage of Portfolio
Aaa	**$ 238,314**	**16.2%**	$ 440,217	27.0%
Aa	**1,176,834**	**79.9%**	989,701	60.6%
A	**22,762**	**1.5%**	173,088	10.6%
Baa	**5,798**	**0.4%**	14,323	0.9%
Not rated	**28,685**	**2.0%**	15,027	0.9%
Total	**$ 1,472,393**	**100.0%**	$ 1,632,356	100.0%

ACCOUNTS RECEIVABLE RISK

The corporation's accounts receivable are comprised of customers with varying financial conditions as the corporation is required to provide basic insurance to all vehicle owners and drivers in the province of Manitoba. All significant past due receivables including subrogation receivables are fully provided for due to the uncertainty of collection. The credit risk pertaining to premiums receivable is mitigated as a customer's policy may be cancelled for default of payment.

The following table highlights the corporation's accounts receivable by major category.

(in thousands of dollars)	2009	2008
Policy and time payments	**$ 250,412**	$ 225,191
Accrued interest	**26,308**	30,866
Subrogation and other receivables	**12,502**	13,390
Allowance for Doubtful Accounts	**(12,692)**	(13,658)
Total	**$ 276,530**	$ 255,789

REINSURANCE RECEIVABLES RISK

The corporation evaluates the financial condition of its reinsurers to minimize the exposure to significant losses from reinsurer insolvency. The corporation holds collateral in regards to unregistered reinsurance in the form of amounts on deposit and letters of credit of $5.2 million (2008 – $11.9 million). Furthermore, a corporate guideline requiring reinsurers to have a minimum credit rating of A- from A.M. Best and BBB+ credit rating from Standard & Poors is in place. For the 2009 calendar year, nine reinsurers share the corporation's casualty reinsurance coverage, ranging from 2.5% to 32.5%. The reinsurer exposed to 32.5% of the losses is licensed in Canada by the Office of the Superintendant of Financial Institutions and, therefore, subject to minimum capital requirements. For the 2009 calendar year, 16 reinsurers share the corporation's catastrophe reinsurance coverage, none holding more than 15% of the reinsurance exposure. The 2009 catastrophe reinsurance program is placed on a rolling one-third, three-year term to further mitigate the corporation's exposure to reinsurer insolvency. No amount due from reinsurers was considered uncollectible during 2008/09 and no allowance for doubtful accounts has been established as at February 28, 2009.

STRUCTURED SETTLEMENTS

The claims settlement processes may involve the use of structured settlements, which are purchased through various financial institutions. As of the balance sheet date, the present value of expected payments totals $142.6 million (2008 – $142.2 million) based on various dates of purchase. The corporation assumes a financial guarantee to make payments to claimants in the event that financial institutions default on payments under the terms of the structured settlement.

Liquidity Risk

A significant risk of the insurance industry is the ability to match the cash inflows of the investment portfolio with the cash requirements of the policy liabilities and operating expenses. The corporation has taken the overall historical liability settlement pattern as a basis to define diversification and duration characteristics of the investment portfolio. To meet the cash requirements for claims and operating expenses, the corporation has policies to ensure that assets and liabilities are broadly matched in terms of their duration.

Cash and cash equivalents are essential components of the corporation's financial liquidity management. Cash flows are monitored to ensure sufficient resources are available to meet our current operating requirements. Excess funds not needed to meet current operating requirements are invested in long-term instruments to generate additional revenue for future obligations.

7. Capital Management

The corporation's Board of Directors has approved risk-based capital adequacy target levels by line of business to maintain financial stability. In addition, specific levels of retained earnings have been appropriated to support two major corporate initiatives:

- The Immobilizer Incentive Strategy – a program designed to protect at-risk vehicles from theft; and
- The Extension Development Fund (EDF) which was established to defray the costs of projects undertaken to maximize the opportunities presented by the 2004 merger of Manitoba Public Insurance and the Division of Driver and Vehicle Licensing.

The corporation supports the use of the Minimum Capital Test (MCT) as a risk-based method developed by the Office of the Superintendent of Financial Institutions (OSFI) to assess the corporation's financial risk and determine the capital adequacy of reserves held in retained earnings. This methodology assigns risk factors to the company's assets and policy liabilities. It is used to determine whether federally regulated property and casualty insurance companies are maintaining adequate capital to absorb unexpected losses. OSFI expects these regulated companies to establish a target capital level, and maintain ongoing capital, no less than the supervisory target of 150 per cent of the capital required by the MCT.

The corporation's external actuary annually calculates the MCT by line of business to assist the Board of Directors in reviewing and establishing appropriate target levels.

Basic's retained earnings are comprised of the Rate Stabilization Reserve (RSR) and the Immobilizer Incentive Fund (IIF). The corporation's Board of Directors' current target level range is 50 per cent to 100 per cent of MCT or $107 million to $214 million. The Public Utilities Board of Manitoba by its Order 157/08 has established the Basic RSR target for rate-setting purposes to be $76 million to $115 million and includes the IIF for purposes of assessing RSR adequacy.

The corporation's external actuary, based on his report for the 2008 Basic Insurance Dynamic Capital Adequacy Test (DCAT), identifies three plausible scenarios where Basic retained earnings become negative and has concluded that the future financial condition of this line of business is not satisfactory.

The corporation's Board of Directors' current target level for Extension retained earnings is 200 per cent of MCT which equates to $35.0 million. Based on this target the corporation's external actuary has concluded, in the 2008 Extension DCAT report, that the future financial condition of this line of business is satisfactory.

The corporation's Board of Directors' current target level of $37.0 million for SRE retained earnings is 200 per cent of MCT. Based on this target the corporation's external actuary has concluded, in the 2008 SRE DCAT report, that the future financial condition of this line of business is satisfactory.

The corporation's Board of Directors approved the retained earnings in excess of the 200 per cent of MCT for the Extension and SRE lines of business to be appropriated into the Extension Development Fund to defray annual costs associated with the drivers licensing projects (Note 22).

8. Property and Equipment

9. Provision for Employee Future Benefits

The corporation has a defined benefit pension plan, severance benefit plan and a post-retirement extended health benefit plan available to eligible employees. The defined benefit pension plan is based on years of service and final average salary whereas the severance benefit plan is based on years of service and final salary.

The corporation uses an actuarial valuation, on an annual basis, to measure the accrued provision for its benefit plans. The most recent actuarial valuation was conducted by an external actuary as at December 31, 2008, with the next scheduled actuarial valuation being December 31, 2009.

The actuarial valuation is based on the corporation's best estimate of various economic and demographic assumptions. Results from the most recent actuarial valuations, projected to February 28/29 and the corresponding economic assumptions are as follows:

	Pension Benefit Plan		Other Benefit Plans	
	2009	2008	**2009**	2008
Economic assumptions:				
Discount rate	**5.25%**	5.40%	**5.25%**	5.40%
Inflation rate	**2.00%**	2.00%	**–**	–
Expected salary increase	**2.90%**	2.75%	**–**	–
Expected health care cost increase	**–**	–	**7.00%**	7.00%

(In thousands of dollars)	Pension Benefit Plan		Other Benefit Plans	
	2009	2008	**2009**	2008
Balance, beginning of year	**$ 155,725**	$ 136,620	**$ 32,855**	$ 29,852
Current service cost	**7,346**	6,630	**3,911**	3,251
Interest cost	**8,464**	8,039	**661**	583
Benefits paid	**(5,436)**	(4,282)	**(2,079)**	(2,109)
Actuarial valuation deficiency	**5,303**	8,718	**393**	1,278
Provision for employee future benefits	**$ 171,402**	$ 155,725	**$ 35,741**	$ 32,855
Employee contribution for the year	**$ 5,848**	$ 5,343	**$ –**	$ –

Plan Assets

The corporation has not segregated investment assets to fund the benefit plans. Funding occurs as benefits are paid. The corporation has established a provision against general assets, which is being increased to match the increase in its benefit plan liabilities. The interest cost associated with the various benefit plans is based on market interest rates at the most recent valuation date.

(in thousands of dollars)	Pension Benefit Plan		Other Benefit Plans	
	2009	2008	**2009**	2008
Plan expenses for the year:				
Current service cost	**$ 7,346**	$ 6,630	**$ 3,911**	$ 3,251
Interest cost	**8,464**	8,039	**661**	583
Actuarial valuation deficiency				
Pertaining to interest	**3,341**	5,492	**–**	–
Pertaining to expense	**1,962**	3,226	**393**	1,278
	$ 21,113	$ 23,387	**$ 4,965**	$ 5,112

10. Provision for Unpaid Claims

The provision for unpaid claims, including adjustment expenses, represents an estimate for the full amount of all costs and the projected final settlement of claims incurred.

The provision for unpaid claims, including adjustment expenses, is subject to variability. This variability is related to future events that arise from the date the loss was reported to the ultimate settlement of the claims. Accordingly, short-tail claims such as physical damage claims tend to be more reasonably predictable than long-tail claims such as public liability claims. Factors such as the receipt of additional claims information during the claims settlement process, changes in severity and frequencies of claims from historical trends, and effects of inflationary trends contribute to this variability.

The determination of the provision for unpaid claims, including adjustment expenses, relies on judgment, analysis of historical claim trends, investment rates of return and expectation on the future development of claims. The process of establishing this provision necessarily involves risks which could cause the actual results to deviate, perhaps substantially, from the best determinable estimate.

The provision for unpaid claims, including adjustment expenses, by major claims category includes:

(in thousands of dollars)	2009		2008	
	Gross	**Reinsurers' Share**	Gross	Reinsurers' Share
Automobile Insurance Division				
Liability	**$ 1,412,138**	**$ 31,884**	$ 1,341,723	$ 29,975
Physical Damage	**145,047**	**5,650**	166,112	21,370
	1,557,185	**37,534**	1,507,835	51,345
Discontinued Operations				
Personal/Commercial	**4,251**	**–**	4,790	–
	$ 1,561,436	**$ 37,534**	$ 1,512,625	$ 51,345

The provision for unpaid claims, including adjustment expenses, is discounted using the following discount rates:

	2009	2008
Benefits	Interest Rate Assumptions	
Pre-PIPP Weekly Indemnity	**2.6% per year**	2.6% per year
PIPP other than death and impairment	**2.6% per year**	2.6% per year
All other coverages	**4.6% per year**	4.6% per year

PIPP – Personal Injury Protection Plan

According to accepted actuarial practice, the discounted reserve includes a provision for adverse deviation of $276.7 million (2008 – $271.3 million) comprised of a claims development component of $166.6 million (2008 – $158.2 million), an interest rate component of $108.5 million (2008 – $111.3 million) and a reinsurance component of $1.6 million (2008 – $1.8 million).

Net claims incurred and adjustment expenses included no losses from catastrophes in the current fiscal year (2008 – $10.0 million). Catastrophes are an inherent risk to the corporation and may contribute materially to the year-to-year fluctuations in the corporation's results of operations and financial condition when they occur.

Unpaid claim liabilities are carried at values that reflect their remaining estimated ultimate costs for all accident years.

Changes in the estimate of net unpaid claims, recognized during the fiscal year ended February 28, 2009 for prior years, are as follows:

(In thousands of dollars)	Accident Years				
	2008	2007	2006	2005 and Prior	Total
Net unpaid claims (valuation estimate as at February 29, 2008)	$ 333,135	$ 196,148	$ 146,189	$ 778,069	
Net payments for the year	137,977	20,980	12,082	32,579	
	195,158	175,168	134,107	745,490	
Net unpaid claims (revised valuation estimate as at February 28, 2009)	162,395	165,093	117,014	770,015	
(Redundancy) Deficiency	$ (32,763)	$ (10,075)	$ (17,093)	$ 24,525	$ (35,406)
Prior years (redundancy) deficiency		$ 1,373	$ 4,082	$ (67,915)	$ (62,460)

Changes in the estimate of net unpaid claims for discontinued operations recognized during the fiscal year ended February 28, 2009 are a decrease of $0.3 million (2008 – decrease of $0.4 million). All of the net unpaid claims relate to loss dates prior to October 1, 1990.

Improvements to the Personal Injury Protection Plan (PIPP) benefits have been approved in principle, by government, for claimants who meet the definition of "catastrophic injury" as it will be defined in *The Manitoba Public Insurance Corporation Act* and regulations. These improvements will apply to all active PIPP no-fault injury claim files as well as all new claims on a go-forward basis. The financial impact of these changes is estimated to be $90.8 million on a one-time basis and has been recorded in the provision for unpaid claims.

11. Reinsurance

The corporation follows the practice of obtaining reinsurance to limit its exposure to losses. Under agreements in effect at February 28, 2009, these reinsurance agreements limit the corporation's exposure to a maximum amount of $5.0 million (2008 – $5.0 million) on any one occurrence.

The reinsurance arrangements also limit the corporation's liability in respect to a series of claims arising out of a single occurrence, including catastrophic claims, to a maximum of $13.3 million (2008 – $11.7 million). These arrangements protect the corporation against losses up to $266.7 million (2008 – $266.7 million).

Certain lines of insurance carry maximum limits lower than these amounts. While these arrangements are made to protect against large losses, the primary liability to the policyholders remains with the corporation.

The figures shown in the Statement of Operations are net of the following amounts relating to reinsurance ceded to other companies:

(In thousands of dollars)	2009	2008
Premiums earned	$ 13,172	$ 16,641
Claims incurred	$ 1,126	$ 45,330

12. Commitments

The corporation is committed to make minimum annual lease payments for land, buildings and equipment. The minimum annual lease payments required are approximately as follows:

(in thousands of dollars)	
Fiscal Year	Minimum Lease Payments
2010	$ 1,437
2011	$ 1,204
2012	$ 1,120
2013	$ 988
2014	$ 782
thereafter	$ 11,231

The corporation has committed $5.9 million for the construction of a new service centre.

13. Investment Income

(in thousands of dollars)	2009	2008
Interest from bonds	**$ 68,201**	$ 72,344
Gain (loss) on sale of Available for Sale bonds	**8,754**	1,435
Gain (loss) on sale of Held for Trading bonds	**6,541**	–
Unrealized gain (loss) on Held for Trading bonds	**(5,533)**	–
Dividends from equities	**9,976**	10,373
Gain (loss) on sale of equities	**(35,572)**	37,907
Gain (loss) on foreign exchange	**(20,214)**	15,833
Write-down of investments	**(24,619)**	(9,010)
Investment management fees	**(2,902)**	(3,338)
Total	**$ 4,632**	$ 125,544

Investment income is net of management fees paid to the Department of Finance in the amount of $2.9 million (2008 – $3.3 million). This includes $1.7 million (2008 – $2.2 million) of fees the Province paid to outside managers on the corporation's behalf.

14. Accumulated Other Comprehensive Income (Loss)

Accumulated Other Comprehensive Income (Loss) (AOCI) reflects the net unrealized gain or loss on financial assets classified as Available for Sale. Changes in AOCI by type of asset are presented below.

(in thousands of dollars)	AOCI at February 29, 2008	Unrealized Gains (Losses) in 2008/2009	Realized (Gains) Losses transferred to Net Income in 2008/2009	AOCI at February 28, 2009
Canadian Equities	$ 7,581	$ (133,747)	$ 34,630	$ (91,536)
U.S. Equities	(12,741)	(23,168)	20,216	(15,693)
Bonds and Other	28,328	(35,641)	(3,417)	(10,730)
	$ 23,168	$ (192,556)	$ 51,429	$ (117,959)

15. Discontinued General Insurance Operations

The corporation discontinued writing reinsurance assumed business effective November 18, 1987 and personal and commercial insurance policies effective October 1, 1990.

As of February 28, 2001 the corporation accepted a third-party offer to purchase the reinsurance assumed business from the corporation. Under the terms of the agreement, the corporation transferred and assigned to the third party the title, interest and all of the obligations resulting from the uncommuted reinsurance assumed treaties written by the corporation for the period July 1, 1975 to November 18, 1987 including retrocessional treaties. The obligations include all known or unknown liabilities. The primary liability to the treaty holders remains with the corporation in the event of the third party's insolvency.

Claims costs and expenses on personal and commercial policies will be incurred until all claims on existing policies are settled.

Discontinued operations resulted in net income of $0.4 million (2008 – $0.8 million) which is reported as part of the Special Risk Extension line of business (Note 16). Included in the provision for unpaid claims is $4.3 million (2008 – $4.8 million) relating to discontinued operations.

16. Net Income (Loss) From Annual Operations

The lines of business reported net income (loss) from annual operations as follows:

(in thousands of dollars)		2009		2008
Basic insurance	**$**	**(8,165)**	$	69,040
Extension insurance		**(1,684)**		12,351
Special Risk Extension		**14,899**		16,049
		13,215		28,400
Net income from annual operations	**$**	**5,050**	$	97,440

17. Surplus Distribution

On November 26, 2007 the Public Utilities Board of Manitoba released its ruling on the corporation's 2008/2009 Basic Insurance rate application and ordered a surplus distribution of 10 per cent of the basic motor vehicle premiums written based on 2006/2007 rates. At February 29, 2008, the rebate was estimated to be $62,700,000. The amount was actualized during the current fiscal year when $62,646,000 was distributed to Basic policyholders.

On December 2, 2008 the Public Utilities Board released its ruling on the corporation's 2009/2010 Basic Insurance rate application. There is no surplus distribution in 2009/2010.

18. Fair Value Disclosure

The fair value of financial assets and liabilities approximates their carrying value.

19. External Auditor and External Actuary Costs

The Basis of Reporting note (Note 2) provides information on the appointment of the external auditor and external actuary. In the normal course of business, and in addition to the annual attest audit of the corporation's financial statements and valuation of policy liabilities, the external auditor and external actuary provided advisory services to the corporation.

Costs incurred for services rendered are:

(in thousands of dollars)		2009		2008
KPMG LLP				
Audit fees	**$**	**178**	$	171
Regulatory related fees		**14**		–
Advisory fees		**15**		2
Total	**$**	**207**	$	173
Ernst & Young LLP				
Valuation of policy liabilities fees	**$**	**95**	$	107
Actuarial advisory fees		**92**		89
Management advisory fees		**–**		6
Total	**$**	**187**	$	202

20. Driver Licensing Operations Recovery

Effective October 4, 2004 the Province of Manitoba transferred the management and administration of driver licensing to the corporation, which includes all aspects pertaining to driver safety, vehicle registration and driver licensing, including all related financial, administrative and data processing services.

The Province of Manitoba has agreed to provide funding to the corporation in the amount of $21.0 million annually, into perpetuity, payable in equal monthly installments of $1.75 million to defray the cost borne by the corporation as a result of the transfer.

The corporation, on behalf of the Province of Manitoba, collects and transfers motor vehicle registration fees and driver licensing fees to the Province of Manitoba.

Fees collected on behalf of and transferred to the Province of Manitoba include:

(in thousands of dollars)		2009		2008
Vehicle registration fees	**$**	**118,056**	$	102,702
Driver licensing fees		**19,876**		21,880
Total	**$**	**137,932**	$	124,582

21. Immobilizer Incentive Fund

Activity in the Immobilizer Incentive Fund includes:

(in thousands of dollars)		2009		2008
Balance beginning of year	**$**	**17,925**	$	33,143
Less: Funds transferred to Basic Insurance Rate Stabilization Reserve to offset program costs		**(15,904)**		(15,218)
Balance end of year	**$**	**2,021**	$	17,925

The Immobilizer Incentive Fund was established during the 2005/2006 fiscal year by appropriating $40.0 million from the Basic Insurance Rate Stabilization Reserve to fund the Immobilizer Incentive Program. An additional $10.0 million was transferred to the Immobilizer Incentive Fund during 2006/2007 to expand the No Cost Immobilizer Program to all Manitobans owning Most-at-Risk vehicles.

Program costs incurred are included in "Net income from annual operations after surplus distribution" for the Basic Insurance line of business, which is reported in the Statement of Retained Earnings under the heading "Rate Stabilization Reserve."

Funds are transferred from the Immobilizer Incentive Fund to the Basic Insurance Rate Stabilization Reserve to offset the program costs incurred.

22. Extension Development Fund

Effective March 1, 2007 the Board of Directors approved retained earnings targets for Extension and Special Risk Extension lines of business (Competitive Lines) based on 200 per cent of the most recent year's Minimum Capital Test (MCT). The MCT is a risk-based methodology developed by the Office of the Superintendent of Financial Institutions to assess a property and casualty insurance company's financial risk and determines the capital adequacy of reserves held in retained earnings.

Further, the Board of Directors approved that the Competitive Lines retained earnings in excess of the most recent year's target of 200 per cent of MCT will be appropriated into the Extension Development Fund (EDF). The EDF is being used to defray the annual driver licensing project costs that flow through the Extension line of business Statement of Operations.

Activity in the EDF includes:

(in thousands of dollars)		2009		2008
Balance beginning of year	**$**	**35,389**	$	–
Transfer from Competitive Lines Retained Earnings		**31,739**		38,983
Transfer to Competitive Lines Retained Earnings		**(7,703)**		(3,594)
Balance end of year	**$**	**59,425**	$	35,389

23. Rate regulation

The corporation's basic universal compulsory automobile insurance line of business (Basic Insurance) is subject to regulation by the Public Utilities Board (PUB) of Manitoba. Under the provisions of *The Crown Corporations Public Review and Accountability Act*, the PUB has the authority to review and approve Basic Insurance rates, premiums and service fees charged with respect to compulsory driver and vehicle insurance provided by the corporation. No new rates or fees for services can be introduced without the approval of the PUB. The PUB is required to ensure that the rates are just, reasonable and not unduly discriminatory or preferential.

Annually the corporation prepares its Basic Insurance general rate application and files it with the PUB in the month of June for implementation the following fiscal year commencing on March 1. The general rate application includes the prospective rate requirements based on historical and forecasted financial and other information as well as the application of actuarial, accounting and statistical principles and practices.

The corporation is required to pay a portion of the PUB's operating costs relating to the corporation's share of the overall PUB budget. In addition, the PUB can also order the corporation to reimburse other proceeding participants for specified costs such as their time, legal and expert witness fees.

24. Subsequent Event

On February 26, 2009, the corporation submitted a conditional offer for the purchase of the Cityplace property for $81.5 million plus expenses. The closing date for the transaction is May 1, 2009. The Cityplace building houses most of the corporation's administrative offices as well as some third-party occupied office and retail space.

25. Comparative Figures

Certain of the comparative figures have been reclassified to conform to the current year financial statement presentation.

Management's Responsibility for Financial Information

The consolidated financial statements of the WCB were prepared by management, which is responsible for the integrity and fairness of the data presented, including significant accounting judgments and estimates. This responsibility includes selecting appropriate accounting principles consistent with generally accepted accounting principles in Canada. Financial information contained elsewhere in this annual report conforms to these financial statements.

Management believes the system of internal controls, review procedures and established policies provide reasonable assurance that relevant and reliable financial information is produced and that assets are properly safeguarded. Management also believes that the WCB's operations are conducted in conformity with the law and with a high standard of business conduct. The internal auditor performs periodic audits designed to test the adequacy and consistency of the WCB's internal controls.

The Board of Directors is responsible for overseeing management in the performance of its financial reporting responsibilities and approved the financial statements and other financial information included in this annual report on March 16, 2009.

The Audit Committee assists the Board of Directors in its responsibilities. This Committee reviews and recommends approval of the consolidated financial statements and annual report. Internal and external auditors and actuaries have unlimited access to the Audit Committee. The Audit Committee reviews the financial statements and the other contents of the annual report with management and the external auditors and reports to the Board of Directors prior to their approval for publication.

The Chief Actuary of the WCB completed an independent actuarial valuation of the benefit liabilities included in the financial statements of the WCB and reported thereon in accordance with accepted actuarial practices. The firm of Eckler Ltd. has been appointed as the peer reviewer to the WCB. The Chief Actuary's opinion on the valuation of the benefit liabilities is provided on page 29. Eckler Ltd.'s opinion is provided on page 30.

Grant Thornton LLP, independent auditors appointed as a sub-agent to the Provincial Auditor General, has performed an independent audit of the consolidated financial statements of the WCB in accordance with Canadian generally accepted auditing standards. Their Auditors' Report, on page 31, outlines the scope of this independent audit and includes their opinion expressed on the 2008 consolidated financial statements.

Auditor's Report

To the Workers Compensation Board of Manitoba

We have audited the consolidated balance sheet of the Workers Compensation Board of Manitoba as at December 31, 2008 and the consolidated statements of operations and accident fund reserve, comprehensive income, changes in accumulated other comprehensive income and cash flows for the year then ended. These financial statements are the responsibility of the WCB's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of the WCB as at December 31, 2008 and the results of its operations and its cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

($ amounts in thousands of dollars unless otherwise noted)

1. NATURE OF OPERATIONS

The Workers Compensation Board of Manitoba (WCB) was created in 1917 under the authority of *The Workers Compensation Act* of Manitoba. In accordance with the provisions of the Act, the WCB is responsible for:

- prevention of workplace injuries and occupational diseases in conjunction with the Manitoba government's Workplace Safety and Health Division
- administering payments to injured workers and suppliers of services to injured workers
- levying and collecting premiums from established classes of employers in amounts sufficient to cover the current and future costs of existing claims
- investing funds set aside for the future costs of claims as well as surplus funds.

An independent Workers Compensation Appeal Commission operates under the Act to make final rulings on any appeals pertaining to the WCB's assessment or benefits decisions.

The WCB's vision is *SAFE Work - A Way of Life*. The organization's mission is to promote safe and healthy workplaces, promote recovery and return to work, provide compassionate and supportive compensation services for workers and employers, and ensure responsible financial stewardship. The WCB compensates for lost wages, provides support and arranges for rehabilitative help and has a responsibility to injured workers, their families and their employers to help injured workers return to health and productive work in a timely and safe manner.

The workers compensation system is funded through premiums collected from employers. The WCB does not receive government funding or assistance. Available funds are invested and used to protect the WCB and its ratepayers from general business risks and catastrophic events in areas such as investment returns or extraordinary claims costs. To that end, an accident fund reserve attributable to the Class E employers exists. A second reserve, accumulated other comprehensive income, shows the cumulative unrealized gains and losses arising from the investment portfolio.

The target balance for the reserves is based on a formula modified from the Minimum Contributing Capital and Surplus Requirements rules set out by the Office of the Superintendent of Financial Institutions, Canada. The calculation moves in tandem with changes in the size of the WCB's assets and liabilities thereby calculating a reserve target that reduces risk to the organization. The target balance also includes a provision for the potential of new occupational diseases in the future and the expected impact of adopting International Financial Reporting Standards in 2011. The target balance for the reserves was $244.2 million at the end of 2008 ($254.0 million in 2007).

The WCB's Funding Policy is intended to ensure that fiduciary responsibilities are carried out in accordance with the Act and that annual influences do not unduly distort the funding process. The WCB is committed to operating on a fully funded basis to a level funding standard. Full funding requires that current employers pay for the current and future cost of existing compensable injuries and their administration, rather than future generations of employers paying for those injuries. Under level funding, the cost of claims with lengthy latency periods is funded in a level fashion over the workers' periods of exposure to the elements that led to the injuries or diseases.

2. SIGNIFICANT ACCOUNTING POLICIES

The WCB's significant accounting policies are as follows:

Measurement Uncertainty

These financial statements have been prepared in accordance with generally accepted accounting principles in Canada, which requires the WCB to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenue and expenses during the reporting periods. Actual results could differ from these estimates.

Basis of Consolidation

These consolidated financial statements include the accounts of the WCB and its wholly owned real estate investment subsidiaries. Intercompany balances and transactions are eliminated on consolidation.

Cash

Cash includes cash on hand and balances with banks, net of any outstanding cheques. Cash and short term investments held by investment managers and custodians for investment purposes are included in the investment portfolio.

Investments

Under the provisions of Canadian Institute of Chartered Accountants (CICA) 3855 Financial Instruments – Recognition and Measurement, the financial assets of the WCB's investment portfolio are designated as available-for-sale, and carried at fair value. Other than the real estate portfolio assets in WCB Realty Limited, a wholly owned subsidiary, gains and losses arising from the change in fair value that have occurred during the year are recorded in other comprehensive income until the investment is derecognized (sold). At that time, the cumulative gain or loss previously recognized in other comprehensive income is designated a realized gain or loss and reclassified to investment income in the Consolidated Statement of Operations and Accident Fund Reserve. Income from interest and dividends is recognized in the period earned. Investment income is presented net of investment expenses.

The WCB consolidates the real estate portfolio of WCB Realty Limited at fair value, in accordance with CICA Accounting Guideline 18 – Investment Companies. Changes in fair value that occurred during the year are recorded in investment income in the Consolidated Statement of Operations and Accident Fund Reserve.

Fair Value of Investments

Investments are stated at fair value, which is the amount of consideration that would be agreed upon in an arm's length transaction between knowledgeable, willing parties who are under no compulsion to act.

Publicly traded investments are stated at year end market prices as listed on the appropriate stock exchange or as provided by the custodian from independent sources.

Pooled fund investments are valued at the most recent unit values supplied by the pooled fund administrator at year end.

The fair value of real estate investments is determined annually by management based on a combination of the most recent independent appraisals of the rental properties and market data available at year end, net of any liabilities against the properties.

Capital Assets

Capital assets are stated at cost less accumulated amortization. Capital assets are amortized on a straight line basis over their estimated useful lives, as follows:

Computer equipment	3 - 5 years
Systems development	3 - 10 years
Furniture, fixtures and equipment	5 years
Building renovations and leasehold improvements	2 - 10 years
Building	40 years

Employee Future Benefits

The actuarial determination of the accrued benefit obligation for pensions and other retirement benefits uses the projected benefit method prorated on service. This method incorporates management's best estimates of salary escalation, investment rate of return, retirement ages of employees and other actuarial factors. Actual results could differ from these estimates as the assumptions are of a long term nature, consistent with the nature of employee future benefits.

Actuarial gains (losses) arise from the difference between the actual experience of the pension plan's assets and liabilities for a period and the assumed outcome for that period, or from changes in actuarial assumptions used to determine the accrued benefit obligation. If the cumulative net actuarial gain (loss) exceeds 10 per cent of the greater of plan assets or liabilities, the excess is amortized over the expected average remaining service life of active employees. Past service costs are amortized on a straight line basis over the remaining service life of active employees expected to receive benefits under the plan.

On January 1, 2000, the WCB adopted the new accounting standard on employee future benefits using the prospective application method. The WCB is amortizing the transitional asset (pension) and transitional liability (other) on a straight line basis over 15 years, which was the average remaining service life of active employees expected to receive benefits under the benefit plans as at January 1, 2000.

Benefit Liabilities

The WCB's Chief Actuary prepares a valuation of the benefit liabilities of the WCB at each year end. The benefit liabilities represent the actuarial present value of all future benefit payments expected to be made for claims or injuries which occurred in the current fiscal year or in any prior year. The benefit liabilities include provision for all benefits provided by current legislation, policies and/or administrative practices in respect of existing claims, plus provisions for the future expenses of administering the existing claims.

The benefit liabilities also include the estimated liability for long latent occupational diseases. Due to the nature of the estimated liability for long latent occupational diseases and the extent of related historical claims information available, this liability is more uncertain by its nature than other benefit liabilities. As information is accumulated and analyzed, adjustments may be necessary to improve precision.

Fair Value of Other Financial Assets and Liabilities

Other financial assets and liabilities consist of cash and cash equivalents, accounts receivable and accounts payable. The carrying value of these items approximates their fair value, consistent with the short term nature of these items.

Accumulated Other Comprehensive Income

The designation of the WCB's investment portfolio as available-for-sale requires the WCB to use accumulated other comprehensive income (AOCI). AOCI is comprised of the cumulative unrealized gains and losses arising from the investment portfolio that, in accordance with primary sources of generally accepted accounting principles, are recognized in other comprehensive income but excluded from the operating surplus.

Premium Revenue

The operations of the WCB are categorized, in accordance with the Act, into Class E (general employers pool) and several classes of self-insured employers.

General Employers Pool

Employers registered within Class E are subject to collective liability and premium revenue is estimated by applying applicable industry assessment rates to the employers' reported assessable payrolls for the current year. Any difference between the estimated premium revenue and the actual premium revenue is credited or charged to income in the year the determination is made.

Self-Insured Employers

Self-insured employers – principally government bodies and railways and their subsidiaries – are subject to individual responsibility for costs attributable to claims arising from their employees, as well as administration expenses incurred on behalf of self-insured employers. As such, premium revenue from self-insured employers is recognized as these costs are incurred. Current costs are collected as billed while future costs are recorded as a deferred receivable.

The Government of Canada and its agencies are self-insured based on the *Government Employees Compensations Act*. Under this Act, the administration of this program is delegated to the WCB which acts as agent of the Government of Canada for the payment of compensation to federal employees in Manitoba.

Foreign Currency Translation

Transactions in foreign currency are converted to Canadian dollars at the exchange rate in effect at the time of the transaction. Assets and liabilities denominated in foreign currencies are translated into Canadian dollars at the exchange rates in effect at the balance sheet date. Unrealized foreign currency exchange gains and losses arising from the investment portfolio are recorded in other comprehensive income until the investment is derecognized (sold). At that time, the cumulative foreign currency exchange gain or loss previously recognized in other comprehensive income is designated a realized foreign currency exchange gain or loss and reclassified to investment income.

3. LINES OF CREDIT

The WCB has established an operating line of credit with its principal banker in the amount of $3.0 million. Advances on the line of credit bear interest at the bank's prime interest rate. The WCB has also established a revolving credit facility with the Province of Manitoba in the amount of $40.0 million. Advances on the revolving credit facility bear interest at the Province's preferred lending rate. Both credit facilities are unsecured. Borrowings during the year amounted to $37.5 million ($5.3 million in 2007), comprised of $15.0 million on the operating line of credit and $22.5 million on the revolving credit facility ($2.3 million and $3.0 million, respectively, in 2007), and were repaid in full during the year.

4. RECEIVABLES AND OTHER

	2008	2007
Premiums - Class E employers	$ 27,134	$ 26,142
Allowance for doubtful accounts	(1,013)	(1,226)
	26,121	24,916
Current assessments - Self-insured employers	2,600	4,058
Sundry	2,165	1,481
Accrued pension benefit asset (Note 10)	3,789	4,735
	$ 34,675	$ 35,190

5. INVESTMENT PORTFOLIO

Fair Value of the Investment Portfolio

	2008	2007
Equities		
Canadian	$ 150,922	$ 214,976
Private placements	29,675	33,061
U.S.	116,634	131,857
Europe, Australasia & Far East	66,213	95,019
Emerging markets	18,964	38,863
	382,408	513,776
Cash and short term investments	20,376	47,394
Fixed income	341,076	319,497
Real estate (see table below)	141,199	138,475
Total	$ 885,059	$ 1,019,142

Real Estate Portfolio

The real estate portfolio can be further broken down as follows:

	2008	2007
Rental properties and other net assets	$ 186,037	$ 185,114
Mortgages payable	(44,838)	(46,639)
Real estate investments	$ 141,199	$ 138,475

Mortgages payable on rental properties bear interest at rates ranging from 3.5 per cent to 7.36 per cent per annum, with maturity dates ranging from 2009 to 2033. Scheduled principal and interest payments for 2009 on these mortgages total $15.6 million. The scheduled amounts of principal repayments in each of the next five years are as follows:

2009	$	13,590
2010		972
2011		8,830
2012		759
2013		2,318
		26,469
Thereafter		18,369
Total	$	44,838

Investment Income

Investment income was derived from the following sources:

		2008		2007
Canadian equities	$	4,939	$	5,530
Foreign equities		6,386		5,211
Cash and short term investments		1,349		1,932
Fixed income		17,121		16,202
Real estate (see table below)		12,097		28,389
Realized gains reclassified from other comprehensive income		7,530		45,309
Loan interest expense		(52)		(9)
Management expenses		(4,335)		(4,486)
Investment income	$	45,035	$	98,078

Real Estate Income

The real estate income can be further broken down as follows:

		2008		2007
Rental income, net of expenses	$	5,275	$	6,319
Appraisal gains		6,560		13,757
Realized gains from property sales		262		8,313
	$	12,097	$	28,389

Purchases of Investments, Net of Sales

Purchases of investments, net of sales can be further broken down as follows:

	2008	2007
Purchases of investments	$ 796,194	$ 1,321,583
Proceeds on disposal of investments	(769,274)	(1,284,030)
Net purchases of investments	$ 26,920	$ 37,553

Purchases and sales activities occur primarily within the fixed income portfolio and short term investments.

Commitments

The WCB has contractual agreements to contribute further funding to a maximum of $12.6 million ($18.4 million in 2007) to specific investment projects to be financed from the existing portfolio or from available cash.

6. INVESTMENT RISK MANAGEMENT

In accordance with the Statement of Investment Policy and Objectives, the investment objective of the WCB is to generate a consistent, positive, real rate of return on invested assets. Recognizing the need to achieve a balance between risk and return, investment risk is managed through a portfolio that is diversified across a number of distinct asset classes as well as geographic region and investment style.

The following sections describe the nature and extent of financial risk exposure and the related risk mitigation strategies.

Market Risk

The WCB invests in publicly and privately traded equities and fixed income instruments available on domestic and foreign exchanges. As these securities are affected by market changes and fluctuations, the WCB is exposed to market risk as a result of price changes due to economic fluctuations in capital markets.

The following table presents the effect of a material change in the key risk variable – the sector benchmark – for each of the equity mandates in the WCB investment portfolio:

	2008		2007	
	5 year annualized		5 year annualized	
Equities	+/- 1 standard deviation	+/- 2 standard deviation	+/- 1 standard deviation	+/- 2 standard deviation
% change in benchmark	16.7%	33.4%	9.0%	18.0%
Canadian	$25,161	$50,322	$19,348	$38,696
% change in benchmark	10.3%	20.6%	10.6%	21.2%
US	$11,467	$22,934	$13,977	$27,954
% change in benchmark	14.1%	28.2%	13.9%	27.8%
Europe, Australasia and Far East	$10,056	$20,112	$12,207	$26,414
% change in benchmark	21.1%	42.2%	16.7%	33.4%
Emerging markets	$4,001	$8,003	$6,489	$12,978

Credit Risk Management

Credit exposure on fixed income securities arises from the possibility that the issuer of an instrument fails to meet its obligation to make interest payments and repay principal. To mitigate the risk of credit default, the minimum quality standard for individual bonds and debentures at time of purchase is BBB, as rated by an established bond rating service. To further mitigate this risk, bonds with a BBB rating are limited to a maximum of 15 per cent of an individual investment manager's portfolio. The balance of the portfolio should be invested in bonds with a minimum rating of A or higher.

Of the fixed income assets in the investment portfolio, 98 per cent (98 per cent in 2007) have at least an A credit rating. The WCB does not anticipate that any borrowers will fail to meet their obligations.

Securities Lending

The WCB may lend, for fee income, any of its securities to third parties, provided the loans are secured by cash or readily marketable securities having a market value of at least 105 per cent of the market amount of the asset borrowed. As at December 31, 2008, these loans amounted to $67.1 million ($114.9 million in 2007).

Foreign Exchange Risk Management

The WCB has certain investments denominated in foreign currencies, which exposes the WCB to foreign currency risk. During 2008, the WCB did not undertake hedging strategies for the currency risk of foreign investments. While currency fluctuations influenced short term returns, these fluctuations are not expected to affect the long term position of the investment portfolio.

WCB has exposure to the US dollar, with USD-denominated holdings of $201.6 million CAD ($265.6 million CAD in 2007) or 22.8 per cent of the portfolio (26.1 per cent in 2007).

The table below presents the effects of a material change in the Canadian/US dollar exchange rates:

	CAD/USD	
	2008	2007
10 % appreciation in the Canadian dollar	$(18.3 million)	$(24.1 million)

Interest Rate Risk Management

The WCB is exposed to interest rate risk to the extent that the fair value or future cash flows of a financial instrument fluctuate due to changes in market interest rates. These fluctuations are managed by actively controlling the duration of the fixed income portfolio. As at December 31, 2008, the duration of the WCB's bond portfolio was 6.3 years (6.8 years in 2007).

The following table shows the effects of a negative 50 and 100 basis point (where one basis point equals 1/100 of one per cent; 50 basis points equals 0.5 per cent) change in interest rates on the bond portfolio:

	2008		2007	
+/- basis point change	50 basis points	100 basis points	50 basis points	100 basis points
Bonds	$8,281	$16,562	$8,706	$17,412

7. DEFERRED ASSESSMENTS

Deferred assessments represent the WCB's estimate of the present value of premiums which will be received in the future from self-insured employers to fund the future costs of existing claims that have arisen from their employees. As such, the fair value for deferred assessments is not readily determinable. The deferred assessments may be secured by irrevocable letters of credit or other suitable forms of guarantee. The changes in deferred assessments were as follows:

	2008	2007
Balance at beginning of year	$ 47,598	$ 43,718
Increase in future cost liability	18,379	5,003
Increase in pension related transactions	477	445
Interest allocation	(763)	(1,568)
Net change in deferred assessments	18,093	3,880
Balance at end of year	$ 65,691	$ 47,598

8. CAPITAL ASSETS

	2008		2007	
	Cost	Accumulated Amortization	Cost	Accumulated Amortization
Computer equipment	$ 11,866	$ 10,268	$ 11,268	$ 9,705
Systems development projects	12,546	8,842	12,016	8,110
Furniture, fixtures and equipment	2,228	1,983	2,080	1,932
Building renovations and leasehold improvements	3,852	2,983	3,625	2,795
Building and land	6,176	556	6,031	485
	$ 36,668	$ 24,632	$ 35,020	$ 23,027
Net book value		**$ 12,036**		**$ 11,993**

As a result of asset dispositions, costs of $309 ($624 in 2007) for computer equipment and furniture, fixtures and equipment, and the offsetting accumulated depreciation were removed from the accounting records. A gain of $1 ($2 in 2007) was recognized on the sale of these fully depreciated capital assets.

9. PAYABLES AND ACCRUED LIABILITIES

	2008	2007
Accounts payable and accrued liabilities	$ 4,837	$ 3,751
Client annuity program	13,878	12,531
Community Initiatives and Research Program grants	2,398	2,186
Deposits from self-insured employers	4,995	1,591
Employee vacation entitlements	2,951	2,817
Unearned revenue	182	545
Other payables	1,286	1,305
Sick leave plan (Note 10)	2,965	2,497
	$ 33,492	$ 27,223

10. EMPLOYEE FUTURE BENEFITS

The WCB has two employee benefit plans which provide pension and other future employment benefits to its employees. The cost of these employee benefit plans is recorded as an expense in the period in which employees' services are rendered.

The pension plan, which is funded by employee and employer contributions, is made up of the WCB Retirement Plan and the Supplementary Employee Retirement Plan. The WCB Retirement Plan is a defined benefit pension plan that provides indexed pensions (two-thirds of the Consumer Price Index for Canada) based on years of service and the best five consecutive years average earnings in the last 12 years of employment. The Supplementary Employee Retirement Plan provides that the employees of the WCB whose pension benefits exceed the maximum pension benefit permitted under the federal *Income Tax Act* will receive pension benefits based on their total pensionable earnings.

The WCB also has a defined benefit plan that provides for a payment of sick leave credits to employees that meet established criteria upon termination or retirement. Employees are not required to contribute to this plan.

Total cash payments for employee future benefits for 2008, consisting of cash contributed by the WCB to the funded pension plan and cash payments directly to beneficiaries for the unfunded sick leave plan, were $2.8 million ($2.5 million in 2007).

The WCB measures its accrued benefit obligations and the fair value of plan assets for accounting purposes as at December 31 of each year. The most recent actuarial valuation of the Retirement Plan for funding purposes which was filed with the pension regulators was as at December 31, 2007. The next required valuation for this purpose will be as at December 31, 2010.

Information about the WCB's employee benefit plans for the year is as follows:

	Pension Plan		Sick Leave Plan	
	2008	2007	**2008**	2007
Benefits paid by the plan	$ 3,136	$ 1,499	$ 189	$ 44
Employer contributions	2,631	2,417	189	44
Employee contributions	2,001	1,744	-	-
Employee future benefit expense	3,577	3,059	657	621
Actual return on plan assets	(16.34%)	(1.3%)	-	-

Reconciliation of the benefit plans to amounts included in the financial statements:

	Pension Plan		Sick Leave Plan	
	2008	2007	**2008**	2007
Fair value of plan assets	$ 72,499	$ 84,426	-	-
Accrued benefit obligation	79,068	97,587	$ 3,832	$ 4,406
Plan deficit for accounting purposes	(6,569)	(13,161)	(3,832)	(4,406)
Balance of unamortized losses	10,358	17,896	867	1,909
Accrued benefit asset (liability)	$ 3,789	$ 4,735	$ (2,965)	$ (2,497)

The accrued benefit asset for the pension plan is included in receivables and other. The accrued benefit liability for the sick leave plan is included in payables and accrued liabilities.

The key actuarial assumptions used to value the employee future benefit liabilities for accounting purposes as at December 31 are as follows:

	Pension Plan		Sick Leave Plan	
	2008	2007	**2008**	2007
Discount rate	7.25%	5.50%	7.25%	5.50%
Expected long term rate of return on plan assets	6.75%	6.75%	-	-
Rate of compensation increase	3.75%	3.75%	2.25%	2.25%
Expected average remaining service life (in years)	14	14	14	14

The asset allocation for the pension plan as at December 31 is:

	2008	2007
Equity	59%	61%
Fixed income (including short term)	41%	39%

11. BENEFIT LIABILITIES

Benefit liabilities are determined in accordance with standards established by the Canadian Institute of Actuaries. The actuarial present value of future benefit payments reflects management's long term estimates of economic and actuarial assumptions and methods, which are based upon past experience and modified for current trends. As these assumptions may change over time to reflect underlying conditions, it is possible that such changes could cause a material change in the actuarial present value of the future payments. The fair value for benefit liabilities is not readily determinable.

The key actuarial assumptions used to value the benefit liabilities as at December 31 are as follows:

	2008	2007
Discount rate for non-indexed benefits	6.0%	6.0%
Discount rate for CPI-indexed benefits	3.0%	3.0%
Discount rate for wage-indexed benefits	2.0%	2.0%
Discount rate for healthcare benefits	(0.5%)	2.0%

An analysis of the components of and changes in benefit liabilities is as follows:

	2008						2007
	Short Term Disability	**Long Term Disability**	**Survivor Benefits**	**Healthcare Benefits**	**Rehabilitation Services**	**Total**	**Total**
Balance at beginning of year	$ 130,016	$ 375,671	$ 155,548	$ 146,534	$ 23,912	$ 831,681	$ 789,032
Add: Claim costs incurred							
Current year	115,326	1,843	7,770	49,492	10,367	184,798	171,971
Prior years	(24,240)	57,297	5,971	42,333	(3,032)	78,329	43,520
	91,086	59,140	13,741	91,825	7,335	263,127	215,491
Less: Claim payments made							
Current year	30,619	397	556	19,482	40	51,094	48,506
Prior years	39,618	47,220	15,710	35,002	2,675	140,225	124,336
	70,237	47,617	16,266	54,484	2,715	191,319	172,842
Balance at end of year	$ 150,865	$ 387,194	$ 153,023	$ 183,875	$ 28,532	$ 903,489	$ 831,681

The liability for short term disability claims is an estimate of future wage loss payments for claims that have yet to medically plateau or stabilize. The long term disability liability includes estimated future wage loss payments for those claims that have medically plateaued and stabilized, estimated future pension payments and estimated future cost of claims relating to certain long latent occupational diseases. The liability for survivor benefits is composed of estimated future pension payments and other services provided to survivors of those who have lost their lives as a result of workplace injuries or illnesses. Healthcare liabilities are the estimated future medical costs for existing claims. The liability for rehabilitation services is composed of the estimated cost of future rehabilitation services which are externally supplied to the WCB.

Included in the benefit liabilities balance is $39.4 million ($38.0 million in 2007) for the long latent occupational disease liability and $54.4 million ($53.4 million in 2007) for the future cost of administering existing claims.

12. BENEFIT LIABILITIES FOR SELF-INSURED EMPLOYERS

Note 11 contains a complete description of the components of the benefit liabilities for all employers. An analysis of the portion relating to self-insured employers is as follows:

	2008						2007
	Short Term Disability	**Long Term Disability**	**Survivor Benefits**	**Healthcare Benefits**	**Rehabilitation Services**	**Total**	**Total**
Balance at beginning of year	$ 13,713	$ 44,219	$ 27,878	$ 18,501	$ 2,076	$ 106,387	$ 99,683
Add: Claim costs incurred							
Current year	12,563	780	764	7,151	1,002	22,260	19,864
Prior years	(281)	3,253	2,242	15,126	(631)	19,709	10,403
	12,282	4,033	3,006	22,277	371	41,969	30,267
Less: Claim payments made							
Current year	3,743	85	102	2,137	0	6,067	5,911
Prior years	5,774	4,640	3,719	5,669	130	19,932	17,652
	9,517	4,725	3,821	7,806	130	25,999	23,563
Balance at end of year	$ 16,478	$ 43,527	$ 27,063	$ 32,972	$ 2,317	$ 122,357	$ 106,387

Included in premiums and claim costs for self-insured employers are payments in the amount of $4.2 million ($4.1 million in 2007) made by self-insured employers directly to injured workers on the WCB's behalf. These amounts are reported to the WCB for inclusion in these financial statements.

Included in the benefit liabilities balance is $11.4 million ($11.1 million in 2007) for self-insured employers' share of the long latent occupational disease liability and $6.8 million ($6.2 million in 2007) for the future cost of administering existing claims.

13. PREMIUM REVENUE

	2008	2007
Premiums - Class E employers	$ 203,445	$ 194,059
Assessments - Self-insured employers	26,349	26,034
Increase in deferred assessments (Note 7)	18,093	3,880
Total premium revenue	$ 247,887	$ 223,973

14. OPERATING EXPENSES

	2008	2007
Salaries, employee benefits and training	$ 39,923	$ 37,263
Information technology service fees	1,574	1,898
Occupancy costs	1,978	1,834
Office supplies, services and projects	742	471
Communications	1,240	1,029
Professional fees	981	895
Donations	579	80
Amortization of capital assets	1,913	2,065
Appeal Commission	1,150	1,228
Community Initiatives and Research Program grants	1,000	1,000
Recoveries from the Government of Canada	(867)	(861)
Prevention and other (Note 15)	9,580	9,079
Total operating expenses	$ 59,793	$ 55,981

Of the total operating expenses, $4.3 million ($4.2 million in 2007) was allocated to self-insured employers based on the current year's transaction volumes.

The WCB administers the *Government Employees Compensation Act* program for the Government of Canada. The operation of this program is reflected only to the extent of the recoveries of operating expenses.

15. RELATED PARTY TRANSACTIONS

Pursuant to *The Workplace Safety and Health Act* of Manitoba, the Province may pay the expenses incurred in the administration of that Act out of the consolidated fund and may, subsequently, recover such portion as it may determine from the WCB under *The Workers Compensation Act* of Manitoba. For 2008, the amount charged to operations under this provision was $7.4 million ($6.9 million in 2007).

Also, under Section 84.(1) of *The Workers Compensation Act* of Manitoba, the Province may pay the costs incurred in respect of worker advisors and may recover them from the WCB. For 2008, the amount charged to operations under this provision was $0.9 million ($0.9 million in 2007).

In addition to the legislated obligations referred to above, included in these financial statements are amounts resulting from routine operating transactions conducted at prevailing market prices with various provincial government controlled ministries, agencies and Crown corporations with which the WCB may be considered related. This includes the provision of assistance, in the form of medical opinions and appeal services, for the Province of Manitoba relating to criminal injury claims. The provincial government is also a self-insured employer under *The Workers Compensation Act* of Manitoba. Account balances resulting from these transactions are included in these financial statements and are settled on normal trade terms.

Included in the WCB's investment portfolio as at December 31, 2008, are guaranteed debentures issued by the Province of Manitoba in the amount of $0.8 million ($1.0 million in 2007).

16. COMMITMENTS

The WCB has signed operating leases for office premises expiring at various times until December 31, 2012. The minimum lease obligations over the next five years are:

2009	2010	2011	2012	2013	Total
$549	$369	$62	$10	$0	$990

17. CONTINGENCIES

The WCB is party to various claims and lawsuits related to the normal course of business that are currently being contested. In the opinion of management, the outcome of such claims and lawsuits are not determinable. However, based on the total amount of all such actions, the WCB has concluded that their outcomes, either individually or in aggregate, will not have a material effect on the results of operations or financial position.

18. AUDITOR INDEPENDENCE

Grant Thornton LLP did not provide non-audit services to the WCB in 2008 ($9 in 2007).

19. COMPARATIVE FIGURES

Certain comparative figures have been reclassified to conform to the financial statement presentation adopted in the current year.
